The account of the small taxes likewise it is impossible to make up. It does not seem likely that 802,000*l* will be received from them, and it is very dubious how far some of them can be relied on as permanent sources of revenue. Anyhow they do not greatly affect our fiscal position, On the face of the figures, however, our position is not very unpromising. If the Chinese war had continued, we should indeed have been in considerable financial difficulties. Last year Mr Gladstone used for the supply of the Exchequer parts of the national capital which he will not have at his disposal again. He derived from

	£
Malt and hop credits	1,400,000
Reduction of balances in the Exchequer	1,286,000
	2,686,900

And if we had to meet the same expenditure as last year, without the aid of these temporary and supplemental resources, we should certainly feel considerable anxiety. Happily, however, this is not so. The Chinese war is over, and we have moreover the indemnity to speculate upon, though when it may be received is not so extremely certain.

On the whole, we are persuaded of two conclusions. First, and this is at this moment the most important, that there is no likelihood of any measure this year which can affect the money market. Mr Gladstone last year made use of what we ventured to call a *rhetorical* deficit. In his great oration he reckoned as terminated many taxes—the income tax among the rest—which were terminated in theory and in law, but which in practice Parliament was quite ready to renew, and which every one knew would be renewed,—and in this manner he without difficulty showed a deficiency of many millions. The shadow of this deficit has haunted finance ever since. Many people were alarmed, and are so still, not from anything Mr Gladstone really did, but because he *said* he was going to take off 2,000,000 of taxes in the face of a deficiency of 9,000,000*l* and more. There is no occasion, however, for such alarm. The real changes of last year were those above stated, and a glance at their comparative scantiness is enough to assure us that *their* consequences will never disorder the money market.

Secondly, we believe approaching revelations will show that Mr. Gladstone's Budget neither deserved the extravagant eulogiums of sanguine adherents, nor the yet more extravagant invectives of angry alarmists. It has not produced a millennium; it has not destroyed our indirect revenue. It was simply an accumulation of many changes, all of which were beneficial in themselves, but which, notwithstanding, most financiers would have diffused over a series of years, in preference to concentrating all of them into a single year. At the critical moment, however, the general public rapturously approved that concentration. We warned them that a high income tax was the inevitable consequence; and they must be prepared to pay whatever direct taxation the public necessities may demand, though it is evident that cannot be very different from that which they have been paying during the year that is now come to an end. We add from a parliamentary return the proceeds of the penny taxes, and of the taxes on bills of lading and dock warrants, between 16th May and 31st December last year :—

	£	s	d
One penny on goods in packages or parcels ... One penny on goods in bulk, by weight ... One penny on goods in bulk, by measure ... One penny on goods in bulk, by number ... One penny on animals ... (According to the units of entry fixed by the Lords of the Treasury and the Commissioners of Customs)	82,868	3	1
Eighteen pence on shipping bills and bills of lading...	30,254	5	0
	113,122	8	1

Custom House, March 5, 1861. W. W. TAYLOR, Examiner.

Return of the total amount of duty received for the sale of dock warrant stamps, from the 3d April to the 31st day of December, 1860, inclusive, under the Act 23 Vict., c. 15, passed in the last session of Parliament.

	£	s	d
Amount of duty received for dock warrant stamps, sold at 3d each, from the 3d of April to the 31st December, 1860	8,595	8	9

Inland Revenue Office, March 5, 1861.

THE IRISH AND ENGLISH CONVICT SYSTEM.

CAPTAIN CROFTON AND SIR JOSHUA JEBB.

IT is high time that the Irish system of treating convicts should be applied in England. In the one country the penal convict discipline is in every respect a conspicuous success; in the other it is in every respect a conspicuous failure. Week after week we have fresh proof that the convicts in our working prisons in England are subjected to influences which can only end in deepening the criminal taint in them;—that penal discipline, so far from being permanently deterrent, does not even deter during the lapse of the sentence itself from the most lawless and violent combinations. And yet, while our papers are filled with the convicts' alarming attempts to organise a rebellion at Chatham, and with Sir Joshua Jebb's futile appeals to the criminals to be grateful for the undeserved leniency with which they are treated and the gratuities they receive,—all this time a system is in active operation in Ireland which has progressively reduced the numbers of the convicts for the last five years, which has reclaimed, as far as the most careful scrutiny can judge, a very large proportion of those submitted to it, and which is in fact emptying the Convict Prisons in Ireland, while our's are very nearly as full as ever, and certainly filled since the abolition of Transportation by a more hopeless, a more professionally criminal class. In England the proportion of reconvictions of criminals who have before passed through the convict prisons to the total convictions is enormous. In Ireland it is decreasing yearly and rapidly. In England, of those who have been discharged on ticket-of-leave, it has been shown that probably near 90 per

cent. are reconvicted, and therefore in no wise benefited by their treatment. In Ireland, of those discharged on licence during five years, only 7 per cent. have had their licences revoked before their natural expiration, and certainly not so many as 20 per cent. in all return to prison either then or afterwards. There has thus been a fair trial of Captain Crofton's system and a fair victory over that of Sir Joshua Jebb. And we must once more urge that it is little to English credit, from any motives of false delicacy, to delay the application of a remedy in England which has been so powerful in Ireland to check a still more virulent evil. The military method of herding these offenders in gangs, and treating them with little or no regard to their individual cases, has been tried; and the individualising method of breaking up as much as possible all the associations of, and motives to, crime, and studying the individual case, has also been tried; and with this result—that in Ireland, after the first four or five years' discipline, criminals once thought hardened offenders of the deepest criminal dye, are employed, without any restraint and without any breach of discipline, in open country work under warders, or rather leaders, who have no more force at their disposal than the foreman of a building firm;—while in England we are beginning to look upon Chatham and the other prisons where convicts' labour is turned to account, with the same kind of dread with which the quarters of the Sepoy regiments were regarded in India during the autumn of 1857.

With such a comparative result it is difficult beyond measure to understand why Colonel Jebb is permitted to go floundering on his own much-loved but perilous way, when at every step we are warned that it is the wrong way. While the matter was one of theory, it was right that both methods should be tried. Perhaps Captain Crofton's views might have been open to the charge of being too sanguine and too lenient—of treating crime with less than the proper amount of distrust, displeasure, and indignation. Perhaps some people may have thought that Colonel Jebb's more military view of penal discipline was the wiser. All these questions are open to discussion as matter of theory: but experience should supersede theory. After all, it does not much matter whether the result has been attained by severity or by indulgence, or by the combination of both, so long as it *has* been attained. The steps by which criminals are in fact reclaimed must be better than the steps by which they are led to league together against their warders and the authorities. The discipline which empties prisons must be better than that which fills them and excites the prisoners to revolt. The discipline which induces the people of Dublin to prefer discharged convicts to ordinary workmen, must be better than the discipline which leaves the London ticket-of-leave man a greater terror to honest people than it found him.

The Irish system has succeeded by thoroughly interesting the criminal himself in his own reformation, by stirring up higher interests within him, and aiding him in the attainment of knowledge and habits of work which render him sure of supporting himself comfortably without crime. At every stage in the process to which he is subjected some fresh and individual stimulus to exertion is given him; at every fresh stage he is more and more definitely individualised, that is, taught that his rank in the prison has been determined by his own conduct,—thrown on his own responsibility for improving it,—helped to develop his own faculties,—and, in a word, prepared for living in the world with a full knowledge of the temptations that beset him most easily and of the best safeguards against them. Gradually and almost imperceptibly the ties of restraint are withdrawn;—first he becomes conscious of a certain degree of freedom within narrow limits; then this is enlarged; at last, when the licence is granted, freedom becomes the rule, and the limits to it are almost invisible checks and motives against relapse,—and so at last, as the sentence expires, even this slight control is removed. The English system, on the other hand, has failed because this individualising system has not been adopted. The men are superintended in gangs,—with no more intelligent guides, leaders, and instructors than that of the coarse old soldiers who act as their warders. The prison schoolmasters, we are told, are sometimes taught by the better educated convicts, but seldom does a convict learn to read and write from a schoolmaster. The men are massed in working regiments, with no attempt to scatter the forces of crime by distributing thoughtful and educated teachers and leaders amongst them to lighten the leaden atmosphere. There is no attempt to reintroduce them gradually into the world, so that each man has tested his own powers in honest work before he is released. He works every hour of every day between men whose lives and experience have been as narrow and criminal as his own. He is paid even too handsomely if he behaves well, for his good behaviour; but his good behaviour only consists in obeying mechanical rules. The company in which he lives is as tainted,—more tainted than before his confinement. If there are a few strong sturdy rebels, they leaven the whole compact mass; and there is no hope of any distinct centres of opposing sentiment in favour of order and obedience. In fact, the regimental system pursued in the English prisons is wholly unfavourable to the development of individual character or courage among the convicts, and seems almost planned expressely to diffuse any infectious impulse to guilt that the worst among them may originate. Whereas the Irish system strives at every point to develop each man's nature, so that there may be as many non-conductors of criminal impulse as there are distinct individual characters,—the English system seems to strive to fuse the whole mass still more closely together, so that a spark anywhere may spread at once into a flame.

Captain Crofton, then, has succeeded beyond our most sanguine hopes. Colonel Jebb has failed beyond our worst fears. Are we to wait till Colonel Jebb retires from the stage, and till we have perhaps heard of more than one fusillade having been directed against these poor mutinous wretches at Chatham, before we are to reap in England any of the rich fruits of our Irish experience?

THE TRADE TABLES FOR FEBRUARY AND THE IMPORTS FOR 1860.

The trade of the country is just now suffering from great depression. The value of our exports for February shows an even greater falling off as compared with last year than did the exports for January; and in the two months they are less by 3,370,000*l*, or about 17 per cent. than in the same two months of last year. The figures are these:—

February.			Two months ending 28th February.		
1859.	1860.	1861.	1859.	1860.	1861.
£	£	£	£	£	£
9,614,143 ...	10,721,940 ...	8,373,718	19,207,566 ...	20,088,437 ...	16,718,419

The falling off is in beer and ale, cottons, linens, and worsteds, besides iron and the metals. The largest items of decrease are as follows:—

Decrease in first Two Months of 1861 as compared with the same months 1860.

	£
Beer and Ale	232,000
Cotton (manufactures)	734,000
— (yarns)	556,000
Linen (cloths)	171,000
— (yarns)	98,000
Iron (bolt and bar)	101,000
Tin (plates)	133,000
Worsted (stuffs)	182,000
Worsted and worsted yarns	123,000

And, besides these, the diminution in haberdashery, in hardware, and in copper has been large. Of course the falling off in the exports to the United States is exceedingly marked, and exceeds a million sterling, which is at the rate of six millions in the year; and when we come to consider that the insane American tariff which is now in force could not have affected our exports for January and February, we may well fear that our trade with the United States will suffer quite as marked a collapse as in the year after the crisis of 1857. At that time our exports to British India were increasing with rapid strides, and made up in great measure for the failure of the American market. Now, however, both countries are reducing their consumption of English goods largely at the same moment, and hence the marked effect upon trade.

With regard to the imports, there seems to be no great decline, but the imports of wool and cotton are diminished materially. The following are the quantities of the chief raw materials of manufactures imported during the month, as compared with last February:—

		February.		
		1860.		1861.
Cotton	cwts	1,376,504	.....	1,000,468
Flax		66,240	.....	39,199
Hemp		14,518	.....	8,618
Jute, &c.		43,431	.....	51,953
Wool	lbs	5,607,268	.....	4,364,766

The following shows the same comparison for the principal articles of food and drink :—

	Entered for Consumption. February. 1860.	1861.	Entered for Consumption. February. 1860.	1861.
Cocoa .....lbs	753,685	113,029	310,530	285,096
Coffee	4,704,163	4,187,681	3,078,424	2,889,337
Wheat .....qrs	53,087	714,967	53,087	714,967
Barley, oats, peas, beans, Indian corn	207,081	494,557	207,081	494,557
Wheatmeal and flour .....cwts	125,446	690,511	125,446	690,511
Sugar, unrefined	556,275	627,850	606,882	669,673
Tea .....lbs	11,104,457	12,175,188	5,582,106	5,826,610
Wine .....gallons	700,871	830,785	161,924	969,284

It is remarkable that of the wine by far the largest quantity is not of the lightest class, or entered at the lowest duty. The table is as follows :—

	Duty. s d	Entered for Home Consumption. February. 1861. gallons.	Two Months. 1861. gallons.
Under 18 degrees	1 0	97,590	247,902
— 26 —	1 9	24,109	69,788
— 40 —	2 5	751,251	1,956,816
— 45 —	2 11	19,406	61,338
— 40 (in bottle)	2 5	76,392	166,381
Wines unclassed at old duty		536	1,112
		969,284	2,503,337

by which it appears that more than 2,000,000*l* gallons, out of 2,500,000, are entered at the 40 degree duty, that is, the highest except one.

We have for the first time in these tables the *classified* values of the imports from different countries during the year 1860. From this it appears that we imported as follows in the year ending Dec. 31 :—

	1858. £	1859. £	1860. £
From foreign countries	125,970,332	139,708,200	167,658,188
From British possessions	38,613,500	39,474,155	42,990,455
Total	164,583,832	179,182,355	210,648,743

in other words, more than 30,000,000*l* more than in 1859, and more than 20,000,000*l* more than in the year of largest previous imports, 1857. The imports from France have increased considerably in 1860, and may be expected to increase still more in 1861. They were :—

France. 1858. £	1859. £	1860. £
13,271,890	16,870,858	17,704,183

The increase in our imports from the United States is enormous,—a consequence, of course, of the bad harvest :—

United States of America (Atlantic Ports). 1858. £	1859. £	1860. £
34,243,915	34,265,237	44,724,624

THE INDIAN PAPER CURRENCY.

The following is the Report of the Select Committee on the Bill to Provide for a Government Paper Currency in India:—

To the Hon. the Legislative Council of India.

The Select Committee appointed to consider the Bill to provide for a Government paper currency have the honour to report that they have received a despatch from the Secretary of State for India, dated the 26th of March, 1860. They have gone carefully through the Bill, and have made certain amendments therein, which are contained in a copy of the Bill annexed to the report. [From the Secretary to the Government of Bombay, dated the 20th of August, 1860, and inclosures].

In order to explain the nature and object of the more important amendments it is necessary to refer briefly to the circumstances which have occurred since the Bill was read a first time and printed. It then embodied, in the form originally proposed by Mr Wilson, the scheme of that lamented statesman for the establishment of a great and novel system of paper currency throughout India. The leading features of that scheme consisted in the issue at various circles into which India was to be divided, and through the agency of an independent body of Commissioners, of a paper circulation of notes from 5r to 1,000r, based on a reserve partly of specie and partly of securities in a proportion which might fluctuate from time to time, but was in no case to fall below that of one-third of specie to two-thirds of securities. This scheme, which was fully explained by Mr Wilson in a most able and minute speech gave rise to many comments, but his untimely death makes it impossible to know how far he might have been disposed to modify it; and the Bill was read a first and second time with a distinct understanding on the part of the members of the Legislative Council that they were not to be considered as committed to its detailed provisions. In the meantime a despatch was received from the Secretary for State objecting to the principle on which the Bill was founded, of issuing notes against a fluctuating reserve of securities, and stating the opinion of the Home Government that the principle ought be the same as that adopted in England, of permitting issues of paper only against actual coin or bullion, with the exception of a certain limited amount, to be defined by law, below which it might reasonably be supposed that the paper circulation could never fall. Your Committee concur with Sir Charles Wood in thinking this principle safer and more applicable to the circumstances of India. It is the principle sanctioned by experience, and by a great preponderance of authority in England, and it presents the great advantage of securing a paper currency absolutely identical, beyond a certain safe limit, with the metallic currency which it displaces, and free from those risks which, under the most able management, must attend an extensive issue by the Government of promissory notes, based on a large proportion of securities which, in times of difficulty, might be almost inconvertible. It is an advantage also that, under this plan, the temptation will be diminished for the Government to force the circulation of notes further than the country is prepared for them, and that the necessity will be removed for frequent interference of the State with the money market by the purchase amd sale of securities. Your Committee have accordingly amended the Bill by striking out the 10th and 11th sections, and introducing a clause, declaring that all issues of notes shall be made against actual coin or bullion, with the exception of an amount, in no case to exceed four crores of rupees, which may be issued against securities. They have fixed on the sum of four crores as the *maximum* limit, because this is very nearly the amount which may be issued in excess of actual specie by the present banks under their existing charters.

The Banks of Bengal, Madras, and Bombay are authorised to issue, in the aggregate, notes to the amount of five crores of rupees, with a reserve of one-fourth of their total liabilities in specie, to meet their notes and other demands; and your Committee have thought it right that the mercantile community should have an assurance that the present amount of authorised issue should not be curtailed, as might practically be the case if a lower limit than four crores were adopted. Within this limit also we think that the Government, whose general credit and cash balances are, by the words which we have introduced, made distinctly responsible as well as the special reserve, may be safely trusted so to regulate their issues as not to endanger the payment of their notes, for which purpose it will be essential that they should not at first exercise the full power of issuing up to the four crores against securities, but should proceed with great caution, feeling their way gradually, and always maintaining an ample reserve of specie. Beyond the limit of four crores no issue whatever will be permitted, except against actual coin or bullion in the vaults of the Mint or local treasuries, unless the Legislative Council should hereafter see fit, after experience of the working of the law now proposed, and full discussion and consideration, to pass a further law on the subject. This fundamental change in the principle of the issue of the notes makes several changes necessary in the machinery of the Bill.

When the function of the commissioners is reduced to the simple one of giving notes for specie or specie for notes, it is obviously unnecessary to provide for an expensive staff, or to make them independent of the Government. The Masters of the Mint may probably be the commissioners at the Presidency towns, and the ordinary collectors may act as deputy-commissioners at other places. In certain cases it may be advantageous to use the agency of banks, especially at the Presidency towns, or at large places of commerce, where branches may be established. Such an agency would in no respect alter the character of the issue, which would remain that of the Government, who would retain the exclusive possession of the reserves against which the notes were issued, but the banks would simply act as agents for the purpose of greater economy and convenience in paying or issuing Government notes to the general public. Accordingly, instead of the section obliging the Governor-General in Council, by a certain day, to divide all India into circles, and to appoint deputy-commissioners in each, we have substituted sections giving a discretionary power, except as regards the Presidency towns, which are to be the centres of separate circles, of appointing from time to time such circles as may be found expedient, and of making such arrangements with Government offices, banks, or other persons, as may be necessary to facilitate the issue and payment of notes. As regards the circles, we are disposed to leave much discretion to the Government in exercising the power of creating them, as experience only can show to what extent it may be necessary to resort to it.

It is clearly impossible to make notes issued at one place payable everywhere, as this would entail the necessity of keeping a reserve adequate to the whole circulation at each point, and it is difficult to enact that notes shall be a legal tender at an extreme distance from any place where cash can be legally demanded for them. Hence has arisen the necessity for circles; but it cannot be denied that the division of India into separate circles would be in many respects an evil, and that it would be very desirable that a uniform circulation should be established over as wide an area as possible.

We are not without hopes that, under the arrangements contemplated, this may be to a considerable extent attained; and that, as confidence is extended, Presidency notes, if received at the Government Treasuries, may, with the aid possibly of an auxiliary gold currency, become practically such a general medium of exchange throughout India as to supersede in a great measure the necessity for local notes.

With reference to the question of gold, we have introduced an

important amendment. Without attempting to discuss the questions which have been raised respecting a double standard, or to depart in any respect from the principle of a sole silver standard, we have thought it would be a considerable advantage to provide for the possible application in India of the principle as regards gold that is applied in England in regard to silver. In England, where gold is the sole standard, the Bank of England are authorised to issue not exceeding one-fourth of their gold coin and bullion against silver. We have given a power of issuing up to one-fourth part of that portion of the circulation of India which is represented by actual coin or bullion against gold coin or bullion, at a rate to be fixed by the Government from time to time, and not altered without six months' notice. With ordinary prudence the Government cannot lose by taking a limited amount of gold at a price to be fixed by itself, while it may be a great convenience to commerce in many cases to know that gold can be made available as money at a certain fixed rate. Nor is it impossible that, if a certain fixed *minimum* value be thus given to gold, and it can be taken freely at the Government Treasuries at this rate, the superior convenience of gold and its adaptation to native wants may give it a higher value, and thus, in course of time, a considerable auxiliary gold currency may be introduced. Should these expectations not be realised, no harm will have been done, and the clause will simply remain a dead letter, showing that, with a sound paper circulation superadded to silver, nothing more is wanted.

Your Committee have anxiously considered another point, namely, what should be the lowest denomination of notes which should be issued as a legal tender? The disadvantage of issuing two sorts of notes, one of which should be a legal tender, and the other not, seemed to be such that it was desirable to make all the notes uniform in this respect. This being so, your Committee have thought that, on the whole, it would be more prudent not to authorise at present a lower denomination of notes than for 20 rupees. With a circulation of 5 and 10 rupee notes, it appeared to several members of your Committee that there would be considerable risk of exciting suspicion and discontent among the mass of the community, who might be compelled to take payments in an unaccustomed medium, for which they could not readily obtain change without loss.

If, under the proposed provisions as to gold, that metal should come into general circulation, the use of small notes would be in a great measure superseded by a medium which, from its intrinsic value and power of uniform circulation, must be admitted to possess some important advantages over any form of small note currency. If, on the other hand, those apprehensions should be groundless, and after a short time, when the public are familiarised with the larger notes, a spontaneous demand should arise for notes of a smaller denomination, it will be easy to introduce a Bill extending the limit below 20 rupees. The other amendments are merely matters of detail, which will be seen by reference to the Bill.

Your Committee have been unanimous in adopting the amendment now submitted to the Legislative Council, and they trust the Bill, as it now stands, will be found to embody a safe and practical scheme for extending to India the benefits of a circulating medium better adapted for her wants and for the rapid expansion of her trade and industry than that which she at present possesses, of a purely metallic silver currency. The last two sections of the Bill have been omitted, because the Penal Code seems to contain similar enactments.

THE NEW RULES AS TO THE TRANSFER OF STOCK.

THE following clauses in the Act that has just received the Royal assent, to regulate the Bank of England payments, and to "increase the facilities for the transfer of Stocks and Annuities," will be interesting to our readers:—

§7. And whereas the said Governor and Company have heretofore closed the books for transfer of the various capital stocks and annuities created by Parliament transferable at the Bank of England, forming part of the unredeemed public debt, for a certain number of days prior to the days fixed for the payment of the half-yearly dividend thereon respectively, in order to their convenience in calculating the dividends due to the several proprietors thereof, and preparing the warrants for the same, and during the period of such closing no transfers have been permitted, except under circumstances of special necessity, and such transfers have been attended with great inconvenience, by reason of the stock so transferred carrying the right to the current half-year's dividend: and whereas it is desirable to increase the facilities for the transfer of such stocks: be it enacted, that it shall be lawful for the said Governor and Company to close the books for the transfer of the said several stocks and annuities respectively on any day in the month preceding that in which the dividends thereon respectively shall by law be payable; and the person or persons who on the day of the closing of such books was or were inscribed as the proprietor or proprietors of any share or shares of and in such stocks and annuities respectively shall, as between him, her, or them, and the transferee or transferees thereof, be the person or persons entitled to the then current half-year's dividend thereon; and the person or persons to whom any transfer shall be made after the day of the closing of such books shall not be entitled to the then current half-year's dividend on such stock, but shall take and accept the same exclusive of the right to the said half-yearly dividend; provided that the period for which such books of transfer shall be closed shall not exceed fifteen days.

§10. And whereas the said Governor and Company have also heretofore closed, in the manner and for the purposes herein-before mentioned, the books for transfer of certain stocks created by the Secretary of State in Council of India, under the authority of certain Acts of Parliament empowering him in that behalf, and it is desirable that the provisions herein-before contained shall extend to the said last-mentioned stocks likewise: be it enacted, that it shall be lawful for the said Governor and Company in like manner to close the books for the transfer of the said stocks so created by the Secretary of State in Council for India as aforesaid respectively, on any day in the month preceding that in which the dividends thereon respectively shall by law be due, and thereupon the rights of the transferor or transferee respectively to such dividends shall be the same as is herein-before provided respecting the transferor and transferee of dividends of other capital stocks transferable at the Bank of England in the like case; provided that the period for which such books of transfer shall be closed shall not exceed fifteen days.

Agriculture.

DRAINAGE OUTFALLS AND ARTERIAL DRAINAGE.

THE Committee of Landowners, which some time ago was formed at a meeting to consider the question of obtaining a general Act for draining the low-lying tracts so difficult to drain under the existing state of the law, is understood to have induced the Government to take up the subject and to introduce a measure for the purpose. Whether such a measure is still in embryo, or whether the draft of a bill for the purpose sleeps in the Home Office, we know not, but either way the matter ought not to be forgotten. It ought to be introduced and passed during the present session, for every year makes some general plan for relieving the low lands more and more urgent. The increased drainage of the higher lands, where the owners are not much dependent on their neighbours for sufficient outfalls, has already thrown the water falling during heavy rains so rapidly on the low districts that floods have been more frequent and more mischievous than formerly; and the extensive drainage works which have been undertaken during the past winter, in consequence of the fearful wetness of the previous year, will add still more to the hazard of low-lying districts in future wet seasons.

In a tract before us entitled "A Plea for an Arterial Drainage Embankment and Improvement Act," by Mr G. A. Dean, a well-known agricultural engineer and surveyor, the author gives an instance of the operation of this cause of injury to low lands. "Formerly," says Mr Dean, "when land-drainage operations were scarcely thought of by landowners or farmers cultivating high lands, it took a considerable time before the surplus rainfalls descended into the low grounds, whereas now there are so many thousands of acres surface-drained and numerous improved outfalls into ditches, these surplus rainfalls descend much more rapidly into the low grounds, where, from want of sufficient main drains and outfalls, they accumulate, and floods ensue. Previously to the drainage of some high grounds at Merton, Maldon, and Sutton, in Surrey, it required *not less than three-fourths of an inch* of rainfall to flood the valley of the Beverley Brook, now half an inch will flood it." He also mentions that mills on rivers often form great impediments to effectual drainage. Indeed, Mr Dean does good service to the cause of agricultural improvement by the clear and full manner he deals with the subject of arterial drainage. Tracing rapidly the early history of the great drainage works of Romney Marsh and of the Great Level of the Fens, he points out not only what is to be done in future works of a similar or analogous kind, but also many past errors to be avoided. Romney, which contains 24,000 acres, is the oldest drainage work in this country, originally commenced it is believed by the Romans. So the regulations by which such districts are governed have been founded for the most part on "certain laws of sewers that were made by Henry Bathe (a Justice and Commissioner for that purpose) in the time of Henry III.," which have become a pattern and exemplar to all like places of the whole realm."

The early history of the Fen is also somewhat obscure, but in 1478, Morton, Bishop of Ely, commenced the great forty-feet cut from Peterborough to Guyhirn, still known as "Morton's Seam." Successive Earls of Bedford with their co-adventurers, acting under various Acts of Parliament extending from the time of Charles I., and continued under successive Governments down to modern times, became the chief agents in the improvements of the Great Level of the Fens. In these improvements vast sums appear to have been needlessly expended, and a most burdensome and

unequal pressure of taxation upon all the owners of Fen lands has been the result. This has inevitably produced enormous litigation, while successive engineers of eminence have been employed to rectify, as far as might be, the original errors of construction. Vermuyden, who was a co-adventurer with Francis, Earl of Bedford, and the engineer of the works, made the fundamental mistake of cutting new channels through a spongy soil instead of availing himself of the natural rivers, and in neglecting the outfalls to the sea.

It would seem, however, that he was not free from difficulties, there always having been conflicting interests between those who desired simply to free the land from water, and those interested in the navigation. After referring in some detail to such taxation, litigation, and dissensions, Mr Dean says: "The jealousy and dissensions between those concerned in carrying on the navigation through the Great Level, and those whose immediate object was the work of drainage, has never ceased, but remains as great as ever. Much of this jealousy and these dissensions have been occasioned by the improper system of drainage carried out by Sir C. Vermuyden, and his errors should be avoided in all such operations for the future. The errors originated in a great neglect of the outfalls to sea, for the improvement of which no plan whatever was carried into execution. The Great Level was an extensive plain, through which four natural rivers had regular and continued currents; viz., the Wellam, the Nene, the Ouse, and the Grant, each of these rivers effecting a junction with tributary streams. The obvious course was to scour out, widen, deepen, and straighten these rivers and adjoining streams, and embank them. Having thus improved the interior drainage by natural means, he ought to have turned his attention to widening or compressing the line of rivers out of the Level in their course to the outfall; and further relief might have been afforded by making a receptacle at the base of high grounds in the nature of a catch-water drain for the upland waters at the time of pressure, as afterwards recommended by the late Mr Rennie. Instead, however, of pursuing plans so evidently beneficial, he completely altered the face of the Level by abandoning in many cases the natural rivers, and in cutting straight drains through porous soils, which for want of a continual current soon closed up again; and as one error occasioned another, sluices were erected and unnecessary works executed at an expense much beyond what would have been required had the system been confined to a natural instead of an artificial plan of drainage. Nature should never be abandoned for art, but art should be called in as an aid to nature .....But for the improper system originally pursued, the efficient drainage of the level of the Fens is a work that any well-qualified engineer of the day could easily effect." The shutting out the tide from the Witham above Boston was a main error of Vermuyden's: "had it been allowed to enter, that river would have been in a far better condition than it is at present."

Amongst the eminent engineers employed on the level of the Fens during the present century are the following:—Rennie in 1800, 1809, 1814, 1836, and 1840; Telford in 1821; Telford and Sir John Rennie in 1822; Chapman in 1826; Walker in 1833, 1842, and 1847; Sir W. Cubitt in 1842; R. Stephenson in 1847; Rendell in 1849; Fowler in 1857 and 1858; R. Stephenson and Bidder in 1858; and Page in 1860. Truly may it be said that the Fens are a source of fertile employment to engineers.

We shall defer to a future occasion some notice of the various facilities afforded to landowners for obtaining money for works of improvement which the author mentions, and pass on to his suggestions which "should be embodied in any Act granted for the purpose of effecting the perfect drainage of the United Kingdom, for reclaiming waste lands, and for improving those under cultivation." A clear definition of the words drainage, outfalls, embankment, warping, irrigation, and catch-water drains. Power to make outfalls; to erect steam engines; to purchase water-mills, where obstructions to drainage; to construct reservoirs for holding water for irrigation purposes, and for supplying towns and villages with water; to remove dams, weirs, and other obstructions in rivers; to authorise one or more owners to execute works of drainage, embanking, irrigation, and warping; to construct catch-water drains, to carry off drainage water, and to prevent such waters entering navigable streams where the entrance would be injurious to navigation by the overflow of banks or otherwise. Here we have a tolerably comprehensive list of objects, and there can be no doubt that some general Act to enable such works to be completed, with or without the consent of unimproving proprietors whose lands may interfere with such improvements, would be highly beneficial alike to the landowners and to the community. The execution of the Act to be intrusted to the Inclosure Commissioners, in conjunction with the County Court Judges. He also suggests that powers might be given to set out districts capable of being benefited by arterial drainage, and to charge lands included with the cost of works executed, and with power to levy rates upon such district lands. Also to cut outfall drains through adjoining properties, with compensation for injury thereby caused, the authority to be given by the County Court Judge; who should also settle the compensation. The deepening, cleansing, and straightening rivers, or to divert them, and to take down or alter bridges. A majority of the landowners of a district to be drained to bind a minority. We shall return to this work and subject as being at this time of great importance.

AN ESSEX FARMER.

Recent obituaries record the death of one of the most remarkable farmers in Essex, Mr William Hutley, of Power's Hall, Witham, in the 65th year of his age. Mr Hutley was not ranked as a go-a-head agriculturist, and he always delighted to be designated as a "practical" farmer, rather in contradistinction to those whom he considered as would-be "new lights" in the rural world. He was, however, eminently a good farmer, and few have cultivated heavy land with more complete success. And with some affectation of despising novelties in husbandry, he readily availed himself of modern facilities, as for instance the steam-engine, of which he made good use. So at the local agricultural meetings nobody more boldly and frankly asserted the rights and advocated the interests of tenant-farmers. He himself always refused to rent a farm unless he could obtain complete control over the game, and a consequent exemption from the vexatious interference of gamekeepers; and he ever advised his brother farmers never to consent to reservations of game. So he was the advocate of well-paid labour on the farm. In his racy way, he told the Witham Farmer's Club that he had tried labourers at 20 pence and 2s a day, but they were of no use to him, and that "he never got on well except with half-crowners."

He was remarkable for careful and complete tillage of his land. Always forward with his work, he never put in the seed till the land was in a perfect state of preparation, resorting to a long fallow rather than sow when the soil was not in good order. A friend who was one Sunday walking with Mr Wm. Hutley and his brother—who farmed close by and was a sort of farming rival—over the farm of the former during the spring, when coming to a large field of beans, which, like all his crops, was a model of cleanliness, Mr W. Hutley laughingly said to his brother he would give him a penny for every weed he could find in that field, and the challenge was not accepted. As a feeder of stock, cattle and pigs in particular, Mr Hutley was not excelled by any farmer in Essex.

COMMERCIAL LITERATURE.

The London Dock Companies. Richardson and Co.
The Proposed Northfleet Docks. By J. L. Tabberner. Effingham Wilson.

The first of the above pamphlets examines in detail the present unfavourable position of the London and St Katharine's Dock Companies, and in a minor degree of the East and West India, the earnings of the two having especially declined during the last few years. This result is ascribed to the rivalry of the Victoria Docks, which, by offering to take business at lower rates, have compelled corresponding reductions on the part of the older companies. The author, however, is only partly correct in this view, since it has not merely been competition from the Victoria Docks that has been experienced, but also from the owners of private wharfs, a circumstance which is only casually alluded to. In comparing the dividends of various companies, the author is also apparently ignorant that the Victoria Docks receive a fixed sum from the lessees, Messrs Peto and Co., and that the 5½ per cent. at present declared on the stock would be equally paid whether the docks were full or empty. In order to restore these companies to a more prosperous footing, a policy of combination is advocated.

Mr Tabberner's pamphlet reminds us of the passage in Mr Gladstone's budget last year, where he contended that a period of fiscal difficulty was eminently favourable for commercial changes and reforms. Nothing daunted by the declining dividends of other dock companies, Mr Tabberner puts forth a series of arguments, based partly upon the increasing trade of the port of London, to show the necessity of providing improved dock accommodation, and the superiority of Northfleet as its intended site. The distinctions between the old docks and the proposed undertaking at Northfleet are pointed out at length, and it is urged that with regard to profits an analogy cannot properly be drawn between the two. His views are thus far supported by the circumstance that the more recently established Victoria Docks, which in many particulars resemble the Northfleet project more than the older companies, are making greater progress than any of their rivals. It is, however, in connection with the railway system of the country that Mr Tabberner looks for the chief success of his undertaking.

Remarks on the Anticipated Cotton Crisis. By An Ex-Indian Cotton Collector. Effingham Wilson.

The object of this work it is not easy to discover. According to the author, our railways in India will, as far as cotton is concerned, prove of no value whatever, while our efforts at canalisation have been also useless, although, if properly directed, they may prove of immense importance. If we neglect the last point, we are promised a formidable competition from Indian manufactories, which will perhaps serve "to clear the atmosphere of Manchester of smoke, and to restore to their pristine picturesque beauty the banks of the Irk and the Irwell." Even by the author's own showing, however,

the development of the coal-fields of Nerbudda seems in any case to threaten the latter event, the possibility of which has long been the subject of speculation. The style of the pamphlet is not free from the fault of Indian journalism,—no small amount of abuse being lavished upon the Manchester interest and Government in general, and the Department of Public Works in particular.

GENERAL LITERATURE.

NEW ZEALAND, THE BRITAIN OF THE SOUTH. With a Chapter on the Native War, and our Future Native Policy. By CHARLES HURSTHOUSE, a New Zealand Colonist, and a Visitor to the United States, the Canadas, the Cape Colony, and Australia. Second Edition. London: Edward Stanford, 6 Charing cross. 1861.

THE NEW ZEALAND WAR OF 1860: An Inquiry into its Origin and Justice, together with some Remarks on the Land Question, in relation to the Natives. Copied, with Additions, from the "Colonial Intelligencer," the Organ of the Aborigines' Protection Society. W. Tweedie, 337 Strand.

IN this new edition of Mr Hursthouse's useful guide to intending emigrants, he has brought up the information to the present time in statistics and political geography, and has added a long chapter on the native war, with an Appendix containing much valuable information relating to it. The tone in which his narrative of events is written, both here and in the "Historical Sketch" which opens the work, is so bitter against the political course taken by the missionaries and their friends in office, throughout the whole history of the colony, that we fear many readers will be too much repelled by it to study carefully the remarkable and instructive series of facts which he has here presented. Unhappily, Christian nations have so often played wolf and lamb with uncivilised aborigines, that we cannot wonder that many benevolent persons conclude almost as a matter of course (while in total ignorance of the facts) that the present Maori war is but another illustration of the old fable,—a prepossession which is strengthened in many quarters by the fact that the clerical party in New Zealand incline to the Maori side. But the facts, apart from Mr Hursthouse's method of presenting them, show most clearly that the clerical party are not only mistaken in the present case, but have been disastrously mistaken, over and over again, in New Zealand affairs. As this volume is not likely to be widely purchased except by intending emigrants, and as Mr Hursthouse's account of the early troubles at New Plymouth is extremely important in its bearing on the present state of things, we will briefly condense his history of that settlement, from his 2nd and 19th chapters, and the appendix to the latter. We do not, of course, assume to decide *ex cathedrâ* upon our author's accuracy, but judging from the fulness and clearness of his narrative, and the extracts from New Zealand documents by which it is supported, we certainly think that the burden of disproof lies with the opposite party.

Wiremu Kingi, alias William King, is one of the chiefs of the Ngatiawa tribe. These people originally dwelt in the district watered by the rivers Waitara and Waiongona, and their two chief strongholds were Pukerangiora on the former stream, Ngapuketuru on the latter. Some time previous to the year 1833, a fishing canoe of the Waikatoes, a tribe dwelling a little to the North of them, was driven ashore near Waitara when the wrecked crew were cruelly killed and eaten. In revenge, for this, the Waikatoes, led by their great chief, Te Whero Whero, soon afterwards made a fell swoop on the Ngatiawa, stormed their fortress at Pukerangiora.....slew some 1,100 men, women and children, picked out some two or three hundred of the most likely prisoners for slaves, devoured the rest.....and returned home in triumph.....Before this Waikato storm actually burst on them, however, a few of the more timid or far-sighted of the Ngatiawas seem to have fancied that there was danger brewing in the Waikato sky; and as they had learnt that the country round Waikanae, in Cook's Straits, was not occupied by any powerful tribe.....they resolved to steal off to that neighbourhood..... while there was time. William King was one of this wary section of the tribe; and he had led a party of his followers down the coast, and established himself at Waikanae, some time before that terrible Waikato blow.

Their number was increased by fugitives of their own tribe, but when Colonel Wakefield and the pioneer settlers appeared in Cook's Straits, in 1840, the Ngatiawas were still a broken and dispersed people. They were pleased at the approach of English traders, and when it became known that Colonel Wakefield wished to purchase land on which to found English settlements,

Various chiefs of the Cook's Strait tribes, prominent among whom we find William King, eagerly opened negotiations with him for the sale of portions of their respective tribal lands lying at Wellington, Nelson, Wairau, Manawatu, Wanganui, and Taranaki.....Colonel Wakefield, wanting a district on which he might plant the New Plymouth settlement, was induced to receive proposals from William King and the Waikanae natives, and from the Resident natives at Muturoa [Ngatiawas who had returned to their old homes, directly after the Waikatoes had left them], for the purchase of such portion of this their old unoccupied country, some 70,000 acres, *including the Waitara*, as lay between a certain stream called the Taniwa and the islets called the Sugar Loaves.

Mr Hursthouse adds in a note on this passage: "In these negotiations with Colonel Wakefield, William King was particularly prominent, and in a deed of sale, known as the Queen Charlotte's Sound deed, which made over to the Europeans a tract of country *including the Waitara*, he signed first for himself and father." It appears that Colonel Wakefield had some doubt whether the Ngatiawas had not lost their right and title to sell the land through their conquest and ejection by the Waikatoes; "but as William King and the Resident natives contended that the land was still Ngatiawa land because the Waikatoes had never *occupied* it, Colonel Wakefield purchased of them this block of 70,000 acres." But no sooner did the news of this transaction reach Te Whero Whero, than he indignantly declared that he would not sanction it, and that the whole district belonged to the Waikatoes, both by the right of conquest and by the Treaty of Waitangi. The officials attached to the Colonial Government declared that the Waikato right was good, and counselled Colonel Wakefield to extinguish the Waikato claim by purchase. Accordingly,

An arrangement was eventually effected, and a formal deed was drawn up by the Crown officers, and signed by the two great Waikato chiefs, Te Kati and Te Whero Whero, by which they made over to the Queen the whole of the New Plymouth country, extending even from Tongupourutu to Waitotara.

Of this deed (dated Jan. 31, 1842) Mr Hursthouse gives a complete copy, and points out that it conveys to the Queen "a far larger district than the one lying between Taniwa and the Sugar Loaves." Now, the Resident natives, when Col. Wakefield's exploring ship first visited New Plymouth, had numbered "some 50 odd." But when once New Plymouth was fairly founded, a native population soon appeared on the spot. Various parties of fugitives returned; the Waikatoes liberated many of their captive slaves, who flocked back to their old quarters; and they "were joined, from time to time, by so many kinsmen from the Taranaki people, and by so many outcasts and desperadoes from other tribes, that in 1843" "the New Plymouth natives were found to have increased from 50 to 500." And now comes the strange part of the story. At this period, the Colonial Government at Auckland took upon itself "*to assume the illegality of the [New Zealand] Company's title to the waste lands in Cook's Straits where they had planted their little settlements, and to call on the Company to prove their title good, as against the natives, before a legal tribunal specially constituted for that purpose.*" The Government asserted that it was morally bound to set up such a tribunal by virtue of the Treaty of Waitangi, the second article of which "guaranteed to the natives the lands, estates, forests, fisheries, and other properties which they might possess." This tribunal, called the "New Zealand Land Claims Court," was set up in 1844, and an able lawyer, Mr Commissioner Spain, "was to preside, hear evidence, and adjudicate on the legality of the Company's Cook's Strait purchases." Before this time a marked change had appeared in the demeanour of the natives; and those of New Plymouth, as they found themselves growing stronger, commenced annoying the settlers in various ways; refused to accept the ample native reserves which had been set aside for them, and at length, "took forcible possession of the whole of the Waitara," and threatened that at the coming Land Court they would wrest from the settlers every acre which the latter had planted at Waiongona, Waiwaikaiho, and Mongaraka. But Mr Commissioner Spain pronounced judgment against them, and confirmed the deed of sale by which the New Plymouth district was purchased of Te Whero Whero. He, however, "went on to say,

That if any section of the Ngatiawa had preserved a right, it was the Resident natives, who had never fled, and not the returned slaves, or the Cook's Strait fugitives. That those Resident natives, and, indeed, the Cook's Strait natives, had sold any right they might have retained to Colonel Wakefield; and that, as there was an abundance of fine land in the native reserves and in contiguous unoccupied districts for Resident natives, for returned slaves, for fugitives, for all—land enough indeed for a hundred times their numbers—the natives had better settle down quietly to their own cultivations, and leave the white man free to do the same.

The day after this judgment was pronounced, the settlement was in an uproar. The natives "were furious at the verdict, and instantly declared their intention of treating it with contempt." The Wairau massacre had just occurred, in which Rauperaha, having repudiated the sale of the Wairau district, had murdered a British magistrate and a British officer in cold blood, and had shot down some 26 white men; and the shameful leniency with which these outrages had been met by the Colonial Government might well encourage the New Plymouth turbulents. The event proved that their star was in the ascendant.

Certain special pleaders were soon found among his [Governor Fitzroy's] officials who declared that Governor Hobson's Maori law expounders were wrong, and that New Plymouth belonged to the Ngatiawa, and not to the Waikato, because [the] Waikato had never occupied it. On this, His Excellency Governor Fitzroy came to New Plymouth—called a public meeting of the settlers; denounced them as all but trespassers on the little farms they had cleared; boasted that he had not even read the Court's judgment, but that from its manifest injustice he had at once determined to set it aside; asserted that Governor Hobson's purchase of the district from the Waikato was worth nothing, inasmuch as the Waikato had no power to sell; that Colonel Wakefield's purchase from the resident Ngatiawa was worth nothing, inasmuch as the resident Ngatiawa had no power to sell; affirmed that every acre of the district had always belonged, and did then actually belong, to the Ngatiawa; and told the settlers that if he could not succeed in purchasing a small block of land from the true representatives of the tribe (the returned slaves and Cook's Strait fugitives, who as he alleged were now, and now for the first time, on the spot), he should break up the settlement, and move the people to Auckland.

This latter hint rather alarmed the natives, who did not want to lose the white man's trade; consequently "they instantly agreed

to sell Captain Fitzroy a patch of 3,000 acres round the village." The Governor bought this patch, and "compelled all the settlers to abandon their cultivations, and move into it." But the Governor's own day of trouble was approaching. Not long after these events, Heke, "a chief, as a missionary author tells us, 'distinguished for his knowledge of the Scriptures,'" and one of those who signed the treaty of Waitangi, broke out in rebellion at Kororareka, burnt the town, and drove the inhabitants to Auckland. "A grave petition from the Cook's Strait settlers and Company's colonists was laid before Parliament; a Select Committee of the House condemned [the then] Lord Stanley's missionary policy;" Governor Fitzroy was recalled, and Governor Grey appointed in his place. He inaugurated an entirely different régime; compelled Heke to sue for peace, and put a stop to the murderous proceedings of other turbulent natives (including old Rauperaha) at Wellington and Wanganui. Then, turning his attention to civil matters, he did all in his power for the welfare of both races; he bought up the whole of the Middle Island and threw it open for settlement; employed the natives largely in Government works, and gave them every encouragement in the pursuits of industry and peace. And it is to the credit of the Maoris that he became at once respected and popular among them. He met the New Plymouth difficulty thus:—Deeming Governor Hobson to have been in the right, he yet saw that it would be unwise to reopen the vexed question, and that the best policy would be to assume that the latest decision was correct, and that the Ngatiawa were the true owners of the district. But as the smallness of the town block of land rendered the maintained existence of the settlement almost impossible, he opened negotiations with the natives for the sale of some of the unused country which surrounded it. They agreed to sell him some 25,000 acres of land, five-sixths of which when it came to be surveyed proved to be utterly unfit for the plough. This, however, was the only land they would then sell, and the settlers went to work on it as they best could. Some years later, in 1853, Rawiri, the chief of the Ngatiawa, owning some fine land near the Mongaraka, offered to sell a part of his territory. The Government bought it, and named it the "Bell Block." As Rawiri and a party of his men were proceeding to cut the boundaries, they were shot down by Kakatoré, a chief of the same tribe, who had threatened to kill Rawiri if he sold land to the English. This brought about a bloody feud between Rawiri's party and that of Kakatoré, which lasted for nearly a year, till the latter chief was slain, "when the quarrel was considered at an end, and no further opposition was offered to the occupation of the Bell Block." "During the progress of this blood-feud the settlers frequently memorialised the Government to interfere;" but Sir George Grey was then gone, and Colonel Wynyard, his successor *pro tem.*, "appears to have doubted his power to interfere with success." In 1855, Governor Browne arrived in New Zealand, and declared emphatically that he would allow of no outrages "within the European boundaries." For some time previous to his arrival, "there had been growing up in New Plymouth, among the more intelligent natives, a party favourable to the sale of land." Governor Browne's declaration re-encouraged this party (whom Rawiri's murder had dispirited), "and eventually Te Teira, a chief residing at Waitara, with about sixty followers, decided on offering to the Government a piece of land which he and his ancestors had long possessed there." But, as we all know, he was opposed by William King, who had now returned to Waitara: "William King, who was one of the first to abandon the possessions of his tribe, and one of the last to venture back when the white man had made the place a safe residence for him." "Te Teira declared that he would do as Rawiri had done—sell what was his own. King pointed to Rawiri and his fate, and warned him that he had better not."

Aware of the gravity of the issue, the Government proceeded in their course with all possible care and deliberation. Months were spent in investigating Te Teira's title—it was found to be unimpeachable—numerous meetings were held with the natives—William King was present—at two of these he formally admitted that the land was Teira's—but swore, again, that he would not suffer him to sell it—the purchase money was paid down—again and again was William King cautioned not to interfere—he turned the adder's ear—the survey was slowly commenced—it was stopped by this misguided man—troops were marched to the spot, and the Taranaki war commenced.

It has been alleged by King's apologists that, as a chief of Teira's tribe, he had a right to veto the latter's proceedings, independently of any personal claim on the land in question. But we think that Mr Hursthouse's extracts (pp. 501-2) from the Rev. Mr Buddle's pamphlet on the Maori King movement, show unmistakeably that the rule of not alienating any individual property in land without the consent of the whole tribe (of which the chief is, of course, the representative) was first proposed *as an innovation* in 1849 at a meeting of some of the Cook's Strait Natives, and was then strenuously resisted by many present. Ultimately this proposal ripened into the Anti-selling Land League, which in 1854 bound its members to the resolution, "that from this time forward no more land shall be alienated to Europeans without the general consent of this confederation." Kakatoré, the murderer of Rawiri, was one of the most active chiefs in this League. But we do not hear that any of the natives who desire to sell their land have ever adhered to it, so as to afford to this new Vehmgericht the excuse of broken vows to be avenged. The land in dispute has now been bought and paid for *three times over*, and in resisting the claim of one of the first sellers thereof to veto our transactions with the latest possessor, Governor Browne has evidently taken the course of plain justice. He could not have done less without virtually abandoning the colonists to the passions and caprices of the most lawless among the Maoris, and ruining the best hopes for the populations of both races committed to his care.

Mr Hursthouse's volume contains a new map by Stanford, dated 1861, in which the eight provinces of New Zealand are separately coloured; a great assistance to those who wish to know their boundaries and extent. The map is, however, on rather too small a scale for practical purposes.

The other work we have placed at the head of this article is an entire contrast to Mr Hursthouse's, not only in its views, but in its style. It is a most feeble and confused pamphlet, whose only importance consists in the illustration which it affords of the imperfect statements and puerile reasoning which some of the partisans (we can scarcely call them the friends) of the Maori do really put forth. We do not sympathise with Mr Hursthouse's bitter invectives; but we think such a pamphlet as this, reprinted from the organ of the "Aborigines Protection Society," sufficiently justifies the British Colonist in a grave distrust of the influences which gave rise to it.

THE ART-JOURNAL. March. Arthur Hall, Virtue, and Co.

THE present number of this Journal gives us "The Armourer," a picture in the Royal collection by H. Leys, a modern Belgian artist, who paints with much of the skill and power of the old Flemish masters. Turner's exquisite picture of "Modern Italy,"—a work on which the exuberant imagination of the great artist was more generously lavished than perhaps on any other,—and a marble group by G. Fontana, an Italian artist, entitled "Cupid captured by Venus," are the two remaining steel engravings. "The Hudson River," "Rambles of an Archæologist among old Books and in old Places," the Biography of George Edwards Hering, and "An Examination into the Antiquity of the Likeness of our Blessed Lord," are the subjects of the illustrated chapters.

WHO IS THE "KING OF HUNGARY" that is now a Suitor in the English Court of Chancery? A Letter to the Right Hon. Lord John Russell, M.P., Her Majesty's Principal Secretary of State for Foreign Affairs. By TOULMIN SMITH, of Lincoln's Inn, Esq., Barrister-at-Law. London: W. Jeffs, 15 Burlington Arcade. 1861.

THE object of this tract is to show that the present Emperor of Austria is not the King of Hungary, and that he has therefore no right to sue as such in an English court of law. Mr Toulmin Smith completely proves his case, and brings forward many facts of importance and interest concerning the Hungarian laws, frequently citing the original text.

NOTES ON THE SITE OF THE HOLY SEPULCHRE AT JERUSALEM. An Answer to the "Edinburgh Review." By JAMES FERGUSON, Fellow of the Royal Institute of British Architects; Author of an Essay on "The Ancient Topography of Jerusalem," "Illustrated Hand Book of Architecture," &c. London: John Murray, Albemarle street. 1861.

MR FERGUSON replies in this pamphlet to the arguments brought by the "Edinburgh Review" against his Essay on the "Ancient Topography of Jerusalem." His object is to prove that the church built by Constantine over the tomb of Christ is not the edifice now known as the "Church of the Holy Sepulchre," but is, in reality, the church called "The Dome of the Rock," which is contained in the same enclosure with the Mosque of Omar. His evidence appears to us to be completely satisfactory as far as Constantine's edifice is concerned: whether that church can be proved to have stood on the site of the original tomb is another and a far more difficult question.

CHRIST'S COMPANY AND OTHER POEMS. By RICHARD WATSON DIXON, M.A., of Pembroke College, Oxford. London: Smith and Elder. 1861.

THE title of this thoughtful little volume should rather have been "Christ's *Companions*" than "Company." In the poem on St Paul we are irresistibly reminded of the striking poems in which Robert Browning has attempted to delineate the effect produced by early Christian preaching on contemporary minds; but with this difference, that while Browning puts his descriptions into the lips of nameless Pagans of his own creation, Mr Dixon has unaccountably chosen *Gallio* to be the exponent of a depth of Christian feeling and spiritual perceptiveness which are strangely out of place in him who "cared for none of those things." In the poems on "St John" and "St Peter" there is more striving after a dramatic ideal, but we cannot feel that it is attained. Again, the "St Mary Magdalene" is an unmistakeable echo of Tennyson's

early poems, especially of "Mariana in the South." The latter part of this volume is far more original, and is at once stimulating and disappointing. There is no one poem which we can regard as a finished success; there is much morbidness of tone, and not a little affectation in language; but in spite of all drawbacks, the book attracts us by the genuineness of the author's mind. And the frequent flashes of poetic genius, and of true spiritual insight, which are scattered throughout these poems, incline us to hope that Mr Dixon may do better things hereafter than anything which this volume contains.

SIBYL; AND OTHER POEMS. By JOHN LYTTLETON. London: Smith and Elder. 1861.

THE chief poem in this small volume is good of its kind,—a sad tale, and well told. A few of the minor poems are pleasing.

GOOD WORDS. A Magazine for all the Week. Edited by NORMAN MACLEOD, D.D. Parts I. and III. for 1861. Edinburgh: Alexander Strahan and Co. London: Groombridge.

A MONTHLY magazine, of which the basis is composed of religious exhortation, poetry, and picture, while miscellaneous amusement and information fill up the secular department. Dr Guthrie, of the Free Kirk, is one of the principal contributors, and the March Part contains an article from the pen of Archbishop Whately, "On the Duty and Method of Instructing," which in its excellent remarks on the study of external evidences, and its quiet depreciation of the internal evidences of revelation, is very characteristic both of the strong and of the weak side of that "Church of Common Sense" of which the author is one of the most distinguished exponents. Among the miscellaneous papers, the "Peep at Russia," and the "Visit to a Slave Market in Washington," by the Editor, and "My First Geological Excursion," are perhaps the best. The poetry is not above the average, but the wood-cuts are good.

BOOKS RECEIVED.

De Quincey on Self Education, Style, Rhetoric, and Political Economy. Hogg.—Recollections of a Physician. Ward and Lock.—Egypt. Blackwood.—Punjaub and Delhi. Blackwood.—Temple Bar.—The St James's Magazine. Saunders.—The Cornhill Magazine. Smith, Elder and Co.—*Old Bones*. Hardwicke.—Macmillan's Magazine. Macmillan.—Indigo and Its Enemies. Ridgway.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

This is the season at which the great companies hold their annual meetings of the shareholders. The Western and Orleans Railway Companies have already held theirs, but the reports presented by the Directors have not yet been published. At the Western meeting, however, the gross receipts for 1860 were stated to be for the "old net work" 45,825,221f, and the net profits 25,978,716f. These last allowed a dividend of 37f 50c to be declared: this was the same as in the preceding year, and 4f 50c more than in 1858. In the Orleans meeting the gross recepts were stated to be 75,377,427f, and the clear profits 33,524,973f. These last, which were greater than those of 1859, allowed a dividend of 100f to be declared. It is expected that the dividend of the Northern Railway Company will be 65f 50c, and that of the Services Maritimes of the Messageries Imperiales 60f.

Many persons had expected that the Directors of the Bank of France would this day declare a new reduction of discount; but, considering that the rate is already 2 per cent. below that of the Bank of England, a further diminution would, perhaps, not have been prudent.

The Credit Industriel Bank is taking the necessary measures for transferring the provisional bonds of the Ottoman loan granted by M. Mires into definitive bonds. This person, it is said, is no longer *au secret*; but he still, of course, continues in prison. The shares of his Caisse Generale des Chemins de Fer are to-day at 90f: they were higher a few days back, but a decline has taken place in consequence of a report that Count de Germiny, Governor of the Bank of France, intends to resign the post of judicial administrator of his affairs.

The Government from Tuesday has increased the interest on Treasury bills to 4 per cent. for those of from 3 to 5 months, 4½ for those of from 6 to 11 months, and 5 for those of a year. These rates are ½ per cent. higher than those previously fixed.

At Rennes, a banker of the name of Leray has failed with liabilities of about 2,400,000f, but the assets are nearly equal.

The Bank of the Ile de la Reunion (Bourbon), has declared a dividend of 27f 50c per 500f per share for the second half of last year.

Quotations on the Bourse have been affected in consequence of the receipt of letters from Vienna expressing fears that the Austrian Government entertains hostile designs against Sardinia:—

On account of the peculiar wording of the decree which declares that skins, oleaginous seeds, grease, and certain other articles of European production shall be admitted free of duty when imported by French vessels, the question has arisen whether the exemption is gained by such vessels when they bring such articles from foreign bonding warehouses, as well as when they bring them direct from the countries in which they are produced; and the Government has decided that it is not. Thus articles of Russian production brought direct from the country in French ships are free; but brought from England or Belgium in the same ships they are not so. In accordance with this decision, it has further been laid down that though articles brought *direct* from Russia by *land* are free of duty, they are not so if they are conveyed from Russia to a Belgian or Dutch port by sea and then brought from it by land.

The following is a detailed account of the imports taken out of bond for consumption in the first two months of the present year, compared with the corresponding periods of the last two years;—

	First Two months of 1861.	First Two months of 1860.	First Two months of 1859.
Oxen and sheep ....head	63868	57932	57328
Wines....hectolitres*	47571	27118	18225
Alcohols	12020	8419	2483
Cocoa....quintals*	7577	6437	6489
Coffee	64697	44433	49243
Grain	290818	57048	350895
Flour	17948	31	
Hemp, peeled, &c.	18259	8282	8595
Cotton	310892	143913	172686
Flax and hemp yarn	1887	3197	1464
Oleaginous seeds	186921	160246	140056
Tallow	3941	1350	1795
Hops	2143	2228	2406
Coal	7371386	7334307	7695977
Coke	873452	886706	737647
Oils	24855	19322	36918
Indigo	816	1334	1073
Jute	6761	...	...
Wool	46143	26868	37848
Flax, peeled, &c.	47139	34382	50857
Machinery ....francs	1040594	347131	...
Pig iron ....quintals	113170	76559	53085
Of which from England	108421	48884	16869
Bar iron	1417	699	6044
Copper	31819	18313	24703
Lead	22370	18543	29989
Zinc	34827	33554	36329
Articles in iron	1000†	...	...
Salt	42525	17392	779
Silks	5714	5042	6168

Foreign sugar	91120	81674	63648
Flax and hemp fabrics	3868	3120	2068

* The hectolitre is rather more than 22 gallons; the quintal is nearly 2 cwts.
† All from England.

It will be observed from this table that, as remarked in my last, there is a large increase in the principal articles of consumption. This increase, it is scarcely necessary to observe, proves to demonstration the excellence of the commercial reforms which have been effected. The quantities of pig iron, coal, and wool brought from England have augumented.

The following were the principal exports of French productions:—

	First two months of 1861.	First two months of 1860.	First two months of 1859.
Oxen and sheep ....head	9863	12048	10302
Wines, ordinary....hectolitres	249083	282054	354550
Of which to England	4426	5338	2752
Superior wines	8843	8172	6717
Brandies from wine	23975	33754	39384
Of which to England	11771	14254	22382
Other alcohols	12133	8081	12960
Grain ....quintals	370959	422849	1057824
Flour	123740	157134

Glass and crystal	9273 ...	10714 ...	10939
Ditto with drawbacks	31550 ...	33427 ...	35455

These returns are, on the whole, not so satisfactory as could be wished. The exports to the United States in particular present a large decline; those of wines and brandies for example, are this year more than half less what they were in 1860.

The return of the precious metals present these results:—

SILVER.

	First two months of 1861. f	First two months of 1860. f	First two months of 1859. f
Imported	26735240	31781660	45842000
Exported	51536060	53996680	55478760

* This is the figure given in the Customs tables, but it seems erroneous.

Annexed is an account of the markets—

FLOUR.—At *Paris*, the quotation yesterday was 70f to 75f the sack of 159 kilogs. Four marks were 71f 75c for the month, 71f 50c to 71f 75c for April and May.

WHEAT.—At *Paris*, yesterday, prices were with difficulty maintained, and some sales were made at a decline on last week's quotations; those of "la culture" ranged between 38f and 40f 50c to 41f for the sack of 120 kilogs; those of "commerce" between 38f and 39f 50c to 40f. Of the provincial markets, as many as 100 present a rise of 13c to 1f 67c the hectolitre; 15 a fall of from 21c to 66c. In 24 markets no change has taken place, and 22 are reported firm.

COTTON.—Business was very active at *Havre*, in the week ending Friday, as many as 34,393 bales being sold. Prices rose 2f for the very low sorts, 4f for the low, 2f to 4f for very ordinary, 2f for the ordinary and other sorts. Low New Orleans was, consequently, 99f the 50 kilogs; and very ordinary ditto, 104f. The arrivals were 19,678 bales. This week, business has been rather active, and low New Orleans has risen to 100f.

COFFEE.—At *Havre*, in the week ending Friday, the demand was active and prices firm. 775 sacks Hayti Port-au-Prince went at 78f to 80f the 50 kilogs; 140 ditto, 79f; 550 Jeremie, 78f 50c: 730 Cayes and Jacmel, 78f; 100 Cape, 81f; 1,120 ditto, for delivery, 81f 50c; 200 Gonaives, 83f; 2,000 Rio, not washed, 67f 50c to 73f; 52 ditto, washed, 81f 50c; 80 Santos, 77f; 400 tons Porto Rico, at prices kept secret; a small lot of Guadeloupe "habitant," 132f 50c duty paid; 1,000 sacks Ceylon triage, for delivery at a distant date, 106f; 2,000 ditto, for early delivery, 108f. Several lots of different sorts of damaged were also sold. The arrivals were nearly 4,500 sacks; also some lots of Guadeloupe. This week, a fair amount of business has been done: Hayti, 79f to 80f; Santos, 74f to 76f; Rio, 73f. At *Nantes*, last week, some small lots of Reunion *feve pointue* went at 128f 50c to 130f. Some Malabar native and plantation, 103f to 110f. Some damaged Malabar was also sold. This week, some lots of Java have been sold at 110f 25c to 116f 50c; some Manilla, 97f 50c to 103f 25c. At *Bordeaux*, last week, business was calm. Some lots of Guayra went at 83f 50c to 91f; 250 sacks Rio, not washed, 72f 50c to to 73f; 92 ditto, washed, 102f 50c; 60 ditto, washed, at prices kept secret; a lot of Guadeloupe "habitant" at 137f 50c to 147f 50c. This week, a lot of Santiago has been taken at 92f; some Rio, washed, at established prices; ditto, not washed, 72f 50c; Java at different prices. At *Marseilles*, last week, 250 sacks Port-au-Prince went at 80f. This week, a lot of Rio has been taken at 71f.

SUGAR.—The sales at *Havre*, in the week ending Friday, were 215 casks French West India, at 48f to 48f 50c the 50 kilogs, duty paid; 1,050 bales Reunion, 51f to 52f in bond; a lot of Porto Rico for delivery at 47f 50c; 1,200 casks Havana disposable, 35f 50c to 36f. Some damaged Reunion and Havana were also sold. This week, there have been some very large sales of Reunion at 52f to 52f 50c. Of other sorts, Bahia has been at 34f, French West India 49f 50c, duty paid. At *Nantes*, last week, as many as 23,668 sacks Reunion were sold at 50f to 51f 12½c the 50 kilogs; sales were also made of 280 sacks Mauritius, at 56f; 4,562 Mayotte, 45f 50c to 46f 75c; a lot of French West India, 44f 26c to 45f; and one of "usine" ditto, 51f 25c. This week, some large sales of Reunion have been made at prices varying from 52f to 56f 75c. At *Bordeaux*, last week, business was active: 6,300 bales Reunion went at 50f 50c to 52f 75c; 600 "gros grain," 56f; 200 crystallised, 57f 25c; some lots of French West India, 48f; 5,000 boles foreign, 51f to 52f; Havana nominally 69f. This week, business has been active: Mauritius, 54f; Reunion, 52f to 53f; French West India, 49f to 50f. At *Marseilles*, last week, 1,600 bales Reunion went at 51f, and a lot of superior ditto 52f. Nothing done in French West India or Havana. This week, only some damaged Mauritius has been sold.

INDIGO.—At *Havre*, in the week ending Friday, 17 cases Bengal and a lot of Guatemala were sold at prices *kept* secret. The arrivals were unimportant. This week, 21 cases have been sold, but the prices are not given. At *Bordeaux*, last week, 43 cases Madras and Kurpah went at established prices. This week, a few lots of Kurpah, Java, and Madras have been sold; prices not given.

WOOL.—At *Havre*, in the week ending Friday, the sales were 34 bales La Plata unwashed, 1f 60c to 2f 95c the kilog; 18 bales La Plata sheep and lamb skins, unwashed, 1f 35c to 1f 46c. Some bales of damaged Russia were also sold. The arrivals exceeded 1,000 bales. This week, La Plata unwashed has been at 1f 70c; Buenos Ayres sheepskins, 1f 60c.

HIDES.—A fair amount of business was done at *Havre* in the week ending Friday. 5,556 bales Buenos Ayres salted went at 70f to 73f 50c the 50 kilogs; 2,500 Monte Video saladeros, 73f 50c to 74f; 900 Valparaiso salted cow, 93f; 1,000 Rio Grande salted for delivery, 71f 50c; 500 New Orleans salted, 47f; 2,000 horse, dry La Plata, 9f each. The arrivals were about 12,000 and sundry bales. This week, Rio Janeiro salted has been at 57f 50c, New orleans salted 47f 50c. This week there has been a large public sale by auction, at which Monte Video went at 51f to 60f, Martinique 52f 50c to 58f 50c, Ireland 41f 50c to 44f, Hayti drysalted 55f, Lima drysalted, 66f to 67f 50c, Tampico 97f, Maraguan drysalted 70f.

TALLOW.—No sales were made at *Havre* in the week ending Friday, and the arrivals were 242 casks. Nothing done this week. At *Paris*, yesterday, the 100 kilogs were 131f 75c.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following commercial advices are dated Calcutta, February 16:—Import Market.—Since our last there was a trifling improvement in demand, although almost too trifling to call for note, but even that could not be held, and the market has gone back to its late utterly inert condition. Present nominal prices, though involving heavy loss, cannot be got, except for very limited quantities for special objects. There is, consequently, really nothing doing. Produce Market.—Here also entire stagnation prevails—absolutely nothing to record. The unfavourable reports of falling markets at home have had no effect upon native holders of produce, who, indeed, at present, are not affected by any external reports; increased demand for home consumption has kept pace with increasing wages, and the scarcity in the North-West strengthens their position.

We have received the annexed report from Bombay under date the 26th ult.:—A slightly better feeling is perceptible in our market for imports, owing principally to the firmness of holders, to the greatly reduced stock in second hands of staple articles, and to the speculative purchases by importers of a few articles hitherto ruling disproportionately low, combined with the non-arrival of large supplies overdue for the last month or six weeks. The intelligence to hand by telegraph, *via* Galle, had at first the effect of causing considerable speculation in cotton, but business has been quite at a stand for the past four or five days, owing to the conflicting tenour of these and subsequent advices. But values, owing to the absence of stocks, rule steady, and we have no material alteration to notice in new. Exports now come up to 197,000 bales, showing a great increase compared with the corresponding periods of 1860 and 1859, when they were respectively 56,000 and 92,100 bales, and the tonnage now engaged in harbour will take away 200,000 bales more. In seeds business is restricted, owing to the paucity of supplies, and the high rates demanded by holders in the face of rising freights and exchange.

The returns of the trade of the port of New York for the month of February show the total importation of foreign goods to have been 2,813,000*l*, against 3,833,000*l* in the corresponding month of last year. The deliveries from warehouse, however, had been 3,220,000*l*, so that stocks were diminishing. The imports of foreign goods during the first eight months of the fiscal year—namely, July to February inclusive, had been 29,200,000*l* against 31,000,000*l* in the same eight months of the preceding year, while the importation of foreign specie was 3,540,000*l* against 420,000*l*.

An account of the amount of bank notes authorised by law to be issued by the several banks of issue in Ireland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 9th day of March, 1861:—

Name and Title.	Circulation Authorised.	Average Circulation.	Amount of Coin Held.
	£	£	£
Bank of Ireland	3,738,428	3,094,750	862,844

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 27th day of March, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,377,065	Government Debt	11,015 106
		Other Securities	3,459,900
		Gold Coin and Bullion	11,053,703
		Silver Bullion	848,362
	26,377.035		26,377,065

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,599,072
Rest	3,840,975	Other Securities	19,967,528
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	8 415,844	Notes	6,967,990
		Gold and Silver Coin	953,391
Other Deposits	11,104,930		
Seven Day and other Bills	573,232		
	38,487,981		38,487,981

Dated the 28th March, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	19,382,307	Securities	30,488,600
Public Deposits	8,415,844	Coin and Bullion	12,855,456
Private Deposits	11,104,930		
	39,503,081		43,344,056

The balance of Assets above Liabilities being 3,840,975*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£554,300
An INCREASE of Public Deposits of	191,750
A DECREASE of Other Deposits of	347,324
No change in the amount of Government Securities.	
An INCREASE of Other Securities of	260,229
An INCREASE of Bullion of	154,031
An INCREASE of Rest of	15,534
A DECREASE of Reserve of	403,849

The above return shows less unfavourable results than might have been anticipated. The bullion has augmented, but on the other hand there has been a considerable decrease in the reserve. The increase in the circulation arises from the payments usual towards the end of the quarter.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,013,551	£ 20,790 915	£ 21,733,073	£ 21,674,363	£ 19,982,307
Public deposits	8,999,881	7,630,763	9,346,914	10,284.110	8,415,844
Other deposits	9,266,234	12.991,054	13.879,985	13,556,194	11,104,930

Other securities	14,063 963	16,857,437	17,357,488	23,955,189	19,967,528
Reserve of notes & coin	9,284,044	13,153,167	13,117,250	8,766,346	7,921,381
Coin and bullion	14,246,179	18,628,917	19,630,470	15,271,701	12,855,456
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4½ p. c.	7 p. c.
Price of Consols	96⅛	96¼	95⅜	94⅛	91⅞
Average price of wheat	38s 1d	45s 2d	40s 0d	45s 6d	54s 0d
Exchange on Paris (shrt)	25 0 5	25 5 12½	25 5 10	25 10 15	25 37½ 45
— Amsterdam ditto	11 15½ 15⅝	11 15 15⅛	11 14 14⅛	11 14 14⅛	11 19⅛ 12
— Hamburg (3months)	13 6¼ 7	13 6 6¼	13 5¼ 5⅜	13 5⅛ 6	13 9¼ 9⅜

In the corresponding week of 1851, no events of any importance occurred either at home and abroad. The Ecclesiastical Titles Bill continued to be actively debated in the House of Commons. Great exertions were being made to complete the Crystal Palace in time for the opening of the Great Exhibition on the 1st of May.

In 1858, although the effects of the commercial crisis were passing away, the continuance of failures in the India and China trades checked the revival of business. The subscription for the first five millions of Indian 4 per cent. debentures had just taken place, the result being the absorption of 4,800,000*l* at rates principally between 97 and 98½.

In 1859, the hopes of peace inspired by the announcement of a Congress had been shaken by the vast armaments of the three antagonistic Powers. The embarrassments of the Indian finances were forcing themselves painfully upon the public attention. The Russian loan of twelve millions was on the eve of issue. One million had just been paid upon the debentures of the East Indian Railway Company.

In 1860, the preliminaries of peace had been signed between Spain and Morocco. The annexation of the Central Italian provinces to Sardinia was being completed, while, on the other hand, Savoy was being occupied by the French. In Parliament a variety of questions were the subjects of desultory discussion. The Bank had just raised their rate of discount from 4 to 4½ per cent. Extraordinary fluctuation prevailed on the Paris Bourse owing to the exceptional operations of the Government.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 4,797,729*l*; in 1858, a deficiency of 3,866,383*l*; in 1859, a deficiency of 3,477,503*l*; and in 1860, a deficiency of 10,398,995*l*. In 1861, the deficiency is 8,862,598*l*.

DISCOUNT AND MONEY MARKET.—The demand for money this week, although active, has been less than is usual at the present period of the year, owing to the general contraction of trade. Notwithstanding that yesterday provision required to be made for the engagements of several days forward, there was no pressure anywhere, and at the Bank the applications for discount were comparatively moderate. In the general market the rate was 6¾ to 7 per cent., but only the best three months' paper could be negotiated on the former terms. On the Stock Exchange the continued sales of Exchequer bills and India bonds cause a steady demand for money, which is increased by some of our principal monetary houses being, it is said, borrowers on stock. The rate there is consequently firm, 6½ per cent. being required for short loans and 7 for longer periods.

To-day, being Good Friday, has been observed as a holiday in the City, and the Stock Exchange, Bank, and other public establishments have been closed.

The rates of discount in the principal cities of the Continent remain about the same as before. They are as follows:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	3
Frankfort	3	1½
Amsterdam	3	3
Turin	7	6
Brussels	4	4
Hamburg	...	2½
St Petersburg	6	...

ENGLISH FUNDS.—Consols were inactive but steady during the greater part of the week, but on Wednesday experienced a fall on the report from Paris of a collision between the Austrian and Piedmontese troops on the Austrian frontiers. Although thisc rumour has not been confirmed, yesterday a further deline subsequently took place, the military movements in Italy and the declarations of Count Cavour in the Sardinian Parliament causing fresh uneasiness. French Rentes have also been receding, and the fluctuations on the Bourse, taken in conjunction with recent events in Italy, are considered to bear a close resemblance to the position of affairs just previous to the outbreak of the last war. Consols were finally quoted yesterday evening at 91⅝ to ¾ for money, and 91¾ to ⅞ for the account, showing a fall on the week of more than ¼ per cent., and the market at the close presented a very dull appearance.

The announcement of the equalisation of the interest on Exchequer bills maturing in June with those due next March has caused both issues to be now quoted the same price. Those securities have, however, been again heavy, owing to a pressure of sales, and they have consequently fallen from 7s to 2s discount, at which they stood last Friday, to 13s to 8s discount. India bonds are almost unsaleable, and are nominally 30s discount.

Indian loan scrip has been partially supported by numerous small purchases for investment; but the fact that the Government have it in their power to issue an almost unlimited amount of this stock to pay off India bonds, debentures, &c., has more than counteracted this influence, and the price has declined to 100 to ¼.

FOREIGN STOCKS.—Business in this department continues limited, and the principal transactions have been in the more speculative stocks, such as Mexican and Turkish Six per Cents. In the former a slight improvement has taken place,

LONDON:—Printed and Published by DAVID AIRD, of 18½ Exeter street, Strand, in the parish of St Paul, Covent Garden, at the ECONOMIST OFFICE, 340 Strand, parish of St Mary-le-Strand, in the county of Middlesex.—Saturday, March 30, 1861.

the public showing more confidence in the future prospects of Mexico and the stock being scarce in the market. Turkish Six per Cents., on the other hand, have relapsed, on the disturbances that have broken out in some of the provinces of the Ottoman Empire. A satisfactory statement respecting the Ecuador debt, by which it appears that the funds in hand in cash and bills in England available for the bondholders amount to 7,078*l*, and that there is a further sum of about 8,000*l* in Guayaquil, leading to the inference that the payment of dividends will shortly be resumed, caused some demand for Ecuador bonds, but no material alteration in value occurred. A portion of this information had however previously transpired. Buenos Ayres securities are flatter on the announcement from Parana that the Senor Riestra, the finance minister, and another leading member of the Government have retired.

French 3 per Cents. closed yesterday at 67f 75c, being a decline since last Friday of more than three-eighths per cent.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and yesterday:—

Railways and other Shares.—British railway stocks have followed the movement in the funds, and have latterly shown a very heavy tendency. Midland has been especially flat, the last traffic return being unfavourable, and the supply of this stock having increased probably from realisations of amounts held on borrowed money. Great Western appears also to have been sold on balance, while London and North Western on the other hand has been in demand for transfer. The slight decline in the Midland traffic has acted prejudicially as regards other stocks, since although the returns have hitherto been good, there is a general apprehension that railway receipts will soon be considerably affected by the stagnation in trade. Hence even a small decrease causes a disproportionally bad effect. The quotations yesterday were at the lowest point of the week.

Colonial descriptions have been generally steady. Foreign are flat on the unfavourable reports from Paris. South-Austrian and Lombardo-Venetian shares have in particular declined to 1⅜ to ⅝ dis., notwithstanding that, as shown in 1859, an outbreak of war in Italy would bring a very large increase of traffic in the transport by both the belligerents of troops and military material.

London General Omnibus shares have partially rallied, closing at 1, buyers.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and yesterday:—

Foreign Exchange.—The rates this week have been generally firm, especially those on Holland, on which a slight advance has taken place.

Bullion.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, giving an account of the bullion transactions of the week, and also those in India Government Loan Notes:—

Gold.—The shipments of gold to America have been resumed this week on a rather larger scale, the America having taken 86,700*l*, and the Edinburgh 102,030*l*. The Pera has also taken 15,000*l* to Bombay. We have had, however, large arrivals from the Continent, and these are likely to continue. About 160,000*l* has been sent into the Bank during the past few days, and further amounts are likely to follow, the Pera having brought about 43,000*l* from Australia, and other arrivals from Melbourne are now daily looked for.

Silver.—The silver ex La Plata has been sold at 60⅝d per oz standard, and the Pera took about 182,240*l* to Bombay. The market is quiet at present, and we do not expect any large amount will go by the next mail to India and China of the 4th April.

Mexican Dollars.—The dollars ex La Plata have been fixed at 59¼d, and the market is rather quiet.

Exchange on India at 60 days' sight for Banks' drafts:—Bombay and Calcutta, 1s 11¾d to 2s 0⅛d; Madras, 1s 11⅛d to 2s; bills with documents, 1s 11⅛d to 1s 11⅜d.

India Government Loan Notes are weaker, with the same slack demand. We quote 5 per Cents. 93½ to 94½, and 5½ per Cents. 99½ to 100½.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, refinable, 77s 10½d per oz std. Silver—Bar silver, 5s 0⅝d per oz std; bar silver, containing 5 grs gold, 5s 0⅞d per oz std; fine cake silver, 5s 5⅛d per oz; Mexican dollars, 4s 11¼d per oz; Spanish dollars (Carolus) 6s 6d per oz, last price.

About 24,000*l* in bars was the amount of gold purchased by the Bank yesterday.

Public Companies.—The annual meeting of the Ottoman Bank took place on Wednesday, when a satisfactory report was presented, showing that the available balance was 31,746*l*. A dividend at the rate of 8 per cent. per annum, free of income tax, was declared, and 5,000*l* carried to the reserve, which now stands at 68,196*l*, leaving 5,836*l* to be carried forward. A subscription of 250*l* for the relief of the sufferers by the inundation at Galatz was also approved. The Chairman, Mr Layard, M.P., in his opening statement, said that the Directors have felt it their duty during the past year, in consideration of the doubtful position of affairs abroad, to restrict their transactions as much as possible. Hence the profits have not been so large as in the previous year; but, on the other hand, there have been no heavy losses to write off. Shortly before the last meeting the late important events occurred in Syria, and the inspector of branches, Mr Gilbertson, was at once sent out to Beyrout. It is not yet known what the loss will exactly be at that establishment, but it is much less than might have been anticipated. Owing to the prudent management the bank has been very little affected by the recent failures in the Eastern trade. A serious disaster has taken place at Galatz owing to an extraordinary accumulation of ice. Mr Powell, the Company's manager in that town, was among the first to attempt to stop the disaster, and afterwards to alleviate the distress occasioned by it. A sum of about 1,000*l* has been subscribed in London for the sufferers, but more is required. On the negotiation of the late Mirès loan, Mr Layard lost no opportunity of expressing to the Turkish Ambassador in Paris his opinion of the reckless manner in which that operation was conducted. Since then, however, the transaction has fallen through, and the failure of the loan he thought will prove of the greatest benefit to Turkey. A discussion followed, chiefly upon a circular that had been distributed advocating the policy of winding up, a course which very few of the proprietors appeared to approve. No resolution was come to upon the subject, but it was practically deter-

mined that the question shall be left entirely in the hands of the Directors.

The Chartered Bank of India, Australia, and China have also held their annual meeting this week, when a dividend was declared at the rate of 6 per cent. per annum, making a total of 6½ for the year 1860, free of income tax. The profits in the past six months have been rather less than in the first half of the year, owing to the low value of money in India, and also in some degree to the disturbance of the trade with China during the war. Still, however, the general business of the establishment has been satisfactory, the profits in 1860 being 47,552*l*, against 31,211*l* in 1859, the dividend also having been raised from 6 to 6½ per cent. The Directors, having regard to the liabilities and extensive transactions of the bank, consider the formation of a reserve fund indispensable, and have recommended the appropriation of 5,000*l* to that purpose, notwithstanding the diminution in the profits. Resolutions were passed adopting the report, approving an application to the Treasury for a supplemental charter to issue notes at Singapore, and authorising the postponement of the annual meeting from March to April. Annexed is an abstract of the report:—

The Directors have now to present to the shareholders a report on the operations of the bank during the past year, which they trust will prove satisfactory. The result exhibited by the general balance sheet submitted is a net profit, for the year ending 31st December last, of 45,552*l*, and a balance now disposable of 27,502*l*. The Directors, at the meeting in September last, expressed their opinion of the propriety of increasing the reserve fund, even at the expense of the dividend, in the early stages of the bank's existence. On the present occasion, therefore, they recommend an addition of 5,000*l* to the reserve fund (which will then stand at 10,000*l*), and a dividend for the past half-year, at the rate of 6 per cent. per annum, free of income tax—making, with the distribution of the previous half-year, a dividend at the rate of 6½ per cent. for the whole year—and leaving 1,632*l* of undivided profits to be carried to new account. It has not yet appeared to the Directors advisable to increase the number of their branches abroad; they will be quite prepared, however, when the proper time arrives, to extend the business of the bank in this manner. The charter confers the privilege of issuing bank notes in the Queen's colonies in the East, but not in the territories formerly under the government of the East India Company. The Directors, however, consider it very desirable that the bank should possess this privilege at Singapore, and they propose accordingly to apply for it to the Lords Commissioners of Her Majesty's Treasury. In terms of the deed of settlement, two extraordinary general meetings must sanction this application. The same sanction is also required for postponement of the ordinary annual meetings from March to April in each year; a measure which the increase of the bank's operations abroad now renders necessary, in order to ensure the due receipt and examination in London, of the accounts from all the agencies to the previous 31st of December.

At the Atlantic Royal Mail Steam meeting it was resolved to raise 600,000*l* additional capital in 7 per cent. preference shares. The report stated that the new board have been devoting their best energies to the financial position and prospects of the Company, and have anxiously considered on the most effectual means for carrying out the Irish Transatlantic service. From the burning of the Connaught steamer the mail contract was suspended till the 26th inst., and a further delay was rendered necessary through the damage to the Hibernia by the late gales. The service, however, will be resumed on the 9th of next month. In future the Company will deliver mails at Newfoundland each voyage. An improvement of the harbour accommodation at Galway has been urged upon the attention of the Harbour Commissioners. It was resolved to carry the previous losses of the Company to the debit of capital. A large proportion of the preference shares about to be issued have, it is said, already been arranged to be placed.

At the annual meeting of the British American Land Company on Wednesday, the report stated that the claims against the Government having been finally disposed of, the land register has been examined and rectified, from which it appears that the property of the Company is larger by 18,698 acres than had been previously calculated upon. The sales during the past year were 20,663 acres for 14,374*l*, and the cancelments, where no re-sales have been effected, 2,587 acres for 1,550*l*. The Sherbrooke Town sales were four acres for 725*l*, and the cancelments 1½ acres for 486*l*. By the acquisition of certain mills and properties the valuation of Sherbrooke has been greatly increased The copper mines in the district are about to be tested. The general operations of 1860 have been satisfactory, more than double the quantity of unimproved land having been disposed of than in 1859, while fair prices have been obtained. There is also a continued demand for land by incoming settlers. The debt due to the bankers on this side has been reduced by 2,000*l*.

At the London General Omnibus Company's meeting, the report, of which a notice has already appeared, was adopted after a protracted discussion. An amendment to name a committee of investigation was rejected by 52 votes to 30.

The dividend warrants of the Red Sea and India Telegraph Company, for the interest guaranteed by the Government, have at length been issued, after being nearly two months overdue. It is needless to repeat that the sole default has lain with the Treasury.

The dividend proposed to be declared at the ensuing meeting of the Oriental Bank is at the rate of 9 per cent., making a total distribution of 16 per cent. for the year 1860.

Failures and Mercantile Embarrassment. — The suspension has taken place of the old-established East India house of J. G. Behrends and Co., with liabilities for nearly 40,000*l*. The step has been rendered necessary by the illness of the principal partner, Mr Behrends, who alone was conversant with the full details of the business. About half the liabilities are secured. The assets are at present uncertain. The following was the circular issued :—

17 Bucklersbury, March 23, 1861.

Messrs J. G. Behrends and Co. having consulted us on the state of their affairs, we find that the affliction to which Mr J. G. Behrends was subjected in the month of December last (and from which he has only partially recovered) has necessitated his almost entire absence from business, and in consequence thereof it is imperative to suspend for a while the payment of the liabilities of the firm. The accounts are now in course of investigation by Messrs Quilter, Ball, Jay, and Co., of Moorgate street, and a meeting of the creditors will be convened at the earliest possible opportunity, in order to submit to the creditors a statement of the affairs of the firm, of which meeting you will in due course be apprised.—We are your obedient servants,

Hughes, Kearsey, Masterman, and Hughes.

The failure is also anounnced of Mr Phineas Abraham, West India merchant, of New London street, with liabilities to the amount of about 100,000*l*., of which about 35,000*l* or 40,000*l* is considered to be covered by special consignments. The stoppage has been immediately caused by the excessive amount of bills drawn upon him by a correspondent in Jamaica, with which island the principal part of Mr Abraham's business was carried on. The estate is expected to turn out favourably.

Messrs Cuppa Brothers, a respectable Greek house, yesterday suspended payment, with liabilities for about 70,000*l*, half of which is already secured, being on account of one of the principal establishments in Constantinople. The firm has for some time been making sacrifices in order to prevent a stoppage, but has at last been obliged to succumb. The estate is expected to turn out favourably.

Advices from Havana mention the failure of Messrs Arrigunaga Pedrozo and Co., with large liabilities.

It is stated that the Count de Germiny has resigned his position as official liquidator of the affairs of M Mirès.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.40 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 6-10ths per cent. dearer in London than in Paris.

The course of exchange at New York on London for bills at 60 days' sight is about 105¾ to 106 per cent. for first-class bills. Although this shows the exchange to be against England, the high rate of interest and the loss of time before the gold is received back from the American mints render it doubtful if any profit can be made at the present rates by sending gold to the United States.

The Commercial Times.

MAILS ARRIVED.

LATEST DATES.

On the 24th inst., AMERICA, per steam ship Adriatic, via Southampton—New York, 18th inst.

On the 27th, AMERICA, per steam ship North Briton, via Londonderry—Portland, Maine, 16th inst.

On the 29th, AMERICA, per steam ship Bremen, via Southampton—16th.

MAILS TO BE DESPATCHED.

This evening, to America (New York line), by British packet, via Queenstown.

On Tuesday morning, to West Indies and Pacific.

On Wednesday morning, to America (New York), by United States packet, via Southampton.

On Wednesday evening, to India (Bombay line), via Marseilles.

On Thursday morning, to India (Calcutta line), Ceylon and China, via Southampton.

On Thursday evening, to Canada and United States, by Canadian packet, via Londonderry; to Constantinople, by French packet.

On Friday evening, to Cape of Good Hope.

On Saturday evening, to America (Boston line), and Newfoundland, by British packet, via Queenstown.

Imports of the week ..... 223,910 qrs.

COMMERCIAL EPITOME.

THURSDAY NIGHT.

The wheat trade at Mark lane, this week, has been active, at 1 to 2s per quarter more money. Fine barley and oats have commanded full prices; but other articles, except flour—which has advanced 1s per sack—have moved off slowly at late rates. The imports from abroad have amounted to 13,470 quarters of wheat; 910 barley; 9,250 oats; 700 sacks and 11,340 barrels of flour.

The Liverpool market has ruled steady for wheat and flour, and prices have had an upward tendency.

Our advices from Alexandria, forwarded by Messrs Briggs and Co., and dated the 13th inst, state that the cotton trade was heavy, and that prices were a shade lower. Freight by steamer to Liverpool, ⅛d per lb.

The cotton market this week opened with a very strong tendency to a further rise, the advices from America per Adriatic again reporting a great falling of in the receipts, and the crop now generally being estimated under 4,000,000 bales. On Monday prices for the lower descriptions of American cotton were fully ¼d above last Friday, but in the course of the week this advance has been partly lost, and to-day the quotations are about ⅛d higher than on that day. The sales in five days are 69,000 bales, of which 38,000 are to spinners, 13,000 on speculation, and 18,000 for export. To-day, 8,000 bales have been sold, with a steady market.

The public sales of tea have gone off steadily, and prices have been well supported. Privately, the market is steady, on former terms. The following statement, dated Hong Kong, February 15, refers to the tea and silk trades:—

Canton Silk—Settlements have been trifling, amounting to 20 piculs for Bombay, Loogkong at 450 dols, and Kumchuck 440 dols; 60 boxes re-reeled Kumchuck have also been taken for America at 490 dols. Tea—During the fortnight a moderate business has been done, but at fully previous rates, and latterly dealers have shown more firmness. Scented teas, small settlements, and at no decline. County greens are beginning to come in, and a portion has been taken at extreme rates for America. Further supplies are looked for shortly. Sales and stocks are as follows:—Congou—Sales, 23 chops (including two contract) Ohnams, 20½ to 24 taels; Oopack, 25½ to 32 taels; stock, 57 chops. Souchong—Sales, 1 chop, at 38 taels; stock, 3 chops. Scenetd Orange Pekoe—1,000 boxes, at 23 to 24 taels. Scented Caper—5,000 boxes at 12½ to 24 taels. Canton-packed Congou—1,500 half chests, at 19 to 23 taels. Canton Greens—Gunpowder, 6,000 boxes at 12½ to 19 taels. Country Greens—770 packages; stock, 3,030 packages. Prices have not transpired; but it is understood that cargo young hysons have realised 23 to 29 taels, and for the higher descriptions of gunpowder, imperial and hyson, 48 to 60 taels have been paid. Freights to London, 2*l* 10s to 2*l* 15s for tea. Foo-chow dates are to the 7th inst. Tea—The settlements show a falling off compared with any previous period of the season, and a good portion is for the colonial market. Any general inquiry has been checked by increasing firmness of the teamen, who are unwilling to realise at the present rates, and who do not seem to be at all pressed for money. The receipts from the country have fallen off, and stocks present a corresponding decline. There is now a generally prevailing impression that future supplies will be below the hitherto estimated accounts—an opinion confirmed to some extent by the "low dusty" quality of many of the late arrivals. Shanghai advices are to the 6th inst. Silk—Settlements for the fortnight reported as 3,000 bales, making a total for the season of 70,000 bales. Rates remain unaltered, but all kinds of Tsatlees are very firm at previous quotations,—viz., Tsatlee, No. 1, 2, and 3, none; No. 3, taels 410; No. 4, taels 300; inferior, taels 340 to

380. Taysaam—No. 1, taels 360; No 2, taels 340; No. 3, taels 300 to 310; No. 1, taels 280; inferior, taels 240 to 270. Supplies likely to continue good; but the native holidays expected to retard arrivals of any consequence for a short time. Total export of silk from China to Europe is 67,483 bales against 48,990 last year, or an increase for this season of 18,493 bales. Tea—Transactions in all descriptions have been very small, and show no alteration in prices. Total export of tea from China to Great Britain is 66,513,000 lbs against 60,197,300 lbs to same time last year, showing an increase of 6,315,700 lbs for this season. To the United States the export is 20,780,400 lbs against 25,320,500 lbs, or a decrease for this season of 4,540,100 lbs.

Good and fine qualities of raw sugar have moved off freely, and, in some instances, the quotations have had an upward tendency. Low and damp parcels, however, have sold heavily, at late rates.

On the whole, a fair amount of business has been passing in the coffee market, on former terms. The following report in reference to the coffee trade at Colombo, and dated the 1st inst., is forwarded by Messrs Fryer, Schultze, and Co. :—

Plantation Coffee we now quote at 11s 3d per bushel, equal to 63s 2d per cwt f.o.b., including exchange, at which price some parcels have been disposed of. Exports from 1st October to 26th February are as follows:—

	cwts			cwts
To Great Britain	152,455	against	last year	163,724
— Foreign ports	12,151	—	—	10,522
— Australia and India	5,934	—	—	6,499
	170,540			180,745

Native Coffee—The arrivals from the interior continue to be moderate, and dealers are unwilling to submit to lower prices. Our quotations are for unpicked 41s 6d per cwt, equal to 49s 7d picked and dried f.o.b., including exchange. Shipments are as follows:—

	cwts			cwts
To Great Britain	34,354	against	last year	56,584
— Foreign ports	20,983	—	—	20,537
— Australia and India	3,441	—	—	493
	58,778			77,614

Freights—The supply of tonnage has somewhat influenced rates, and coffee in casks can now be engaged at 3*l* 12s 6d to 3*l* 15s per ton; in bags, 30s.

Annexed is an official statement of the total quantity of coffee, sugar, and indigo produced in the island of Java during the years 1859 and 1860:—

	Coffee. tons		Sugar. tons		Indigo. tons
1859	50,472	.....	123,690	.....	974,381
1860	68,124	.....	127,197	.....	950,868
Total increase...	17,652	.....	3,507	...decr.	23,513

There has been a fair demand for rice, and prices have ruled very firm.

The public sales of colonial wool have been brought to a close, and they are thus reported bp Messrs Bradbury and Cook:—The first series of public sales of colonial wool commenced on the 28th February, and closed on Thursday. The catalogues contained the following quantities:—Sydney, 6,555; Port Philip and Portland Bay, 23,942; Van Diemen's Land, 723; Adelaide, 8,207; Cape, 16,352; New Zealand, 1,435—total, 57,214 bales. Russian Merino, 2,643; Spanish and Portugal, 318; German, 170; Buenos Ayres, 113; sundries, 839—total, 4,083 bales. There has been a good attendance of the home trade throughout; and during the last fortnight foreign buyers have also operated very freely, their purchases amounting to fully one-fourth of the whole sale. Prices opened about 2d to 3d per lb below those of last series, and at this reduction there has been a pretty evenly sustained competition. The unprecedentedly large arrivals from Victoria and Adelaide in time for these sales have no doubt tended to increase the general depression. Many of the flocks from Victoria have improved in breed, and the bulk of this wool has been brought to market in excellent condition. Some of the marks have suffered in price from being too short grown and tender in staple. On scoured Cape wools, which were much depressed at the last sales, there is a further decline of 2½d per lb, arising chiefly from its defective breed, condition, and length. The fleece wool from this colony sold steadily, at a reduction of about 1½d per lb. Scoured wools, both from Australia and Odessa, have been much depressed; the reduction on these is 3d to 4d per lb.

In the various other markets, the transactions have been on a very moderate scale. English copper has fallen 4*l* 10s per ton, and linseed oil has sold at 28s to 28s 3d per cwt on the spot. Tallow has declined to 59s per cwt for Y. C.

"The week closes," observes the New York *Shipping List* of the 16th inst., "with a decidedly dull money market, and a marked tendency to lower rates of interest. The applications, both at Bank and at the discount houses, are extremely moderate, and, with a renewal of the specie importations from Europe, unaccompanied by any noticeable increase of activity in commercial operations, the volume of unemployed capital, as might be expected, is steadily increasing. Large amounts of what in ordinary seasons would be considered paper of an unquestionable character, are to-day floating about unsaleable. On call, the demand during the week has been moderate. The general market, however, continues to be correctly represented by the figures annexed:—

	Per cent. per annum.
Loans on call, stock securities	6 to 6½
Do. other good securities	7 ..
Prime endorsed bills, 60 to 90 days	7½ 8
Do. 4 to 6 months	7½ 10
First-class single signatures	9 12
Other good bills	12 15
Names less known	18 24

The dry goods auctioneers are doing more business. There were three important sales yesterday, all of which were well attended. The activity which characterised the stock market at the commencement of the week, under the influence of favourable advices from Washington, was partially lost on Wednesday, though prices, in the main, were well supported. Yesterday, the dealings in all descriptions were on an extremely moderate scale. The new loan continues in fair demand. For the coupon stock 94 is asked, and for the registered 95¾ is readily paid. In Treasury notes there is a steady business at 102⅞ to 104 for the new 12 per Cents.

The constantly diminishing receipts and estimates of the American crop caused an extremely good demand in the early part of the week, and prices rose fully ⅛d per lb on our quotations of the week previous. The dulness of trade in manufactures, however, and the probability of reduced consumption, owing to the extensive turn-out of operatives from the mills, combined to check the activity of our market, and with returning dulness, some of the improvement in price has been lost. We raise our quotations for American 1-16d to ⅛d per lb. Brazil have been in moderate request at steady prices. Egyptian have rather improved in demand, but are still heavy of sale. East India have gone off readily at full rates. To-day the demand is fair; the sales amount to 8,000 bales. The news per North Britain of a further great deficiency in receipts is calculated to give more confidence to holders. The reported export amounts to 18,130 bales, consisting of 11,890 American, 270 Brazil, and 5,970 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand from most of the manufacturing markets held this week are, on the whole, favourable. About an average business has been passing in goods for India and China, and the continental, as well as the home demand, has somewhat improved. In the iron and coal districts, trade, generally, is flat.

MANCHESTER, March 28.—In this market the extent of business has notably diminished since last week. The decreased estimates of the cotton crop caused spinners, and in a smaller degree manufacturers, to raise prices in the beginning of the week, having been encouraged thereto by the rather larger engagements lately undertaken. Buyers have, however, been deterred by the prospects of foreign markets, whilst sellers have been affected by several failures which have occurred here. Still, in the main, manufacturers remain quite indifferent as to selling; they are ignorant how long the turn-out of weavers at Ashton, Staleybridge, and surrounding districts will continue to lessen the production of cloth, or how soon a like state of things may spread to other localities, since the agitation amongst operatives may in fact be said to be general. In the above districts the stoppage of of 50,000 looms represents a diminution of more than 300,000 pieces per week.

BRADFORD.—The improved condition of the market continues, and staplers are asking higher rates than they were willing to sell at a fortnight ago. The sales effected, however, are said to be chiefly among dealers. There is a fair demand in noils and shorts, at prices which have been current for a month past. There is no improvement in the worsted yarn trade. There is a better feeling in the piece market, and where manufacturers are willing to make a concession a little is doing. The demand for goods, both for export and home consumption, is still incommensurate with the production. The China news is very unfavourable, and several orders for goods suitable for that market have been cancelled.

LEICESTER.—The hosiery trade is dull in most branches; very little business continues to be done at the warehouses, and stocks are being kept down as much as possible. At Loughborough and Hinkley there is no beneficial change in the hosiery trade. There is no alteration in wools, the market being tolerably firm. Yarns are not in request, and spinners are not working full time.

NOTTINGHAM.—The lace trade in most departments remains in the same dull state as for some time past. There have been a few home buyers in the market, and some small orders have been given. The plain net trade continues very flat. A little is passing in fancy nets, muslins, &c., but in no branch is there an average amount of business doing. The silk lace department remains without change. A few patterns are in request, and it is very probable that good articles will be in better demand as the season advances. Manufacturers have not much stock in hand, and are finishing goods to order. In hosiery there is no favourable change to notice. Business in most departments remains extremely flat, and many framework knitters are out of work. Yarns are selling at late rates.

BIRMINGHAM.—The preliminary meeting of the ironmasters of this district was held in this town on Thursday. After a brief discussion it was resolved to adhere to the old scale of prices for all descriptions of manufactured iron. The representatives of most of the leading firms in the district were present, and it was generally admitted that the trade was extremely dull.

BELFAST.—The partial activity which prevailed last week in the shipment of finished goods to America, has been followed by a lull of the utmost quietude. Home demand is very limited, except in the finer lines of linens, which have been moved off at full prices, Coarse goods, so largely taken off in the spring of last year, are very slow of sale, the great depression of employment in the labour market having the worst effect on that department of the trade. France has not yet been doing even a moderate business in linen goods. Since the commencement of the year, stocks of finished fabrics have been accumulating, not, however, to an extent likely to influence values.

WOLVERHAMPTON.—The business doing in iron is still very moderate: nevertheless, compared with last week, no change has taken place in the quotations:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine Nos. 1, 2, and 3 melters, made with Lord Ward's thick coal warm air, 4*l*; Old Windmill End Mine forge pig iron, made with Lord Ward's thick coal, 3*l* 12s 6d; best native hydrate pigs, 3*l* 10s to 4*l*; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 10*s*; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 7s 6d to 3*l* 10s; Barrow hæmatites, 3*l* 7s 6d to 3*l* 10s; Workington hæmatites, 3*l* 7s 6d to 3*l* 10s; Kirkless Hall hæmatites, 3*l* 6s 3d to 3*l* 8s 9d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. Favourite Shropshire and Forest of Dean brands, 4*l* 5s delivered; Northern hæmatites from 3*l* 5s to 3*l* 10s, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, March 16.—There has been rather an improved feeling in the demand for all kinds of flour, and prices have ruled firm. More business has also been passing in wheat, at extreme rates; and the corn trade has ruled tolerably active, on rather higher terms.

NEW YORK, March 13.—With a moderate inquiry from the local and Eastern trade, and a light demand for export, the market for State and Western flour has been somewhat depressed, and a further slight reduction in prices has had to be submitted to, in order to effect sales to any extent. Canada flour is dull and drooping. Southern flour is in moderate request, and prices may be quoted a shade lower.

EXPORT from 1st to 12th March.

	1861. barrels	1860. barrels
Wheat Flour	76,624	21,907

There has prevailed a moderate demand for wheat for local milling and export, and prices have steadily tended in favour of the purchaser. The sales comprise 170,000 bushels, of which about 44,000 changed owners yesterday. Corn is steady, with a moderate business, comprising 115,000 bushels, including 45,000 yesterday, at 66 cents for old Western mixed, in store, 67 to 68, delivered.

EXPORT from 1st to 12th March.

Wheat	261,473	8,757
Corn	235,030	16,069

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, THURSDAY EVENING.

Notwithstanding that somewhat increased supplies of home-grown wheat have been on offer during the past week, the demand for most kinds has continued somewhat active, at a further improvement in value of from 1s to 2s per quarter. There has been an improved feeling in the sale for foreign wheats, at quite 1s per quarter more money. Fine barley has realised full currencies; but other descriptions have changed hands slowly, at barely late rates. Malt has moved off slowly, on former terms. The demand for oats has fallen off, and inferior qualities have had a drooping tendency. Beans and peas have ruled about stationary. Both English and foreign flour has commanded more attention, and prices have rather advanced.

Most of the continental markets have continued firm for wheat, at full quotations. Barley and oats, of fine quality, have commanded former terms. In other produce, very little has been passing.

In Scotland, wheat has realised rather more money; but the demand has been by no means active. The inquiry for spring corn has fallen off; but flour has advanced about 1s per 280 lbs.

The Irish markets have, for the most part, been in a most sluggish state. However, in some instances, fine dry wheats have produced rather more money. The exports to England continue on a very moderate scale for the time of year.

At our market on Wednesday, wheat, both English and foreign, commanded Monday's improvement in value of from 1s to 2s per quarter. Fine barley and oats supported previous rates; but the demand was by no means active. Flour was very firm in price.

To-morrow being a close holiday, no market will he held here.

Floating Cargoes.—There has been 75 arrivals of grain-laden vessels off port up to last night, since the 21st inst., consisting of 37 cargoes of wheat, 4 rye, 15 maize, 8 barley, and 11 miscellaneous. A fair business has been done in cargoes, and the quotations have had an upward tendency.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, THURSDAY MORNING.

SUGAR.—The improved feeling noticed in this market at the close of last week has continued during the present one, and the sales have gone off with spirit at 6d to 1s advance, notwithstanding the liberal supplies still offering. Some qualities show a rise of 1s 6d from the lowest rates current in the middle of the month, the demand being now very general. Refiners have bought largely, and good to fine crystallised sorts are taken eagerly by the grocers. There were 979 casks West India disposed of to yesterday, including grainy Berbice and Demerara offered by auction, which realised 36s 6d to 42s 6d per cwt. Floating cargoes taken for exportation are dearer. The landings last week were 3,110 tons, and the deliveries amounted to 4,870 tons, leaving the stock at the close 51,700 tons, against 48,700 tons and 45,750 tons in the two previous seasons at the same time.

Mauritius.—19,760 bags offered in the public sales on Tuesday all sold, and generally at 6d or occasionally 1s above last week's quotations: crystalised, 16s duty, 45s 6d to 46s 6d; 13s 10d duty, 39s to 44s; grainy, 37s to 43s 6d; soft low grey to good yellow, 36s to 41s 6d; brown, 31s to 35s 6d per cwt. Several parcels have changed hands by private contract.

Bengal.—2,291 bags, chiefly of the lower grades, found buyers: soft brown, 30s 6d to 31s 6d; good Cossipore, 42s to 42s 6d per cwt.

Madras.—426 bags brown native sold at 31s to 31s 6d per cwt.

Foreign.—Transactions on the spot include 3,000 bags low brown Siam, at 30s 6d; 3,000 boxes Havana, at 37s 6d to 41s 6d; and 2,000 bags Pernambuco, at 32s to 32s 6d. A floating cargo of Java, No. 11 to 11½, has sold at 25s 6d, for a near port; one of Havana, at 26s, No. 12½, for the same destination; one, No. 15, at 29s, for the Mediterranean; and one of Cuba muscovado, for the United Kingdom, at 24s. Of 39,520 bags Manilla, by auction, about 22,000 bags sold at 34s to 35s for clayed. 273 casks Cuba sold: brown and low grey, 33s 6d to 36s; yellow, 36s 6d to 44s.

Refined.—Owing to the limited supply of goods, prices have further advanced 6d to 1s, and the market has been nearly cleared. Low to middling descriptions may now be quoted 49s 6d to 50s 6d. Crushed is stationary at 47s 6d to 49s per cwt. The refiners are, however, increasing their productions, so that a better assortment may shortly be expected.

RUM.—The reduced supply offering prevents business of importance, and the market is firm. Good Demerara has sold at 1s 11d; Surinam, 1s 9d per proof gallon.

COCOA.—No public sales were held yesterday, but there appears to be more inquiry for West India privately.

TEA.—There has been rather a limited business by private contract since last week, and prices exhibit no change to notice. The further public sales were commenced yesterday, the catalogues consisting of 3,045 packages of Assam and 5,670 packages of China descriptions. Good qualities of the former went at previous rates. Common was cheaper by 1d to 2d per lb.

COFFEE.—This article maintains its recent firm position, and there are still small supplies offering. Coloury plantation Ceylon has met with inquiries, commanding rather higher rates. 417 bags Bahia were principally bought in at 55s to 60s 6d, a small portion selling at 55s to 58s 6d. About 1,500 bags Rio, bought in last week, have since been disposed of at 54s to 58s. A floating cargo of Rio has been sold at 51s 6d per cwt for a near port.

RICE.—Since last Friday the sales have been moderate on account of the high rates now required by holders. There are still inquiries for soft grain descriptions at the recent advance. Privately fine to good Necrancie Arracan has sold at 10s 9d to 11s 1½d; low to good white Bengal, 11s 1½d to 13s; low Moulmein, 9s 9d. A floating cargo of Larong Arracan has sold at 10s 3d for Liverpool; Ballam afloat has realised 10s 1½d ex-ship, or 10s 4½d per cwt landed.

IMPORTS and DELIVERIES of RICE to March 23, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SPICES.—The market is quiet, and few changes have occurred. 800 bags Alleppy pepper were taken in at 4½d. 189 cases nutmegs sold at 1s to 3s 6d. 52 cases mace, 11d to 1s 2d. 7 cases Penang cloves, 1s 3¼d to 1s 3½d. 55 bags Zanzibar were taken in at 3⅞d to 3⅞d. 800 bags pimento part sold at 2⅝d to 2⅞d. 38 bales Ceylon cinnamon, fourth to first sort, 8d to 1s 6d per lb. 107 bags African ginger were bought in at 37s 6d per cwt.

SAGO.—360 boxes small grain were bought in at 17s 6d per cwt.

SALTPETRE.—The market is still firm, business being restricted by the reduced quantity offering, and the enhanced rates required by importers. Bengal, refraction 8¼ to 4, has sold at 36s 6d to 38s 3d. 354 bags Bombay, refraction 4⅝ to 9⅛, 31s to 34s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to March 23, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	3700	3400	5020	2030
Delivered	2760	3335	4210	3320
Stock	4715	3900	3750	5115

Deliveries last week 328 tons.

COCHINEAL.—184 bags went off at about former rates. Honduras silver, 2s 9d to 3s 2d; Teneriffe, 2s 7d to 2s 9d; ditto blacks, 2s 10d to 3s 4d per lb.

DYESTUFFS.—Gambier is less readily saleable. By auction, on Tuesday, fair quality, rather dark, partly sold at 16s 6d; heated, 15s 9d to 16s. A portion of the sound was bought in at 17s, and since realised. Nothing has transpired privately in Cutch, pending the expected public sales. Good quality, 24s to 24s 6d per cwt. Safflower is firm.

SAPAN WOOD.—80 tons Siam found buyers at 8*l* to 9*l* 5s per ton.

JAPAN WAX.—2,540 cases partly sold at 58s to 65s per cwt.

METALS.—The general demand is still rather inanimate. Most kinds of manufactured iron have been dull at the quotations. Latest transactions in Scotch pig iron were at 47s 3d for mixed numbers. Spelter is firmer, 18*l* 2s 6d per ton having been paid on the spot. Lead is quiet at the reduction in price last noticed. British copper has fallen ¼d per lb. The market for foreign tin has been without improvement: Straits quoted 117s to 117s 6d per cwt.

HEMP.—Petersburg clean is firm at 31*l* to 31*l* 10s per ton. No sales have been reported in Manilla by private contract. 1,900 bales by auction were sold at lower rates: common to good roping, 21*l* to 22*l* 12s 6d; good white, 34*l* to 34*l* 2s 6d.

LINSEED.—Moderate transactions have taken place at the quotations, which are about the same as before: Calcutta, 50s 6d to 52s; Bombay, 53s to 54s per quarter.

OILS.—No alteration is perceptible in the value of common fish oils or sperm. Quotations for olive on the spot are the same as on Friday last. Linseed oil remains steady at 28s to 28s 3d, and foreign refined rape at 40s 6d to 41s. The market for cocoa-nut has been inactive, and former quotations are not quite obtained. Palm sells slowly at 44s to 44s 3d per cwt.

TALLOW.—The relatively low value of Australian and other sorts, coupled with the reduction on town-melted last Friday, has quite unsettled the market for Russian, the consumers still making limited purchases of the latter. This morning, 1st sort Petersburg Y. C. closes at 58s 6d to 59s; April to June, 57s 6d; for delivery in the last three months, 55s to 55s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, March 25.

POSTSCRIPT. THURSDAY EVENING.

SUGAR.—The market was firm to-day, with a steady demand. 1,153 hhds West India sold during the week. By auction, 5,594 bags China partly sold: fine white, 47s to 47s 6d; grey and soft yellow, 34s 6d to 36s 6d; dark brown, 28s 6d to 31s 6d. 820 bags Natal, 33s 6d to 41s. 6,850 bags Mauritius and 943 bags native Madras realised the previous quotations. Privately, several parcels Mauritius changed hands; also 2,000 bags clayed Manilla at 35s; 1,000 boxes Havana at previous quotations; and 850 casks foreign muscovado at 36s 6d per cwt.

TEA.—The sales concluded to-day, without further change in prices of China.

RICE.—13,900 bags Bassein partly sold at 10s to 10s 6d for common quality. About 6,000 bags soft grain descriptions are reported on the spot.

SALTPETRE.—601 bags French manufactured, by auction, were bought in at 35s per cwt, refraction 3½. Privately, further business was done in Bengal, refraction 7¾ to 6, at 36s 9d to 37s 6d per cwt.

COCHINEAL was unaltered, excepting for blacks, which went cheaper.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been well supported this week for all description of goods, at about 6d advance. Treacle is in better demand and scarce. Dutch crushed continues very firm. 150 tons V. O. have been sold at 32s 3d, and S. & T. superfine at 33s, all in barrels f. o. b. in Holland.

GREEN FRUIT.—Market bare, contrary winds preventing arrivals. Some parcels oranges from St Michael's and Valencia, sold by Keeling and Hunt at public sale, went at an advance of 2s per package. Lemons without alteration. Nuts of all kinds at easier rates, the consumption falling off, owing to the depressed state of trade, which has its effects on articles of luxury.

DRY FRUIT.—The improvement in fruit is continued, and in currants none are now to be had below 27s. Fine Gulf are more inquired for. Raisins are firm at last week's rates.

ENGLISH WOOL.—Rather more inquiry for English wools this week than there has been lately, and prices are firm at the late quotations.

COLONIAL WOOL.—The colonial markets closed to-day with rather a firmer tone. The East India and low wools have realised good prices.

FLAX unaltered, very little Russian being now left on hand.

HEMP firm, and holders are looking for higher rates, the spot demand being improved and stocks at the outports lower than usual.

COTTON.—Sales of Cotton from Friday, March 22, to Thursday, 28, inclusive;—600 bales Surat, at 5½d to 5¾d for fair to good sawginned, 5⅝d for good fair Broach, 5½d to 5⅝d for fair to good fair Dholleras; 1,050 bales Tinnevelly, at 5⅞d to 6d for good fair to good; 350 bales Western Madras, at 4¼d for good fair. The market continues firm, and extreme prices have been paid for Surat and Western Madras, and for good Tinnevelly an advance of ⅛d per lb may be quoted. The transactions have been moderate, owing to the small quantity offering. To-day 1,794 bales middling fair to fair Tinnevelly and 100 seedy Surat were offered at public sale: the former were bought in at 5¾d to 6d, being ⅛d to ¼d per lb above the value. 4d was refused for the Surat, and they were bought in at 4⅛d per lb.

TOBACCO.—Demand has continued moderately active for good and fine Western strips, and the market has assumed a very firm appearance. Some small sales have been effected for exportation.

SILK.—No change. Prices the same. A good deal doing in China silk. Good Tsatlee very scarce. Bengal silk continues dull.

LEATHER.—The leather market has been rather inactive during the past week, and at Leadenhall, on Tuesday, the wants of buyers were limited. The supply of fresh leather was moderate, and prices generally were unaltered.

METALS.—Copper was reduced in price on Tuesday last 4*l* 10s per ton, but as this had been already more than anticipated, the market is not changed in consequence. There have been no transactions of note reported this week. Iron continues much depressed, and it is difficult to foresee how the market can at present right itself from the damaging effects of the new American tariff. Lead is rather drooping. Tin plates are in somewhat better inquiry, although still very flat.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	56	6
Fat by ditto	2	11
Yellow Russian	60	0
Melted stuff	37	6
Rough ditto	22	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market quiet, but steadily maintains previous quotations. Fine butter scarce, otherwise without change.

METROPOLITAN CATTLE MARKET.

MONDAY, March 25.—The total imports of foreign stock into London, last week, amounted to 2,106 head. In the corresponding period in 1860, we received 2,351; in 1859, 3,065; in 1858, 414; in 1857, 1,094; in 1856, 268; and in 1855, 1,378 head.

The show of foreign stock in to-day's market was seasonably good, and in fair average condition. Sales progressed slowly, and prices had a drooping tendency. Fresh up from our own grazing districts a good supply of beasts came to hand, and its general quality was prime—the Scots and crosses being unusually good. Although the attendance of butchers was somewhat numerous, the beef trade ruled heavy at a decline in the quotations realised on Monday last at fully 2d per 8 lbs. The general top figure for beef was 4s 8d, but a few Scots realised 4s 10d per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire we received 2,000 Scots, &c.; from other parts of England 500 various breeds; from Scotland 280 Scots and crosses; and from Ireland 28 oxen, the latter in middling condition. The total number of sheep was tolerably good, but the show of Downs and half-breeds was very limited. These breeds supported last week's currency; but long-woolled sheep were very dull, and 2d per 8 lbs lower. The general top figure for Downs was 5s 10d; but few pens realised 6s per 8 lbs. Lambs, the supply of which was moderate, sold slowly at from 7s to 8s per 8 lbs. From the Isle of Wight 150 lambs came fresh to hand. We have to report a steady sale for calves at last week's currency, viz., from 5s to 6s per 8 lbs. There was a slow inquiry for pigs; nevertheless the quotations were supported.

SUPPLIES	March 26, 1860.	March 25, 1861.
Beasts	3380	3580
Sheep	21240	19260
Calves	95	79
Pigs	310	240

HOP MARKET.

BOROUGH, Thursday, March 28.—Good and fine hops are in steady request, at very full prices. Inferior parcels are firm in value; but the business doing in them is much restricted.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, March 25.—During the past week the arrivals coastwise have been moderate, but plentiful by rail; the quantity at market is more than equal to the demand, the prices remain much the same; the following are this day's quotations:—Yorkshire Flukes, 130s to 140s; Lincolnshire Regents, 100s to 110s; Dunbar red soil ditto, 140s to 160s; ditto, ditto, reds, 105s to 120s; North Berwick Regents, 120s to 125s; Perth, Forfar, and Fife ditto, 90s to 110s; ditto, ditto, ditto Rocks, 80s to 90s; ditto, ditto, ditto reds, 75s to 80s; French whites, 60s to 90s; Belgian ditto, 60s to 80s; Dutch ditto, 60s to 80s per ton.

BOROUGH AND SPITALFIELDS, Thursday, March 28.—These markets continue to be extensively supplied with home-grown potatoes, and the trade generally rules inactive, at previous currencies. Dunbar Regents are worth, 150s to 170s per ton.

COAL MARKET.

WEDNESDAY, March 27.—Bell's Primrose Gas 13s 6d—Craghead Steam 14s 9d—Davison's West Hartley 15s 9d—Dean's Primrose 14s 6d—Hastings' Hartley 15s 9d—Tanfield Moor Butes 13s—Walker Primrose 12s 9d—Wall's-end:—Wharncliffe 15s 6d—Braddyll's Hetton 17s—Stewart's 18s 6d—Tunstall 17s—Thornley 15s—Carway and Duffryn Malting 24s. Ships at market 70; sold, 24.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

THURSDAY, March 28.—The improved feeling has so far not yet led to any great amount of business, owing, in some measure, to the circumstance that buyers endeavour to obtain such concessions in price as holders are not disposed to make; the transactions are consequently restricted to the supply of immediate wants at current rates.

METALS.

(FROM OUR OWN CORRESPONDENT.)

THURSDAY, March 28.—The demand for manufactured iron is still of a limited character, but the price of good iron is well maintained. In Scotish pig iron, there has been more activity at somewhat improved rates. Copper has this week been reduced in price by the smelters ¼d per lb on manufactured copper, and £4 10s per ton on tile and best selected. Most other metals remain unchanged, and in limited demand.

The Gazette.

TUESDAY, March 26.

BANKRUPTCY ANNULLED.

T. Ellison, Liverpool, baker.

BANKRUPTS.

J. King, New Alresford, Southampton, saddler.
J. H. Gates, Manor street, Clapham, builder.
P. Raphael, Duke street, Aldgate, wine merchant.
T. Wood, Colchester, builder.
G. E. Parker, late of Moorgate street, and Buckingham street, Strand, dealer in foreign goods.
G. Norman and G. B. Norman, Birmingham, brass founders.

EPITOME OF RAILWAY NEWS.

☞ TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 16th of March amounted to 480,670*l*, and for the corresponding week of last year to 459,160*l*, showing an increase of 21,510*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 208,293*l*, and for the corresponding week of 1860 to 198,333*l*, showing an increase of 9,960*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, March 25.—In the railway market to-day the transactions were again very limited, but prices were generally steady. In some stocks a slight improvement took place, especially Great Western, South-Eastern, and Caledonian. Eastern Counties, on the other hand, was flat. Foreign descriptions were dull, and South Austrian and Lombardo-Venetian receded to 1⅜ to ¼ dis. No material alteration occurred in American railway securities. There was a better demand for mines, and the closing quotations showed increased firmness. Joint stock banks closed about the same as on Saturday In miscellaneous securities, Victoria Dock stock, Electric Telegraph, and Canada Land shares were quoted lower.

TUESDAY, March 26.—The railway market advanced this morning on a demand for some stocks for the settlement to-morrow, but, the transactions being chiefly confined to the dealers, a relapse soon took place. The public continued apparently to make moderate investments, but the current speculation in this department, especially in the provinces, were for the fall. Compared with yesterday a decline occurred in London and North-Western and Midland, and an improvement in Great Western and North-Eastern stocks. In foreign market there was a decline in Pernambuco. South Austrian and Lombardo-Venetian remained at 1⅜ to ¼ dis. American railway securities left off without alteration. Mines were in moderate demand, and in one or two cases showed a reduction. Ottoman bank shares were dull. Miscellaneous decriptions closed the same as yesterday.

WEDNESDAY, March 27.—In the railway market the progress of the settlement showed a moderate absorption of stock by the public, especially as regarded London and North-Western. Midland and Great Western, on the other hand, were more supplied. Prices during the day remained generally steady, but late in the afternoon the market was very flat on the adverse rumours from Paris. Although the present quotations were for the new account in April, they exhibited a decline of 1¼ per cent. in Midland and Sheffield, and of ⅝ in Lancashire and Yorkshire and Great Western. Colonial descriptions remained without change of importance, but in the foreign market South Austrian and Lombardo-Venetian shares receded. American railway securities closed about the same as yesterday. There was not much doing in mines, but in several cases the final quotations were higher. No material variation occurred in joint stock banks or miscellaneous descriptions.

THURSDAY, March 28.—The railway market opened flatly, partly from the fall in the funds, and partly from a decline in the Midland traffic return. Lancashire and Yorkshire and Midland were prominently heavy, the former from some sales for transfer. North-Eastern stocks, North British, and South-Eastern were also depressed. In the colonial market there were few changes of importance. Foreign descriptions were dull. The transactions in mines were limited.

FRIDAY, March 29.—This being observed as a holiday in the Stock Exchange, no business was transacted in the railway and mining markets.

POLYTECHNIC INSTITUTION.—This institution appears to have regained favour with the public during the present management, to which great credit is due for having revived so important an undertaking. The attractions for the ensuing week are considerable. Instruction, no doubt, will be afforded to the old, amusement to the young, and, we hope, satisfaction to all.

FREE ISSUE.

Notice.—The following invaluable works have just been published, and are now being issued gratis to all who enclose two stamps for postage, to No. 27 Alfred place, Bedford square, London.

DR WATSON'S NEW MEDICAL ESSAYS on Nervous and Physical Debility, with their easy Detection and Self Cure. Lately discovered and now made public by the author, with cases and diagrams, showing the connection between the brain and other organs. Also prescriptions and other appropriate remedies for the self-treatment and cure of those special diseases, and whether acquired in youth, manhood, or old age. By Dr Watson, F.R.A.S., London, Member of the Medical Society of Rouen, the National Academy of Sciences, Paris, and Fellow of the Imperial Institute of France, &c., &c. (vide Diplomas and Medical Directory).

FINE TEA CHEAPER.

STRACHAN & CO.'S justly celebrated DRAWING ROOM TEA is now reduced to 4s per lb. Guaranteed the finest and Cheapest Tea in the United Kingdom.
26 Cornhill, London, E.C.

KEATING'S COD LIVER OIL. Just Imported. The Pale from Newfoundland, and he Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within he reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, Imperial measure, at 79 St Paul's Churchyard.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANCASTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr GRANVILLE, F.R.S.—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Light-Brown Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.
SOLE AGENTS,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.
THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

DR CURTIS'S MEDICAL WORK, "MANHOOD." An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

DR ROBERT ROWE ON *INDIGESTION*. This day is published, price 2s 6d, the fifteenth edition, NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.
By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills."—TIMES.

Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.
London: J. Churchill, and to be had of all booksellers.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

MEDICAL CONSULTATIONS.—Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,
37 BEDFORD SQUARE, LONDON.
Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.

These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.

Dr L. La'Mert may be consulted in Glasgow until the 31st March, at 56 Rosebank terrace, St George's road.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

COLLARD AND COLLARD'S NEW WEST-END ESTABLISHMENT, 16 GROSVENOR STREET, BOND STREET, where all communications are to be addressed. *Pianofortes of all Classes for Sale and Hire.*

PIANO-FORTES.—CRAMER, BEALE, and CO. Every description on sale or hire, New and Second-hand. Lists gratis, post free—201 Regent street.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., *46* Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

HOLLOWAY'S OINTMENT AND PILLS.—*Hope for All.*—Whatever their ailments none need despair of being cured till they have tried these inestimable remedies. Whether the disease be internal or external, spontaneous, or the result of violence, if a cure be possible Holloway's medicaments will effect it. The severity or duration of the malady is no bar to the successful influence exerted by these twin medicines, which cleanse, purify, and invigorate every solid and fluid in the body, and completely renovate the digestion. They render every organ of secretion healthy. These admirable antidotes act immediately on the absorbent system, lungs, heart, and circulation, whereby they invariably give energy, tone, and vigour to all the natural functions of life.

HEALTH AND HAPPINESS for the NERVOUS and DEBILITATED.—The proprietors of the Birmingham Institute of Anatomy desire to make known an infallible means of self-cure for the nervous, debilitated, &c., and will forward the same gratuitously on receipt of a stamped directed envelope.—Address "To the Secretary, Institute of Anatomy, Birmingham."

Second Edition, price 2s 6d, post free for 30 stamps,

TOOTH-ACHE: ITS CAUSES, and a New Painless Method of Cure (with as much certainty as water quenches thirst). Teeth cured by this Method will never ache again, and thus prevent the necessity of the painful operation of extraction. By THOMAS HOWARD, Surgeon Dentist to His Grace the Archbishop of Canterbury, 17 George street, Hanover quare, London

CHIMNEY-PIECES, TOMBS, MONUMENTS, FONTS, &c.—EDWARDES BROTHERS and BURKE, 17 Newman street, Oxford street, London, W., beg to inform the nobility and gentry that they manufacture at their own establishments, in Italy and Belgium, as well as at the above address, every description of marble work, at the lowest possible prices. Their galleries contain specimens of all foreign and British marble quarried, in Chimney Pieces, from 25s to 300 guineas each; MONUMENTS AND TABLETS, from £5: Head and Foot Stones, from 30s each.—Sole agents to the Invernettie Granite Company.

OVERLAND ROUTE.—COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

POLYTECHNIC INSTITUTION (Limited). Now open with Great Novelties. Mornings, 12 to 5. Evenings, 7 to 10.—Admission 1s Schools and Children under Ten Years of Age, Half-price.

HOTEL COMPANIES.—

It has been confidently assumed by the promoters of Hotel Companies, in their Prospectuses, that Innkeeping is likely to be better done than ever by the novel means of "Trustees, Board of Directors, Auditors, Standing Counsel, Solicitors, Brokers, Architect, Surveyor, Secretary," and the proprietorship of a multitude of Shareholders. The house is to be built and fitted-up under the direction of Directors who do not pretend to be "Innkeepers;" it is to be far more costly in site, in construction, accommodation,—and therefore in rental,—than any of the old-fashioned Inns; the "charges" are to be less than have been customary at Inns; yet the profits are to be so great that all the subscribers are to derive enormous interest from their capital without any toil. But whilst these propositions are supposed to be taken for granted, there is one question unsettled, not even alluded to, in the Prospectuses, namely, whether Innkeeping be indeed a pursuit consistent with the operation of a share Company.

The enterprise of a former age, perhaps less wise than ours, extended no further in this direction than the production of rental,—contented to leave to the worker the fruits of industry. Will the question, then, bear the test of rental? No one, not even a Company, would propose to build a Hotel except at a place much resorted to, and in a first-class position there. Land is then dear. The Hotel (including land) built for £100,000 in this country would not be of extraordinary proportions. Seven per cent. is not held to be more than a fairly advantageous intrest on Buildings. WHERE would such Hotel be accepted by a TENANT at a Rental of £7,000 per annum? One of the most carefully considered Hotel projects (London) was lately estimated thus:—Land, £180,000, building, £100,000. It is doubtful that the building would have been erected for this amount; yet at £280,000—5 per cent.,—a rental would be required of £14,000 per annum. Surely no tenant but a "Company" could afford to pay that.

It is, however, the praise and glory of the present generation to have discovered that Inns may not only be made to pay such rentals, but also be CONDUCTED by a Company. The fish, flesh, and fowl, the butter and eggs, and soap and candles, the wines and spirits, pale ale and soda water, the linen and crockery, the wear and tear, the men-servants and maid-servants in every degree,—administered by a Board of Directors in conclave assembled once a week! Such is the scope of their jurisdiction. They have to manage the Manager and dispose of his week's budget of perplexities and miscarriages, accidents and offences, at one sitting. Unless the Hotel be large it were not taken up by a Company; the details committed to the Manager must therefore be extensive and various; does he supervise the Cuisine, regulate all things, impose obedience? He MUST know MORE than his masters. How can they govern him? Hence the most necessary, if the least agreeable, duty of the Manager will be to direct the Directors. Alas! to what deception, obfuscation, and folly must they not be liable? Were it reasonable that a man who had the tact to rule the heterogeneous elements of a Directorate, with the ability and knowledge to well manage the Hotel, should not soon prefer to occupy a better position? If fit for a Master, he will not be contented as one of many masters. The Manager *to a* Hotel Company will therefore be an inferior MAN,—a man of tact chiefly.

The proper sphere of a Company, if not vast, is always indefinite; whereas the business of an Inn is absolutely "limited" to the capacity of the building. So many rooms, occupied so and so, and there is an end of it. Superabundance of trade at one period cannot, in this case, compensate deficiency at another. This is one of the many incompatibilities of Innkeeping to the operation of a share Company. What then, has induced the recognition of "Hotel Companies?" It is a delusion.

"Greater the interest, less the security," is a modern axiom; and it undoubtedly applies to Hotel Companies. Innkeeping is made up of minute and multifarious details, and success in it is the reward of diligent and DIRECT control thereof. Is it then fairly presumable that shareholders, as promised in the Prospectuses of Hotel Companies, will obtain 25 or 30 per cent. from money so invested and worked by Directors who, ignorant of innkeeping, would in fact feel insulted by the title of "Innkeeper?" The expectation of shareholders to obtain 30 per cent. interest without participation in the labour of earning, or without imminent risk of loss, is obviously chimerical. Such an overplus after the grandly augmented outlay, and expenses above indicated, and "reduced charges," would imply profits quite gigantic to the individual Innkeeper with his plain house and economical arrangements, and suggest the reflection,—Why, in this age of competition he has maintained his prices! If that promise of the Prospectuses of Hotel Companies were true, it ought not to be so, for it would betray a breadth of margin which must be pronounced unjustifiable in a commercial Company and a robbrey to the public.

ALLEN'S PATENT

PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues post free.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 18 and 22 West Strand, London, W.C.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

TRADE B/P MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark, and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

EAST INDIAN RAILWAY COMPANY.

The Board of Directors are prepared to receive applications in writing (accompanied by testimonials) for the appointment of Assistant Traffic Manager at Howrah, East Indies: Salary £440 per annum. Applications, marked on the outside "Application for the office of Assistant Traffic Manager," must be delivered at the Company's offices, Alderman's walk, London, addressed to the Secretary, on or before 12 o'clock at noon, on Tuesday, the 9th April next.—By order of the Board, D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, March 19, 1861.

THE EAST INDIAN RAILWAY

COMPANY require Stores of the following kinds—namely, COPPER, BRASS, TIN, and LEAD.

Particulars may be obtained upon application at the Company's offices, Alderman's walk, New Broad street, London. Tenders, which must include all charges for packing and delivery free alongside, in any Dock or on any Wharf, or in any part of the stream in the ports of London or Liverpool, are to be made on or before 12 o'clock at noon on Tuesday, the 9th of April next. The tenders must state the date the parties will undertake to deliver the stores, and must be endorsed "Tenders for Stores."—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's Walk, New Broad street, London, 21st March, 1861.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par for the remainder of the sum of £1,500,000 required to complete the total amount which the Company has the power to borrow on Debentures not convertible into shares.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years from the 15th December, 1860, transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice, the bonds will be paid off at the expiration of the first five years on presentation at the Bank of England.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.

No scrip receipt or bond will be issued for a less sum than £50.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, Jan. 22, 1861.

SCINDE RAILWAY COMPANY.—INDUS STEAM FLOTILLA.

— PUNJAUB RAILWAY.—At the Sixth Annual General Meeting of the above Company, held at their offices, on Thursday, the 28th March, 1861, W. P. Andrew, Esq., in the chair, the following resolutions were carried unanimously:—

1. That this meeting receive and adopt the report and accounts of the Directors.

2. That the Directors be authorised, under the sanction of the Secretary of State for India in Council to raise the sum of £83,000 for the purposes of the Indus Steam Flotilla, by the issue of Bonds or Debentures bearing 5 per cent. interest, payable at the expiration of five years, with the option of the holders of such Bonds or Debentures at any time within that period of converting the same into Indus Steam Flotilla Shares or Indus Steam Flotilla Capital Stock.

3. That W. P. Andrew, Esq., and Sir Frederick Arthur, Bart., be re-elected Directors of this Company.

4. That Philip Anstruther, Esq., be re-elected an Auditor of this Company.

5. That the best thanks of this meeting be tendered to the Chairman and Directors for the zeal and ability with which they have conducted the business of the Company.

6. That the cordial thanks of this meeting are due to W. P. Andrew, Esq., for his courteous conduct in the chair this day.

W. P. ANDREW, Chairman.
THOS. BURRELL, Secretary.

Gresham house, Old Broad street, March 28, 1861.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the amount which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, of converting them into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London, 1st January, 1861.

NATIONAL DISCOUNT COMPANY

The Right Hon. Edward Pleydell Bouverie, M.P., President.

William Chapman, Esq., Deputy Chairman.

James Hutchinson, Esq. | William G. Thomson, Esq.
Charles Morrison, Esq. | T. M. Weguelin, Esq.

BANKERS—Messrs Glyn, Mills, and Co.

The Directors are prepared to grant Debentures for loans of sums of £100 and upwards, for periods of 3, 5, 7, or 10 years.

Any information required can be obtained on application to the Secretary. FRED. FEARON, Secretary.

65 Moorgate street, London.

CANADA LANDED CREDIT COMPANY.

Incorporated by Act of the Parliament of Canada.

Capital, £200,000.

PRESIDENT—Lewis Moffatt, Esq.

VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.

DIRECTORS.

The Hon. G. W. Allan, M.L.C.
R. D. Chatterton, Esq.
The Hon. Malcolm Cameron, M.L.C.
Richard L. Denison, Esq.
Charles Donaldson, Esq.
W. P. Howland, Esq., M.P.P., President of Board of Trade.
Thomas D. Harris, Esq., Vice-President Board of Trade.
Lewis Moffat, Esq., Director Bank British North America.
William McMaster, Esq., (McMaster and Nephews.)
Samuel Spreull, Esq.
Mr Sheriff Smith, Collingwood.
E. W. Thomson, Esq., President of the Board of Agriculture.

BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, £500, and £1,000 sterling, for periods of five, seven, or ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West of ample value.

The Company by its charter is always first mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower, or the value of the land mortgaged.

The Company assumes all responsibilities, and guarantees the payment of interest to the day, viz., 1st January and 1st July; at their bankers in London, and the same can be received through any of the country banks.

Investors incur no risk as in a railway or similar undertaking; the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done, made to the Government of Canada, prospectuses, annual report, and further information, may be had of the Company's stockbrokers and agents,

BRUNTON and SON,

Auction Mart chambers, Bartholomew lane, London.

New ready, complete in 3 Vols. 8vo, with nearly 2,000 Wood Engravings, price £4 cloth lettered, or £4 14*s* 6*d* strongly half-bound in russia; to be had also in 15 Parts, 5*s* each,

DR URE'S DICTIONARY OF ARTS, MANUFACTURES, and MINES.

Fifth Edition, chiefly rewritten and greatly enlarged. Edited by ROBERT HUNT, F.R.S. F.S.S., Keeper of Mining Records, &c.: Assisted by numerous Contributors eminent in Science and familiar with Manufactures.

"There can be no question as to the great superiority of this work over that of Dr Ure; and indeed it is not with strict propriety that it is now called 'Ure's Dictionary' at all; it is, to all intents and purposes, 'Hunt's Dictionary'; Mr Hunt having not only been the editor, but, to a great extent, the compiler; although with important aids, of such men as Dr Herapath, Dr Angus Smith (who wrote the article on 'Sanitary Economy,' a novel feature in such a work), Sir William Armstrong, Mr Alfred Tylor, Professor Voelcker, of the Agricultural College, Cirencester; Professor R. D. Thompson, the chemist; Mr G. Ansell, of the Mint; Mr Dafforne, sub-editor of the 'Art-Journal'; Mr Fairholt, Professor Frankland, Dr Normandy, Mr Linton, Dr Noad, and many others,—all able and competent men in their several callings, as the editor himself is well known to be, not only as the keeper of mining records, but as a man of science generally, and, therefore, specially competent as the editor of such a work as this. The book, on the whole, constitutes an important and standard addition to the records of the arts and sciences."—BUILDER.

"To those lovers of science who have not the advantage of possessing a scientific library, this work is invaluable, both on account of its extensive range of subjects and the completeness of its articles; while as a standard work of reference it forms an indispensable necessity to every good library."—JOHN BULL.

A New and Enlarged Edition.

LEADERS OF THE REFORMATION. LUTHER—CALVIN—LATIMER—KNOX. By JOHN TULLOCH, D.D., Principal and Professor of Theology, St Andrews, and one of Her Majesty's Chaplains in Ordinary in Scotland. Second edition, crown octavo, price 6s 6d.

"Dr Tulloch is eminently fair and tolerant, and speaks throughout in the character of a historian, and not of a partisan. He is clearly a sincere seeker after truth—neither a blind idolater nor a reckless iconoclast. He is utterly above all the vulgar religious clap-trap into which his subject might have led an inferior man. Papist and Protestant, Lutheran and Calvinist, Englishman and Scotchman—all are honestly and fairly dealt with."—SATURDAY REVIEW.

Will be let on lease, on very favourable terms.—Apply to Messrs Salter and Rossiter, 17 Abchurch lane, E.C.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

A GENTLEMAN, WHO HAS HAD several years' experience in the Mincing lane trade, is open for a Re-engagement. He is well acquainted with Bookeeping by double entry, and fully conversant with the English, French, and German languages. The highest references given.—Address A. B., at Blight, Stationer, 168 Fenchurch street.

AGENCY.—A FIRM OF LONG standing, having an Establishment and Warehouse in the City, is open to an engagement for receipt or forwarding of goods, or to conduct any agency affairs requiring knowledge of business, confidence, and punctuality. Unquestionable references.—Address, by letter, prepaid, O. N., Messrs Rowsell and Son, 31 Cheapside, London.

CHINA OR INDIA.—A Gentleman, who is an experienced bookkeeper, and would be able to take the Management of the Counting-house Department in a Mercantile office, is desirous of meeting with an engagement for China or India. Unexceptionable references.—Address, Mr Jamesen, 2 Crescent, Minories, E.C.

COMMISSIONS WANTED.—Several Gentlemen representing a first-class London House, calling upon the leading Grocers and Chemists in England and Wales, are desirous of a Commission where the samples are light and the article sold in good demand.—Address C. H., Post office, 33 Mount street, Lambeth, S.

WANTED, BY AN ACTIVE, intelligent Young Man, a situation as Clerk or Messenger: latterly been employed in House and Estate Agents' Offices. Good references from former employers. —Beta, 83 Bolsove street, Regent's park, N.W.

WANTED, A GENTLEMAN to join an established first-class Monetary firm. The present annual returns, and which are rapidly increasing, average about £24,000, and with additional capital will be at once quadrupled. An interest will be disposed of to a suitable party for from £5,000 to £10,000. This investment is well worthy the attention of a person of position seeking most gentlemanly occupation, combined with the realisation of a handsome income, in a very rising house whose business operations are free from risk or of any speculative tendency. Unexceptionable references will be given and required, prior to negotiations being entered upon. Address, in first instance, in real name, accompanied by a reference, to B. and Co., care of W. Penny, Esq., 57 Lincoln's inn fields.

PARTNERSHIP.—Wanted, a Partner to join the advertiser in an old-established Sugar Refinery in London. The partner must be a gentleman of business habits and able to undertake the counting house department, and must be able to introduce a capital of from £15,000 to £20,000. Most unexceptional references will be given.—Apply by letter to X. Y., care of Messrs Marten, Thomas, and Hollams, Solicitors, Mincing lane, London.

PARTNERSHIP.—WANTED, A Partner, with from £15,000 to £20,000 at command, in a well-established and first-class Warehouse in the City. The present annual returns are about £150,000, but with the required additional capital, in a few years may be doubled. To a gentleman competent to take the entire or partial charge of the counting-house department, this presents an undeniable opportunity for a safe and profitable investment, with position. Principals only treated with.—For further particulars, apply to Geo. Laurence, Esq., Solicitor, 12 Bread street, City, London.

TO BILL-BROKERS, BANKERS, and OTHERS.—Lost, on its way by post from Liverpool to London, a Bill for £1,000, drawn by Messrs Wm. Puston and Co., Hong Kong on Messrs Graham, Kelly, and Co., Liverpool, and accepted by them, payable at Messrs Williams, Deacon, and Co.'s, London, in favour of the Nord-Deutsche Bank in Hamburg, six months' from 14th January. The bill was forwarded from Liverpool to Messrs R. Heine and Co., 1 Angel court, Throgmorton street. Payment is stopped at the bankers, and the bill is of no use except to the rightful owner. A Reward will be given to the party taking it to Messrs R. Heine and Co., as above.

THE CITY TURKISH BATHS,
5 SOUTH STREET, FINSBURY.
Open daily, Sundays excepted.
The bath, in addition to being a great curative agent is the greatest physical luxury in the world.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.
FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1859, amounted to £690,140 19s, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

Instituted in the Reign of Queen Anne, A.D. 1714.

UNION ASSURANCE SOCIETY,

FIRE and LIFE.

OFFICES—81 Cornhill, and 70 Baker street, London; and in Bristol, Liverpool, Edinburgh, Dublin, Hamburg, Berlin, and Berne.

Fire Insurances due at Lady-day should be paid on the 25th March, or within 15 days after.

The next Septennial calculation of Life Profits will be made in the year 1862, and all policies effected prior to 31st December, in this year, will participate in the Bonus subsequently to be declared.

This Company combine the advantage of a large accumulated capital, every modern system of insurance, and the experience of 150 years.

WM. B. LEWIS, Secretary.

THE STANDARD LIFE ASSURANCE COMPANY.

Established 1825.

LONDON—82 King William street.
EDINBURGH—3 George street (Head office).
DUBLIN—66 Upper Sackville street.

ANNUAL REPORT, 1861.

The Thirty-fifth Annual General Meeting of the STANDARD LIFE ASSURANCE COMPANY was held at Edinburgh, on Monday, the 25th of February. The following results were communicated in the Report by the Directors, showing the operations of the Company during the year 1860:—

	£	s	d
Amount proposed for assurance during the year, contained in 1,384 proposals	807,747	0	0
Amount of assurances accepted, and for which policies were issued, contained in 1,207 policies	705,897	0	0
Annual premiums on new policies	22,565	4	6
Claims by death during the year, exclusive of bonus additions	104,326	14	8
Annual revenue at 15th November, 1860	304,161	13	7
Arising from premiums.. £227,595 4 1			
From interest on the invested funds	76,568	9	6
	304,161	13	7
Accumulated fund, invested in Government securities, in land, mortgages, &c.	1,805,982	13	6

Average amount of new assurances annually for the last 14 years, Half a Million sterling, being the largest amount of business transacted in that period by any Insurance Company.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

NOTE.—An Adjourned Meeting will be held early in May, to receive the Report on the Division of Profits for the past Quinquennial period.

IMPERIAL LIFE INSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman.

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

ALLIANCE BRITISH AND FOREIGN LIFE and FIRE ASSURANCE COMPANY, Bartholomew lane, London, E.C.

The usual Half-yearly Dividend of 8s 6d a share on the shares of the Company will be in course of payment on, and after Wednesday the 10th instant, between the hours of 11 and and 3 o'clock (Sautrday excepted).—Dated the 4th April, 1861.

F. A. ENGELBACH, Actuary and Secretary.

LONDON LIFE ASSOCIATION,

81 King William street, E.C. Instituted 1806.

PRESIDENT—Charles Franks, Esq.
VICE-PRESIDENT—John Benjamin Heath, Esq.
TRUSTEES.

Francis Hy. Mitchell, Esq.	Robert Hanbury, Esq.
Alfred Head, Esq.	Bonamy Dobree, Esq.

The London Life Association was established more than 50 years ago, on the principle of mutual assurance, the whole of the benefits being shared by the members assured. The surplus is ascertained each year, and appropriated solely to a reduction of the premiums, after seven yearly payments have been made.

If the present rate of reduction be maintained, persons now effecting assurances will be entitled, after seven years, to a reduction of 72½ per cent., whereby each £10 of annual premium will be reduced to £2 15s.

	£
This Society has paid in claims more than	4,000,000
And has policies now in force amounting to	6,440,000
For the payment of which it possesses a capital exceeding	2,700,000
And a gross income from premiums and interest of more than	335,000

Assurances may be effected for any sum not exceeding £10,000 on the same life.

The Society has no agents and allows no commission.

EDWARD DOCKER, Secretary.

A.D. 1720.

Medical Referee, Samuel Solly, Esq., F.R.S.

Notice.—The usual fifteen days allowed for payment of Fire Premiums falling due at Lady-day will expire on 9th April.

Fire and Life Assurance may be effected with this Corporation on advantageous terms.

In the Life Department, assurances are granted with participation in Profits, or, at lower Premiums, without such participation.

The Reversionary Bonus on British Policies has averaged nearly 2 per cent. per annum on the sum assured

Equivalent reductions have been made in the Premiums payable by persons who preferred that form of Bonus.

The divisions of Profit take place every Five years.

Any sum not exceeding £15,000 may be insured on one Life.

This Corporation affords to the Assured

Liberal participation in Profits,—with exemption from the liabilities of partnership.

A rate of Bonus equal to the average returns of Mutual Societies,—with the guarantee of a large invested Capital Stock.

The advantages of modern practice,—with the security of an Office whose resources have been tested by the experience of nearly a CENTURY AND A HALF.

The Corporation has always allowed the Assured to serve in the Militia, Yeomanry, or Volunteer Corps within the United Kingdom, free of charge.

ROYAL EXCHANGE, LONDON.
ROBT. P. STEELE, Secretary.

ROYAL AGRICULTURAL SOCIETY of ENGLAND.

LEEDS MEETING, July 15th, 16th, 17th, 18th, and 19th.

Entries of Implements, Wool, Flax, Cheese, and Butter, close on the 1st of May, and of Live Stock on the 1st of June.

Prize Sheets and Forms for Entries may be had on application to H. HALL DARE, Secretary.

12 Hanover square, London, W.

PRACTICAL GEOLOGY.—

King's College, London.—Professor TENNANT, F.G.S., will give a COURSE of LECTURES on GEOLOGY, having especial reference to the application of the Science to ENGINEERING, MINING, ARCHITECTURE, and AGRICULTURE. The Lectures will commence on Friday morning, April 12th, at 9 o'clock. They will be continued on each succeeding Wednesday and Friday, at the same hour. Fee, £1 11s 6d.

R. W. JELF, D.D., Principal.

EVENING LECTURES ON GEOLOGY,

at the Government School of Mines, Jermyn street.—Mr WARINGTON W. SMYTH, M.A., F.R.S., will commence a Course of TEN LECTURES on GEOLOGY, on Monday, 15th April, at Eight o'clock; to be continued on each succeeding Thursday and Monday evening, at the same hour. Tickets for the whole course, price 5s, may be had at the Museum of Practical Geology.

UNIVERSAL PRIVATE TELEGRAPH COMPANY, LIMITED.

The terms for use of this Company's wires are £4 per mile per annum, including maintenance. Professor Wheatstone's Alphabetical Instruments, requiring no battery, can either be purchased or rented.

L. C. HERTSLET, Secretary,

3 Hanover square, W.

PROFESSOR TYNDALL, F.R.S.,

will commence a course of THIRTY-SIX LECTURES on PHYSICS, at the Government School of Mines, Jermyn street, on Monday, 15th April, at 2 p.m.; to be continued on each succeeding Tuesday, Wednesday, Thursday, and Monday, at the same hour. Fee for the course, Thirty Shillings.

TRENHAM REEKS, Registrar.

FREDERICK DENT,

Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 81 Strand, and 34 Royal Exchange.

AIR CIRCULATING AND ANTI-GREASE HATS—

Patented and Manufactured by MAYHEW and CO., 89 New Bond street, W.—These Hats are waterproof, grease proof, and ventilating; they are peculiarly soft and easy in wear, ensuring a comfortable and complete fit to any formation of head, being light, yet durable. First quality, 21s; second ditto, 17s, lash. To be had wholesale at the manufactory, Union treet, Southwark, S.E.

SAUCES.—CONNOISEURS

have Pronounced LEA and PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea and Perrins' name on Bottle, Label, and Stopper.

Sold by Crosse and Blackwell, London, and all respectable Oilmen and Grocers. Sole manufacturers—Lea and Perrins, Worcester.

CHUBB'S PATENT SAFES

—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

ALLSOPP'S PALE OR BITTER ALE:—

Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS,

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers; or "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

The Political Economist.

THE STATE OF PARTIES.

The state of parties in England just now is not very extraordinary, for we have seen frequently of late years something much resembling it, but it is theoretically rather singular and practically very perplexing. The Government is weak and the opposition is yet weaker. All manner of stories as to possible causes of a "political crisis" are in circulation from time to time; "well-informed persons" will at any moment be ready to explain to you the dangerous results of this or that Ministerial speech in Parliament, and if you will only listen long enough, they will foretell with more or less of confidence exactly when the Government will break up, by assault from without or from inaction within. These ominous conjectures are not, it is true, of any intrinsic value; they are prophecies of what cannot be foreseen, and attempts to know what cannot be known; but though worthless in themselves, they are valuable as indications of political feeling. A Government which is believed to be strong, becomes half strong thereby; a Government which is believed to be weak, is deficient in a most effectual ingredient of power.

There are four participants, if we may use such a phrase, in the present political situation. The country at large and three parties in Parliament—the Conservatives, the satisfied Liberals, and the dissatisfied Liberals; and we shall venture to describe, in a few words, the position and tenets of each.

The country, we believe, wishes no change of Administration; on the contrary, it is well satisfied with the present. It is not, indeed, true that there is any strong personal attachment to Lord Palmerston; he is popular from his vigour, and his courage, and his pliability, and his age, and *because no one else is popular;* but he is supported by no warm enthusiasm, by no fast and firm affection. Possibly it is not granted to successful, easy-minded men of the world to inspire any such feelings: they have their full share of other advantages and blessings in this world, and cannot, therefore, complain if they have not this one also. But after every necessary exception and allowance, it is certain that the country has at present much more confidence in Lord Palmerston than it has in any competing statesman, and that the feeling is to be found in the inner minds of many of those who do not vote with him, as well as of those who do. The general disposition, too, of the country on domestic politics is identical with that of the present Cabinet. It is at once cautiously liberal and critically conservative. The English people, taken as a whole, believe—whether rightly or wrongly is not now the question—that their political institutions are in the main good: they are opposed to every organic change of primary importance or sweeping magnitude; but, at the same time, they have no clinging attachment to the details of their laws: they are ready to alter what can be proved to need alteration, and anxious to substitute whatever can be proved to be the most suitable and desirable substitute: they are as far from the creed of Lord Eldon as from that of Mr Bright—in a word, they criticise what exists, and, *upon evidence,* they will adopt what is proposed. And if this is a true description of the country, it is an almost equally true one of the present Ministry, speaking of them as a body, and not engaging in the discussion of minor differences. The extreme Tories say the present Government *may* alter anything: the extreme Radicals vow it *wishes* to alter nothing: and these are but the appropriate reflexes of a mental disposition at once scrupulously conservative and carefully improving.

So much on domestic matters. Upon foreign policy it will be generally admitted that the opinions of the present Cabinet are much more in accordance with those of the nation than the published sentiments or feelings of any other persons who can by possibility replace them. The cause of Italy has been an excellent measurer of the natural sympathies and temperament of public men. The English people have been able to see which of them corresponded with and which of them were different from their own. They were themselves sincerely and heartily anxious for Italian freedom. They saw that Lord John Russell and Mr Gladstone were heartily anxious for it also, and they could not avoid seeing that Mr Disraeli was anything but anxious.

The country, then, wishes no change of Government. Why, then, does any one wish it? It is not very easy to say why the Conservatives should covet office at the present moment. The wisest and calmest among them we know are not desirous of it, and there is an argument more impressive than any which they could suggest for their not being so. There is the lesson of recent experience. The Conservatives have twice tried the experiment of governing in a minority, and they have failed very ignominiously. No thinking Conservative looks back with anything like satisfaction to the Conservative *regime* of 1852 and 1858. They know that though the Administration of those years were Conservative in name, they were not Conservative in fact;—they know that Mr Disraeli, the ruling spirit of both those Governments, was ready to accept anything, to concede anything, to carry anything;—they know that the only difference between those Cabinets and a Liberal Cabinet was that every Liberal Administration professes to believe in its own measures, and that Mr Disraeli professed, generally ostentatiously professed, to disbelieve in them. He paid a verbal homage to Conservatism, while he was in practical slavery to Mr Cobden and Mr Bright. No wise Conservative, no conscientious man of any opinion, can wish to see these scenes repeated.

It may, however, be said that Mr Disraeli will not be a third time permitted to play his favourite game. On the

contrary, it is doubtless intended by many influential Conservatives that he shall not play it. They will not, or they think they will not, be dragged through the mire for him or for any one. They intend to come in as *true* Conservatives if they come in at all; they hope to carry out the principle of the party both in policy and in legislation, if they should a third time be the occupiers of Downing street.

But we are confident that these more rigid and sincere Conservatives would find upon trial that they had undertaken an impossible task. In foreign affairs the country would simply and unmistakeably repudiate and reject an anti-Italian and pro-Austrian policy,—the very policy, that is, which has been avowed by Lord Derby and Lord Malmesbury as well as by Mr Disraeli; and in domestic affairs there would be a difficulty as great, though not perhaps as apparent. The English people would not now be content with *mere* Conservatism. Though not desirous of large and perplexing innovations, they are sincerely desirous of moderate and progressive improvement. Some alterations a Conservative Government, or any Government, must year by year make to satisfy the public mind. And the selection of these alterations would and must fall into the hands of Mr Disraeli, the ablest, the quickest, the most ambitious, the most *managing* of all the Conservatives: he and Lord Stanley would arrange the innovations to be made. The policy would soon be the policy of 1852 and 1858. The directing minds would be the same, and the characteristic measures would not be different. Changes would be proposed, not because the Cabinet thought them desirable, not because they were proved by principle, not because they were justified by preliminary investigation and approved experience, but simply and solely because the public mind desired them. In other words, the showy plans that happen to enjoy a fleeting and momentary popularity, the crude proposals that float before the undisciplined imagination, the loose schemes of noisy agitators, would be caught at by a Conservative Government. As in 1852 and 1858, not professing to be convinced themselves, they would be at the mercy of the supposed convictions of others. They would be obliged to alter, and yet would think they ought not to alter. To please their friends, they must avow lofty maxims of unmoved Conservatism; to please their enemies, they must, in fact, abandon these maxims to the winds.

The Conservatives then should not, we think, desire to turn out the present Government. Should any part of the Liberal party wish to do so? The only persons who can have a public reason or motive for doing so are the advanced Reformers. They may believe that they have a greater chance of obtaining a large measure of reform, or an enormous reduction in our military expenditure, or an important substitution of direct for indirect taxation, by aiding to destroy the present Government than by aiding to sustain it. They may say, we believe do say: 'In 1858 we were 'not nominally in office, but we had real power. Now 'our party is nominally in office, but we have no power at 'all. *Then* we held the balance between the Whigs and the 'Conservatives. Both of them were anxiously suing for our 'support on every important measure, and carefully consulting our wishes on every important occasion. *Now* Lord 'Palmerston is in power, and he does what he likes; and he 'does not do anything which he dislikes. *We are nobody;* 'and moreover his views are not our views, nor his wishes 'our wishes.' Thoughts such as these are certainly in the minds, not perhaps of many, but of some members, and it is very necessary to explain concisely how far they are just.

We believe that these opinions are wholly erroneous, and that a little examination will show that, regarding the subject solely rom their own point of view and with exclusive reference to the attainment of their own conscientious aims, the extreme Liberals could scarcely commit a more futile mistake than to turn out at this moment the present Government.

We quite admit, indeed we have just maintained, that they might obtain from the stratagems and the necessities of Mr Disraeli some measures which they will not obtain so soon from Lord Palmerston. We concede that if the dissatisfied Liberals were to act together in opposition,—which, however, no one who knows anything of the matter believes for an instant that they could or would,—they then would hold a critical position of peculiar though momentary strength, and would be able to extort much that was of importance from the cringing weakness of an impotent Government.

But at what price would the extreme Liberals buy this precarious ascendancy? At the price, in plain and natural English, of *disgusting* the country. England would not endure that a *series of measures* which it did not think desirable should be stolen from it by a manœuvre and a stratagem. If the changes under discussion were really required by the country, no artificial alliance between the Radicals and the Conservatives would be required to obtain them; and if that alliance did succeed in obtaining one or two such measures, the public mind would revolt at the unnatural attainment of what it did not desire, would find some way out of the political dilemma, and would not improbably be exasperated into a rigid and bigoted Toryism.

It is to be remembered that we have a great peculiarity in English politics, which gives a singular stability to our institutions, and has left a remarkable trace on our political language. All our political changes have been *permanent;* the public mind has been slow to acquiesce in their necessity, slow to apprehend their importance, slow to reconcile itself to the requisite disturbance. *But the work so done is never undone.* The very term "reactionary" has become a by-word of reproach. We assume that all that is past is right, and we refuse even to hear those who wish to re-establish any law which we have repealed, or any institution which we have abolished.

We owe this great political advantage—an advantage almost never possessed in an equal degree by any other country—to the fair, straightforward, so to say *intellectual* manner in which the great alterations of late years have without any exception been carried. They have been carried by the process by which the repeal of the Corn Laws was carried,—by efficient penetrating argument, by continued *satisfying* discussion. If the Reform party should depart from this policy, they will immediately find that they lose its peculiar result. The repeal of the Corn Laws could not have been a victory for ever, if it had been prematurely snatched by an unnatural combination of parliamentary parties, or a clever manipulation of passing circumstances. And if, disregarding the good teaching of this great precedent, the advanced Liberals attempt to hurry on sweeping projects for which the public understanding is not prepared, they will find that a momentary advantage has been gained at the sacrifice of an inestimable lasting benefit—that what they so hastily gain may very easily be as hastily retracted—that the Liberal party will have lost its most striking and efficient prestige—that it will no longer be the party whose defeats are transient but whose victories are immortal.

We have said nothing of the 'satisfied Liberals' in this long article, and it is not necessary to say anything. We do not altogether agree with them, or with some of them. The present Government may not be the best we can imagine; it is in many respects by no means the best. But we agree with the 'satisfied Liberals' that it is a good representative of the mind of the country; that its faults are the country's faults, and its merits the country's merits; that it has far more tried and trusted ability in its ranks than any other Cabinet which is likely to succeed it; that, according to all the rules of plain good sense, we had better endure its defects, errors, and shortcomings, than again undergo the Government of a Conservative minority, casually aided and charitably strengthened by irregular contingents of Radical support.

HOW TO READ JOINT STOCK BANK ACCOUNTS.

THE Reports of Joint Stock Banks which we publish in a compact form in our Supplement of to-day seem to be very different from one another; but there are, nevertheless, some well-acknowledged principles according to which they should be framed and by which they should be judged. A perfect Report of a Joint Stock Bank would certainly be somewhat of the following character:—

First. It should make quite clear what are the funds at the disposal of the bank; what are the conditions upon which they are held. In accordance with this general principle, it should state what is the capital of the bank and what is the reserve fund: next, what are the deposits, distinguishing between those held at call and those which are to be repaid only at the expiration of a certain stipulated notice. Further, it should state what is the amount of the note circulation, if any, and what is the amount of its draft circulation:

these two are its floating circulation more or less among the general public, and in proportion as they are greater or less, in that same proportion the funds of the bank are greater or less likewise. Lastly, the balance sheet should make clear what has been the profit for the half-year or year to which it relates, and also what accumulation of undivided profit remains on hand from previous periods.

Secondly. Turning to the other side of the account, the balance sheet should state precisely what has been done with the money, and especially explain how much of it is held in a tangible and convertible form, and how much of it is employed in loans to customers or is otherwise locked up in the current business of the bank. It is better that it should distinguish separately the *cash* at "bankers and branches;" the Government securities; the "other securities," as India bonds and debentures, or railway shares, which, though in many respects good investments, are in time of panic sensibly different from stock or from Exchequer bills; the loans to bill-brokers or to share-brokers upon bills of exchange or upon Stock Exchange securities readily convertible; lastly, the amount of bills discounted for bill-brokers, which, not being loans payable on demand or notice, but investments for stated periods, should in strictness be specified separately. These items make up the *reserve* of the bank. Next, the balance sheet should state what the bank buildings or premises are worth; and lastly, what loans, discounts, or other advances it has made its customers. These particulars will afford us means of seeing what it has done with its money.

How, then, are the public to see from these figures whether the bank is a good one or a bad one? On this point there is a common misconception. It is thought that the capital of the bank is the point to which the greatest attention ought to be paid; and that the bank is better or worse in proportion as its capital is greater or less. But so far is this from being the case, that a large capital is not unfrequently a temptation to bankers. They wish to pay a good dividend on it, and they must pay some dividend. If their legitimate current business is not enough to pay a sufficient dividend on their capital, they are apt to strive to increase it by expedients which it would be better to avoid; to make questionable advances, to take questionable bills, to be eager for that "last half per cent." which has ruined many profitable concerns. The capital ought to be sufficient, but no more than sufficient; and it is a needless and sometimes a dangerous policy to seek to increase it beyond the appropriate limits.

Again, some persons attach a superstitious importance to the reserve fund, and judge of a bank greatly by the amount of it. And we do not deny that a good reserve fund is a necessary prerequisite of a good bank. But it is not of itself sufficient. It is only an exceptional provision for the unforeseen calamities which may happen under the best management. We cannot tell from looking at it whether that management is really good or not good.

How, then, can we so judge, as far as an account can teach us?—for under all circumstances there must be much no figures can ever tell, and no balance sheet, however carefully framed, entirely exhibit. The rule of rules is to see first what money the bank owes the public, and then see what money it has in hand to pay off the public, if the latter should wish it. We should add together all the liabilities of the bank—its circulation, its drafts, and its deposits; see what the total is carefully; and then we should compare with it the amount of the cash, loans to bill-brokers, Government securities, and other immediately tangible and convertible assets which the bank has in hand. If the available money bears a good proportion to the possible claims, the bank is a good and secure bank; and if not, it is, we do not say insecure, but doing somewhat more business than it should, and needs care rather than expansion, check rather than development. The specific proportion between the cash reserve and the liabilities of the bank to the public must vary in some degree with the nature of the bank's business, and we would not lay down any technical or theoretical rule upon it:—we only say that this proportion is the critical element in the whole account—that it is the one which most deserves the attention of all concerned in the welfare of the bank—that when we are comparing two banks in the same circumstances and doing similar business, it is a just, a searching, and an appropriate test.

THE KINGDOM OF ITALY AND ITS DIFFICULTIES.

Lord John Russell's prompt and manly acknowledgment of the title of "King of Italy," conferred on Victor Emanuel by the almost unanimous vote of the Italian Parliament, is certainly not premature, since, in lending an English sanction to the "idea" for which Italy will still have to struggle painfully, probably both by diplomacy and war, it does something to aid in turning that idea into a reality. But we must not forget that that title expresses as yet a hope and an aspiration, not a fact,—that it embodies a vision of political right and destiny which, however fair in the distant horizon, is not undisturbed by a bank of very threatening clouds hanging immediately over the foreground. In removing some of the most pressing dangers which beset the Italian cause, England can lend some aid. With regard to others she is quite powerless. But it is well for us, in acknowledging officially for the first time the Kingdom of Italy, to acknowledge as explicitly, though unofficially, the perils which beset it.

In the first place, there is this hallucination of Mr Roebuck's and the Germanisers both in Austria and England who affirm that the Kingdom of Italy will be stronger and more united, or, as the member for Sheffield says, "that you "can check France better, by having Austria on the "borders of Italy than by sending her up to the crests of the "mountains." Now this Germanising crotchet would not need and would not deserve an answer, if the common sense of England were the final arbiter in the matter. But as unfortunately German prejudice is likely to have a fearful influence in determining the result, it becomes necessary for the English Press to reiterate again and again the only arguments which can penetrate that dense atmosphere. We quite believe that Mr Roebuck is unsullied by Austrian bribes,—but when he can talk such nonsense as this, he is surely infected by Austrian flattery, which is an honourable form of bribe. No doubt it may be maintained with at least some superficial appearance of truth, that *Austria* is stronger for a conflict with France so long as she holds Venetia and the Quadrilateral; but to assert with Mr Roebuck that *Italy* is more independent of France in the latter event than in the former is sheer delirium. It is to say that the sheep is less dependent on the protection of the sheep-dog when the wolf is prowling near than when he is driven out of the land; or that the way to eradicate a man's deference for an imperious and powerful friend is to surround him with imperious and powerful enemies. If we want to relieve Italy from her dependence on France, we must relieve her from the fear of Austria. If we don't care to relieve Italy from her dependence at all, but only to "check "France," then perhaps it might be more effectual to Austrianise all Italy again, than to give her a mere corner where her presence provokes a constant series of recoils on French protection. England has already taught Prussia to understand the true interest of Germany in Italy. The way in which we can best serve the Italian cause is to press the same views on the constitutional party in Austria. Sooner or later a war must break out in Venetia, if negotiation for its cession fails, as it certainly will. And then the reforming party in Austria might do the most important service to Italy by dividing the Viennese Parliament, and demanding the withdrawal of the Austrian troops,—as the English Liberals demanded the cessation of hostilities with the American colonies during the American war of independence. Mr Roebuck tells us that English ideas, literature, newspapers, and political convictions, have the greatest weight with the educated Austrians. If so, it is well for us to explain promptly and emphatically that Mr Roebuck's conversion to the Austrian policy for Venetia has excited nothing but amusement and intellectual pity in England,—nay, even in Sheffield,—though no one doubts his honour.

A second and greater difficulty in the way of the Italian Kingdom than even Austria herself, is the rashness of the extreme party in trying to provoke at once a contest for Venetia. Naturally enough Austria would accept with delight such a provocation, if it came while the attitude of Hungary is yet uncertain, and while, by prolonging negotiations with the Hungarian Diet, she would be enabled to concentrate all her force on the Sardinian campaign. If we may rely on the accounts that reach us from the Mantuan

frontier, Austria has been laying traps for such acts of provocation, hoping to detach both France and Hungary from Italy. For should the Garibaldians be tempted into a raid, France would be held back by her pledge from supporting the aggressor,—and the plans of the Hungarian patriots would still be in suspense. No madder policy can be conceived than the renewal now on the Venetian frontier of the policy of the Garibaldian descent on Sicily last year. And any measures, however strong, by which the Sardinian Government might find it necessary to check this movement would be justified in the eyes of all fair observers. The situation is quite changed since last year. The next step is not *revolution* but *war*. Revolution may, nay must, originate unofficially. War can only be justified by the responsibility of the Government which has to conduct it;—for it can only be successful where the cost has been counted carefully beforehand. Garibaldi no doubt himself recognises this. The interviews of which we hear between him and Victor Emanuel at Turin hold out the promise that he will be guided by the wishes of his King. But a large number of the enthusiasts who followed his standard last year seem to forget the great change in the posture of affairs. They forget that though the unpopularity of a native Italian Government may be exposed by the feeblest hand, the fidelity and strength of an invading army, like the Austrian army in Venetia, does not depend in any appreciable degree on the goodness of their cause. No one is justified in precipitating a collision with it who cannot command all the chief resources for securing success. It is for the Administration alone to declare war with a foreign Power,—for the Administration alone can estimate the strength it can command. In the present case, probably nothing but an Hungarian revolution could justify even a *hope* of success without the assistance of France.

The third great danger in the path of Italian unification is the demoralised state of Southern Italy. Week after week we have read of disturbances at Naples, coming sometimes in the shape of resistance to authority, sometimes in demands for food from the Government; and now we hear of a monster petition being taken to Paris to Prince Murat by General Ulloa, signed by 750,000 Neapolitans (80,000 of whom are inhabitants of the city of Naples),—pointing, as Murat's recent invective against Sardinia proves, to a new caprice in the populace of the Southern half of the Peninsula. The loss of grandeur resulting from the absorption of the Two Sicilies in Italy is no doubt telling already on the volatile Neapolitans, and they may perhaps be now partially repenting of the step, and hoping to get by French influence the opportunity of retracing it. This doubtful loyalty of the South is one of the greatest difficulties Count Cavour now has to contend with. There is a large class under every corrupt Government to whom the exchange of a bad for a good Administration is by no means agreeable. That class must be firmly and strongly curbed. There is another far more respectable class certain to groan over the loss of autonomy,—and to fret under the yoke of a distant Government, which is obliged to accommodate itself to the fiat of a wider public opinion than the different provinces have yet learned to respect. This class also is now giving trouble in Naples, and trying to justify Lord John Russell's foolish and hasty *dictum* that two Italian Kingdoms would be better than one. It is mischievous, not so much for its own strength, as because it offers excuses for foreign intervention. England can best serve the Italian cause by using all her influence to prevent other Powers from taking advantage of these excuses, and otherwise ignoring entirely all these blots upon the Italian unanimity. Partly by soothing measures, partly by the firm assertion of authority, Count Cavour will no doubt soon suppress the discards which the Bourbon dynasty has left as a legacy behind it,—and in doing so, it will be no slight aid to him that England has already admitted the organisation of the Italian kingdom as an accomplished fact, in no need of any new revision or ratification.

The last great obstacle to the Italian Kingdom is the Papacy and its French defenders. Of this we need not speak at length. The Pope is playing Victor Emanuel's game by the insane obstinacy of his policy towards his eldest son and principal monitor. And this obstacle to the unity of Italy, though serious and dangerous so long as the others last, will probably dwindle into nothing so soon as the others are removed. If once the German hallucinations about Venetia were eradicated; if the extra-political conspiracies of the extreme left in the Italian Parliament were fairly at an end, and their principles embodied in an ordinary party-organisation; if the Southern part of the Kingdom were heartily united with the Northern,—then the Roman question would not long delay the solution. The strength of the Pope lies in the supposed necessity for French protection, and that necessity entirely depends on the many unsettled elements in the present Italian politics; on the undefined fear which the extreme republican Italian party still contrive to inspire; on the undefined hope which the discord between Naples and Turin still infuses into the ultramontane section; and still more on the hopes which a conflict between Sardinia and Austria, possibly backed by other German Powers, would summon up. While all these unsettled questions remain, the Pope may contrive to cling to the semblance of temporal authority, and the French find sufficient excuse for delaying their departure. But the other questions once settled, the Roman question will settle itself. So that while we shall watch with great anxiety the Italian policy of the Constitutional party at Vienna, and the policy of the Italian Government, both on the Venetian frontier and in the South of Italy and in Sicily, we believe that the Roman question will only become important if there is failure elsewhere. If either the Pope or the Emperor of the French should see signs of growing weakness in the Italian Government, or of growing discord in the Italian Kingdom, the French "wedge" at Rome may be used to widen the fissure and to break the unity of Italy. Otherwise it must be gradually withdrawn, and the Italian nation in regaining its continuity will close over the temporal power of the Pope.

THE BUILDING STRIKE.

It is impossible, and would be a cowardly abstinence from our proper functions, to be altogether silent in reference to the renewed controversy between masters and men in the Building and other cognate trades, though the subject is one which presents few temptations to journalists like ourselves, who are troubled at once with warm sympathies, fixed principles, and strong convictions. All sincere friends of the working classes must deeply grieve to see them, year after year, taking up false positions, following misleading guides, and encountering severe and gratuitous suffering. As far as individual operatives are concerned, indeed, it is probable that their fault begins and ends in the simple error—an enormous and deplorable one no doubt—of placing themselves again blindly and helplessly in the hands of Mr George Potter and his associates, after the experience and the misery of last year. This of itself shows either that they have less sagacity, or else less free-will, less moral courage, and less individual independence than we would fain give them credit for. We believe their failure lies rather in the latter than in the former quality. We are strongly of opinion that neither the choice nor the action of their leader is their own affair; that they are pretty generally aware what a mistake they made last year, and are in their hearts very averse from a repetition of it; but that they are so little accustomed to act for themselves, and have so strong a sense of the duty and the wisdom of sticking together and acting in combined masses, that they submit almost without question or remonstrance to any man or body of men that assumes to speak in their name and to command their allegiance.

But when we come to look at their present proceeding as taken by their delegates and themselves as one aggregate whole, it offers itself to us in two aspects—*first* as to its wisdom, and *secondly* as to its honesty. Now we have always upheld that operatives in all trades have a perfect right to claim an advance of wages when trade is brisk, demand preponderant, and profits high, and to combine, if need be, for the purpose of giving weight and efficiency to

this claim;—provided always that they neither transgress the law nor interfere directly or indirectly with the equal liberty of action of any other workmen, but leave others as free to work as they are to refuse to work. If they violate this condition they commit a crime, which may be punished with perfect justice, and ought to be repressed with prompt severity. But whether, and when, it may be wise to put this indisputable right in practice is a wholly different question. We believe—and have often explained—that it can scarcely ever, if ever, be wise to do so at the cost of a strike,—for this simple reason:—that if the supply of labour is inadequate to the demand, wages will rise without the necessity of a strike; and if the supply be redundant, wages will not and cannot be raised by any number of strikes. We presume upon the operatives' own showing—(and we wish to argue the case simply on their own showing)—that the supply of labour *is* redundant now, because we observe that one of the pleas put forth in support of their demand for shorter hours is that the adoption of such hours *would enable so many more workmen to be employed:*—that is, the work being insufficient for *all* for ten hours a day, they desire to see it more equally distributed. If this be so, then it is obvious that the labour-market is rather overstocked than understocked, and, as a necessary consequence, that wages ought not to rise and *cannot* rise except by the use of violent and artificial means. If, then, the demand for an advance of wages—or what is precisely the same thing (however it is attempted to disguise the identity), the demand for the same wages for shorter hours—be in the face of this natural law, it cannot succeed, and must, therefore, be unwise.

But is there not another set of considerations which seem equally to demonstrate its unwisdom? What was the entire sum lost in wages to the workmen in the combined trades by the strike of two years ago? How many families did it reduce to absolute beggary? How many women and children starved? How many men ruined their health and strength for ever by the privations then endured? How many poor creatures sought relief from those privations in evils worse than the endurance of them? Even if the strike had terminated in their favour, instead of in their utter discomfiture, *how many weeks* or months or years *must have elapsed before the advance extorted would have made up the loss sustained?* How rarely can it be worth an industrious man's while to remain out of work for months—to forego (say) 33s a week for twelve or fifteen weeks, in order to obtain 36s, so long as trade continues brisk and before the inevitable reduction or dismissal comes? Can it ever be worth while in occupations which are busy *during only a portion of the year?* And, finally, can it ever be worth while, not only to encounter this certain loss for this futile hope (as the building trades did the other day), but to submit *for years to a considerable weekly deduction from their earnings*—in the form of contributions to the Union—in order to be able, when their leaders choose, to fight this desperate battle and to risk this ruinous defeat?

Now, let the workmen read their present demand by the light of recent experience. Say that by resolute persistance, by remaining on strike during April and May, they at length carry their point, let them calculate how much poorer they will be in October, when the building season ends. If they fail, the calculation will be still easier—and more disastrous.

But are the demands made by the delegates on behalf of the workmen at all more honest than they are wise? This remains to be seen. The plea put forward is that the men wish for more leisure in order that they may refresh themselves and improve their minds. The masters have most properly and sensibly met this plea by offering to allow the men to work whatever hours they please, and to pay them *by the hour*—on a scale somewhat more liberal than at present. If the men were as sincere in their plea as they are peremptory in their demand, they can prove it by at once closing with the proposal of their masters. Their application is, in fact, granted; they may have the additional leisure they ask for, if only they are willing to pay for it. If they decline the proposal made, the public will know what to think of their sincerity. For ourselves, we have no doubt whatever that some workmen would be glad to have the spare hour to themselves, even at their own expense, and that all wish for it, if it can be obtained at the cost of their employers. But that this leisure hour is the real object of the delegates we have no belief whatever; and it appears from a report in the *Times* of Thursday that one of these parties wished to obtain from Mr Lucas an engagement that, if the men closed with the plan of payment by the hour, the employers would NOT limit the working day to the nine hours ostensibly demanded!

We rejoice to hear that there is now a considerable probability that the fair and liberal offer of the masters will be accepted, and this unfortunate controversy finally closed. We rejoice to hear it for four reasons. *First*, because the offer is reasonable in itself and may probably supersede future conflicts;—*secondly*, because it is well that every workman should have the power of purchasing any amount of leisure which he may value;—*thirdly* and chiefly, because the acceptance of the proposal will be a significant indication that the operatives are beginning to think and act for themselves, and to take their affairs out of the hands of the irresponsible leaders who have, on previous occasions, so deplorably misguided and victimised them;—and *lastly*, because, if the conflict be not averted by some timely arrangement of the sort, it will probably end in measures which will not only entail terrible immediate privations on the workmen, but long-continued depression in their trade and a permanent reduction in their wages.

THE REVENUE AND THE MONEY MARKET.

THE Revenue Accounts, which we publish elsewhere, entirely justify the remarks which we ventured to make upon the prospects of taxation this day week. Mr Gladstone's Budget has not destroyed our indirect revenue. On the contrary, during the year we have received from the

	£
Customs	23,305,777
Excise	19,435,000
	42,740,777

—a magnificent total, after so extensive a series of changes and reductions. The net decrease, after allowing for the augmentation in these sources of revenue, which is greater this year than last, is 805,995*l*. And though this is not, for the reasons we last week assigned, by any means an exact measure of the financial difficulty with which Mr Gladstone will soon have to cope, it may, nevertheless, prove to us that this difficulty will not be an insuperable one. Next year's account will be different in several respects from last year's; but we see enough to assure us that there are no calamities in store for us which should stagger the money market, or depress an enterprising financier.

More novelty attaches to the account No. III. showing the relations of the Chancellor of the Exchequer to the loan market.

It appears that 594,000*l* Exchequer bonds have been issued out of the sum authorised last year, and that 200,000*l* of the terminable annuities created for the fortifications have likewise been taken. These make together 794,000*l*, and this sum is so much deducted from the capital of the world and expended on temporary purposes, and to this extent the operations of the Chancellor of the Exchequer have permanently impoverished the money market. 1,000,000*l* has likewise been borrowed to pay off the Exchequer bills of which payment was demanded. But this operation does not affect the aggregate resources of the money market. The money so applied still exists; it has not been expended on the temporary exigencies of the country, or appropriated to the construction of permanent works, such as fortifications yielding no pecuniary return. It has simply been paid to the former holders of Exchequer bills; it is, in fact, a transfer of loanable capital from the Bank of England to them, and the total funds of the money market as well as the rate of interest are, therefore, wholly unaffected by it.

It may be worth while to state that of the 2,000,000*l* of Exchequer bonds Mr Gladstone took power to issue last year, 1,000,000*l* were taken by the Savings Banks on the 8th November, 1860, and 594,000*l* have since been issued to the Bank: 406,000*l*, therefore, only remain to be issued. The issue in November was not an augmentation of the debt of the country, as 1,000,000*l* of other bonds then became due and were then paid off.

THE REVENUE.

THE NEW CURRENCY SCHEME FOR INDIA.

TO THE EDITOR OF THE ECONOMIST.

SIR,—In your article on the New Currency Scheme for India, in the general purport of which I cordially concur, it appears to me that in one passage you concede more to the opponents of Mr Wilson's plan than the force of their objection and the merits of the case require; and, as the point to which I refer sets in a striking light one important advantage which India would derive from a paper currency, perhaps you will allow me to offer a few remarks respecting it.

Referring to the objection to Mr Wilson's plan, that "it would have depreciated the currency," you truly state that this is an objection which applies to every paper system, since the depreciation of a currency is an inevitable consequence of its augmentation, and the precise means by which the liberation of superfluous metal is accomplished. And you thus more fully explain your meaning:—"That the momentary depreciation of the currency is to some extent an evil is certain. But it is equally certain that it is the inevitable purchase-money which we must pay for the advantage we wish to obtain. Gold and silver cannot be expelled from a country except by being made cheap there. A transitory variation in the value of the precious metals is the necessary price at which a country which has already a large metallic circulation can alone obtain the great and permanent economy of a paper one. There is no individual peculiarity in Mr Wilson's scheme which has ever been indicated as specially exposing it to the objection of producing depreciation It is only open to that objection in the same degree and in the same manner as all other schemes which effect the coveted object are and must be open to it." To this exposition of the process by which a paper currency displaces a metallic one every economist will subscribe; yet there is one expression in the passage which I have quoted which seems to me, if not to imply a misapprehension as to the peculiar nature of the benefit which India would derive from a paper currency, at least calculated to suggest one; and which at all events fails to expose the full extent of the blunder involved in the objection of Mr Wilson's opponents.

You say "the momentary depreciation of the currency is to some extent an evil." This is no doubt true, since a depreciation of the currency involves a disturbance of fixed contracts, which always confers an unjust boon on one portion of a community at the expense of another. But it is also true that the local depreciation of the currency (always supposing its metallic basis is preserved) is a benefit to the country at large of a most important kind, and that the chief advantage to be looked for for India from the introduction of a paper system is to be obtained precisely through this means.

The characteristic feature of the trade of India, almost from the dawn of commercial history, has been the flow of the precious metals from Europe to that region, "contrary," to quote the words of Humboldt, "to the movement of the earth, of mankind, and of civilisation." Of course this is due proximately to the greater value of the precious metals there. And if we inquire the cause of this greater value, I apprehend the answer is to be found in those peculiarities of Oriental society which early led to a special necessity for a metallic medium of exchange, combined with the habit of hoarding, which was the natural incident of rapacious and inefficient governments. But, how ever this may be, there can be no doubt that the abnormally high value at which the precious metals have been maintained in Oriental countries has been in their external trade a source of loss to them. A high value of money being synonymous with low prices of commodities, this circumstance has enabled foreign countries to command the produce of India on terms extraordinarily favourable, while it has placed India at a corresponding disadvantage in her dealings with them. India, in short, has been compelled by this peculiarity of her commercial position to part with a greater portion of the produce of her land and labour in return for the goods of foreign countries which she imports than would otherwise have been necessary. I say by this peculiarity of her commercial position, and this is the important point to be attended to. Under ordinary circumstances the proportion in which trading countries exchange their commodities is determined by their industrial capabilities, in conjunction with the re-

quirements of each for the productions of the other; and the range of prices, by a movement of the precious metals, adapts itself to this proportion. But in India, so great has been the consumption of the precious metals in the currency and in hoards, that, notwithstanding the constant flow thither, prices have never been able to rise to their natural level—I mean to the level requisite in order to place international exchanges on their natural footing according to the principle just indicated. Prices have therefore been in India from time immemorial abnormally low. The produce of Indian labour consequently has failed to command its natural remuneration in the markets of the world, and the country has thus been deprived of that full measure of benefit from her foreign commerce to which Nature has destined her. It follows, therefore, that the high local value of money in India is a source of loss to that country, and consequently a depreciation of her currency, far from constituting an objection to a financial scheme, is one of the principal advantages to be hoped for from such a measure.

To those who have not considered the connection of national interests with the local values of the precious metals, the position which I have been endeavouring to establish, that the interest of India requires that her currency should be depreciated, will probably appear paradoxical; yet, after all, it is merely saying that a country, like an individual, is interested in obtaining the highest possible price for its goods, as it is interested in paying the lowest possible price for the goods of other countries. A high value of money in India, as compared with Europe, means a low price for Indian commodities as compared with the commodities of Europe; and all that my doctrine asserts is, that in her exchange with Europe, India is interested in selling her commodities at the highest possible price.

If these views be sound, Sir—and they appear to me to flow directly from the elementary principles of economic science—then it follows that the arguments of those who object to Mr Wilson's scheme, because of its tendency to depreciate the currency of India, are not merely futile, but betray a complete ignorance of one of the principal ends which should be aimed at in such a measure. In order to set free from the domestic circulation the immense mass of metal now absorbed in it, a temporary depreciation of the Indian currency is, as you have shown, indispensable. To this I have ventured to add that the interests of India require that this depreciation should be permanent; for it is only thus that the metal which has been discharged will be prevented from returning; and it is only thus that a check will be given to that perennial flow of metal to the East which has been from time immemorial the onerous incident of her trade. Let that tide of metal once be checked—and this can only be done by effecting a local depreciation of its value—and the wealth which it represents, instead of being consumed as at present in maintaining a cumbrous and inefficient currency, will henceforth reach India in the form of commodities directly conducive to her well-being. In place of a "breed of barren metal," she will henceforth receive those materials of real wealth and those elements of productive capital which Europe is competent to afford her.

For the present, however, there seems little prospect of her realising these benefits. A comprehensive scheme, conceived in a statesmanlike spirit, has been set aside in deference to the requirements of a pet theory—a theory which, so far from being "established" as its advocates complacently assert, has been condemned by the first economists in this and other countries, and which on the only two occasions on which it has really come into operation has been found at once mischievous and impracticable. Such a sacrifice of practical utility to abstract doctrine is singular in a practical nation, and it is as deplorable as it is singular.—I am, Sir, your obedient servant, JOHN E. CAIRNES.

Queen's College, Galway, April 2, 1861.

THE DOUBLE INCOME TAX.

TO THE EDITOR OF THE ECONOMIST.

SIR,—Will you do me the favour of allowing me space in your paper for a few words on the question, discussed in your last number, of "The Two Income Taxes."

The case against the Indian proprietors who are residents in this country is thus put by Mr Bright:—"The question appeared to be this—a man enjoyed the advantages of two Governments, and had his property in one country while he enjoyed the benefits of it in another; and he thought he should only pay for the support of one Government, though he enjoyed the advantages of two. He could not see for a moment that such a case could be defended by any solid or serious argument." And in your article you sustain with your authority the view of Mr Bright.

With great deference to Mr Bright's opinion and yours, I venture to think that this consideration does not settle the question. The Indian proprietor who resides in England no doubt enjoys the advantages of two Governments; but does he receive the *same* advantages from *each* which the resident owner of property of the same value in the United Kingdom receives from the Government to which he pays taxes? Suppose an owner of land in India to reside in London, deriving from his property a 1,000*l* a year; and suppose an owner of land in Ireland, residing also in London, to derive from his property a like annual sum. One of these proprietors, supposing the principle of the double income tax to be enforced, pays twice as much for the advantages of Government as the other: rightly, according to Mr Bright, because these advantages are in his case derived from two Governments. Is it not obvious, however, that the amount of governmental protection, as well as the ability to pay taxes, are in both cases the same? And, this being so, according to what standard of fiscal liability is one man to be taxed in twice the amount of the other? The sole distinction between the two cases is that in one the entire duty of protection is performed by a single agency, while in the other that duty is divided between two. In the case of the income derived from Indian sources, the Indian Government affords it protection during the progress of its production, and the Imperial Government during that of its consumption; while for the income derived from domestic sources, the duty of protection is discharged by the same Government during both these stages. The case may be illustrated by that of a commodity which before reaching the consumer passes through the hands of several producers. Mr Bright will scarcely contend that the price of the commodity would be regulated by the number of producers whose hands it happened to pass. If this were the case, the effect of division of labour would be to enhance, instead of to cheapen commodities. And yet this principle, which would be absurd in the case of all other services, Mr Bright would make the standard by which to remunerate the service rendered by Government.

It will be said that this reasoning applies with equal force to property in the colonies, and in foreign countries. No doubt it does. And if that friendly understanding existed between the Governments of different countries which is desirable, and if the inconveniences necessary for giving effect to the principle did not overbalance the gain, I see no reason why it should not be applied to these cases. Indeed, the argument of Mr Gladstone admitted this much, since it was addressed, not to the justice of the demand of the Indian proprietors, but to the practical inconvenience, "the amount of confusion and difficulty which the recognition of the principle in question would involve." It may be admitted that the difficulty of adjusting domestic taxation to the fiscal system of foreign countries with a view to the exemption, partial or complete, of property derived from such sources would, at all events at the present time, be insuperable; but surely this is no reason for refusing to apply the principle where no difficulty in its application exists. It is enough to have to sacrifice justice where a strict adherence to its rules is by circumstances rendered impossible or very difficult; but, for the sake of consistency, to carry this sacrifice beyond the point which necessity prescribes, to introduce gratuitous injustice as a counterpoise to that which is unavoidable, is surely the veriest pedantry of practical statesmanship.

As to the practical effects of the attempt to impose double taxation on one species of property, it is not difficult to predict them. The possessors of the obnoxious incomes at the time when the unequal tax is imposed have no choice but to submit to their fate. There is for them no escape. All future purchasers, however, will have no difficulty in evading the differential impost by the simple expedient of "discounting" it in the price of the article. Accordingly, when Government have next occasion to resort to the money market to meet the exigencies of Indian finance, they will find themselves under the necessity of paying an interest on their loans higher than would otherwise be necessary, by the amount of the special disadvantage under which they have laid this species of property. Government, in short, will be obliged to pay its own income tax in advance—a sufficiently absurd situation. The most serious consequence, however, of this policy will be the discouragement which it must offer to the migration of British capital to India,—a discouragement which will operate, not so much in proportion to the actual deduction from profits which this particular measure may entail, as in proportion to the apprehension which it cannot fail to excite of future developments of the same principle.—I remain, Sir, your obedient servant,

JOHN E. CAIRNES.

Queen's College, Galway, March 25, 1861.

Agriculture.

APPREHENSIONS AND HOPES.

FOR the past, it is now certain that our wheat crop of last year was a bad one—a very bad one. Despite various assertions to the contrary in political and even in some commercial quarters, the deficiency of English-grown wheat in 1860 was greater than even farmers expected. The *Mark Lane Express* Review of the Corn Trade states that the deficiency of yield as indicated by "the course of six months' deliveries" amounts nearly to one-half: thus "the last months of 1860 and three first of the present year make the present totals 1,846,703 qrs against 3,166,607 qrs for the same period last season, showing a decrease of 1,319,904 qrs, which is very near the proportion of 7 to 12, or only one-twelfth more than a half." This probably does not accurately measure the actual deficiency in the quantity of wheat grown last year, for the deficient deliveries referred to have been in part occasioned by

the wretched condition of the sample, which has led to the use of much wheat for feeding stock, and induced most farmers who can afford it to abstain from thrashing in the expectation that during the spring the grain may harden and improve in condition in the stack. Thus, in the monthly report from Berkshire it is said "a great deal [of wheat] has been used for feeding purposes, still the quantity in farmers' hands is more than usual." And we hear somewhat similar accounts from many of the districts where the farms are large and the occupiers are men of capital. Barley has everywhere proved unexpectedly productive; and, though a comparatively small portion of that grown has been good enough for the maltster, yet the large quantity brought to market has greatly reduced the market price of barley.

With regard to the present time, all accounts concur in stating the work of the season to be much in arrear. The preceding Easter was fine, with slight exceptions, and a good deal of sowing was effected; but during the past week the weather has been again very wet, so that nothing effective can have been done upon arable land. And the season is rapidly advancing, while the land has for so many months been completely saturated with wet that a little rain reduces it to an unworkable state. Full three weeks of dry weather are required to enable farmers to overtake their work, and place their farms in the position they ought to be at this time of the year.

The price of meat keeps up, though markets are said to be somewhat dull—an indication that a fall in prices may be anticipated. The influence of some twenty months of almost continuous wet weather is now telling upon the flocks, a very large portion of the sheep brought to market being affected with rot. This has caused the price of best mutton to be extremely high. The beasts brought to the Metropolitan market from Norfolk and Suffolk during the present season have been better than usual, a circumstance, perhaps, due to the fact that there has been so much grain in those counties fit for little except cattle feeding. The pastures have lately grown a little, but there is as yet no feed of any importance.

In the Eastern Counties, farmers are all very short of money, the deposits in all the banks of that district are said to have been reduced to an enormous extent, and that farmers, instead of depositors, have become borrowers of money. This was to be expected, for the past year has been a severe one for the agricultural interest, and it will require some time before its consequences are got over.

As to the future, it may be said to depend upon the weather. Another wet season would prove ruinous to many farmers, while a dry year for the rest of 1861 will enable most men of competent capital to make some progress in effacing the traces 1860 have left on their fortunes. A slowly rising barometer, and two dry and and bright days on the Thursday and Friday of the present week, give hope of better weather than this year has yet produced.

Though the growing crops are backward, a period of dry and moderately warm weather in the present moist state of the land would produce a rapid vegetation, and unless checked by night frosts, we might find ourselves entering upon the month of May with far better prospects than at present we have any right to anticipate, for to this time we have experienced all the indications of a showery, if not a positively wet season. That farmers are gradually coming to sound and decisive views of the exigencies of their business, under the pressure of adverse seasons, we have many indications: of these, the following resolutions, adopted at a meeting of the Framlingham Farmer's Club, may be taken as a sample—*i.e.*, "That the future of agriculture as regards its success depends mainly on lessening the cost of production; that the increase of production must be greatly looked to in the shape of meat; and that it is highly important to give more freedom to the skill and intelligence of the farmer, for without freedom and security it is unfair to expect that he will expend his capital." This points to the three great points on which the future of English husbandry turns.

THE INCLOSURE, TITHE, AND COPYHOLD COMMISSIONS.

ARTERIAL DRAINAGE.

THE jealousy with which rights to landed property and the interests of individuals in such property are regarded in this country has unquestionably operated largely to prevent improvements. The first step to improvement, the inclosure of commons and wastes and laying several the commonable lands over which several persons had partial and qualified rights of ownership, was, until a comparatively modern period, only to be accomplished by the aid of a special Act of Parliament for each parish, manor, or other division in which an inclosure was contemplated. The expense of this was enormous. Country lawyers and surveyors, town agents, parliamentary agents, and a long train of costly satellites were set in motion, and in cases of inclosures of moderate extent the cost was often such as rendered it doubtful whether the proprietors of the inclosed land had not better have left things as they were. At last a General Inclosure Act was passed, and a permanent Commission, consisting of three men of position and intelligence, was appointed to superintend, sanction, and report on proposed inclosures. But before the General Inclosure Act was passed, by far the greater part of the work of that kind which was required had been done. The Commissioners, however, were intrusted with the commutation of tithes, and more recently with the enfranchisement of copyholds. The commutation of tithes being compulsory, that business was after a few years worked out. Copyhold enfranchisement has now also been made compulsory in this sense, viz., that the lord of a manor may be compelled by any individual copyholder to enfranchise his own property, and the result has been that the enfranchisement proceeds slowly and partially, though in an accelerating ratio. What ought to have been done would have been to have enforced a general compulsory enfranchisement of copyholds once for all. The Legislature has, however, thought fit to order it otherwise, and the fact is, that the three able Commissioners, who constitute the triplicate Commissions, of Inclosure, Tithes and Copyholds, are by no means overworked. They are thus able as well as competent to undertake the superintendence of arterial drainage, and the consequential improvements of embanking, warping, and reclamation, which Mr Dean, in his tract to which we referred last week, proposes should be intrusted to them.

We have three parliamentary papers, being the Reports of the three Commissions on Tithes, Inclosures, and Copyholds for the year 1860, which show what has been done and is doing in these matters. The tithe commutation work is for the most part done. Of 7,049 notices for making awards which have been issued by the Tithe Commission, one only was issued during the year 1860; and of 5,646 drafts of compulsory awards, two only were received during last year. In 12,223 districts, the tithes have been commuted by confirmed agreements or confirmed awards, and in 408 of those districts the rent-charges have been disposed of by redemption or merger. Only four apportionments have been received and two confirmed in 1860, but in the alteration of apportionments there is more stirring, 204 altered apportionments having been received and 191 confirmed during the year 1860. There have also been 35 applications for exchanges of glebe lands received during the past year, of which the Commissioners have confirmed 27. At the close of 1860 they had confirmed 14,468 distinct mergers of tithes or rent-charges. When we look back to the state of things which existed before the Tithe Commutation Act, and recollect the obstacles to agriculture the taking or the power of taking tithes in kind occasioned, we may well congratulate the owners and occupiers of land on that healing measure.

The Inclosure Commission Report also tells of work well nigh done so far as inclosures are concerned. But the Commissioners have a very useful power of effecting exchanges of lands which is in full activity. Though there have been only 50 applications for inclosures during last year, there were 259 for exchanges.

Upon the Commissioners reporting in favour of such enclosures as they confirm, a short Act is passed called (for this year) "The Annual Inclosure Act, 1861," which enacts that the several proposed inclosures mentioned in the schedule be proceeded with. The report states that "the average expense of the inclosure proceedings, as far as this office is concerned, up to the time of the assents to the provisional orders, including any expense which may have attended these assents, and which leaves the case ready for Parliament to deal with, is 15*l* 18s 7d." An inclosure has thus become an arrangement which may be effected with, practically, no other costs than such as are incident to the surveying, dividing, and mapping the land.

The Copyhold Commission Report (the 19th) shows an active business to be in progress. During the last year there have been 714 enfranchisements, the particulars of which are given in a schedule to the report. Besides, 330 applications for enfranchisement have been received; of these, 68 are under the voluntary and 262 under the compulsory powers of the Acts. This proves how unwillingly lords of manors consent to enfranchisements. It is to be noted that the 714 enfranchisements of 1860 are nearly twice as many as those of the preceding year. The amount paid in full for these enfranchisements was 107,415*l* 6s 11d, and the commuted rent-charges amount to 805*l* 15s 1d. Until the copyholders had power to compel enfranchisement little progress was made, no more than 58 having been conferred in 1853, but in 1854, when the compulsory Act first came into operation, the number of cases advanced to 131, the following year to 220, and has advanced with an almost uniform progression to the number of cases in last year. The total sums paid in full for copyhold enfranchisements in the nineteen years during which the Enfranchisement Acts, voluntary and compulsory, have been in operation constitute an aggregate of 489,934*l* 3s 6d, and the total amount of the rent-charges is 4,201*l* 6s 4d. Besides which, land to the extent altogether of 1,337 acres have been given to lords of manors as considerations for copyhold enfranchisements. They have certainly put on the screw to some purpose, for these considerations are probably five times the value of the actual receipts lords of manors derived from the now enfranchised properties. But they had a power of obstruction, a dog-in-the-manger interest, for which they have received ample redemption payments.

On looking through the schedule to the report, we do not distinguish what enfranchisements have been voluntary and what compulsory, but in the great majority of cases from four to five years' annual value of the copyhold property seems to have been the consideration where the fines were arbitrary. There are cases

in which no more than three years' value was paid, while in other instances as high as seven years' value constituted the consideration for enfranchisement. The quit rents had generally to be redeemed at from twenty-five to thirty years' purchase.

The great obstacle to the progress of copyhold enfranchisement is that each owner of such property must incur the cost of a separate process of enfranchisement.

In all the above matters, tithe commutation, inclosures, and copyhold enfranchisement, the duties which have devolved upon the Commissions were more limited than would be imposed on them by a General Drainage Act. But the principle is the same; and we see no more reason to apprehend any defect or miscarriage in the latter than in the former duties. Drainage implies the removal of obstructions on other lands than those proposed to be drained, and very often at considerable distances. The interests and the persons thus effected may be more numerous and more complex than those dealt with under the existing Commissions. For instance, Mr. Dean proposes that the Commissioners should have "power to set out districts capable of being benefited by arterial drainage; to decide what lands shall be included in such districts and what excluded; to charge lands included with cost of works executed, and with power to levy rates upon such district lands." And in a note he expressly suggests that such powers would obviate the necessity for private Acts of Parliament. So powers to straighten, widen, deepen, and embank rivers, are essential to any effective drainage of low-lying districts.

The subjecting the initiation of these powers to the prior consent of a majority or a stated proportion of the landowners, would seem to afford all the protection now given by the necessity of procuring assents to private Acts of Parliament for similar works of improvement, while, as in the case of inclosures, the cost would be reduced to a mere trifle.

COMMERCIAL LITERATURE.

COMMERCIAL TABLES. By GEO. T. GRAHAM. Longman, Green, Longman, and Roberts.

MR GRAHAM aims in the above tables to supply a more compendious and accurate ready reckoner than has yet been issued. Many similar productions exist, but it is alleged they are too limited to be of much value. Mr Graham's work comprises reckoning tables, showing the value of any number of articles at different rates or prices, including fractions; tables to calculate commission or brokerage, wages, and a variety of other similar purposes. The tables are comprehensive enough, no material calculation being omitted except interest, in which case "Laurie's Interest Tables" are considered to render a further treatise unnecessary. In a work of this nature accuracy of course is of the greatest importance, and, as far as a cursory glance can enable a judgment to be formed, it appears to possess this requisite. Of its general utility in that case there can be no question.

RAILWAY INTELLIGENCER, 1861. By MIHILL SLAUGHTER, Secretary of the Railways Department, Stock Exchange. Published by the Author.

THIS is an improved edition of a work published annually by Mr Slaughter, showing the precise position of the railways of the United Kingdom, together with that of many foreign and colonial undertakings in which British capital is invested in a greater or less degree. The various companies are arranged in alphabetical order, and under each railway details are given of the amount of capital authorised by Parliament, the sums actually raised whether in ordinary or preference stocks or by debentures, the revenue and expenditure, dividends, mileage, engagements for leases, purchases, and amalgamation, working agreements, and other particulars. A mass of information is also given respecting railway affairs generally, such as legislation on accidents and railway statistics, while in the appendix will be found the rules of the Stock Exchange relating to bargains in stocks and shares of public companies, the stamps required on transfers, usual forms, &c. Mr Slaughter's book is well and lucidly compiled, and will prove useful to the very large class of the nation who are more or less interested in railway property.

HISTORY OF THE RAILROADS AND CANALS OF THE UNITED STATES. By HENRY V. POOR, Esq., Editor of the *American Railroad Journal*. Vol. I. New York: Schultz and Co. London: Trubner and Co.

THIS is the first portion of a work intended to form a succinct history of the various railways and canals of the United States, showing their progress, cost, revenue, expenditure, and present condition. The volume now issued comprises several of the more important States of the Union, describing the railroad system of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, and Maryland. The plan pursued is comprehensive, but at the same time admits of any particular company being readily found and examined in detail. In the first instance, a general view is given of the whole of the undertakings of a State, after which follows a separate and concise history of each line. The work appears to have been carefully compiled, and its utility as a book of reference can scarcely be over-estimated. Some excellent maps are appended.

GENERAL LITERATURE.

THE HISTORY OF ENGLAND FROM THE ACCESSION OF JAMES THE SECOND. By LORD MACAULAY. Volume V. Edited by his Sister, LADY TREVELYAN. Longman and Co.

THE circumstances under which this volume is presented to the public must be already known to our readers. It contains all of his history that Lord Macaulay left in a state for publication, with the addition of a disconnected fragment—the rough draught of his account of the death of his great hero, William. The continuous narrative closes with the general election in the year 1701. Thus his pen has been arrested on the very eve of that brilliant and eventful epoch for the delineation of which he seemed to be beyond all living writers most eminently qualified. Delightful as are the volumes which Lord Macaulay lived to complete, it is impossible to avoid regretting that his labours have been expended on the reigns of James and William, rather than on the much more congenial era of Anne. However, we are thankful that the comparatively brief additional narrative comprised in the present volume remains, even though its perusal reminds us only too forcibly of what we have lost by the premature death of its author.

The concluding volume of Lord Macaulay's great work is certainly not inferior to any of its predecessors in vigour and richness of style, though it may fall short somewhat of them in interest of subject-matter. No dramatic scene like the trial of the Bishops—no romantic page of history like that which contains the heroic defence of Londonderry—no masterly picture of the glories and toils of war such as that presented by the campaigns in Flanders, will be found in this record of the concluding years of the reign of William. There are, however, descriptions of considerable though secondary interest, which sufficiently prove that the power of the writer was unimpaired to the last, and that the grief, which, to use his own touching words with respect to his hero-King, "only noble spirits feel, to think that they must leave their work but half finished," must have been aggravated in his case by the consciousness of an intellectual capacity fully equal to its satisfactory accomplishment. His readers, on the other hand, will find a melancholy pleasure in reviving from these pages their recollections of that style so inimitable and so identified with the man himself—those copious and flowing but well-poised sentences—that exuberance of illustration—that stately, and were it not so natural we might say pompous, enunciation of political and social truths—that vivid yet abstract delineation of personal character—that felicitous choice of words—that oratorical array of conflicting and balancing opinions—that strong yet intelligent and well-reasoned enthusiasm for the "great deliverer"—which will be ever inseparably connected with the name of Macaulay.

The principal subject-matters of the volume before us are the disputes between William and his Parliaments on the questions of a standing army and his Dutch favouritism—the negotiations respecting the Spanish succession—the success and downfall of Montague—the Darien colony project—and the death of James II. The jealousies of Portland and Albemarle, and the splendid embassy of the former to the Court of Louis XIV.—the romantic episodes of the fortunes of Lord Clancarty and the trial of Spencer Cowper—the destruction of Whitehall Palace—and the visit of the Czar Peter—afford ample scope for the pictorial genius of the author; while the rivalries of the East India Companies, and commercial questions, such as the Irish woollen manufactures, illustrate no less remarkably his powers of popular exposition of not very popular subjects. Somers—to most of us little more than an illustrious *name*—is rendered somewhat more distinct and in proportion more interesting by the loving pencil of his panegyrist. Additional shadows are cast upon the already but too much darkened fame of Sunderland. Montague is weighed in the balance of merits and demerits with considerable impartiality; while upon Sir Edward Seymour the vials of indignant reprobation are poured out with little or no mercy. Marlborough is referred to with a somewhat more respectful hatred; while the failings of William himself are admitted with an approach to frank impartiality.

The author's remarks on the comparative merits of a regular army and of a national militia will scarcely please the public in its present mood. Indeed we cannot but think—with every allowance for the exaggeration of popular enthusiasm and self-love—there is too much in his treatment of this question of a tone of official depreciation of unofficial organisations. Nor are we quite satisfied with his judgment on the conduct of the House of Commons in limiting as they did the number of regular troops to be maintained in time of peace. It may be that there was some risk in the extent to which the disbanding was carried; but it must be always remembered that the reign of William was throughout looked upon as a great precedent for all that should follow, and it was very necessary to watch with even jealous and ungenerous, and in one point of view unwise, suspicion on all possible germs of future ill-practices. It might have been wiser in itself to have a larger standing army in the face of such a rival as Louis; but would it have been easy hereafter

to graduate the standard thus once set up, according to the varying circumstances of the time—or would it not rather have become an absolute precedent for future standing armies? But the subject would not have assumed half the importance it did in the eyes of the English people, if the presence and obstinate retention by William of the Dutch guards had not kept alive in the popular mind the idea that the army was something unnational and attached solely to the person and authority of the Sovereign. Lord Macaulay candidly admits that William's conduct with respect to his Dutch favourites is indefensible; but it was the general spirit which he displayed on this material point, much more than any special grants, that undermined his popularity throughout his reign, and gave strength and some fair pretext to the suspicious watchfulness of the Commons. William's great fault was that while calling upon the nation to identify itself completely with his own favourite European projects, and thus to give him a position in European affairs which as Stadtholder of Holland he could never have aspired to, he throughout refused to identify himself with English feelings, and scarcely tolerated English national peculiarities. By his demeanour and his actions he constantly proclaimed himself a Dutchman, and seemed almost eager to prove to the world that he regarded England simply as a storehouse of men and money, to supply him with the sinews of war and to enable him to reward those who had served *him*, whether their services had also been of special benefit to England or not. It was, indeed, very natural that he should prefer the country of his birth and all his early associations; but when he assumed the leadership in a great expedition and afterwards the government of such a nation as England, he ought to have remembered also that he was the son and the husband of English Princesses, and that his new duties could only be properly fulfilled by moderating his natural feelings, and not merely consenting, with unconcealed reluctance, to reside so many months in the year in the land which had adopted him. Nor could he lay claim to the lofty position of an independent benefactor to this country. Of that he had deprived himself by his lavish grants out of English and Irish domains to his Dutch favourites; and yet he neglected the only means by which these grants could be regarded without jealousy by his new subjects. His heart was always in Holland and his confidence reserved for Dutchmen alone. This is not a slight and incidental fault, to be noticed, as Lord Macaulay does, in an occasional paragraph, but a cardinal error, striking at the very root of the character of William for statesmanship and good government. It is from this point of view that the questions of a standing army and the other jealousies between the King and the English nation assume an aspect quite independent of their significance in themselves. The Osbornes, Harleys, and Churchills were no doubt not very trustworthy or congenial confidants, but one who had made himself a truly *English* King would have placed himself above and beyond the power of such men; and William, at any rate, had not a few opportunities of knowing that the nation was sound at heart, and only required a generous sympathy on his side to rally round him with grateful enthusiasm. It is this great leading fault in William, much more than any special act of his, which renders it difficult for an Englishman to feel a glow of patriotism in connection with the successful administration of our Dutch deliverer.

The Darien exploit is told by Lord Macaulay with a merciless adherence to the sterner facts and probabilities of the matter, and with scarcely the slightest sympathy with the generous aspirations and high national spirit by which it was elevated above a mere trading speculation. The element of religious enthusiasm which entered so much into the constitution of the expedition seems to have repelled our author into scornful and almost triumphant criticism.

The last days of the wretched King of Spain and the Indies afford our historian an opportunity of drawing with advantage from his rich treasury of eloquent words and pointed thought. But a still more striking passage, in our opinion, is that in which he portrays a class of statesmen who have exercised no little influence over the destinies of the world. We make no apology for extracting it:—

> Portocarrero was one of a race of men of whom we, happily for us, have seen very little, but whose influence has been the curse of Roman Catholic countries. He was, like Sixtus the Fourth and Alexander the Sixth, a politician made out of an impious priest. Such politicians are generally worse than the worst of the laity, more merciless than any ruffian that can be found in camps, more dishonest than any pettifogger who haunts the tribunals. The sanctity of their profession has an unsanctifying influence on them. The lessons of the nursery, the habits of boyhood and of early youth, leave in the minds of the great majority of avowed infidels some traces of religion, which, in seasons of mourning and of sickness, become plainly discernible. But it is scarcely possible that any such trace should remain in the mind of the hypocrite who, during many years, is constantly going through what he considers as the mummery of preaching, saying mass, baptising, shriving. When an ecclesiastic of this sort mixes in the contests of men of the world, he is indeed much to be dreaded as an enemy, but still more to be dreaded as an ally. From the pulpit where he daily employs his eloquence to embellish what he regards as fables, from the altar whence he daily looks down with secret scorn on the prostrate dupes who believe that he can turn a drop of wine into blood, from the confessional where he daily studies with cold and scientific attention the morbid anatomy of guilty consciences, he brings to courts some talents which may move the envy of the more cunning and unscrupulous of lay courtiers; a rare skill in reading characters and in managing tempers, a rare art of dissimulation, a rare dexterity in insinuating what it is not safe to affirm or to propose in explicit terms. There are two feelings which often prevent an unprincipled layman from becoming utterly depraved and despicable, domestic feeling, and chivalrous feeling. His heart may be softened by the endearments of a family. His pride may revolt from the thought of doing what does not become a gentleman. But neither with the domestic feeling nor with the chivalrous feeling has the wicked priest any sympathy. His gown excludes him from the closest and most tender of human relations, and at the same time dispenses him from the observation of the fashionable code of honour. Such a priest was Portocarrero.

Lord Macaulay defends the Treaties of Partition with much ingenuity and tolerable success. Yet it is difficult, after all, not to sympathise with the feelings of the proud Castilians to an extent almost incompatible with any formal approbation of these cold-blooded diplomatic distributions of men and national rights. It is very probable that the Italian and "Guipuscoan" populations had no very vivid feeling of attachment to their Castilian lords, but it is quite another matter whether they could have relished a wholesale transference of their allegiance to another Prince without the slightest opportunity being afforded them of expressing their wishes on the subject. The balance of power in Europe is, no doubt, an important consideration, but it is another matter whether it should be allowed to preponderate to the extent to which it was carried in the Treaties of Partition. But William was, after all, much more of a *European* Prince than a *national* Monarch, and as such could hardly be expected to feel very keenly any violation of national rights when the general interests of Europe pointed to any particular course.

We could linger willingly over many of these brilliant pages, but as it is a book which our readers will be certain to peruse for themselves, we have perhaps even exceeded our necessary duty in the extract which we have already made from it. For the same reason we are not afraid of being misapprehended in the criticism on which we have ventured. Lord Macaulay's History possesses intrinsic merits which defy almost any amount of special criticism, however successful. Its author may not have always impressed on the popular mind the most impartial or truest conception of public men and public affairs; but it will always remain as his indisputable and singular merit, that he has induced a whole nation to read its own history.

THE NATIONAL REVIEW. No. XXIV. Chapman and Hall.

THIS is an unusually good number of the "National": the articles are shorter than is common, and proportionally numerous and varied; all of them are interesting and scarcely any of them heavy. The most tempting paper at first sight, is perhaps that on "Plato"—evidently by a well-known hand; and the latter portion is excellent and eloquent, but the former, on Plato's physical notions, is singularly difficult and dry. It is perhaps unreasonable to feel disappointment at anything so unquestionably valuable; but certainly we had expected something still finer and more satisfying, on such a subject, from such a pen.—There is an elaborate and well judged article on "National Education," showing in detail the working of the present system and suggesting several schemes for its improvement; but we are tempted to regret that the matter was not postponed till the ensuing number, when the voluminous and comprehensive Report just issued by the Royal Commissioners appointed to examine the entire question might have been digested and criticised. That document will assuredly give rise to much controversy; and another long paper on the same subject in July may prove rather a tax upon the interest of general readers of the Review.—Then we have a light article on "Mrs Piozzi," and a somewhat solid one on "Prussia and the German Confederation,"—the views developed in which, as to the surrender by the two great Teutonic Empires of their non-Teutonic Provinces, deserve the attention of politicians, particularly at the present juncture.—Mr Maine's admirable book on "Ancient Law" is discussed with capacity and care; and the paper on "Port Royal" contains a concise and readable sketch of that religious body.—The article on "Politics and Faith," we feel somewhat at a loss to characterise. The writer deplores the apparent disbelief, or rather ignoring, by statesmen and historians in the present day, of any overruling guidance or providential plan in the course of political events, and conceives that the thread of such supervision and control has of late especially been distinctly visible. The discussion is deeply interesting, and the tone in which it is treated is at once thoughtful, lofty, and devout; but we have no space, and do not feel called upon, to offer an opinion as to the completeness or soundness of the views put forth. The article is, however, eminently suggestive—and this, though special praise, is high praise also.

"The Diplomatic Service" is handled in a manner which shows that the writer is fully master of the subject he has undertaken, yet with so much brevity and moderation as to make us wish that the article had been more elaborate and complete. It will be satisfactory to know that the author considers Great Britain to be *on the whole* better served by her diplomatic agents abroad than any other nation; and that, apart from a very few inconsiderate or indefensible appointments, the faults (which must be

admitted to exist in our external action) are to be attributed less to incapacity or unworthiness in our Consuls and Legations abroad, than to the absence of any systematic, consistent, and broadly-based foreign policy at home.—An article on the "The Author of Paul Ferroll,"—in all the critical conclusions of which, powerfully as they are urged, we cannot profess to agree; and one on M. de Tocqueville, whose memoirs and correspondence have recently appeared,—will have great attractions for all to whom the study and analysis of rare character is interesting. The latter appears to be from the pen of one who was intimately acquainted with the French Philosopher and Statesman—whom he characterises as "the purest, noblest, truest gentleman he ever knew."

The political article which closes the number is exceedingly well timed, and will be read with especial interest at a moment when to all appearance the great American Republic is on the very verge of dissolution. It is a sketch of the social, political, and commercial position of the United States at the three epochs of Washington, Jackson, and Buchanan; and traces clearly and briefly the material progress of the nation contrasted with its moral decline from 1790 to 1860. It is in every respect deserving of careful and considerate perusal. It explains the gradual deterioration of the national character as shown in, and aggravated by, the steady and rapid democratic corruption of their institutions;—the abolition of property and residential qualifications, the encroachments of universal suffrage, the destruction of judicial independence, the abolition of all permanence in the tenure of civil office, the increase of lawlessness and brutality, the decline of integrity among public men, and the general but indisputable lowering of the standard of decency and manners. The picture is a very melancholy one, and not the less so that it is painted without any exaggeration of colouring. The corruptions and infamies of Mr Buchanan's administration are less fully and distinctly stated than we could have wished; but it was probably difficult without entering into cumbersome details to have done complete justice to this part of the subject. The concluding portion of the paper is not as well done as the earlier divisions, but in spite of this imperfection we commend the whole to the earnest attention of all who are anxious to trace the true history of a democratic experiment, tried on the grandest scale and under the most favourable circumstances.

On Food. Being a Course of Lectures delivered at the South Kensington Museum. By E. Lankester, M.D., F.R.S., Superintendent of the Animal Product and Food Collections. London: Robert Hardwicke, 192 Piccadilly. 1861.

In these lectures Dr Lankester treats successively of Water; Salt; Heat-giving Food; Oil, Butter, and Fat; Flesh-forming Food; and Animal Food. All these he classes under the head of "alimentary or necessary food." He traces the chemical ingredients of which each substance of food is composed, in order to explain its action on the human system, and the information he thus communicates is not only very curious and entertaining, but is of great importance, especially to those who have the superintendence of a household. There is, however, one drawback to the general acceptability of this excellent little work, viz., its habitual use of the technical terms of chemistry (which are no doubt indispensable to the correct statement of the facts to be described) without any explanation of them for the unlearned reader. If a brief introduction were prefixed to supply this want, the work would probably circulate among many readers who must at present be discouraged by repeatedly failing to comprehend descriptions of facts which are too valuable to be lost without regret. As usual in this series, the woodcuts are numerous and instructive, and the book is cheap and well printed. One passage, however, reads to us like an erratum; at page 53, line 5, ought not "the potash *arrests* certain changes," to have been "the potash *assists* certain changes"? The sentence as it stands is unintelligible, and this alteration would explain it entirely.

Considerations on the Human Mind; its Present State and Future Destination. By Richard Grattan, Esq., M.D., Ex-J.P., Author of several Works on Medicine, Politics, and Social Economy. London: George Manwaring, King William street, Strand. Dublin: M'Glashan and Co. Belfast: Greer. 1861.

A garrulous, rambling book, by a retired physician, whose drift is to prove that the mind possesses a material substratum, essentially the same in all men, but distinguished by characteristic varieties in different races and individuals. Thus, he thinks, "the soul, being material in part, would resemble an organised body. It would possess, after death, a form visible to those of its own kind,—the power of occupying space," and "of holding intercourse with other minds." Of this theory the author believes himself to have received proofs, in certain visions, which he narrates at length, of his wife and son, soon after their deaths. These visions, or rather dreams, are of the vaguest nature, and would prove nothing to a mind that was not already prepared to believe. There are a few curious thoughts and anecdotes scattered throughout this volume, but they are overlaid by a mass of diffuse talk which very few readers will care to wade through.

The Foot and its Covering: comprising a full Translation of Dr Camper's Work on "The Best Form of Shoe." By James Dowie. London: R. Hardwicke, 192 Piccadilly. 1861.

A sensible, practical, and amusing treatise, by a Scotch shoemaker, who has evidently studied with enthusiasm every subject that bears upon his vocation. The book is illustrated by anatomical plates, and is dedicated to Sir Benjamin Brodie.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

Paris, Thursday.

The Government has at last, in execution of a design long entertained, had the courage to propose to its Corps Legislatif another great measure of commercial reform,—the complete abolition of the sliding scale on the importation and exportation of grain and flour, and the substitution for it of moderate fixed duties on imports, and entire liberty for exports. The sliding scale was originally established in 1814, and has been repeatedly modified since, its last and as was believed definitive modification having taken place in 1832. It is one of the most complicated and grotesque pieces of machinery ever employed in any country. It divides France into four classes, each class being formed without any great regard to geographical affinity,—one class, for example, comprising the North-Eastern departments of the Ardennes and the Aisne, and the extreme Western of Finistère and Morbihan: it selects a certain number of markets in each of four classes, and ascertains every month the average price of grain in each,—the said markets being chosen as absurdly as the classes are grouped: on that monthly average it imposes *every month* duties which vary almost infinitely in each class according to variations in price; and those duties are so contrived that the imperceptible rise of 1 *centime* the hectolitre in price may make a difference of 1f or 2f in the duty. The practical operation of this scale is, that it impedes importations when they are needed, and prevents exports when producers could make them to advantage; that by its constant fluctuations it renders the trade in corn full of uncertainty and hazard; and that at times it occasions the most startling differences in the prices of grain between one part of France and another. The object of the framers of it was to protect agriculturists in years of abundance against what they considered an undue depreciation in the price of grain; and to preserve consumers in years of scarcity from excessive dearness. But, practically, neither of these results has ever been obtained; the exact contrary has, in fact, almost invariably been the case. So notoriously has its ineffectiveness in times of scarcity been demonstrated, that after the dearth of 1847 it had to be suspended; it was again suspended after the dearth of 1853, and has remained so ever since, with the exception of the period comprised between the 7th of May, 1859, and the 22nd of April, 1860. It is at this very moment under suspension to the 30th of September next. It has, moreover, worked infinite mischief by the manner in which it has checked commercial relations: it has, for example, prevented the North-Western Provinces of France from becoming what they might easily have been, one of the principal corn markets for the supply of England, and of course as they could not sell their grain to England, they abstained from purchasing the many English productions which would be useful or agreeable to them.

The bill which the Government has presented to the Legislative Body is preceded by a long *exposé des motifs*, in which the history of the sliding scale is recorded from its commencement to the present time, and the evil effects it produces are clearly demonstrated, and in which, too, the argument is maintained that by the abolition of it French farmers will not, contrary to their belief, sustain any injury. The *exposé*, moreover, represents very wisely that the recent commercial reforms and the treaty with England make such a change in the general economic system of France that the maintenance of the sliding scale would be an anomaly, and would check those commercial relations which it is the object of the reforms and the treaty to develop. An analysis of this document would take more space than can be afforded; and, besides, one is really not necessary, as the evils of the sliding scale, briefly summed up above, have on several occasions been exposed in the Economist. But the Bill itself which the Government has presented may be interesting both to the corn trade and

the shipping interest in England, and I therefore subjoin a translation of it:—

"Art. 1. The duties on the importation of grain, flour, and other alimentary articles are established as follows:—

	In Grain.	Flour. per 100 kilogs. (about 2 cwts.)
Wheat, spelt, and wheat mixed with rye:—		
By Sea:—By French vessels from countries out of Europe, and the growth of countries of Europe	50c	75c
By ditto from elsewhere (foreign Customs entrepots in Europe)	1f 50c	1f 75c
By foreign vessels	1f 50c	1f 75c
By Land:—Growth of European countries	50c	75c
From elsewhere	1f 50c	1f 75c
Rye, maize, barley, buckwheat, oats, pulse, chestnuts, canary seed, millet, vetches, &c.:—		
By Sea:—By French vessels from countries out of Europe, and the growth of countries of Europe	Free	
From elsewhere	1f	1f
By foreign vessels	1f	1f
By Land:—Growth of the countries of Europe	Free	
From elsewhere	1f	1f
Bread and sea biscuit:—		
By French vessels and by land		75c
By foreign vessels		1f 75c
Groats, semoulia in groats, and native feculas:—		
By Sea:—By French vessels from countries out of Europe	75c	
The growth of countries in Europe	75c	
From elsewhere	1f 75c	
By foreign vessels	1f 75c	
By Land:—The growth of European countries	75c	
From elsewhere	1f 75c	
Rice in grain:—		
By Sea:—By French vessels from countries out of Europe, and the growth of countries of Europe	50c	
From elsewhere	2f	
By foreign vessels	2f	
By Land:—The growth of countries of Europe	50c	
From elsewhere	2f	
Sago, salep, and foreign feculas:—		
By Sea:—By French vessels from countries out of Europe	75c	
From elsewhere	2f 25c	
By foreign vessels and by land	2f 25c	
Semoulia in paste, maccaroni, &c.:—		
By Sea:—By French vessels from countries out of Europe	5f	
The productions of countries in Europe	5f	
From elsewhere	7f	
By foreign vessels	7f	
By Land:—The production of European countries	5f	
From elsewhere	7f	

"Art. 2. The grain, flour, and other alimentary articles above mentioned, and also potatoes, *are exempt from export duties.*"

As no data is fixed for bringing these duties into operation, it is to be presumed that the present intention of Government is to cause them to take effect as soon as the Bill shall pass.

An Imperial decree just promulgated enacts that the capital of the Bank of Algeria may be increased from 3,000,000f to 10,000,000f by the issue of 14,000 new shares at 500f, the issue to take place at such periods as the Directors may think fit. The decree stipulates that a portion of the clear profits, not less than one-third, after payment of interest of 6 per cent. to the shareholders, shall be set apart to the reserve fund until the latter shall amount to one-third of the capital.

The *Journal du Havre* calls for a measure which has long been demanded by the public interest and common sense,—the repeal of the law which prohibits (except for the discounts of the Bank of France) the taking of higher interest than 6 per cent. in commercial matters and 5 in non-commercial. It is singular that such a law should exist in these days in such a country as France.

The Minister of Commerce, in reply to a letter from the manufacturers of Sainte Marie, in the department of the Haut Rhin, says that, under the treaty with England, all dyed cotton tissues must pay 25c the kilog above the duty on unbleached, whether the dyeing takes place in yarn or in the piece; and that mixed tissues in which cotton predominates, must pay 15 per cent. *ad valorem.* The same manufacturers asked at what date the treaty is to come into operation for articles now prohibited, and the Minister, in reply, referred to the declarations made by the Government in the Chambers on the subject.

The negotiations for the treaty of commerce between Belgium and France are concluded, and the treaty will soon be signed and published. Those with the Zollverein are progressing satisfactorily. It has already been decided that the Zollverein shall reduce the duty on French wines in casks from 6 thalers to 2 thalers per 50 kilogs, and in bottles from 8 thalers to 4 thaler per 50 kilogs. To tax wines by weight may appear irregular, but it will be convenient.

The Parisian Gas Company, in an annual meeting of shareholders just held, stated the profits of last year at 8,660,931f. This sum is sufficient to allow a dividend of 70f per share, and one of that amount was accordingly declared. Of it 25f have already been paid on account. The Parisian Omnibus Company has declared a dividend of 47f per share, of which 25f were paid on account in January last. The profits of last year were considerably below those of the year before, owing to the aggrandisement of Paris having necessitated the prolongation of certain lines, and the formation of several entirely new ones.

Count de Germiny is about to give up the provisional administration of M. Mires' affairs, if he has not already done so; and they will be placed "in liquidation" in the ordinary way. Certain awkward facts have come out respecting the Roman railways, one of his enterprises: thus, though all the shares were represented to be subscribed, it turns out that only 70,000 out of 170,000 were really taken; and it appears that though the Directors of the Company reduced the nominal value of the shares from 500f to 400f, the Roman Government never consented to the reduction, and yet they kept its refusal secret from the shareholders, so that the latter are now, to their great surprise, liable to pay 100f per share. The retirement of the Directors of this Company is expected.

Subjoined is an account of the markets:—

Flour.—At *Paris* the quotation continues 70f to 75f the sack of 150 kilogrammes. Four marks for April, yesterday, were at the commencement of business, 72f 25c to 72f 50c, but towards the close 72f were accepted. May and June were 72f 25c; June and July, 72f 50c.

Wheat.—At *Paris*, yesterday, the quotation was 38f to 39f the sack of 120 kilogrammes, but no great business was done. In the provinces there has been a rise in 14 markets of 12c to 73c the hectolitre, a fall in 92 of 10c to 1f 50c, and no change has taken place in 28. From 3 the report is "firm," and from 23 "calm."

Cotton.—At *Havre*, in the week ending Friday, the sales were 17,796 bales, and the closing prices were 1f higher for low Mobile and Georgia, but without change for other sorts. Low New Orleans was consequently 99f the 50 kilogrammes; and very ordinary ditto, 101f. This week, business has been very calm.

Sugar.—In the week ending Friday, prices rose at *Havre*. 220 casks French West India went at 48f 50c to 49f 50c the 50 kilogs; 400 bales Reunion disposable at 52f, and a large lot expected at 52f 50c; 523 casks and 1,317 sacks Bahia 34f in bond; and 2,800 Havana expected, 37f. The arrivals were about 700 casks Santiago. This week, business has not been active: Porto Rico, 52f; Havana, 36f 25c; French West India, 49f; Rio, 34f. At *Nantes*, last week, business was exceedingly animated: 157,218 sacks disposable and for delivery at 51f 25c to 52f 50c; 800 sacks Mayotte, 46f 50c; 3,800 casks French West India, 49f 25c. In addition, a bargain was made for the delivery in September of 10,000 casks Havana. This week, some large sales have been made: Reunion, 52f 50c; Mauritius, inferior, 38f 50c to 42f; crystalised and superior ditto, 51f to 52f 52c. At *Bordeaux*, last week, the business done was unimportant: 24,600 bales Reunion went at 52f 75c to 53f; 670 casks French West India, 49f to 50f; 1,000 bales Mauritius, 54f. This week, nothing has been done. At *Marseilles*, last week, business was very animated: 31,800 sacks Reunion, 52f to 53f; 1,400 ditto, 52f 50c; 3,500 sacks Bahia, 33f 50c. A refinery establishment moreover treated for some large quantities of Havana and Bahia, but prices not stated.

Coffee.—At *Havre*, in the week ending Friday, a fair amount of business was done, and prices were firm. 2,100 sacks Hayti Port-au-Prince disposable went at 80f the 50 kilogs in bond; 915 ditto for delivery at the same price; 300 sacks Jacmel for delivery, 79f; 1,650 sacks Rio, not washed, disposable, 67f 50c to 73f; 52 ditto for delivery, 72f; 73 Rio, washed, for delivery, 84f; 10,150 sacks Santos, expected, 74f to 76f; and a small lot of French West India "habitant," for delivery, 135f, duty paid. Various lots of damaged were also sold, and the arrivals were about 5,500 sacks, and some smaller lots. This week, Hayti Jeremie have been at 79f; Gonaives, 82f 50c; Rio, 68f; Porto Rico, 87f; Cayes, 78f; St Marc, 82f 50c. Some damaged Rio has also been sold. At *Bordeaux*, last week, business was not very active; a small lot of Santiago at 92f in bond; 1,250 sacks Rio, not washed, 73f to 92f, according to quality; 50 Guayra, 88f; 447 Java, 117f 50c duty paid. This week, nothing has been done. At *Nantes*, last week, nothing important was done beyond what was related in last Economist. This week, no sales have been made. At *Marseilles*, last week, business was rather animated and prices had an upward tendency. Between 2,000 and 3,000

sacks Rio went at 68f; and 70 of superior quality at 72f to 74f. About 5,000 sacks of inferior quality went at 65f; and 1,200 damaged were also disposed of.

INDIGO.—At *Havre*, in the week ending Friday, the sales amounted only to 33 cases Bengal, at prices kept secret. The arrivals were only 7 cases from England. This week there have been no sales. At *Bordeaux*, last week, business was not important: 6 cases Madras, 22 Kurpah, 3 Java; prices not given. This week, 13 cases Java and 5 Kurpah have been disposed of.

HIDES.—Business at *Havre*, in the week ending Friday, consisted of the sale of 1,030 dry La Plata disposable, at 121f to 145f the 50 kilogs; 4,450 Rio Janeiro dry, 57f 50c; 200 Pernambuco dry, 94f; 716 New Orleans salted, 47f to 47f 50c. By auction, moreover, out of 4,885 offered, 2,742 sound and damaged were sold, the prices of the sound being—Monte Video salted, 51f 25c; Maragnan drysalted, 70f; Tampico dry, 79f; Carmen dry, 79f; Martinique salted, 58f 50c to 62f 50c; Hayti drysalted, 55f; Lima, 66f to 67f 50c; California dry, 108f; Cape salted, 40f; Ireland salted, 41f 50c to 44f; New Orleans salted, 55f 50c. The arrivals were not considerable. This week, transactions have not been important: New York salted, 50f 50c; New Orleans salted, 47f 50c to 48f 50c; Buenos Ayres dry, 117f to 135f; Valparaiso drysalted, 97f 50c; Monte Video salted, 51f 25c.

WOOL.—At *Havre*, in the week ending Friday, business was rather active. 160 bales La Plata, unwashed, from 1f 70c to 3f 32½c the kilog; 23 bales Buenos Ayres, washed, 2f 60c; 121 bales sheepskins La Plata, unwashed, 1f 25c to 1f 65c. The arrivals were rather more than 500 bales. This week, Buenos Ayres unwashed has been 235f the 100 kilogs; Monte Video sheepskins, 105f to 185f.

TALLOW.—At *Havre*, in the week ending Friday, 125 casks La Plata went at 68f the 50 kilogs. The arrivals were not important, and the stock was about 530 casks. This week, nothing has been done. At *Paris*, yesterday, the 100 kilogs were 130f 25c.

The 47th half-yearly meeting of the shareholders of the Bank of Jamaica was held on the 1st ult.. The net profit, after making provision for all bad and doubtful debts, amounted to 5,093*l* 3s 6d, which enabled the directors to recommend an increased dividend of 4 per cent., leaving 1,733*l* 3s 6d to be added to the reserved fund, which would then amount to 20,999*l* 19s 10d. The forfeited shares had been reduced in the six months by 3,024*l*. The exports from Jamaica during the months of January and February amounted to 6 tierces and 686 bags of coffee; 682 hogsheads, 121 tierces, and 108 barrels of sugar; 318 puncheons and 1 cask of rum; 297 bags of pimento; 925 tons of dyewoods, &c. The Demerara Court of Policy sat on the 28th of February, to conclude the framing of the annual estimates. The weather had been very variable, in general showery, but with a few bright days intervening. The exports for the fortnight had been:—Sugar, 2,430 hhds, 115 tierces, 402 barrels, and 418 bags; rum, 1,356 puncheons, 100 hhds and 67 barrels; hardwood timber, 17,465 feet; cocoa-nuts, 1870.

The total quantity of seaborne coal imported into London in March last was 348,172 tons, against 352,992 tons in March, 1860:—

During the greater part of the week the cotton market has been languid, with a limited business; purchases were made on slightly easier terms. Since the arrival of the Niagara's advices there has been more animation, and a fair demand has arisen from the trade. Prices have also regained their previous level, so that we can make little or no alteration in our quotations. There has been a fair demand for Egyptian, at former rates. Brazil are without alteration. A fair business has been done in East India, which, after drooping a little, are now steady at last week's prices. The sales to-day are 10,000 bales. The market is firm. The reported export amounts to 6,450 bales, consisting of 3,190 American, 250 Brazil, and 3,010 East India.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria. cap. 32, for the week ending on Wednesday, the 3rd day of April, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,668,460	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	11,345,098
		Silver Bullion	848,362
	26,668,460		26,668,460

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,608,024
Rest	3,858,803	Other Securities	20,218,063
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7,823,669	Notes	6,844,490
		Gold and Silver Coin	806,670
Other Deposits	11,635,480		
Seven Day and other Bills	606,295		
	38,477,247		38,477,247

Dated the 4th April, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,430,265	Securities	30,748,087
Public Deposits	7,823,669	Coin and Bullion	13,000,130
Private Deposits	11,635,480		
	39,889,414		43,748,217

The balance of Assets above Liabilities being 3,858,803*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£447,958
A DECREASE of Public Deposits of	592,175
An INCREASE of Other Deposits of	530,550
An INCREASE of Government Securities of	8,952
An INCREASE of Other Securities of	250,535
An INCREASE of Bullion of	144,674
An INCREASE of Rest of	17,828
A DECREASE of Reserve of	270,221

The increase in the bullion is less than might have been anticipated, considering the large amounts of bar gold that have been daily taken to the Bank. At the termination of the quarter, however, there is a considerable absorption of coin into general circulation, arising from the usual payments at that period. The decrease in the public deposits is due to the same cause, and is nearly equalled by the augmentation in the other deposits. The diminution in the reserve is chiefly attributable to the increase in the other securities.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,161,017	£ 20,961,157	£ 22,276,721	£ 22,545,586	£ 20,430,265
Public deposits	8,866,091	6,988,972	9,999,661	9,696,432	7,823,669
Other deposits	9,572,840	13,733,515	12,920,732	13,966,248	11,635,480
Government securities	14,145,250	9,153 978	11,708,305	10,221,140	10,608,024
Other securities	14,147.070	16,620,004	17,717,713	24.964,764	20,218,063
Reserve of notes & coin	8,341,891	12,641,658	11,933,318	7,513,007	7,651,160
Coin and bullion	13,906,656	18,311,898	18,960,478	14.883,597	13,000,130
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4½ p. c.	6 p. c.
Price of Consols	97¼	96½	95¾	94½	91⅞
Average price of wheat	38s 4d	44s 3d	40s 8d	46s 5d	55s 2d
Exchange on Paris (shrt)	25 0	25 5 12½	25 2½ 10	25 10 17½	25 35 42½
— Amsterdam ditto	11 15 15½	11 15 16	11 14 15	11 14 14½	11 18 19
— Hamburg (3months)	13 7¼ 7½	13 6 6¼	13 5¼ 6	13 5¾ 6	13 8¼ 9¼

In the corresponding week of 1851 the Budget had just been laid before Parliament, exhibiting an estimated surplus of 1,890,000*l*. Its principal feature was the proposed abolition of the window tax. The bearing of a new act of the Congress of the United States for regulating the appraisement of imported merchandise was also creating much interest. Abroad the repressive and barbarous spirit of the then Italian Governments was shown by the refusals of the Pope and King of Naples to grant passports for a visit to London to see the Great Exhibition.

In 1858, Mr Disraeli's Budget was awaited. Notwithstanding the payment of about one-third of the Indian loan of 5,000,000*l* (many of the subscribers paying in full), the money market was very easy.

In 1859, another Indian loan was daily expected. The Russian 3 per Cent. loan of 12,000,000*l* was on the eve of issue, and payments on the Chilian loan of 1,554,000*l* were in progress. Great depression was manifested in the stock markets throughout Europe, the conditions and time of meeting of the proposed Congress having become very uncertain, and the continued armaments of France, Sardinia, and Austria clearly portending war. Lord Derby had announced his intention of dissolving Parliament as soon as the necessary money bills could be passed.

In 1860, the principal events were in connection with Italy. Austria had protested against the annexation of Tuscany, Parma, and Modena to Piedmont, and the Pope had published an excommunication of "the invaders and usurpers" of some of his provinces. The Sardinian Chambers had just met. In Spain, General Ortega had attempted to organise a revolutionary movement in favour of the Count de Montemolin. The English Parliament was discussing some of the measures necessitated by the new commercial arrangements introduced in the Budget.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 4,574,230*l*; in 1858, a deficiency of 2,886,489*l*; in 1859, a deficiency of 4,796,981*l*; and in 1860, a deficiency of 10,998,416*l*. In 1861, the deficiency is 8,582,583*l*.

DISCOUNT AND MONEY MARKET.—The Directors of the Bank of England, at their weekly court, yesterday, reduced their *minimum* rate of discount from 7 per cent., at which it was fixed on the 21st ult., to 6 per cent.

The step was fully expected to take place, but there was some doubt whether the change would be made this week or the next. Hence the announcement of the reduction caused considerable buoyancy in the stock markets, and altogether a feeling of greater confidence. During the whole week the demand for discount has been moderate, and in the open market the current rate was always below the Bank, except last Saturday, when, being the last day of the quarter, more pressure prevailed. The requirements for the 4th of the month appear to have exercised little influence, traders being already well supplied with capital. On the Stock Exchange money has been rather abundant, and loans on Government securities can be obtained at 5½ per cent.

It was on the 7th of January that the Bank raised their rate from 6 per cent. to 7, a point never previously touched except in a crisis, and a further advance was subsequently adopted to 8. Nearly three months have, therefore, elapsed with money at a panic height. It is a matter of congratulation that, notwithstanding this circumstance, no failures of any importance have taken place. The Greek interests for some time suffered severely, but have since almost entirely recovered themselves.

The joint-stock banks held a meeting to-day, when it was resolved to reduce their allowance on deposits to 4½ per cent. The discount establishments have also lowered their terms to 4½ per cent. on money at call, and 5 with 7 days' notice. A general reduction is thus shown of a half per cent.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	3
Frankfort	3	2¼
Amsterdam	3	3
Turin	7	6
Brussels	4	4
Hamburg	...	2½
St Petersburg	6	...

The commercial bills maturing yesterday, the 4th, were unusually large, but were remarkably well met, no default of any importance being announced.

The private advices from New York are more encouraging, and point to a belief that the present difficulties may be got over without civil war. The exchange has risen to a point when it would be profitable to send back gold to England, and some expectation prevails that shipments to this side will consequently take place. It must be borne in mind, however, that the recent exports from here were not conducted as an exchange operation, but were direct remittances in return for cotton and corn. It is, therefore, doubtful whether any important sums will immediately come back, except in the event of a renewed demand from the States for English goods.

ENGLISH FUNDS.—Consols during the greater part of the week were flat on the apprehension of further complications

in foreign politics, and the possibility of a renewal of the war between Italy and Austria, the continued armaments of France also creating some uneasiness. Yesterday, however, the movement at the Bank caused a rapid recovery, which has been followed by a fresh advance this afternoon. The final prices were nearly the same as last Friday, being 91¾ for money, and 91¾ to ⅞ for the current account. For the 9th of May the latest quotation is 92 to ½.

Exchequer bills have rallied from their previous depression, and are now quoted 7s to 3s discount. It would, however, be impossible to effect any large sales at this price. India bonds are also nominally 5s higher, leaving off at 30s to 20s discount.

India Scrip has been in little demand this week, but has slightly improved, the closing quotation being 100⅛ to ⅜.

Foreign Stocks.—The transactions in foreign stocks this week have not been large, and speculation has been mainly confined, as usual, to Mexican and Turkish. The former, after some fractional fluctuations, closed this evening ⅛ lower than last week. Turkish Six per Cents. have also declined, partly on the Syrian question, and partly on the fear that an outbreak of war would lead to an eventual dissolution of the Ottoman Empire. The present prices, however, are better than at one period. Spanish Passive and Certificates have been flat, particularly the latter, the report that the Government were about to act with some return to good faith towards the holders of these securities turning out unfounded. Russian stocks continue heavy. Sardinian, on the other hand, has been little affected by the threatening rumours from Italy.

The usual purchases for the sinking fund of Peruvian Three per Cents. have been completed by the purchase of 65,400*l* stock at 73½. The original amount of this loan was 1,703,300*l*, of which 715,400*l* has now been redeemed, leaving 987,900*l* still in the hands of the public.

French Three per Cents. closed this evening at 67f 75c for the new account, or nominally the same as last Friday. In the interval, however, a decline had taken place of ¼ per cent.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on March 28 and to-day:—

	Consols. Money. Lowest.	Highest.	Account. Lowest.	Highest	Exchequer Bills.

Railways and other Shares.—The market for British railway stocks was unfavourably influenced in the early part of the week by the publication of the traffic returns from the lines in the manufacturing districts, which, although showing an increase, were not so good as had been calculated upon for the extra receipts for Good Friday. On the announcement of the reduction at the Bank, however, a number of purchases were effected to cover previous speculative sales, and a general advance look place, which, after a temporary reaction, has continued again this afternoon. Compared with last Friday, the changes have been unimportant. Lancashire and Yorksire, however, shows a fair improvement on the week.

In the Colonial market there has been a better demand for Canadian descriptions, and both Great Western of Canada shares and Grand Trunk stock have advanced. Indian securities have been rather dull.

The principal movement in foreign railways has been a further fall in South Austrian and Lombardo-Venetian shares, which were at one period quoted 2 to 1⅞ dis. A recovery, however, then followed to 1¾ dis. American railway securities have improved on the later advices from New York.

In the miscellaneous market there has been more inquiry for joint stock banks. Bank of Australasia, however, receded.

United Mexican Mining shares have been in demand on favourable advices from Mexico, intimating that a rather considerable remittance may shortly be expected. The full rise, however, has not been sustained.

Subjoined is our usual list of the closing prices of the principal railway shares on March 28 and to-day:—

Railways.	Closing prices March 28.	Closing prices to-day.

Foreign Exchanges:—The rates on Holland are again lower this week. The quotation for Paris also shows a slight decline.

Bullion.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, giving an account of the transactions in bullion for the week, and also of the business in Indian rupee paper:—

Gold—The following vessels have arrived with gold since our last circular of 28th March, viz.:—The Result, with 117,000*l* from Melbourne; the Lightning, with 115,000*l*, from Melbourne; the Monarch, with 90,000*l*, from Melbourne; the Tasmanian, with 130,000*l*, from the West Indies; and the Oneida, with 24,626*l*, from the Brazils. As there is but little demand for export, a great proportion of the above has been sent into the Bank, that establishment having purchased 383,000*l*, and the remainder will doubtless follow. The exports have comprised the Ceylon, with 14,499*l*, to India and China; and the Glasgow, with 17,600*l*, to New York; this latter amount makes a total of 4,818,000*l* despatched to America. The vessels now at sea from Australia are—The Kooria Mooria, with 40,000*l*, out 93 days; the Calliance, with 126,000*l*, out 86 days; and the Southampton, with 86,000*l*, out 75 days.

Silver—The Tasmanian has brought 225,000*l* in silver and dollars from the West Indies. The last price was 5s 0⅝d per oz standard; but we consider the market firm, and quote the price as from 5s 0⅜d to 5s 0⅝d per oz standard. The La Plata has taken 12,386*l* to the West Indies, and the Ceylon, 77,167*l* to India and China.

Mexican Dollars.—The dollars, ex Tasmanian, have been sold at 59½d per oz., and we quote that price as rather firm.

Exchange for Bank's drafts on India 60 days' sight, Bombay and Calcutta, continues 1s 11¾d to 2s 0⅛d; Madras, 1s 11⅜d to 2s. Bills with documents, 1s 11d to 1s 11⅜d.

India Government Loan Notes are the same as last week, viz., 99½ to 100½ for 5½ per Cents., and 93½ to 94½ for 5 per Cents., with a very dull market.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, refinable, 77s 10½d per oz std. Silver— Mexican dollars, 4s 11½d per oz; Spanish dollars (Carolus) 6s 6d per oz, last price.

The amount of gold that was taken to the Bank to-day was 130,000*l*, making a total of more than 200,000*l* since the making up of the return published this evening.

The bar silver brought by the last West India steamer has been sold at 60½d per oz., being an advance of ¼d on the price realised by the previous arival.

Failures and Mercantile Embarrassments.—The stoppage has taken place of Mr B. de Cuadra, Spanish merchant, with heavy liabilities. The house was formerly

Cuadra, Romero, and Co., and has long enjoyed a high reputation. The immediate cause of the failure arises from the failure of remittances from the Havana, owing to the recent suspensions there. The estate, it is thought, will pay in full.

A meeting of creditors of Mr Joseph Bull, of Ravensdale iron works, Newcastle-under-Lyne, has just been held, when it was stated that the liabilities amounted to 47,277*l*, while the assets were not more than 11,923*l*. Mr Bull considered himself solvent last June, and is unable to account for the present deficiency. Considerable dissatisfaction was consequently expressed, and there was a strong feeling in favour of adopting proceedings in bankruptcy. It was, however, eventually resolved to appoint a committee of investigation.

The suspension is announced of Messrs Black and Guild, of New York, with liabilities of about 50,000*l*, the chief portion of which will fall in Ireland and the North of England. The firm have an agency at Dundee.

The stoppage was announced this evening of Messrs C. A. and T. Ferguson, mast, oar, block, and gun carriage makers, of Millwall, with liabilities of about 40,000*l*, and assets, it is believed, of like amount. The firm was very old and respectable, having been established a great number of years. Annexed is the circular issued:—

Mast House, Millwall, Poplar, April 4, 1861.

We regret to have to inform you that, in consequence of heavy losses, we are compelled to suspend our payments. We have placed our affairs in the hands of Messrs Coleman, Turquand, Youngs, and Co., of No. 16 Tokenhouse yard, who will prepare a statement of affairs as speedily as possible, and lay the same before you. In the meantime, requesting your kind forbearance, we are, &c. C. A. and T. Ferguson.

Public Companies.—The report of the Agra and United Service Bank, issued preparatory to their meeting on the 13th inst., states that the net profit in the year 1860 was 130,345*l*, which, added to the 12,302*l*, brought forward from the previous year, made a sum of 142,647*l* to be dealt with. Out of this amount dividends and a bonus have been declared equal to 12 per cent., free of income tax; 10,000*l* has been carried to the reserve, which now stands at 200,000*l*; and a balance of 12,647*l* has been carried forward. Owing to the rapidly increasing business of Kurrachee, a branch of the bank has been established at that port.

The Union Steam Ship Company have held a meeting this week, and declared a dividend at the usual rate of 1*l* per share, or 10 per cent. per annum. The general operations during the past half-year have been satisfactory, the mail service having been regularly performed, and always within the contract time. The fleet have also suffered no serious injury from the late severe weather. The outward earnings of the vessels have slightly increased, but the homeward receipts remain comparatively small. The last new ship, the Cambrian, bought for 25,000*l* has successfully completed her first voyage; and another vessel of the same description, the Briton, has been ordered, at about the same price. To meet in part this outlay, it has been determined to sell the Phœbe. It was stated that the operations of the Company have met with the approval of the colonists at the Cape of Good Hope.

The annual meeting took place on Wednesday of the Company of Copper Miners in England; Sir J. H. Pelly, Bart., the governor, in the chair. The result of the operations of the year ending the 26th of January, 1861, has not been satisfactory, the accounts showing a loss for that period of nearly 1,500*l*, which was attributed to the overgrown competition in the iron and tin plate trades, the unsettled state of Continental affairs, and the threatened disruption of the United States. These unfavourable circumstances combined have caused a serious reduction in the value of iron, which has not been compensated by a proportional diminution in the cost of production, especially in the chief item of labour. It was the custom of the Company, in reducing wages, to await the action of other ironmasters; but, the trade doing nothing, the Directors resolved to take an independent course, and last September lowered their wages 10 per cent. Owing chiefly, it is believed, to the mischievous influence of a trade union, the workmen struck for ten weeks, when they acceded to the Company's terms. During this interval advantage was taken to remodel the establishment and to introduce economical measures. A careful re-valuation of the stocks has been made, and from the fall in prices they now stand in the books at a lower sum than last year, although the actual make has been larger. The liabilities of the Company are lower, notwithstanding they include a temporary loan of 25,000*l* from the bankers. The bad debts during the year have been 104*l* only. The works are stated to have been maintained in complete efficiency. The sum of 2,727*l* has been paid out of revenue for old improvements, and 4,373*l* laid out in new, making the balance at present standing to the debit of this account 6,165*l*, which will be written off in this and the next two years. A further outlay will be required this year, but of not more than 400*l* or 500*l*. The alteration in the rate of wages makes a difference to the Company of 10,000*l* a year. At present the works are fully employed, but they yield a very trifling profit. No dividends were proposed either on the ordinary stock or preference shares.

The report of the Nerbudda Coal and Iron Company, presented at their first meeting, yesterday, stated that the requisite tools and engines have been shipped for India. Mr J. H. Blackwell, late mineral viewer to the Bombay Government, has accepted the post of manager; and Messrs Harrison and Harden have been engaged as mining engineers. Operations have already commenced, and a sample of the coal has been forwarded home. Some quantities have also been supplied to the Great Indian Peninsula Railway, and, although surface coal, and necessarily of inferior quality, has answered every purpose. A proposed branch from the collieries to the main line of the Great Indian has been surveyed.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.37½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 6-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 425½ per mark, and the short exchange on London is 13.7 per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 8-10ths per cent. dearer in London than in Hamburg.

The last quotation of the course of exchange at New York on London for bills at 60 days' sight is 105¾ to 106 per cent., showing that as compared with the mint par between the two countries the exchange is against England. The high rate of interest, however, and the loss of time before the gold is received back from the American mints, render it doubtful if any profit can be made at the present rates by sending gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was a fair, but by no means active, demand for both English and foreign wheat at Mark lane to-day, and Monday's prices were well supported, especially for fine samples. Barley and malt moved off slowly, and oats were rather cheaper. In the value of other produce no change took place. The imports from abroad this week are 32,890 quarters of wheat, 10,296 barley, 63,307 oats, 700 sacks and 7,042 barrels of flour.

Both wheat and flour were a dull sale at Liverpool this morning, and the currencies had a drooping tendency.

The state of the grain trade at Alexandria to the 19th ult., is thus reported by Messrs Briggs and Co.:—

Transactions in all descriptions of produce, excepting Indian corn, have been greatly restricted, owing to the lightness both of stocks and receipts. Wheat has throughout the fortnight continued steady at our former quotations. Beans, on the other hand, though scarce, have latterly undergone a decline of 1s to 1s 6d per quarter f.o.b. Indian corn is firm, and in good demand for Syria as well as for England, with full prices for choice quality. The following are the sales since our last, with quotations of present value free on board:—Wheat—Saide, 2,270 quarters, 34s 6d to 35s 6d; beans—Saide, 1,350 quarters, 28s 6d to 29s 6d; Indian corn, 5,030 quarters, 26s to 27s 6d; lentils, 125 quarters, 25s to 26s per quarter. Freights—Beans to the United Kingdom for orders, 5s 9d to 6s 3d per quarter; wheat or other grain in proportion; to a direct port, 5s to 5s 3d for beans or wheat; grain ballasts to Liverpool by steamer, 5s 6d; by sailing vessel, 4s 8d to 5s.

The Liverpool cotton market, notwithstanding that the last accounts from America were in favour of holders, was quiet in the beginning of this week. Yesterday, in consequence first of the confirmation of reduced estimates of the crop, and afterwards the reduction in the Bank rate, a decidedly firmer tone prevailed, and better prices were paid, which are well supported to-day, with sales of fully 10,000 bales. The sales of the week (of only four days, last Friday and Saturday being kept as close holidays) are 46,360 bales, of which spinners took 33,830 bales, speculators 6,080 bales, and exporters 6,450 bales. In some qualities prices are raised ⅛d per lb. If the American crop should only reach the present estimate of 3¾ million bales, or nearly 1 million bales less than last year's crop, and about 700,000 bales less than last year's consumption required, it would prove how very precarious the results of this most important article are, and how necessary to seek a competitive production in other countries.

Messrs Neill Brothers furnish us with the following information respecting the cotton crop of the United States:—"The reduction in crop estimates caused by the sudden falling off in receipts is confirmed by a week's later deliveries. The change in public opinion has become universal on this side. It has been difficult to believe that the present crop would fall so far short of the last, particularly in view of the increased breadth of land planted, besides which some allowance had to be made for the natural tendency to under-estimate. But our advices from nearly every part of the country report that the crop has been hurried to market during the past two months under the fear of trouble with the new Administration, and that there is now very little cotton remaining to come forward. The falling off compared with last year has been one-third on hill lands and one-fourth on bottom lands, which is attributed to the damage by drought during summer, and also to the shortness of the picking season. The total decrease by telegraph now amounts to 775,000 bales, and will reach 900,000 by the end of April. It is therefore not suprising that estimates should take a low range. At New Orleans the general opinion has been reduced to 3,600,000 bales, but if the full balance of the crop comes to market, this figure will prove too low, though we do not now look for the total exceeding 3,800,000 bales."

SHIPMENTS of COTTON from ALEXANDRIA from 3rd Oct. to 16th March.

The transactions in the tea market have been only moderate, nevertheless prices are well supported.

There has been a slightly improved inquiry for most descriptions of sugar, at about previous rates.

Messrs Schmidt and Stern's circular, dated Havana, March 9, says :—

During the first fortnight since our last report of the 6th ult. our sugar market, under the influence of the continued stringency of the money market, and the unfavourable advices from the United States and Europe, was dull, and prices, particularly of the lower qualities, further gave way ¼ to ½ rl; but subsequently the demand became more active, and considerable transactions took place on the basis of 6½ to 7 rs for No. 12. Our quotations to-day are for good current qualities:—No. 7 to 10, 17s 1d to 18s 10½; 11 to 12, 19s 6d to 21s 3d; 13 to 14, 21s 11d to 23s 1d; 15 to 17, 23s 8d to 26s 8d; 18 to 20, 27s 3d to 29s 1d; whites, inferior to prime, 29s 1d to 33s 11d at 10 per cent. pm. f.o.b. The arrivals of sugar have been large, and stocks between here and Mantanzas amount to about 200,000 boxes, against about 120,000 boxes last year at same period. The exports from here and Mantanzas since the 6th ult. up to the 4th instant are as follows:—27,054 boxes to the United States; 27,342 boxes to the United Kingdom and a market; 1,891 boxes to Sweden and Denmark; 5,465 boxes to Hamburg, Belgium, and Holland; 4,184 boxes to France; 28,134 boxes to Spain; 3,173 boxes to the Mediterranean; 1,417 boxes to Central America; total, 49,660 boxes; and the total exports since the first of January amount to 145,743 boxes, against 946,84 boxes last year.

The following information is furnished by Messrs Trueman and Rouse :—

IMPORTS and STOCKS of SUGAR and COFFEE at the PRINCIPAL EUROPEAN PORTS, for the Two Months ending 28th February, 1860 and 1861.

Total	27,580	34,150	51.320	55,220

Coffee has remained firm, but the demand has been somewhat restricted.

"The only alteration in our quotations for currants," observe Messrs Witherby and Son, "is in that of the lower sorts, which since our last report have advanced 2s to 3s per cwt. The market now presents the unusual feature of a nominal range of only 5s to 6s per cwt between the lowest and the finest fruit in a stock of 11,500 tons. The raisin trade has ruled quiet. The clearances have continued large. The stock of all kinds on the 1st inst. was about 2,800 tons, against 6,100 tons in 1860. The stock of Turkey figs is much reduced."

The transactions in rice have been to a fair extent, at full quotations.

Since the close of the public sales, all descriptions of wool have commanded very little attention, though freely offered at the late decline.

"The wool market has continued in a very inactive and unsatisfactory state," observe Messrs Greame and Co. of Liverpool, "which, however, is not surprising considering the various adverse circumstances which have lately combined to depress and curtail trade in its various branches since the commencement of the new year. Stocks of all descriptions of wool are very light, and for useful current sorts there is a fair demand with but little alteration in last month's prices, while others are neglected, and to effect sales a considerable reduction would have to be suffered. Holders generally however are firm, and few forced sales are therefore submitted to."

The following table, from Messrs Churchill and Sim's circular, shows the stock of timber in the public docks on the 1st inst., compared with the same period in 1860 and 1859 :—

	1861.	1860.	1859.
Foreign deals pieces	1,440,000	1,210,000	1,109,000
Battens, boards, and ends	745,000	680,000	390,000
Fir timber loads	55,600	46,300	22,900
Colonial pine deals & battens pieces	968,000	478,000	786,000
Spruce ditto	779,000	715,000	563,000
Pine timber loads	11,000	9,900	8,300
United States pitch pine timber	890	3,500	3,500
East Indian teake	2,000	4,700	17,300

The following observations, from Messrs Powell and Co.'s circular, describe the state of the leather trade during the past month:—"It is seldom that we have to report a brisk leather trade in March, and the past month has fully partaken of the usual inactivity. The high value of money, and the general dulness which pervades almost all branches of commerce, have tended, no doubt, to restrict the transactions in leather, and induce buyers to limit their purchases to the *minimum* of their requirements. Under such circumstances it is satisfactory to be able to state that the alterations in prices are very slight, and that, although the supply has generally been abundant and stocks have increased, no important accumulation has occurred; there is also no doubt that the stocks held by dealers and curriers throughout the country are small, and it may be expected that further ease in the money market would impart a better and a firmer tone to the leather trade. In raw goods an average amount of business has been done. The imports have not been very large. An active demand for exportation was apparent at the public sale on the 14th ultimo, but was much diminished at the last sale. Prices show a slight concession, with the exception of River Plate produce, which is generally firm, and Buenos Ayres heavy ox hides advanced at the close of the month ⅛d to ¼d per lb."

Messrs Grant, Hodgson, and Co. report the state of the tobacco trade during the past month as follows:—"The market remained without change until the middle of last month, and the sales consisted of limited selections for immediate consumption. Subsequently two or three parcels of Western strips having found buyers at extreme quotations, there was more activity, terminating in sales of 1,332 hhds, viz.: 957 hhds Kentucky strips and 98 hhds of leaf, 122 hhds Virginia leaf and 114 hhds strips, and 41 hhds Maryland. Some of the parcels of Western strips are reported to have been taken for resale. A fair inquiry has been made for good and fine Kentucky leaf for exportation at rates which importers have declined accepting. Imports—216 hhds. Deliveries—1,074 hhds, against 1,045 hhds in the corresponding month of last year. Stock—19,709 hhds, against 17,538 hhds in 1860; 12,655 hhds in 1859; 8,559 hhds in 1858; 10,571 hhds in 1857; and 7,646 hhds in 1856."

Scotch pig iron has changed hands at 47s 3d cash mixed numbers. All other metals have met a dull inquiry,

The following is the monthly report for Banca tin in Holland :—

	1861. slabs	1860. slabs	1859. slabs
The stock on warrants amounted on the 28th February to	50954	44642	35316
Deliveries in March	9500	4958	5890
Stock on warrants March 30	41454	39685	29426
Stock in the hands of the Trading Society for their annual sale	192244	108638	96248

The stock of foreign in London is 856 tons.

Linseed oil is selling at 28s to 28s 3d per cwt on the spot. Most other oils have ruled about stationary. Tallow is dull, at 58s 6d on the spot; 57s 6d April to June; 56s 6d July to September; and 55s October to December.

"The demand for money in mercantile circles," observes the New York *Shipping List*, dated the 23rd ult., "is reported a little more active outside of bank, especially on the part of the jobbers, the most of whom, we are happy to say, speak more encouragingly now, than heretofore, of the spring business. Still, the supply continues largely in excess of the necessities of borrowers, and rates of interest keep down to low water mark, but without any relaxation of the rigid scrutiny to which endorsements are subjected. The banks are active competitors with the discount houses for whatever prime paper is floating about, and some of the leading institutions are finding it no easy matter in keeping up their lines. On call, the brokers are supplied at 5 per cent. We quote:—

	Per cent. per annum.
Loans on call, stock securities	5½ to 6½
Do. other good securities	6½ 7
Prime endorsed bills, 60 to 90 days	7 8
Do. 4 to 6 months	7½ 10
First-class single signatures	8 12
Other good bills	12 15
Names less known	18 24

We learn from Washington that the Secretary of the Treasury intends to advertise at once for an additional loan of eight millions, an amount which he thinks will be sufficient to carry the Government through to the end of the current fiscal year. The amount of dry goods withdrawn from warehouse for consumption during the week is double that marketed the corresponding week in 1859, and nearly equal to the business transacted this time last year. There has been but little animation at the Stock Exchange since our last. In United States securities and railway bonds, there has been a moderate business for investments, at firm and improving prices, but the railway list has been neglected, with the exception of Erie, large amounts of which have changed hands. Treasury notes are steady at 103¾ to 104 for the 12 per Cents, 103 for the 10¼, and 102 to 102½ for the 10 per Cents."

MARKETS IN THE MANUFACTURING DISTRICTS.

Notwithstanding that only a limited business has been transacted in goods in most of the manufacturing markets held this week, prices almost generally have been well supported. The stocks of goods in warehouse are by no means so extensive as might have been anticipated. The iron trade has continued heavy, and coals have further receded in price.

MANCHESTER, April 4.—This market has remained completely inanimate, notwithstanding the steady aspects of cotton and discounts, and the restrictions on manufacturing imposed by strikes in several important districts. One check on demand has been the depressing influence of the weather, another the unsettled state of European politics, and another the unalleviated position of our staple trades with India and America. With so many elements against sellers, they have been content to quote ⅛d to ¼d per lb less on yarns, and 1½d to 3d less on such cloths as are not interfered with by the turn-outs. Cloths which are so interfered with have been sought for, but more as a security in case they should be wanted than from being wanted. On the whole, this week has been more destitute of transactions than any that has occurred for months.

BRADFORD.—The buoyancy observable last week does not continue to the same extent. A good deal of wool changed hands just before Easter, and the users have supplied their not immoderate requirements. Prices, however, are not at all depressed. In the home trade for yarns there is not any change. Prices continue firm, and the turn against the buyer. The orders for Russia have as yet been very limited. The home trade for pieces is affected prejudicially by the unfavourable weather. It is also influenced by the turn-out of the Bolton spinners, some looms having been stopped from an insufficient supply of warps.

LEICESTER.—Very little business has been transacted this week, partly owing to the annual Easter holidays; indeed, the hosiery trade has not been known to be so dull for the time of the year for several seasons past. In the adjacent framework-knitting districts business is also very flat, and many of the operatives continue unemployed. There is no material change in the price of wool, the market remaining firm. Yarns not in request, and spinners only indifferently employed.

NOTTINGHAM.—The Easter holidays have interfered with business in the lace trade this week, and very little has been done at the warehouses. Plain nets continue dull of sale, and many other kinds of cotton goods are not in request. Much machinery is still standing, manufacturers chiefly finishing to order. In the hosiery trade there is no favourable change noticeable. Yarns hold up in price.

BELFAST.—A considerable amount of business has been done in the finish of goods. There is rather more inquiry for white linen; a few buyers for the home trade have been in the market, and exports show a slight increase. Bleachers are looking out for a favourable change in the demand for goods suited to the Continental trade.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, made with Lord Ward's thick coal warm air, 4*l*; Old Windmill End Mine forge pig iron, made with Lord Ward's thick coal, 3*l* 12*s* 6d; best native hydrate pigs, 3*l* 10*s* to 4*l*; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 10*s*; good mine pigs, with a modicum of flue cinder, 2*l* 10*s* to 2*l* 15*s*; mine pigs, deteriorated by cinder, 2*l* 7*s* 6d to 2*l* 12*s* 6d; Cleator Moor hæmatites, 3*l* 7*s* 6d to 3*l* 10*s*; Barrow hæmatites, 3*l* 7*s* 6d to 3*l* 10*s*; Workington hæmatites, 3*l* 7*s* 6d to 3*l* 10*s*; Kirkless Hall hæmatites, 3*l* 6*s* 3d to 3*l* 8*s* 9d; grey forge cinder pig iron, 2*l* 5*s* to 2*l* 10*s*; white forge cinder pigs, 2*l* 2*s* to 2*l* 7*s* 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12*s* 6d to 2*l* 17*s* 6d; superior makes of mine melting iron, 3*l* 2*s* 6d to 3*l* 15*s*, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Favourite Shropshire and Forest of Dean brands, 4*l* 5*s* delivered; Northern hæmatites from 3*l* 5*s* to 3*l* 10*s*, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, March 23.—On Wednesday and Thursday there prevailed a tolerably active demand for State and Western flour. The demand was light yesterday, however, and the market closed heavy. Canada flour is in moderate request, without essential alteration in prices. The demand for Southern flour has been moderate, and prices are without material change.

EXPORT from 1st to 19th March.

	1861. barrels	1860. barrels
Wheat Flour	95,498	37,379

The market for wheat was further strengthened on Wednesday last, by a further material decline in the rates of freight to Europe, and on some descriptions a slight advance was established, with a good business doing at the improvement. The European intelligence subsequently received, however, checked the demand for shipment. The business for the three days comprises 190,000 bushels. The above remarks are equally applicable to the market for corn. The demand was moderate yesterday, and the improvement established previously was barely sustained.

EXPORT from 1st to 19th March.

	1861 bushels.	1860 bushels.
Wheat	413,696	8,747
Corn	384,455	32,029

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Compared with last week, there has been less activity in the demand for English wheat; nevertheless, all good and fair samples have moved off freely, at very full prices. Inferior qualities have commanded very little attention, at late rates. There has been a good consumptive inquiry for foreign wheats, at full rates of currency. The barley trade has continued in a sluggish state, but without leading to any quotable change in prices. Malt has sold slowly, on former terms. Good sound oats have realised full currencies; but inferior parcels have changed hands at easier rates. Both beans and peas have ruled about stationary. The flour trade has been tolerably active.

Advices from most of the Continental ports are to the effect that large quantities of wheat have found buyers on English account, on higher terms. Barley and oats have sold freely; but other articles have been much neglected. The latest accounts from New York state that both wheat and flour were in steady request for export, at full quotations.

The Scotch markets have been steady for wheat, at quite last week's quotations. Spring corn and flour have moved off slowly, on former terms.

In Ireland, fine wheat, barley, and oats have commanded full prices. Otherwise, the trade has ruled heavy.

At Mark lane, to-day, although the show of English wheat was very small, all descriptions moved off slowly, and, in some instances, prices ruled the turn in favour of buyers. Owing to the large arrival, all kinds of foreign wheat were a dull inquiry, and the quotations were with difficulty supported. The barley trade was devoid of animation, at irregular currencies. Malt was in

slow request, at late rates. Oats attracted very little attention, and their value further declined 6d per quarter. Beans were steady; but peas were a slow sale, on former terms. In the demand for flour, there was no activity; nevertheless, no change took place in prices.

Floating Cargoes. — Since the 27th ult. up to last night, 45 arr vals off coast are reported, consisting of 28 cargoes of wheat, 4 maize, 5 barley, and 8 miscellaneous. The demand for cargoes afloat is inactive, and prices are looking downwards. The following are the reported sales:—Wheat, arrived, per 492 lbs, Venetian, supposed equal to about 60s 6d; Berdianski, 55s 6d; Odessa Ghirka, 57s 6d, 56s 6d, 53s 9d; Taganrog Ghirka, 53s; soft Azof, 54s; Polish Odessa at 58s and 54s 6d; Galatz, 48s 9d; Ibraila, 46s and 44s 6d per imperial quarter, and Behra, 39s. Maize arrived, per 480 lbs; mixed American, 38s 3d to 37s 6d; barley arrived, per 400 lbs, Odessa 27s; Taganrog, 27s; Saide, at 36s.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market reopened steadily on Wednesday after the brief holiday always observed at Easter, and prices were unaltered, but the demand has been less animated than previously noticed, partly attributable to the rather heavy sales declared for this day (Friday). 200 casks new Barbadoes by auction sold readily at 34s to 43s 6d per cwt. Moderate transactions occurred in West India by private contract, the refiners being now well supplied. The deliveries of sugar, last week, were partly interfered with by the brief holidays. About 4,000 tons were landed, and the stock at this port has increased to 52,800 tons, against 49,450 tons last year at the same period.

Mauritius.—6,127 bags offered on Tuesday were sold, at and after the sales: low soft greyish to good yellow, 37s to 41s 6d; low to good brown, 31s to 36s; grainy and crystalised, 38s to 43s per cwt.

Manilla.—150 tons of unclayed have sold at 30s 6d per cwt.

Foreign.—At auction, 901 boxes white Havana in bond were taken in at 32s 6d to 34s. 1,231 boxes Havana partly sold at 32s to 37s, and 37s 6d to 42s for grey and yellow; 16s duty, 47s 6d to 48s 6d. 619 casks Cuba part sold at 34s to 42s. 200 cases brown Bahia realised 30s to 35s. 1,170 bags China were bought in: grey and yellow, 36s 6d to 39s; dull white at 44s 6d. A floating cargo of Java sold for Holland, No. 12½, at 26s 9d; one of brown Siam for this kingdom, at 31s. A floating cargo of Havana is reported, No. 10, at 24s 9d for the same destination; also one, No. 12, for Antwerp, at 26s per cwt. Yesterday, three floating cargoes sold for this kingdom: one Cuba at 24s 6d, one low brown Bahia at 22s 6d, and one of Havana, No. 12, at 26s 3d.

Refined.—The market is firmer, although active, and quotations remain without material variation to notice as regards dry goods. Common descriptions obtain 50s to 50s 6d per cwt. Dutch crushed is firm.

MOLASSES.—237 puns 305 casks Cuba, offered by auction, partly sold at 16s 6d for common to good muscovado, clayed being partly sold at 15s. 403 casks melado and foreign were mostly bought in at 26s to 31s per cwt.

RUM.—An extensive business has been done, chiefly in Demerara, at 1s 10d to 1s 11d; fine up to 2s. 100 casks Mauritius brought 1s 9d per proof gallon. The total stock of rum is 4,300 puns 1,555 hhds less than last year's at the same period.

COCOA.—West India is quiet, pending the arrivals of the new crop daily expected.

TEA.—Within the past three days the demand has been steady, and the trade have bought to a moderate extent at full prices.

COFFEE.—In the absence of public sales or further arrivals, this article remains exceedingly firm, and plantation Ceylon cannot be obtained unless at a further advance. Two floating cargoes of foreign have been sold, viz., one St Domingo for the Mediterranean at 61s, and one of Rio at 52s 9d per cwt for a near port.

RICE.—The sales have been smaller than for some weeks past, yet prices are unchanged, and the market keeps firm. By auction, 1,360 bags Bengal were bought in at 12s to 12s 6d. Yesterday, 5,838 bags about half sold, at 11s 6d to 12s 6d per cwt for middling broken to good middling white. Privately, a few parcels have changed hands on former terms. A cargo of Necrancie Arracan is reported at 10s 9d per cwt.

IMPORTS and DELIVERIES of RICE to March 30, with STOCKS on hand.

	1861. tons	1860. tons	1859. tons	1857. tons
Imports	14620	6700	6230	28850
Deliveries for home use	16720	15000	5210	7650
Exported	*	6370	5450	3980
Stock	31100	58120	81700	80450

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SPICES.—Nothing of interest has transpired by private contract. Yesterday, 79 bags Penang white, in public sale, about half found purchasers at 6½d for good, common being taken in at 6⅛d per lb.

SALTPETRE.—The market has become very dull, closing yesterday with a downward tendency, and a limited business is reported by private contract, including Bengal, refraction 7¼ to 4, at 36s to 37s 6d.

IMPORTS and DELIVERIES of SALTPETRE to March 30, with STOCKS on hand.

	1861. tons	1860. tons	1859. tons	1858. tons
Imported	3880	3590	5310	2320
Delivered	2940	3600	4760	3640
Stock	4700	3830	3560	5080

COCHINEAL.—167 bags sold at previous rates. Honduras silvers, 2s 8d to 3s 2d; Teneriffe ditto, 2s 7d to 2s 9d; ditto black, 2s 10d to 2s 11d per lb.

GAMBIER is quiet, at 16s 3d to 17s per cwt.

SAPAN WOOD.—Siam, of old import, was partly sold at 7*l* 15s to 8*l* 15s; Manilla, 5*l* 5s to 6*l* per ton.

RUBBER.—Fine Para quoted 2s 1d to 2s 1¼d; East India 1s 4d to 1s 4½d per lb, firm.

METALS.—The market has not shown any activity. Nearly all kinds of iron are quiet. The last sales of Scotch pig were at 47s 3d per cwt. Spelter has sold at 18*l* 5s per ton for spring shipment, but no sales are reported on the spot. The stock consists of 4,000 tons, or 900 tons more than in 1860 at the same period. There is no change to notice in foreign tin. Good Straits were last disposed of at 116s per cwt. The improved demand for tin plates is a favourable feature to remark. Copper and lead are without further variation.

HEMP.—Russian is steady at the quotations. Manilla remains exceedingly dull, several parcels being declared for sale next week. The stock is 15,000 tons, against 18,300 tons last year, and 13,900 tons in 1859 at the same period.

JUTE has been in limited demand, and there were not any public sales held on Wednesday.

LINSEED.—The market is steady: Bombay, 53s to 54s. Calcutta has sold afloat at 50s 9d to 51s 3d, and floating cargoes of Odessa and Taganrog, for the Continent, at 50s per quarter.

TURPENTINE.—3,950 barrels rough sold at 9s 3d ex ship. American spirits quoted 31s to 31s 3d per cwt.

OILS.—The alterations under this head have been few and unimportant, and nearly all kinds are steady. Linseed, 28s 3d; foreign refined rape, 40s 6d to 41s; Cochin cocoa-nut, 50s to 50s 6d; Ceylon, 48s to 49s. Olive and fish oils are the same as last quoted. By auction, yesterday, 35 tuns Southern were bought in at 38*l* to 39*l*; 20 tuns winter bagged sperm, at 106*l* per tun. Palm is firmer, fine selling at 44s 6d per cwt.

TALLOW.—Russian still sells slowly for consumption, and the market is quiet this morning, closing rather lower than on the 28th ult. 1st sort St Petersburg Y.C., 58s 6d to 58s 9d; for delivery in April to June, 57s 6d; for the last three months, 55s per cwt. By auction, yesterday, lower prices were accepted. Odessa beef sold at 52s to 54s 6d; sheep, 52s to 56s 3d. 152 casks East India part sold at 49s to 54s per cwt.

PARTICULARS OF TALLOW.—Monday, April 1.

POSTSCRIPT. THURSDAY EVENING.

SUGAR.—The market is steady to-day, and the public sales, comprising 610 casks West India, 13,660 bags Mauritius, 1,018 bags Bengal, 1,873 bags native Madras, and 1,750 bags Penang went off at the previous quotations. Two floating cargoes of Havana found buyers for the United Kingdom, No. 10½, 24s 9d; No. 12, 26s 6d per cwt. The transactions in West India for the week were 1,223 casks.

COCOA.—100 bags Guayaquil, by auction, sold at 63s 6d per cwt.

COFFEE is firm at previous quotations.

RICE.—Two floating cargoes of Necrancie Arracan sold at 10s 2d, the price of one to be 11s 3d per cwt if taken for the Continent.

SALTPETRE.—394 bags Bengal, refraction 4½ to 4, part sold at 35s 6d to 37s 6d; 162 bags Bombay, at 31s to 31s 6d per cwt.

COCHINEAL.—125 bags sold at full rates.

SAFFLOWER.—44 bales Bengal sold at 4*l* 5s to 5*l* 2s 6d per cwt.

SHELLAC.—205 chests sold at extreme rates.

CUTCH.—Good Pegue was bought in at 24s 6d per cwt.

METALS.—English tin was reduced 4s per cwt to-day. Scotch pig iron quiet.

TALLOW was unaltered.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very steady this week, with not quite so much animation as last, but, on the whole, no material variations to note as respects prices. Treacle is rather more in demand. Several parcels of Dutch crushed have been sold f.o.b. in Holland, in V. O, at 32s 6d; B. & H., No. 1, 32s 9d to 33s, all in barrels for delivery this month, also for May.

DRY FRUIT.—A firm market, with a tendency to advance on best descriptions of currants, which are very scarce. Lowest price for currants now 27s, and only Zante to be got at that figure. Raisins are steady, and a sale of Valentias is reported at 37s.

COLONIAL WOOL.—The market is without change.

FLAX market steady, but little remaining on hand.

HEMP.—Market quiet on the spot; for forward delivery there are very few sellers, the market being very firm at St Petersberg and Riga. The supply this year will fall short both as to quantity and quality.

COTTON.—Sales of cotton from Saturday, March 30, to Thursday, April 4, inclusive:—300 bales Surat at 5⅜d for good fair Broach, and 5¼d for middling fair Dhollera; 100 Tinnevelly, at 5⅜d to 5½d for fair to good fair. The market has been quiet, and the transactions limited, but as the quantity offering is small, and holders show no disposition to press sales, prices remain about the same as last week. P. S.—Sales to-day: 300 bales Surat at 5d to 5¼d. Market quiet.

SILK.—The gradually reducing of Bank rate and large arrivals of China silk have resulted in a good business as to extent. Prices without change. Best silk scarce and firm.

TOBACCO.—Since the large business done at the termination of last month, the market has relapsed into a very quiet state, with sales limited exclu ively to small selections for immediate requirements. Prices firm for home trade qualities, at outside quotations.

METALS.—The change in the price of money has imparted a generally firmer tone to our market, and there is a difficulty in buying on such favourable terms as in the early part of the week.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	56	6
Fat by ditto	2	11
Yellow Russian	60	0
Melted stuff	37	6
Rough ditto	22	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market stiff, shippers holding for 70s f.o.b.: very few offering at all; large delivery this week; trade improving. Butter trade good, at a slight reduction from last week's prices; quality fine.

METROPOLITAN CATTLE MARKET.

MONDAY, April 1.—The total imports of foreign stock into London, last week, amounted to 2,035 head. In the corresponding period in 1860, we received 2,602; in 1859, 2,801; in 1858, 1,620; in 1857, 1,194; in 1856, 722; and in 1855, 534 head.

Compared with Monday last, the arrivals of home-fed beasts were limited, but their general quality was good. Notwithstanding that the beef trade was by no means active, prices advanced 2d per 8 lbs, owing to the comparative scarcity of stock. The best Scots and crosses sold at 4s 10d per 8 lbs, and even 5s. From Norfolk, Suffolk, Essex, and Cambridgeshire we received 1,500 Scots, &c.; from other parts of England, 600 various breeds; and from Scotland, 200 Scots and crosses. The show of sheep was very moderate, and the quality of most breeds was inferior. Prime Downs and half-breds moved off steadily, at very full prices, some few of the former having realised 6s per 8 lbs; otherwise the mutton trade was heavy, at barely late rates. We were scantily supplied with lambs, which sold readily at from 6s 8d to 8s per 8 lbs. Calves, the supply of which was small, were steady, at extreme quotations, viz., from 5s to 6s per 8 lbs.

SUPPLIES	April 2, 1860.	April 1, 1861.
Beasts	3810	2650
Sheep	22070	15710
Calves	130	13
Pigs	330	320

THURSDAY, April 4.—Our market to-day was but moderately supplied with beasts, and all kinds moved off steadily at Monday's advance in the quotations. Very inferior Scots were worth 5s per 8 lbs. Sheep, the show of which was tolerably good, changed hands slowly; prices, however, were supported. We have to report a dull sale for lambs, at 4d per 8 lbs less money. About 120 head came to hand from the Isle of Wight. There was a good demand for calves at full currencies. Pigs and milch cows were a dull inquiry on former terms.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	8	Prime Southdown sheep	5	8	5	10
Second quality ditto	3	10	4	2	Large coarse calves	5	0	5	6

Coarse and inferior sheep	3	6	3	10	Small porkers	4	8	4	10
Second quality ditto	4	0	4	4	Suckling calves.....each	19	0	22	0
Prime coarse-woolled do.	4	8	5	6	Quarter old store pigs	23	0	30	0

Lambs, 6s 8d to 7s 8d.

Total supply—Beasts, 910; sheep and lambs, 6,880; calves, 59; pigs, 300.
Foreign supply—Beasts, 180; sheep, 920; calves, 32.

HOP MARKET.

BOROUGH, Monday, April 1.—We have no alteration to report in our market, which remains steady at the following quotations:—Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 168s; Sussex, 60s, 80s, 126s; Yearlings, 80s, 120s, 170s.

BOROUGH, Friday, April 5.—Our market is very firm, but the inquiry is chiefly confined to good and fine samples, at extreme rates.

POTATO MARKET.

SOUTHWARK, WATERSIDE, Monday, April 1.—During the past week the arrivals coastwise have been light; but, with what is left in store from former arrivals, the supply is still more than equal to the demand, and prices without alteration. The following are this day's quotations:—Yorkshire Flukes, 130s to 140s; Lincolnshire Regents, 100s to 110s; Dunbar red soil ditto, 140s to 160s; North Berwick, 120s to 125s; Perth, Forfar, and Fife ditto, 100s to 110s; ditto, ditto, ditto Rocks, 85s to 90s; ditto, ditto, ditto Reds, 75s to 80s; French Whites, 60s to 90s; Belgian ditto, 60s to 80s; Dutch ditto, 60s to 80s per ton.

THURSDAY, April 4.—The arrivals of home-grown potatoes have been less extensive; nevertheless the demand for them has ruled far from active, at about previous quotations. Dunbar Regents are worth 150s to 170s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 18s to 2*l* 4s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 0s to 5*l* 8s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 18s to 2*l* 4s per load. Trade rather dull.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 18s; and straw, 1*l* 18s to 2*l* 2s per load. A slow trade.

COAL MARKET.

FRIDAY, April 5.—Wall's-end:—Haswell 18s 6d—Stewart's 18s 6d—South Hetton 18s 6d—South Hartlepool 16s 6d—Kelloe 17s 6d—Eden Main 17s—Thorpe 14s 6d—Bell's Primrose 13s—Holywell 16s 6d—Davidson's Hartley 17s 6d—Hartlepool 16s 6d—Howard's Hartley 17s 6d—Lambert's Hartley 17s 3d. Ships at market, 73.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 5.—Since the close of the London public sales our market has been very quiet. If holders were less firm, there would no doubt be more business doing; as it is, however, consumers only buy what they absolutely must have.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April, 5.—A moderate attendance at to-day's market. Wheat, consumptive demand; prices in some instances 1d lower. Flour slow sale, at about 6d reduction in price. Indian corn steady: mixed, 37s; Galatz, 39s to 40s. Beans, oats, and oatmeal without change.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 5.—The market for manufactured iron has been dull throughout the past week, prices generally remaining without change. Scotch pig iron has all been much neglected, with receding tendency in prices. The transactions in copper, since the late reduction in price, have been only very limited. Tin plates have been in better request, and have slightly improved in value.

The Gazette.

TUESDAY, April 2.

BANKRUPTS.

J. Isenberg and D. Myers, Skinner street, Snow hill, boot warehousemen.
W. Freeman, Belper, Derbyshire, builder.
J. Edwards, Cwm Yniscoy, near Pontypool, Monmouthshire, draper.
J. B. Copland, Manchester, wine merchant.
J. Rogerson, East Hartlepool, linendraper.
C. K. Ashley, Sheffield, common brewer.

SCOTCH SEQUESTRATIONS.

T. and J. Beskill, Helensburg, ironmongers.
R. Clarke, Cambusnethan, Lanarkshire, innkeeper.
H. Reid, Glasgow, auctioneer.
P. Hall, Glasgow, newspaper proprietor.
D. Anderson, Aberdeen, baker.

GAZETTE OF LAST NIGHT.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 23rd of March amounted to 487,280*l*, and for the corresponding week of last year to 465,180*l*, showing and increase of 22,100*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 212,932*l*, and for the corresponding week of 1860 to 202,814*l*, showing an increase of 10,118*l*. The increase on the Eastern Counties Railway amounted to 638*l*; on the Great Northern to 672*l*; on the Great Western to 2,325*l*; on the London and North-Western to 1,380*l*; on the London and Blackwall to 23*l*; on the London, Brighton, and South Coast to 2,005*l*; on the London and South-Western to 2,411*l*; and on the South-Eastern to 664*l*:—total, 10,118*l*. The receipts on the other lines in the United Kingdom amounted to 274,348*l*, and for the corresponding week of last year to 262,366*l*, showing an increase of 11,982*l*, which, added to the increase on the metropolitan lines, makes the total increase 22,100*l*, as compared with the corresponding week of 1860.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

TUESDAY, April 2.—The railway market was flat the whole day, sales having been generally pressed, and in all the leading stocks a decline took place. Midland and Lancashire and Yorkshire were especially heavy, the former receding 1¼ per cent., and the latter ⅞. York and North Midland was also ¾ per cent. lower, while in other stocks the reduction was ¼ to ½. No change of importance occurred in colonial descriptions. In foreign there was a fall in Lombardo-Venetian on the announcement of the forthcoming call of 2*l*. Canadian Government debentures were flatter. In American railway securities Illinois Central shares receded. The principal changes in mines were a relapse in East Caradon and an improvement in East Wheal Russell and United Mexican. In joint stock banks Oriental, shares were quoted lower. Miscellaneous descriptions were rather dull, and a decline took place in Canada Land and Electric Telegraph.

WEDNESDAY, April 3.—The railway market was very heavy during the greater part of the day, but rallied towards the close with Consols. Midland, Lancashire and Yorkshire, and South-Eastern showed the chief fluctuations. There was, however, little general business, the transactions being mainly confined to the dealers. Compared with yesterday, Lancashire and Yorkshire, South-Western, and South-Eastern exhibited a slight improvement, while a decline took place in North-Eastern stocks, North British, Eastern Counties, and Sheffield. In the colonial market Indian guaranteed stocks were flatter. In foreign descriptions there was a further fall in South Austrian and Lombardo-Venetian shares, the last price being 2 to 1⅞ discount. Great Luxembourg and San Paulo were also lower. American railway securities were heavy, and a reduction occurred in the shares of the New York and Erie. British mines were dull, and in some cases showed a decline. In foreign, United Mexican advanced: No change of importance took place in joint stock banks or miscellaneous descriptions.

THURSDAY, April 4.—The railway market opened flatly this morning, the traffic in the manufacturing districts being less favourable, but on the announcement of the reduction in the Bank rate an improvement took place, chiefly from repurchases to cover previous operations for the fall, the rise being fully maintained to the close. Nearly all the leading stocks were ⅛ to ⅞ per cent. higher, the principal advance being in Midland, Lancashire and Yorkshire, Great Western, North-Eastern, North British, and Sheffield. The final prices were at the best point of the day. In the colonial market, Great Western of Canada improved to 11½, and Grand Trunk to 21¼ to ⅜. In foreign railways there was a recovery in Great Luxembourg, and a decline in Pernambuco and in Victor Emmanuel obligations. Mines were steady, except United Mexican, in which a relapse took place.

FRIDAY, April 5.—The railway share market was inactive. Midland stock, after being marked 124⅜, relapsed to 124⅛ to ⅜; being ¼ per cent. lower than yesteaday. Lancashire and Yorkshire declined to 110⅝ to ⅞. Eastern Counties improved ¼ per cent. Other descriptions present scarcely any change. Lombardo-Venetian Railway shares were rather better at 1⅞ to 1⅝ dis. East Indian railway stock and Great Western of Canada shares were rather more inquired for. Mining shares were in good request, and, in some instances, enhanced quotations were realised.

FORD'S EUREKA SHIRTS are made with that rigid adherence to details in manufacturing, which alone can ensure a good and comfortable shirt. A box of six excellent shirts for 33s. Illustrated catalogues, mode of self-measurement, price list, &c., post free.
RICHARD FORD, 38 Poultry, London.

Free for four stamps,
ELECTRICITY AND ITS WONDERS in conjunction with the newly-discovered ELECTRO MEDICATED BATH, which can be prepared and applied by "the Invalid," for the safe, speedy, and effectual cure of sexual and generative disorders, spermatorrhœa, and all nervous diseases. Translated from the French by an English Practitioner for the benefit of the British Public. "A new and wonderful discovery, amply proving that many persons, in certain cases, can cure themselves without the aid of the Physician or his usual adjuncts."—MEDICAL REVIEW. Free for four stamps by Mr RAPKEY, M.R.C.S., Alfred place, Bedford square, London. Daily consultations from 11 till 2 and 6 till 8.

RUPTURES—BY ROYAL LETTERS PATENT
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 2s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.
No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.
No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.
Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged
RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.
SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.
THOMAS KEATING, Esq.
Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

DR CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.
MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.
"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.
N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

DR ROBERT ROWE ON INDIGESTION.
This day is published, price 2s 6d, the fifteenth edition,
NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.
By G. ROBERT ROWE, M.D.
"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.
"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.
"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills."—TIMES.
Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.
London: J. Churchill, and to be had of all booksellers.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

MEDICAL CONSULTATIONS.—Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,
37 BEDFORD SQUARE, LONDON.
Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.
These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.
Dr L. La'Mert may be consulted in Glasgow until the 31st March, at 56 Rosebank terrace, St George's road.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON. PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

COLLARD AND COLLARD'S NEW WEST-END ESTABLISHMENT, 16 GROSVENOR STREET, BOND STREET, where all communications are to be addressed. Pianofortes of all Classes for Sale and Hire.

PIANOFORTES.—CRAMER, BEALE, and CO. Every description on sale or hire. New and Second-hand. Lists gratis, post free.—201 Regent street.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

---

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine article, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

HEALTH AND HAPPINESS for the NERVOUS and DEBILITATED.—The proprietors of the Birmingham Institute of Anatomy desire to make known an infallible means of self-cure for the nervous, debilitated, &c., and will forward the same gratuitously on receipt of a stamped directed envelope.—Address "To the Secretary, Institute of Anatomy, Birmingham."

Second Edition, price 2s 6d, post free for 30 stamps,

TOOTH-ACHE: ITS CAUSES, and a New Painless Method of Cure (with as much certainty as water quenches thirst). Teeth cured by this Method will never ache again, and thus prevent the necessity of the painful operation of extraction. By THOMAS HOWARD, Surgeon Dentist to His Grace the Archbishop of Canterbury, 17 George street, Hanover quare, London.

CHIMNEY-PIECES, TOMBS, MONUMENTS, FONTS, &c.—EDWARDES BROTHERS and BURKE, 17 Newman street, Oxford street, London, W., beg to inform the nobility and gentry that they manufacture at their own establishments, in Italy and Belgium, as well as at the above address, every description of marble work, at the lowest possible prices. Their galleries contain specimens of all foreign and British marble quarried, in Chimney Pieces, from 25s to 300 guineas each; MONUMENTS AND TABLETS, from £5: Head and Foot Stones, from 30s each.—Sole agents to the Invernettie Granite Company.

OVERLAND ROUTE.—COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

26 Cornhill, London, E.C.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The *domestic* arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

KEATING'S COD LIVER OIL. Just Imported. The Pale from Newfoundland, and he Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within he reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart, M.D., Physician in Ordinary to the Queen in Ireland—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value"

Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr GRANVILLE, F.R.S.—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Light-Brown Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE AGENTS,

ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

ANOTHER CURE OF COUGH by DR LOCOCK'S PULMONIC WAFERS.—From J. Sweetman, Esq., Stradbally:—"Gentlemen,—I have been subjected to asthma for the last ten years, and have derived much benefit from the use of the wafers.—JOHN SWEETMAN." Dr Locock's Wafers give instant relief and a rapid cure of asthma, coughs, and all disorders of the breath and lungs. To Singers and Public Speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all medicine venders.

HOLLOWAY'S OINTMENT AND PILLS.—Be prepared.—In Great Britain one third of all our deaths is caused by Consumption. It usually makes its attack between the age of sixteen and thirty; and is ushered in by debility, dry cough, and other unmistakeable signs, which could be and should be immediately removed by rubbing this celebrated Ointment upon the back and chest. This friction must be brisk, and repeated regularly night and morning, and two of Holloway's purifying Pills should be taken at bed-time, as an alterative, to mitigate the cough and fever. The early employment of this treatment is of the most moment us importance whether to prevent the fatal disease, or to direct it, when developed, to a safe and favourable issue.

INVESTMENTS IN BRITISH MINES.—Mr MURCHISON'S REVIEW of BRITISH MINING, for the Quarter and the Year ending 31st December, 1860, with particulars of some of the principal Dividend and Progressive Mines, and Table of the Dividends Paid in the Past Six Years, is now ready, price 1s, at 117 Bishopgate street within, E.C.

Reliable information and advice will at any time be given on application.

"This is a very useful and intelligently compiled work. It is also intelligibly arranged, with a view to facility of reference. It comprises full particulars of the position and prospects of the chief dividend and progressive mines."—DAILY NEWS.

OPINIONS ON MR MURCHISON'S WORK ON MINES, PUBLISHED IN 1856.

"Of great value to capitalists."—SUNDERLAND TIMES.

"A valuable guide to investors."—HERAPATH.

"A valuable little work."—GLOBE.

"The book will be ound extremely valuable."—OBSERVER.

"A valuable little book."—CORNWALL GAZETTE.

"All who have invested, or who intend to invest, in mines, should peruse this able work."—GLASGOW EXAMINER.

"Mr Murchison takes sound views upon the important subject of his book."—MORNING HERALD.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

THE LANDS IMPROVEMENT COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.
2. Farm roads, tramways, and railroads for agricultural or farming purposes.
3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.
4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any publicor general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

GREAT INDIAN PENINSULA RAILWAY COMPANY.
Twenty-third Half-yearly General Meeting.

Notice is hereby given, that the Twenty-third Half-yearly General Meeting of the Proprietors in this Company will be held at the London Tavern, Bishopsgate street, London, on Friday, the 26th day of April instant, at Twelve o'clock at noon precisely, for the general business of the Company, pursuant to the Act.

The Books for the Registration of Stock and Shares will be closed from Saturday the 13th, to Friday the 26th instant inclusive, and Transfers will not be received during that period.—By order,

THOS. R. WATT, Secretary.
Company's offices, No. 3 New Broad street, E.C., London, 5th April, 1861.

GREAT INDIAN PENINSULA RAILWAY COMPANY.—Notice is hereby given, that in pursuance of a resolution of the Board of Directors, the Shareholders of this Company, holding shares upon which £8 per share have been already called up, are required to pay a further Call of £2 per share upon each such share (making £10 per share), on or before the 29th day of April inst., at the London and County Bank, South Sea House, Threadneedle street, London; and if such call be not paid on or before the said 29th day of April, the holders of the shares will not be entitled to receive interest upon any portion of their shares so long as such call shall remain unpaid, but will nevertheless be chargeable with interest upon the arrears, at the rate of 5 per cent. per annum, and the shares will become liable to forfeiture under "The Companies Clauses Consolidation Act, 1845."

A letter for the payment of the call will be forwarded to each Shareholder.

N.B. The option of paying in full (the remaining £10 per share) upon any portion of their shares is continued to the Shareholders. A letter authorising the bankers to receive the payment may be obtained on application at this office. THOMAS R. WATT, Secretary.

3 New Broad street, E.C., London, April 2, 1861.

MADRAS RAILWAY COMPANY.—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the amount which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, of converting them into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London, 1st January, 1861.

GREAT WESTERN RAILWAY OF CANADA.—Notice is hereby given, that a Meeting of Shareholders will be held on Thursday, the 11th day of April next, at the London Tavern, Bishopsgate street, London, at 12 o'clock precisely, for the purpose of considering the reports and general statements of accounts for the half-years ending 31st July, 1860 and 31st January, 1861, and also the report of the Committee of Investigation, with the reply of the Directors, preparatory to their submission to the legal meetings to be held in Canada.

And notice is further given, that the Books, kept at this office, for the registration and transfer of shares, will be Closed on and from the 4th to the 11th day of April next, both days inclusive, and transfers will not be registered between these dates.—By order,

BRACKSTONE BAKER, Sec.
No. 126 Gresham House, Old Broad street, E.C., March 30, 1861.

GREAT WESTERN RAILWAY OF CANADA.—Notice is hereby given, that a Special General Meeting of the Shareholders of this Company will be held at the offices of the Company, in the city of Hamilton, Canada West, on Friday, the 17th day of May, 1861, at 1 o'clock precisely, for the purpose of considering the report of the Committee of Investigation appointed at the half-yearly meeting held in Hamilton, Canada West, on the 1st of May, 1860, and the reply of the Directors thereto.—By order of the Board,

March 30, 1861. ROBERT GILL, President.

EAST INDIAN RAILWAY COMPANY.

Notice is hereby given, that the Transfer Books of this Company will be closed from the 17th to the 30th day of April, 1861, both days inclusive, preparatory to holding the Half-yearly General Meeting of the Proprietors.—By order of the Board,

D. I. NOAD, Secretary.
East Indian Railway House, Alderman's Walk, New Broad street, London, April 2, 1861.

N.B. Transfers will not be received at the office while the books remain closed.

EAST INDIAN RAILWAY COMPANY.

The Board of Directors are prepared to receive applications in writing (accompanied by testimonials) for the appointment of Assistant Traffic Manager at Howrah, East Indies: Salary £440 per annum. Applications, marked on the outside "Application for the office of Assistant Traffic Manager," must be delivered at the Company's offices, Alderman's walk, London, addressed to the Secretary, on or before 12 o'clock at noon, on Tuesday, the 9th April next.—By order of the Board, D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, March 19, 1861.

THE EAST INDIAN RAILWAY COMPANY require Stores of the following kinds—namely, COPPER, BRASS, TIN, and LEAD.

Particulars may be obtained upon application at the Company's offices, Alderman's walk, New Broad street, London. Tenders, which must include all charges for packing and delivery free alongside, in any Dock or on any Wharf, or in any part of the stream in the ports of London or Liverpool, are to be made on or before 12 o'clock at noon on Tuesday, the 9th of April next. The tenders must state the date the parties will undertake to deliver the stores, and must be endorsed "Tenders for Stores."—By order of the Board,

D. I. NOAD, Secretary.
East Indian Railway House, Alderman's Walk, New Broad street, London, 21st March, 1861.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par for the remainder of the sum of £1,500,000 required to complete the total amount which the Company has the power to borrow on Debentures not convertible into shares.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years from the 15th December, 1860, transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice, the bonds will be paid off at the expiration of the first five years on presentation at the Bank of England.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.

No scrip receipt or bond will be issued for a less sum than £50.—By order of the Board,

D. I. NOAD, Secretary.
East Indian Railway House, Alderman's walk, New Broad street, London, Jan. 22, 1861.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

INDIA OFFICE, 4th April, 1861.

THE SECRETARY OF STATE FOR INDIA in COUNCIL

hereby gives Notice that he has received from the Government of Bengal the undermentioned schedules, viz.:—

A. Schedule of all Administrations whereof the final balances have been paid to the parties entitled to receive, specifying the amount of such balances, and the persons to whom paid, during the six months ending on 30th June, 1860.

B. Schedule of all sums of money, bonds, and other securities received by the Administrator-General, on account of *current* and unadjusted estates, not being Hindoo or Mahomedan, remaining under his charge, together with the payments made thereout and the balances in hand.

C. Schedule of all sums of money, bonds, and other securities received by the Administrator-General, on account of *adjusted estates, not being* Hindoo or Mahomedan, remaining under his charge, together with the payments made thereout and the balances in hand.

D. Schedule of all sums of money, bonds, and other securities received by the Administrator-General, on account of Hindoo and Mahomedan estates remaining under his charge, together with the payments made thereout and the balances in hand.

E. Schedule of balances in the hands of the Administrator-General, set apart to meet the admitted claims of creditors against the estates therein mentioned.

F. Schedule of unclaimed balances of estates under 500 rupees, deposited with the Sub-Treasurer, Fort William, under the Financial Secretary's Letter of the 8th Oct., 1852, interest being allowed thereon by Government.

And that the said schedules are open to the inspection of the public in the Department of the Official Agent to the Administrators-General at this Office.

ARMY CONTRACTS.

Commissariat, South Camp, Aldershott, April 1, 1861.

Tenders will be received at this office, till noon on Saturday, the 4th May, from persons who may be willing to enter into Contract to Supply FLOUR for hospital bread, in such quantities as may be required, from the 1st June, 1861, to 30th November, 1861, for the use of Her Majesty's Land Forces stationed at Aldershott Camp, and within the command.

Forms of tender and conditions of contract may be obtained on application at this office, by letter or in person, between the hours of 10 and 4 o'clock.

Tenders, on printed forms, must be properly filled up, and signed, and delivered at this office, under closed envelope, marked on the outside "Tender for Commissariat Supplies;" and no tender will be noticed unless made on forms obtained from this office.

ALFRED SALWEY, Deputy-Commissary-General.

ARMY CONTRACTS.

Commissariat, South Camp, Aldershott, April 1, 1861.

Tenders will be received at this office until noon on Thursday, 2nd May, from persons who may be willing to enter into Contracts to Supply FLOUR and MEAT, in such quantities as may be required, from the 1st June, 1861, to 30th November, 1861, for the use of Her Majesty's Land Forces at Aldershott Camp, and within the command.

Separate tenders are required for flour and for meat.

Forms of tender and conditions of contract may be obtained on application at this office, by letter or in person, between the hours of 10 and 4 o'clock.

Tenders, on the printed forms, must be properly filled up and signed, and delivered at this office under closed envelope, marked on the outside "Tender for Commissariat Supplies;" and no tender will be noticed unless made on forms obtained from this office.

ALFRED SALWEY, Deputy-Commissary-General.

CONTRACT FOR CANVAS.

Department of the Storekeeper General of the Navy, Somerset place, April 4, 1861.

The Commissioners for executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland do hereby give notice, that on Tuesday, the 23rd instant, at Two o'clock, they will be ready to treat with such persons as may be willing to contract for supplying and delivering into Her Majesty's Dockyards at Deptford, Portsmouth, and Devonport, 23,450 ROLTS of CANVAS (including 1,220 Bolts of 18 inches wide), to be delivered by the 31st December next. Tenders may be made for any quantity not less than 1,000 Bolts, and no tender will be received unless made on the printed form properly filled up, which, together with "Instructions for making the Canvas," may be obtained on application to this office.

No tender will be received after Two o'clock on the day of treaty, nor will any be noticed unless the party attends, or an agent for him duly authorised in writing.

Every tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words "Tender for Canvas," and must also be delivered at Somerset place, accompanied by a letter signed by two responsible persons, engaging to become bound with the person tendering, in the sum of £25 per cent. on the value, for the due performance of the contract.

TRADE MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

ABERDEEN TOWN AND COUNTY BANKING COMPANY.

REPORT by the directors to the shareholders, submitted at the thirty-sixth annual general meeting of the company, held within the Royal Hotel, Aberdeen, on Tuesday, the fifth day of March, 1861:—

The directors beg to report that the profits for the year ended 31st January last, including the sum of 131*l* 2s 5d, brought forward from profit and loss account of the previous year, and after deducting all charges of management, income tax, &c., and making ample provision for all bad and doubtful debts, amount to 21,238*l* 3s 1d. Out of these profits, the shareholders received a half-yearly dividend of five per cent. in September last, and the directors now declare a further dividend of five per cent. (both dividends being clear of income tax), making together a return of ten per cent. on the capital of the company for the past year. The sum of 7,000*l* has been added to the guarantee fund—thus increasing that fund to 38,000*l*; and 1,000*l* has been applied in reduction of the cost of bank buildings at the head office and branches—leaving, after these appropriations have been made, the sum of 177*l* 13s 1d, to be carried forward to profit and loss new account. The new premises for the bank's head office, referred to in last year's report to the shareholders, have been contracted for at about 12,400*l*, and are now in the course of erection. A statement of the liabilities and assets of the bank as at the 31st January last, and the appropriation of the year's net profits, is submitted, along with this report. Warrants for the dividend now declared will be issued so as to be in the hands of the partners on the 11th proximo. CHAS. CHALMERS, Chairman.

Aberdeen, 20th Feb., 1861.

31st January, 1861.

BANK OF EGYPT.

THE following report was presented to the annual general meeting of shareholders, on Monday, February 25, 1861:—

The directors of the Bank of Egypt submit to the shareholders the accounts for the half-year ending the 31st of December, 1860. Those accounts would have worn a very different aspect if the directors had taken credit for the large amount of interest which has accrued on the debt of the late Prince El Hami Pacha. They entertain no doubt that this debt and interest will be eventually paid in full; but, as a part only of the amount due has, as yet, been recovered, all the moneys realised have been placed to the credit of capital. The transactions connected with this loan to the Prince have attracted so much public attention, and have also exercised so large an influence on the affairs of the bank, that the directors deem it necessary to give a brief statement of the facts of the case. El Hami Pacha was the son of the late Viceroy, Abbas Pacha; he had a very large income, but being in want of ready money, his agents, Messrs Oppenheim and Chabert, borrowed, from time to time, sums amounting in the aggregate to 162,000*l* from the managers in Egypt. This money was advanced on bills for three months, collaterally secured by assignments of very valuable property. Advances of such magnitude to one person were contrary to the direct instructions of the court, who, in this particular case, added an express prohibition, which was entirely disregarded by all the managers. The Prince being about to leave Egypt for Constantinople before the bills matured, the managers deemed it advisable, under the circumstances, to prevent his departure. This attempt, however, failed, on its being proved, by an investigation made (at the instance of the Viceroy) by the British Consul-General and Mr Hugh Thurburn, that the securities held by the bank were amply sufficient to cover their claim. The bills, however, were not paid; and, owing to the consequent lock-up of the capital of the company, and to the great confusion and scandal which followed upon the attempt to detain the Prince in Egypt, the business of the bank was brought nearly to a standstill. The directors, having had much cause to feel dissatisfied with the conduct of the managers even before this incident, requested the deputy-chairman, Mr Anstruther, to proceed at once to Egypt, to inquire into the exact position of this large debt, and the affairs of the bank in general. This duty was kindly undertaken by the Deputy-Chairman under circumstances of great personal inconvenience, and at the hottest season of the year. He went out armed with full powers from the court, and was accompanied by an able English lawyer. The information obtained by the deputy-chairman satisfied the court of directors that they were fully justified in their feeling of dissatisfaction. His visit and examination of affairs led to the almost immediate resignation of Mr Pasquali, to the putting an end to the engagement with Mr

Ranking, and to an entire remodelling of the establishments in Egypt. The directors, as before stated, entertain no doubt that the debt due from the estate of El Hami Pacha will be paid in full; it has already been reduced by various payments to the extent of 70,000*l*, up to the 31st December, and further sums are being received daily. The Deputy-Chairman inquired into other advances injudiciously made, and entirely contrary to repeated instructions. These were all fully investigated, and arrangements were made by him for placing them in a course of speedy settlement. The total amount is about 120,000*l*, and though the directors do not expect that these advances, mainly secured on land taken as collateral security, can be realised without some loss, they have no doubt that the deficiency will be covered without encroachment on the capital of the bank. The board of management in Egypt has been entirely reorganised; and the deputy-chirman has obtained the valuable assistance of Mr Charles Thurburn, one of the principal merchants in Alexandria, who takes his seat at the board in Egypt as local director, and exercises a general supervision over the affairs of the bank. The present managers are Mr Christian and Mr Rowlatt, both Englishmen in the prime of life, and well acquainted with Egypt and its resources. If any shareholder should desire to inform himself more particularly in regard to any of the transactions adverted to in this report, or the position of the bank in general, he is invited to exercise the powers which he possesses, and to examine the accounts at the offices of the company, where every information will be afforded by the committee of management. From the foregoing statement, the shareholders will readily understand that the business of the Bank in Egypt having been completely paralysed for several months, no considerable profits could be realised. Indeed, as soon as it was determined not to take credit as interest for any part of the payments recovered from the estate of El Hami Pacha, it was evident to the directors that the accounts of the half-year must necessarily exhibit a loss. The balance of profit and loss, amounting to 2,887*l* 19s 7d, has been carried to the reserve fund. In conclusion, the directors are happy to state that the credit of the Bank in Egypt is entirely re-established; and that the current expenses in Egypt have been reduced by one-third. The crisis has been a trying one, but the directors confidently assure the shareholders that the business of the bank has now been put upon a sound basis. It is already, though cramped for the present in regard to capital, doing a highly profitable and really banking business; and the directors have no doubt that the bank will henceforth occupy a highly respectable local position, and yield an ample remuneration to the shareholders. The directors cannot close this report without apprising the shareholders how much they are indebted to Mr Hugh Thurburn, of Alexandria, for the cordial kindness with which he has afforded his valuable advice and good offices, both to the deputy-chairman, during his stay in Egypt, and to the officers of the bank since his departure. They have already expressed their warm acknowledgments to that gentleman, and they trust that the shareholders will add their thanks. In conformity with the provisions of the deed of settlement, William Tite, Esq., M.P., and P. F. Robertson, Esq., go out of office, and are eligible for re-election. The auditors also retire from office, and are eligible for re-election.—By order of the Court,

EDWARD CHESHIRE, Secretary.

26 Old Broad street, E.C., London, Feb. 8, 1861.

BANK OF IRELAND.

TO THE EDITOR OF THE ECONOMIST.

SIR,—I am in receipt of your circular of the 29th ult., and in reply, beg to inform you that the capital of this bank is three millions Irish, upon which a dividend of 5 per cent. for the half-year ended 25th December last was declared, and that the "rest" fund now amounts to 1,064,500*l*.—I am, Sir, your very obedient servant,

P. DU BEUAT, Secretary.

Dublin, Feb. 1, 1861.

BANK OF LONDON.

THE tenth annual general meeting of the shareholders of the Bank of London was held on the 17th January, at the London Tavern: Sir John Villiers Shelley, Bart., M.P., in the chair. The attendance was not very numerous.

The secretary (Mr C. J. H. Allen) then read the report, which was as follows:—

The directors have pleasure in submitting the annexed statement of accounts, made up to the conclusion of the past half-year, showing that the balance of profit and loss account amounts to 31,533*l* 12s 3d. This result enables them to make the most ample provision for all outstanding debts, which on this occasion are rendered unusually large by the great failures in the leather trade, and, after liquidating the current expenses, allowing for rebate of interest, and the usual appropriation for preliminary expenses, there remains for disposal the sum of 11,738*l* 4s 1d. The directors therefore declare a dividend at the rate of 5 per cent. per annum, free of income tax, and they carry 4,000*l* to the reserve fund, by which addition that fund is increased to 31,000*l*. The balance, viz., 238*l* 4s 1d is transferred to profit and loss account of the current half-year.

A proprietor said he wished to know before the report was moved how it was they got the amount of 4,812*l* 16s mentioned in the accounts.

The Chairman said that was the amount which they received under the decree of the Master of the Rolls in the case of Mr Tyrrell; and he might add that that amount remained unappropriated till the time within which the defendant could appeal had expired. That was the entire sum for which the decree had been obtained, but there was a further sum of 475*l* for which they had security. That sum would, however, be subjected to deduction for costs. He now begged leave to move that the report be adopted, and he had little to add to the facts and figures which it contained. The liabilities and assets showed an increase of 100,000*l* upon the accounts of last year, but it was right to say that that did not represent the progress the bank had made, because they had a public account which was subject to great fluctuation, and which stood considerably lower this half-year than at the corresponding period of last year. That deficiency was made up by the increase of the legitimate business of the bank. On the last occasion he congratulated the proprietors on the fact that they made a larger profit on that than on any previous half-year, but the accounts now presented showed that they made larger profits on this than even on the previous half-year, notwithstanding the circumstance which must be patent and present to minds of all connected with the trade of the City as marking that period—the great losses arising out of failures in the leather trade. With regard to that, they were aware that on a former occasion they wrote off 4,000*l*, and they had now written off 8,674*l*, making altogether 12,674*l* for bad debts. They paid a dividend of 15,000*l*, and they had 11,000*l* to spare. This state of things must be a matter of considerable gratification to the proprietors. With regard to those failures he believed he might say, as a member of the legislature, that Parliament would be disposed to pass a measure to put an end to such proceedings, and he hoped and trusted that Government would bring in a bill this year which would enable persons to prosecute and punish those men who brought such a slur on the merchants of the City of this country. (Hear, hear.) With regard to the question which had been

already asked, when the time within which an appeal could be brought had expired, the directors would consider how they could best apportion that money. With regard to the reserve fund, let him remind the meeting that that fund was, on January last, brought up to 12,000*l*. It is now brought forward at 27,000*l*, and they added again to that amonnt, making it altogether 31,000*l*. (Hear, hear.) He thought he was bound to point out that this sum of 31,000*l* was entirely provided out of profits—not out of shares or anything else, but direct profits. (Hear, hear.) The directors thought it important to have a good and sufficient reserve fund, in order that the public might have confidence in the bank. (Hear, hear.) It had now arrived at such a sum, that he anticipated before long they might reward themselves for their self-denial, and have the gratification of distributing an increased dividend among the shareholders. (Hear, hear.) But he hoped the shareholders would agree with the directors in the opinion that it was above all things desirable to have a good reserve fund, because nothing was more calculated to ensure the confidence of the public. (Hear, hear.) The bad debts, with the exception of the horrid affair in the leather trade, were a mere nothing, and were all amply provided for in the sum he had already mentioned. He believed there was no other point on which it was necessary for him to trespass on their attention, and therefore he begged leave to move that the report should be adopted.

Mr Frith, deputy chairman, in seconding the report, said that the directors when they discovered the frauds committed by some of their customers engaged in the leather trade, and whom he must characterise as great delinquents, resolved to assist in every possible way those who were engaged in exposing those frauds. Their manager was therefore examined in the Bankruptcy Court, and he believed the clear, open, and truthful evidence given by him had a great effect upon the public mind, and he must congratulate Mr Marshall on the testimony he gave. (Hear, hear.) There was an impression in some quarters that the slang terms used in the Bankruptcy Court were used by Mr Marshall, but he had the emphatic denial of Mr Marshall on that point, and these terms were the coinage of the bankrupt's own brain. (Hear, hear.) He hoped it was unnecessary for him further to disclaim the use of any such terms by their manager. They as bankers dealt in bills, and they held a number of those belonging to the failed firms, but considering that they had current accounts with the bank, and considering how high Streatfeild and Co., stood in public estimation, he thought they would agree with him that no ordinary caution could prevent the losses which they in common with others sustained. Their loss was less than that of others, but still they thought it to be their duty to go further than others did to expose the frauds. The bankruptcy laws have been much complained of for many years, and he hoped they were now about to be remedied. (Hear, hear.) He trusted that the Court of Bankruptcy would never sully its records by giving a certificate to those delinquents, enabling them with enlarged experience to continue their fraudulent practices. He hoped they would be punished as they deserved, for as monetary transactions must depend on the honour and integrity of the persons with whom they dealt, it was requisite that those who disregarded those principles should be adequately punished. He thought that those who came forward as they had done to expose such conduct deserved public respect. (Hear, hear.) As the chairman had already pointed out, the provision for bad debts had been amply and justly made. The only regretable matter they had to deplore was the retardation of an increased dividend, but he hoped they might soon look forward to that increase. (Hear, hear.) If leading commercial men could be brought to recognise the necessity of establishing as a principle, from which they would never swerve, that in all cases where irregular trading, and not misfortune, was the cause of the failure, the most searching investigation would be made, and the utmost punishment the laws allowed awarded, great benefit would in his opinion follow. There was little doubt the extreme reluctance manifested by men of business to identify themselves with such proceedings, however urgently they might be demanded, was one great reason why such cases so frequently occurred. (Hear.)

Mr Lamb, one of the auditors, said that the accounts laid before the meeting presented the real and exact state of their affairs, and he thought they had every reason to congratulate themselves on the position presented by the bank that day. Notwithstanding all they had gone through, they held a position that promised highly for the future, and credit he thought was due to the manager for bringing them to that position. As one of their new officers who had gone into the accounts very fully indeed, he thought it would be gratifying to them to hear this statement from him. (Hear.)

Mr Aste said that, as an auditor, he was satisfied with the state of the accounts upon the whole. The failures in the leather trade tended to reduce their profits somewhat, but it was evident they were in a progressing state. The Bank of London was determined from the beginning to act honourably and consistently in all their dealings. Like all new establishments they met with losses, as other traders did. The failures in the leather trade were disgraceful, but still he did not think that the whole trade should be condemned for the acts of a certain clique in that trade. (Hear, hear.) These failures had caused him to give great attention to the manner in which the debts had been treated, and the amount of loss which was likely to accrue from them to the bank, and he came to the conclusion that ample provision had been made for the bad debts, and that they would amount to what the directors in committee had valued them at. He thought they would be negligent of their duty if they did not express their approbation of the bold and fearless manner in which the directors came forward to expose these as they did other frauds; for this was not the first time they had had to do so: and it must be regarded as a proof that honourable straightforward men were at the head of their establishment. (Hear, hear.)

The motion was then adopted, and a dividend of 5 per cent., free of income tax, declared payable on and after the 24th inst.

On the motion of Mr Hughes, a vote of thanks was passed to the manager and other officers of the bank, which terminated the proceedings.

BANK OF MANCHESTER, LIMITED.

REPORT of the directors to the general meeting of shareholders, January 22, 1861, for the half-year ending December 31, 1860:—

The directors of the Bank of Manchester beg to lay before the shareholders their report of the condition and progress of the bank for the half-year ending 31st December last. The condition of the bank will be seen by a reference to the balance sheet appended to this report. Of the progress made, your directors can speak with great satisfaction; and can report on the part of the commercial community of this city and of the public, a continuance and steady increase of those indications of growing confidence which they were so gratified in being able to notice when they last addressed you. Since the period when the company became limited, the shareholders have very nearly doubled, while the current accounts have increased 35 per cent., and the lodgment accounts have increased 69 per cent., with a corresponding increase in the amount deposited, as will be seen by a comparison of the published balance sheet. During the half-year the capital has been increased to 167,000*l* by the allotment of 1,748 shares, principally to parties bringing business to the bank; and the "reserved surplus fund" now amounts to 20,000*l*. The statement of the profit and loss account which will be submitted to the meeting, the directors trust will be gratifying to the proprietors; and they recommend that a dividend at the rate of five per cent. for the half-year, and a bonus of one per cent., be declared out of the profits, free of income tax, to be payable on Thursday, the 7th of February, leaving a balance of 2,709*l* 7s 11d to be carried forward. In the last report it was stated that the increased business having rendered the present office accommodation insufficient, the directors had purchased a plot of land in Mosley street for the erection of new premises. Since then the Liverpool and London Fire and Life Office, having offered to let on lease a portion of the edifice they are about to erect at the corner of Pall Mall and King street (very near to the Bank of England branch), the Bank of Manchester have accepted their offer to erect handsome and commodious premises in every way suitable for a bank, and agreed to take them on lease for 21 years. One very decided advantage in the change is, that these premises will be ready for occupation much earlier than if a building had to be erected on the land in Mosley street. The increasing business of the bank has stimulated the directors to seek to improve, and as far as possible to perfect, the system of management; the more so because of the necessarily short time which, individually, they can devote to it. Instead, therefore, of availing themselves at this early period of the power conferred on them by the shareholders in October 1858, to appoint a paid managing director, which might largely and unduly augment the working expenses, the board have appointed Mr John Farrer and Mr Joseph Rice joint managers, with full and equal power to conduct the business of the bank; provision being also made to secure the continued counsel and concurrence of the chairman and deputy-chairman, on their visits to the bank. By this plan all the advantage to be derived from the appointment of a paid managing director is obtained;—the responsible executive is enlarged and strengthened; the necessity for the exercise of individual judgment is not diminished; and the gain of combined opinion is added. Your directors feel confident that this arrangement will prove acceptable to both shareholders and customers, and be found a practical improvement in the working of the joint stock bank system. Your directors refer, with sincere regret, to the loss sustained by the bank in the removal, by death, of Mr William Richardson, whose name stood for re-election at this meeting as one of your directors. The warm interest he took in the affairs of the bank, and his energetic and useful efforts to promote its prosperity, alike call for this tribute to his memory. Mr Benjamin Wilson and Mr William Marshall retire from the direction by rotation, and Mr Wilson will be proposed for re-election.

W. S. STELL, Chairman.

BALANCE SHEET, 31st December, 1860.

BANK OF NEW SOUTH WALES.

REPORT of the board of directors of the Bank of New South Wales, to the half-yearly general meeting of the proprietors, held at the banking house, on Wednesday, 24th October, 1860:—

The directors have the pleasure to submit to the proprietors the accounts for the half-year ended 30th September, and congratulate them that, notwithstanding the untoward state of mercantile affairs in the colonies, they are in a position to submit the following favourable result of the bank's operations during that period.

	£	s	d
The undivided balance of 31st March was	3,277	4	0
To which is to be added the profits, after deducting rebate on current bills, allowing interest on deposits, paying expenses of management, and providing for bad and doubtful debts	55,239	7	1
Leaving for distribution	58,516	11	1
which the directors recommend to be applied as follows:—			
To payment of dividend on capital paid up to date, at the rate of 15 per cent. per annum £55,954 15 0			
To balance carried to present half-year 2,561 16 1			
	58,516	11	1

The candidates for the office of director in the room of James Henderson, Esq., who retires by rotation, are—The Hon. George Allen, M.L.C., and Robert Allen Hunt, Esq. It will therefore devolve upon this meeting to elect one of these gentlemen to fill the vacant seat. It will further be the duty of the meeting to elect an auditor in the room of R. A. Hunt, Esq., who retires at this time. An agency of the bank has been opened at Toowoomba, Queensland, and the directors advise the continuance of authority to establish branches or agencies where they may be deemed advantageous. The dividend will be payable at the head office to-morrow, and at the branches on receipt of advice.—For and on behalf of the board of directors.

DANIEL COOPER, President.

BARNSLEY BANKING COMPANY.

REPORT of the directors of the Barnsley Banking Company, at their twenty-ninth annual meeting, held at the bank, on Thursday, the 14th day of February, 1861:—

The business of the bank during the past year enables the directors to place before the shareholders a report, which they confidently expect will meet with the approval of this meeting and that of the proprietors at large. The net profits of the year amount to 6,221*l* 12s 4d, which, together with 115*l* 3s 3d brought forward from last year, makes the sum available for distribution 6,336*l* 15s 7d, of which the directors propose to make the following disposition, viz.:—In payment of the income tax, 219*l* 6s 8d; in dividend of 10 per cent., 3,420*l*; in bonus of 2 per cent., 684*l*; to reserved surplus fund (which will then amount to 17,866*l* 5s 11d), 1,555*l* 3s 1d; to board of directors, 350*l*; to balance to carry forward to next year's account, 108*l* 0s 10d; total, 6,336*l* 15s 7d. In pursuance of the 43rd section of the company's deed of settlement, as altered at the last annual meeting, and confirmed at an adjourned special meeting held on the first of March last, numbers representing the order in which the directors should stand as to retirement were drawn as follows:—1st, T. S. Cordeux; 2nd, Charles Newman; 3rd, Charles Tee; 4th, Elijah Sutcliffe; 5th, Edward Lancaster; 6th, John Cordeux; 7th, Thomas Cope. Messrs T. S. Cordeux and Edward Lancaster having been elected continuing directors, the two directors whose names stand first on such list (except such continuing directors), viz., Mr Tee and Mr C. Newman, are the retiring directors, but eligible for re-election.

CHARLES TEE, Chairman.

BILSTON DISTRICT BANKING COMPANY.

THE following is the report of the directors at the twenty-fourth annual general meeting of proprietors, held at the Star and Garter hotel, Wolverhampton, 5th February, 1861, Joseph Walker, Esq., in the chair:—

Your directors have audited the accounts of the bank to the 31st of December last, and after allowing rebate interest upon undue bills and paying income tax, there is a net profit of 5,970*l* 7s 4d. A dividend at the rate of 10 per cent. per annum for the first half of the year has been paid, and a like distribution is now recommended, leaving a surplus of 2,494*l* 12s 6d, to be added to the guarantee fund. Annexed are statements of the profit and guarantee fund:—Dividend of 5 per cent. to June 30th, 1860, 1,481*l* 5s; dividend of 5 per cent. to December 31st, 1860, 1,481*l* 5s; interest upon guarantee fund, 513*l* 4s 10d; surplus, 2,494*l* 12s 6d; profit, 5,970*l* 7s 4d. Guarantee fund at last report, 17,107*l* 11s 8d; interest at 3 per cent., 513*l* 4s 10d; surplus profit, 2,494*l* 12s 6d; present guarantee fund, 20,115*l* 9s. Larger amounts than were expected having been received from insolvent estates indebted to the bank, your directors are enabled to declare out of the sums set aside to meet bad debts a further bonus of five shillings per share, which will be payable with the dividend on the 1st of March next.

The bad debts of the past year have been of small amount, and are amply provided for.

Mr Joseph Walker and Mr C. J. Elwell retire from the Board, but are eligible to be re-elected.

THOMAS PERRY, Deputy-Chairman.

CARLISLE CITY AND DISTRICT BANK.

THE twenty-fourth annual general meeting of this company was held on February 12, 1861, when the following report of the directors was submitted to the shareholders, and unanimously adopted:—

The balance sheets now laid before the meeting show the net business profits for the half-year ending 30th June to amount to 5,398*l* 8s 2d, being at the rate of 18*l* 12s 3½d per cent. per annum, and for the half-year ending 31st December, 6,182*l* 12s 3d, being at the rate of 21*l* 6s 4½d per cent. per annum, and making on the whole year 11,581*l* 0s 5d, or at the rate of 19*l* 19s 4d per cent. per annum on the paid-up capital. A dividend of 5 per cent. and a bonus of 9s per share, making together 1*l* 1s 6d per share, having been paid for the half-year ending 30th June last, your directors now recommend a dividend of 5 per cent. and a bonus of 11s per share to be declared for the half-year ending 31st December last, making in all 18 per cent. for the past year. The directors regret that during the past year two bad debts have been sustained, one amounting to 444*l* 8s 1d, the other 5*l* 16s. These have been written off from the auxiliary fund, which now amounts to 2,200*l* 3s, subject to one quarter's income tax. The rest or guarantee fund remains at 19,333*l* 6s 8d, or a sum equal to one-third of the paid-up capital. The directors have further to report that since the last annual meeting a change as taken place in the management of the bank,—Mr Davidson having resigned his office, and ceased to discharge his duties on the 19th May, 1860. The board elected Mr Farrar, their late cashier, to succeed him, and the directors have great pleasure in bearing their testimony to the efficient and satisfactory manner in which he has discharged the duties of the office since his appointment. Mr Jno. Wakefield, honorary director, and Messrs George Relph, Thomas Clarke, and Thomas Gibbons, ordinary directors, retire from office in accordance with the eighth clause of the deed of settlement, but are eligible for re-election.

GEORGE RELPH, Chairman.

The report of the auditors (Messrs Thomas Wright, T. B. Crowther, and Robert Armstrong), confirming the balance sheets, was also read and adopted. A dividend of 5 per cent. was declared for the last half-year, and also a bonus of 11s per share, both payable, free of income tax, on the 21st inst.

CARLISLE AND CUMBERLAND BANKING COMPANY.

REPORT of the directors of the Carlisle and Cumberland Banking Company to the proprietors, at the twenty-fourth annual general meeting, held the 6th February, 1861:—

The directors have the pleasure to report that after the payment of all expenses and making ample provision for bad and doubtful debts, the net profits for the year 1860 have amounted to 9,664*l* 15s 11d. Out of this sum the usual dividend of 6*l* per cent. has been paid for the half-year ended 30th of June, leaving now disposable the sum of 6,549*l* 5s 11d, from which the directors are enabled to declare a further

dividend of 6*l* per cent. for the past half-year, and also a bonus of 6*l* per cent. After making these payments, and deducting the income tax payable by the bank, there remains a balance of 318*l* 5s 11d, which will be placed to the credit of the contingent fund, which will then amount to 1,637*l* 3s 3d. The "reserved surplus fund" of 20,000*l* remains complete. The retiring director is Matthew Brown, Esq., who is eligible for re-election, and offers himself accordingly. The lamented death of Mr Benjamin Ward, in July last, deprived the company of his valuable services as manager of the bank, an office which he filled with great efficiency for fourteen years. The vacancy occasioned by this event has been filled by the appointment of Mr David Nelson, whose qualifications for the responsible office the directors had had the best opportunity of appreciating, from his having been one of the directors of the bank for several years. Mr Matthew Brown, one of the auditors, having been appointed a director, the directors, by virtue of the power vested in them, appointed Mr John Simpson, of Penrith, to fill the office of auditor *pro tem.* MATTHEW BROWN, Chairman.

BALANCE SHEET, 31st December, 1860.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

THE directors have now to present a report on the operations of the bank during the past year, which they trust will prove satisfactory. The result exhibited by the balance sheet is a net profit for the year ending the 31st of December last of 45,552*l*, and a balance now disposable of 27,502*l*. The directors at the meeting in September last expressed their opinion of the propriety of increasing the reserve fund, even at the expense of the dividend in the early stages of the bank's existence. On the present occasion, therefore, they recommend an addition of 5,000*l* to the reserve fund (which will then stand at 10,000*l*), and a dividend for the past half-year at the rate of 6 per cent. per annum, free of income tax—making, with the distribution of the previous half-year, a dividend at the rate of 6¼ per cent. for the whole year, and leaving 1,632*l* of undivided profits to be carried to new account. It has not yet appeared to the directors advisable to increase the number of their branches abroad; they will be quite prepared, however, when the proper time arrives, to extend the business of the bank in this manner. The charter confers the privilege of issuing bank-notes in the Queen's colonies in the East, but not in the territories formerly under the government of the East India Company. The directors, however, consider it very desirable that the bank should possess this privilege at Singapore, and they propose accordingly to apply for it to the Lords Commissioners of Her Majesty's Treasury. In terms of the deed of settlement two extraordinary general meetings must sanction this application. The same sanction is also required for postponement of the ordinary annual meetings from March to April in each year, a measure which the increase of the bank's operations abroad now renders necessary, in order to ensure the due receipt and examination in London of the accounts from all the agencies to the previous 31st of December.

CITY BANK.

THE tenth half-yearly meeting of the proprietors of this bank was held on the 15th of January, at the London Tavern: Sir Robert W. Carden, chairman, presiding.

The following report and statement of accounts were read:—

The directors have satisfaction in presenting to the proprietors the annexed statement of accounts, which show that the gross profits realised during the past six months, together with the balance brought forward from the previous half-year, amount to 38,736*l* 10s 4d; of this sum they have appropriated to the payment of the current expenses of the establishment, and a full allowance for bad and doubtful debts, 24,548*l*; and for rebate on bills discounted, not yet due, 4,563*l* 5s; which enables them to declare a dividend at the rate of 6*l* per cent. per annum, free of income tax, and to carry 625*l* 5s 4d to the credit of the profit and loss account of the current half-year. At the last meeting of shareholders, the chairman stated that the bank would sustain considerable loss by the failure of Messrs Streatfeild, Laurence, and Co., which had then just previously occurred. The directors have carefully estimated the value of the bills and other securities held by the bank on account of that firm, and have written off the full amount of the deficiency, in the balance sheet now presented. The dividend will be payable on and after the 22nd instant.

The Chairman—The secretary has just read the report of the directors for the past half-year, accompanied with the financial statement up to the end of December last. In that account they would see two remarkable features. Perhaps one only was remarkable; the other showed the prosperous condition of the bank. He might say there was in it the evidence of the increased and increasing value of the property which they held. He might say, indeed, that the accounts showed several thousands more in excess for the half-year than had been shown in any previous half-year since the commencement of the bank. (Applause.) The other feature was not of a pleasing character, though it was a matter of what might be termed a local character—he alluded to the large debt contracted by the house of Streatfeild and Co., and it was necessary that he should explain this, because they would see in the account the frightful item of 24,548*l* for current expenses and allowance for bad and doubtful debts &c. This was a charge so far in excess of what they had usually seen that it was imperative on him to give some explanation on this item. It would be remembered by those who were present, that at the last meeting the failure of Streatfeild and Mortimer had occurred, and that at that time this bank and many others were involved in a greater or less degree in heavy losses. He had then stated that the loss incurred by this bank would be about 8,000*l* or 9,000*l*. But at that period the directors thought they were dealing with honest but unfortunate parties; they had no idea that they had been dealing with unscrupulous and reckless traders—he might say dishonest traders. The proceedings before the Court of Bankruptcy showed that they were reckless and dishonest, but he was happy to see, for the character of English merchants, that such conduct was very rare. (Hear.) At the time of their failure the bank had not only their names, but those of other firms affixed to the bills which had been discounted. Since then, however, it appeared that these men issued bills, got endorsements and acceptances, for which they knew they themselves only were answerable, and that the acceptors and endorsers were parties only to a system of accommodation bills. He would say thus much, that as traders they had no right to suspect that they had such men to deal with; and this would account for the large loss which they had sustained, much larger than the board had anticipated it would be. (Hear, hear.) Notwithstanding the great loss, which had been calculated at 17,000*l*, but which appeared to be 17,250*l*, it was fortunate that there was

nothing else which had occurred in the shape of bad debts. That was a matter for congratulation with the proprietors. The conduct of those men to whom he referred had been so bad that he hoped this session of Parliament would not pass without making this, which was now a moral, a criminal fraud, and that parties so offending would be sent to a proper place —to a prison (hear, hear); to Newgate. (Hear.) That was nearly all that he wished to draw attention to. The past year had been one of an extraordinary character; there had, perhaps, never been one of the same character, for they had had eleven fluctuations in the rate of discount by the Bank of England within twelve months; and this would account for the difficulties of commercial men during that period in managing their affairs. Again, they had had a deficient harvest, and to show what a wonderful country this was, within the last ten months we had actually paid for grain only, from America, Turkey, and Russia, no less a sum than 22,800,000*l*. This showed, too, that this mighty country has been able to give the precious metals for that food. Never was there a bank which had progressed more securely or prosperously than this. Gentlemen would recollect, too, that they were a bank alone. In looking to the receipts of others, they must consider that they were only a joint stock bank standing alone—they had no branches. Other banks might have branches which might possibly increase their available assets, but in this case the whole energies of the establishment were applied to the one office which was under their care. He should be happy to answer any questions which might be put, and in the meantime he moved the adoption of the report.

Mr Bell seconded the motion, and no proprietor offering any remarks, the question was put and carried unanimously.

The dividend of 6 per cent., free of income tax, was then declared.

Alderman Abbiss moved a vote of thanks to the chairman and directors for their exertions during the past half-year, and congratulated the meeting on their losses being so small when other banks had suffered so severely.

The motion, having been seconded by Mr Beecher, was carried unanimously.

The Chairman, on behalf of himself and the directors, returned thanks, and assured the shareholders that nothing should be wanting on their part to promote the interests of the bank. (Hear, hear.)

On the motion of Mr James Wagstaff, seconded by Mr Thomas Brushfield, a vote of thanks was given to the manager (Mr White), to which Mr White responded.

A similar compliment was paid to the auditors, to which Mr Lewis replied.

DEVON AND CORNWALL BANKING COMPANY.

Report of the directors at the twenty-ninth annual meeting of its proprietors, held at the bank, Plymouth, February 15, 1861, Joseph Collier Cookworthy, Esq., chairman:—

The directors of the Devon and Cornwall Banking Company have much pleasure in reporting to the shareholders, on the twenty-ninth annual return of the period appointed by the deed of settlement, the result of their transactions during the past year, and the present position of the bank. The profits of the bank during the year enable the directors, after making allowance for bad debts, giving some gratuities to clerks, and paying the usual dividend of 12½ per cent. per annum on the paid-up capital, to carry 2,429*l* 16s 3d to the credit of the guarantee fund. The company consists of 289 proprietors, holding four thousand shares, the paid-up capital being 100,000*l*. The guarantee fund, at the close of the last year, amounted to 42,617*l* 15s 7d; the addition thereto, during the year 1860, being 2,429*l* 16s 3d as already stated, making the total amount of the guarantee fund 45,047*l* 11s 10d. The directors have visited and carefully examined all the branches, and must pronounce the existing position of the bank both safe and prosperous.—They append a statement of their affairs as in former years.

RALPH COLE, Deputy-Chairman.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

Report of the directors to the fifteenth ordinary meeting on Friday, the 25th January, 1861:—

The directors have now to present to the proprietors the result of the operations of the bank for the *half*-year, ending, at the branches, on the 30th September, and in London on the 31st December last. It will be seen from the annexed statement of accounts, that the available balance of profit is 19,402*l* 4s 3d, after making provision for estimated losses. The depressed state of commerce in Australia, adverted to in the last report, continued unabated during the six months now under review, but at the date of the latest advices an improvement had manifested itself. The directors have to acquaint the proprietors that the banks in Melbourne have agreed to discontinue the allowance of interest on the balances of current accounts, a system which had been previously abandoned at Sydney. With the increase in the profits of the past half-year, as compared with those of the previous six months, the directors feel justified in recommending the following appropriation of the balance of 19,402*l* 4s 3d, viz.:—

	£	s	d
To the payment or a dividend at the rate of six per cent. per annum, free of income tax, on ££100,000, the paid-up capital of the bank...	15,000	0	0
Towards the reduction of the amounts at debit of—			
Preliminary expenses	500	0	0
Bank premises and furniture accounts	1,000	0	0
Leaving	2,902	4	3

to be added to the reserved fund, which will then amount to £22,487 5s 3d.

(Signed) T. W. WATSON, Chairman.

GLAMORGANSHIRE BANKING COMPANY.

At the half-yearly meeting of the proprietors, held at Swansea, on Tuesday, the 12th February, 1861, Mr David Francis in the chair, the following report was presented and read, and also a summary of the liabilities and assets of the company, as they stood on the 31st December, 1860:—

The directors and managers of the Glamorganshire Banking Company submit to the proprietors summaries of the liabilities and assets of the bank, as they stood on the 31st December, 1860. And they have to report that the profits of the half-year enable them to recommend that the usual dividend, at the rate of 10*l* per centum per annum, free from income tax, be declared upon the paid-up capital of 125,000*l*; that the guarantee fund be increased to 43,000*l*; and that the sum of 2,607*l* 12s 8d be carried forward to meet contingencies. A branch bank has been opened at Aberavon, where a clerk from the Neath Bank attends on Mondays and Thursdays. This has been an accommodation to the neighbourhood, and useful in keeping together the business of the bank. The company's new deed of settlement is now submitted to the proprietors, and if adopted it will be necessary to hold a special meeting to confirm the same; which meeting it is proposed to hold at Swansea, on Thursday, the 4th of April next. The directors have to report with deep regret the death of two of their colleagues, Mr Michael John Michael and the Rev. Thomas Williams. It was resolved:—"That the report of the directors and managers now read be received and adopted." "That a dividend at the rate of 10*l* per centum per annum, free from income tax, upon the paid-up capital of 125,000*l*, be made to the proprietors, payable at the banking houses at Swansea and Neath, on application, on and after Saturday, the 23rd instant." "That the company's new deed of settlement, now submitted, be adopted by the proprietors." "That a special meeting to confirm the last-named resolution be held at Swansea, on Thursday, the 4th April next." "That the thanks of this meeting be given to the directors and managers, for the successful manner in which they have managed the affairs of the bank during the past half-year." DAVID FRANCIS, Chairman.

The thanks of the meeting were voted to Mr Francis for his conduct in the chair.

HALIFAX JOINT STOCK BANK.

TO THE EDITOR OF THE ECONOMIST.

SIR,—Capital, 100,000*l*; reserve fund (1st fund capitalised 25,000*l*), 25,493*l*; profits for the year 1860, 14,187*l*.

At the 31st annual general meeting of proprietors, held on Wednesday, the 30th January, 1861, the above result was announced. Last year, the capital was only 75,000*l*; and the reserve fund, with all additions to the 31st December, was 50,493*l*; out of which the directors capitalised 25,000*l*, leaving the reserve fund then 25,493*l*, and freehold property worth at the least 8,000*l*—total, 33,493*l*. Out of the profits, 14,187*l*, they declared 7,500*l*, 10 per cent. dividend for the year; 1,875*l*, 2½ per cent. bonus—making 12½ per cent. free of income tax; 3,547*l* was carried to reserve fund; 1,265*l* was carried to next account for income tax, &c.; total, 14,187*l*.

The directors do not publish any report, but these are the real figures for any use you may choose.—I am, Sir, your obedient servant, JNO. FISHER, Manager.

Halifax, Feb. 1, 1861.

LINCOLN AND LINDSEY BANKING COMPANY.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The capital paid-up of this company is 76,720*l*; the guarantee fund is 37,000*l*; the last dividend was at the rate of 10 per cent., besides a bonus of 3*l* per share.—Yours truly,

Lincoln, Feb. 6, 1861. W. T. PAGE, Manager.

LIVERPOOL COMMERCIAL BANK, LIMITED.

TO THE EDITOR OF THE ECONOMIST.

SIR,—I was yesterday favoured with your letter of 30th January, to which I delayed sending you a reply till to-day, in order that I then might send you the half-yearly return published this morning, of the assets and liabilities of the bank, as required under the "Limited Liability Act."

I have now the pleasure to send you herewith the last annual report of the bank, likewise our return to which I have alluded, and which was published to-day. This bank does not hold half-yearly meetings or publish half-yearly reports, and as our *annual meeting* does not take place till March, the accompanying documents give you our latest published statements.

Will you permit me to call your attention to the circumstance that our twenty-pound share, having ten pounds only paid, gives to the public an additional security of ten pounds per share, over the amount paid up, and that it is the intention of the directors always to preserve this.—I am, Sir, your obedient servant,

1st February, 1861. WM. DALGLISH, Manager.

Statement published as required by the Act 21 and 22 Vict., cap. 91:—

The liability of the shareholders is limited. The capital of the company is one million, divided into fifty thousand shares of twenty pounds each. The number of shares issued is thirty-two thousand eight hundred and forty. Calls to the amount of ten pounds per share have been made, under which the sum of three hundred and twenty-eight thousand four hundred pounds have been received.

LIVERPOOL UNION BANK.

REPORT of the directors to the shareholders, at their twenty-sixth annual meeting, held on Wednesday, February 6, 1861:—

The directors have much pleasure in laying before the proprietors the results of the operations of the bank during the past year, feeling assured that they will meet with their cordial approval.

By the second resolution at the last general annual meeting, it was left optional with the directors to continue the dividend of six per cent. per annum only, till they should have accumulated a reserve surplus fund of 150,000*l*, with authority, however, to add to such dividend by bonus, or otherwise, if it seemed expedient for them to do so.

On mature consideration the directors deemed it advisable to raise the dividend to seven per cent., as the profits of the year enabled them, after providing amply for all bad and doubtful debts, to place a large sum to the credit of the reserved surplus fund, whilst the prospects of the bank are such as to warrant the conviction that this dividend can be maintained without interfering with their policy of progressively accumulating the reserved surplus fund until it is raised to 150,000*l*.

The paid-up capital of the bank is 450,000*l*, and the number of proprietors 170.

	£	s	d

The directors beg to express their reliance upon the continued co-operation of the shareholders in the furtherance of the interests of the bank. J. ASPINALL TURNER, Chairman.

LONDON AND COUNTY BANK.

AT the half-yearly meeting of share olders, held at the London Tavern, Bishopsgate street, on Thursday, Feb. 7, Mr W. Nicol, M.P., in the chair, the Secretary (Mr Nichols) read the following report:—

Your directors have the satisfaction to lay before the proprietors of the bank a statement of its affairs for the half-year ending the 31st December last. From the balance sheet placed before you, which has been duly audited, it will be apparent that the net profit of the bank for the half-year, after the several deductions of expenses (including income tax), rebate, interest to customers, and making the required provision for bad and doubtful debts, amounts to 48,728*l* 14s 11d, including the balance brought forward from the previous June of 8,708*l* 19s 7d. From the above the directors recommend that a dividend be now declared of 6 per cent. for the last half-year, free of income tax, which, with 5 per cent. already paid, will make 11 per cent. for 1860. Your directors propose a further addition of 15,000*l* to the reserve fund, and to place the remainder, 3,728*l* 14s 11d, to the credit of profit and loss new account. In consequence of the lamented decease of James Andrew Durham, Esq., early in November last, your directors have to announce that the vacancy, thus occasioned, has been filled by the election of Charles Salisbury Butler, Esq., M.P., to a seat at the board. The directors retiring by rotation are John William Burmester, Esq., John Fleming, Fsq., and William Champion Jones, Esq., all of whom are eligible for re-election, and offer themselves accordingly. The dividend will be payable on and after the 18th inst.

We, the undersigned, have examined the foregoing balance sheet, and have found the same to be correct.

(Signed) FRED. HARRISON, HENRY OVERTON, } Auditors.

The Chairman then rose to move that the report and statement of accounts be received and adopted; and before putting the proposition to the meeting proceeded to give a detailed account of the affairs of the bank during the past half-year. The capital fund of 500,000*l*, and the reserve fund of 110,000*l*, were the same as in the last half-yearly account. The amount due by the bank for customers' balances, &c. (5,532,614*l*), formed a very gratifying item in the accounts, as it showed an increase of above half-a-million during the year 1860, and bore evidence of the increased confidence of the public in the establishment, in which they had every reason to believe they would go on progressing as time advanced. Adverting again to their Irish claims, he said that money had been lately flowing in freely from that source. For

a long time they were at a standstill in this matter, and when he first had the honour of addressing the shareholders of this company, four years ago, the directors expected that all the estates would be realised in a few months. He would not refer to the difficulties that had since been thrown in their way, but they had now sold the greater part of them, and though there was considerable difficulty in getting the money out of the hands of their friends on the other side of the water, it had since the 1st of January last flowed in to something like the extent of 45,000*l*. At the last meeting the shareholders were informed that 18,144*l* had been received on account of the Irish sales, and in January 9,467*l* more was received, and no later than the previous day 35,700*l*. There were two or three estates still unrealised, but the sums received amounted to a considerable portion of what might be called the Sadleir legacy to the bank. He was glad to say that the Westminster property, which the bank held in possession as mortgagees, was now making considerable improvement—the terminus of the railway at the one end of it, and the establishment of the Westminster Hotel and the East India Office at the other, had already made a considerable addition to the rental of the property, and it was understood that other Government offices were now being applied for there, and there was every reason to believe that the property would rise in value, and that very considerably, before long. Since the last meeting a new feature in their business had been springing up, which promised to be profitable, and to extend the operations of the bank in a very satisfactory manner. Two new banks had already been established, and another was about to be established, which had connected themselves with the London and County Banking Company as bankers for them in London. One of these was the London and South African, which was now collecting its capital, and the other the Central Bank of Western India, which had already commenced business. He had nothing further to state, except that, though the directors, aided by the zeal and energy of their officers, were enabled to congratulate the meeting upon the progress of their establishment, the shareholders must still look to their own body to improve their property, by introducing new accounts to the bank.

Mr W. C. Jones seconded the motion.

Mr Harrison (one of the auditors) bore testimony to the accuracy of the accounts as prepared by the board, and expressed his opinion with regard to the business of the branches that the checks in operation were the best that could be devised. The gross profits of the bank had largely increased, their shares stood much better in the market than they had done, a considerable sum had been written off for bad and doubtful debts, and he considered that altogether their progress had been most satisfactory. The directors might have recommended a larger dividend, but he did not think, unless the profits very much increased, that it would be advisable to divide a larger sum till the question of the Irish estates was finally settled. There was much to be hoped for in the ultimate decision in this case, but there was great uncertainty in all legal matters, and with the appeal before them the directors were not disposed to recommend any increase of dividend.

The report was then adopted unanimously.

The Chairman proposed that a dividend at the rate of 6 per cent. upon the capital stock of the company be declared for the half-year ending the 31st December, 1860, payable, clear of income tax, on the 18th instant, that 15,000*l* be added to the reserve fund, and that the balance then remaining be carried to the profit and loss new account. The resolution was seconded by Mr Blyth and carried.

A vote of thanks was accorded to the auditors on the motion of Colonel Spong; and a similar compliment was paid to Mr M'Kewan (the manager), and the other officers of the bank.

Colonel Spong suggested to the board that when at some future time they were looking to recommend an increased dividend, they should consider whether the officers of the establishment were not entitled to some bonus for their exertion.

The retiring directors were re-elected, and a cordial vote of thanks to the chairman terminated the proceedings.

LONDON JOINT STOCK BANK.

The half-yearly general meeting of the proprietors was held on the 17th of January at the offices in Princes street, Bank: Mr F. B. Goldney in the chair. After the usual preliminary proceedings, the 47th report of the directors and statement of accounts were read as follows:—

It will be seen by the annexed statement of accounts that, including the sum of 24,534*l* 13s 9d brought forward from the last half-year; and after reserving 60,000*l* to meet the losses incurred by the failures of Messrs Streatfeild, Laurence, and Co., and other firms in the leather trade, there remains for division a net profit of 33,528*l* 3s 1d, which, with 3,971*l* 6s 11d taken from the guarantee fund, enables the directors to declare the usual dividend at the rate of 12½ per centum per annum, free of income tax. It is with regret that the directors have to announce so large an increase to the loss as compared with the estimate made in July last, but since that period several additional failures in the above-named trade have occurred, and the estates of nearly the whole of the insolvent houses are being wound up in the Bankruptcy Court, whereby the expected dividends have been much diminished. It is, however, confidently believed that the amount now reserved will be sufficient to cover every contingency.

	£	s	d
The guarantee fund, with the six months' interest accrued, amounted, on the 31st ultimo, to	214,733	18	1
From which has to be deducted for depreciated value of Government and Indian securities, as compared with the prices on the 30th June last, 6,500*l*, and the sum as before-mentioned of 3,971*l* 6s 11d.	10,471	6	11
Leaving the present amount of the fund	204,262	11	2

The directors have to announce with deep concern the death of their much esteemed colleague, Sir George Carroll, which event will render an extraordinary general meeting necessary during the present half-year, to elect a gentleman to supply the vacancy thus occasioned. The seats in the direction which now become vacant are those of Henry Christy, Esq.; Francis Bennett Goldney, Esq.; Charles James Heath, Esq.; Henry Lee, Esq.; and George Pollard, Esq.; and these gentlemen offer themselves for re-election.

The dividend will be payable on and after Friday, the 25th inst.

Undivided profit brought forward from the last half-year	24,534	13	9
	142,252	13	5

The Chairman first declared a dividend for the last half-year, at the rate of 12½ per cent. per annum, upon the paid-up capital of the company, amounting to 600,000*l*. He then moved the adoption of the report. He had only to say that it was, of course, extremely painful to the directors now to be obliged to write off the large sum of 60,000*l* from profits of the last half-year, in consequence of those extraordinary failures of Messrs Streatfeild, Laurence, Mortimore, and their confederates, which had become so notorious. It was still more painful to see that gentlemen, who had become customers to this bank almost from its establishment, should have so far fallen away from the path of duty as to be guilty of those disgraceful practices by which they had brought ruin upon themselves and disgrace upon their families. But it was a source of great gratification to the directors that they were enabled, by the large profits of the past year, to clear off entirely the losses thus incurred, to the amount of 60,000*l*; and he firmly believed, as well as hoped, that this would be the very utmost amount that could be lost in consequence of those failures. He was ready to give any further explanation that might be asked for.

Mr Tayler said that the 60,000*l* to be written off for those losses appeared to him a most shocking and outrageous sum. He was astonished when he saw that, in the great City of London, where everybody was supposed to be more or less known, that such practices could be carried on. He had understood that the executive officers of this and other joint stock banks always professed to know pretty nearly the weight and character of most of the commercial people in the City; and with such wisdom as they were supposed to possess, he could not understand how these frightful defalcations could get on so long from day to day. Yet the directors and officers of this bank were so extremely careful with regard to other parties, that if anybody wanted 10,000*l* and came there presenting the very best security, there would be a most rigid examination, and he would have the greatest difficulty in obtaining a loan. It was the more astounding, therefore, to find that those wretched people, such as Messrs Streatfeild and Co., whose paper was the merest rubbish—men who were a disgrace to commerce and to human nature—men who ought to be regarded as the worst of criminals, were able to come to the bank and get 60,000*l*, *just as if they came to ask for a Christmas-box.* (Cheers.) They were allowed to come and take money by the "tea-spoon" or the "gravy-spoon," or whatever other ridiculous names their own vain imaginations could suggest. He really hoped the chairman would give some explanation of those terrible defalcations. He must say that he thought the directors of this bank and of the other banks stood now with regard to these transactions in a most shameful position towards their own proprietors, who had been sitting at home thinking that their affairs

were being wisely conducted, so as to give them the best return for their capital—till now they were told that 60,000*l*, a sum too large to be easily picked up in the street, had been thrown away. Such disclosures must tend very much, not only to diminish their dividend and the interest on their capital, but also to make their character suffer. The directors of banks, who were intrusted with millions of their proprietors' money, had likewise the safety and reputation of their companies intrusted to them; and he knew perfectly well that the shares of this company were no longer held and considered as highly in the market as they were before. The proprietors of this bank had put the most implicit confidence in their directors, and it was but a poor return for it now to be told that 60,000*l* was gone, and that they must be glad it was no more. He thought the matter was very much too lightly dealt with in being mentioned by the directors without any comment or explanation to show how they had been led into such enormous error. He saw there many excellent friends among them, and he esteemed their late worthy manager as second to no man in the City. But he had felt bound, as an original shareholder, to come forward and make these remarks, because other gentlemen would be induced by motives of delicacy to refrain from telling the truth. (Cheers.)

Mr Ambrose Moore, one of the directors, must reply to the serious imputations which, as he thought, were so undeservedly cast upon them. Was it imputed to them that they had some corrupt motives for accommodating certain people? (Mr Tayler: "No, no.") He would desire that hon. gentleman and all the proprietors to observe, that it was not the fact that a sum of 60,000*l* had been lost by being put to the credit of those people; but that sum had been lost upon bills discounted for them. Messrs Streatfeild and Mortimore were not in the habit, as he believed, of taking any loans except in the ordinary way of banking, by getting their bills discounted. Now, he (Mr Moore) did freely admit that the directors had been incautious in not looking more narrowly into this account: and he would candidly take his own part of that rebuke. (Cheers.) But the fact was, that nothing occurred to awaken their suspicions, and they never supposed there could be anything wrong in it. Messrs Streatfeild and Co. brought their bills in the ordinary way of business, as they had been accustomed to come to this bank ever since it was opened, now twenty-four years ago, and however nefarious their conduct now proved to have been during the last four or five years, there was once a time when they had great commercial reputation, based upon capital which they actually at one time possessed; and their predecessors in the same house had retired with large fortunes from the business. It thus would not unfrequently happen, that when the old partners of a house went off, and the foundations of its stability were partly withdrawn, the change was not obvious in the world's eye. The bank, however, had been in the habit of discounting their bills, which had all the appearance of being drawn for actual sales of goods. They were all drawn for odd sums of money, such as 975*l* 15s 1d, to give them the aspect of representing real transactions. He had only found two or three cases in which an even sum—perhaps 100*l* or 500*l*—appeared in the bills discounted for Messrs Streatfeild and Co. by this bank; and Mr Laurence himself had avowed in the Bankruptcy Court, that this contrivance of the uneven sums was employed by him as a blind, to deceive the parties who were discounting his bills. He (Mr Moore) would give to Mr Laurence for this contrivance all the credit that his financial ingenuity could deserve. (A laugh.) Mr Laurence was, indeed, a master of his art, which he had cultivated with the kind of affection requisite to make a consummate performer, whether on the stage or in the business of real life. He had certainly deceived the directors of this bank, as well as their late manager. It should be remarked, by the way, that Messrs Streatfeild and Co. had various other places to resort to for discounts, unknown to the directors of this bank, who were only aware of their discounting at the Bank of England, and in one or two other quarters. Messrs Streatfeild and Laurence so contrived that no one of the parties who discounted for them should have a preponderating amount of bills upon one house, for that might have led to a disclosure. Now the directors of the London Joint Stock Bank admitted that they had been grossly misled in these transactions, and they all felt exceedingly mortified about it. But it was not fair to impute to them general mismanagement of the affairs of the bank. Some gentlemen would perhaps have a bank conducted on the parsimonious principle, forgetting that they could not expect to make a profit without incurring a risk. But if they wished to have large accounts and to do business with good and wealthy people, they must be ready to accommodate them, and put confidence in them. It would not do for the bank, every time a bill was brought there, to interrogate such people as to whether the acceptor would pay the bill, or whether the bill represented a real transaction; they would repel such questions as an insult. Every man of the world must know that this was not the way in which business could be satisfactorily carried on. The directors of a bank like this must be capable of grasping large transactions, but they would not be human beings if in such dealings they did not sometimes make a mistake. This was but one of the uncertainties attending every sort of trading operation, and such things would now and then occur. If, indeed, such things were to occur often, then it might justly be imputed to the directors that they were unfit to conduct the business, that they were deficient in judgment and penetration, or in diligence. But what had been the results of their liberal management of the bank since its commencement, and how did these results compare with the experience of some other banks, which, under a more suspicious kind of management, refusing to lend anything to anybody, had gone on for many years, barely paying 5 cent., and with their shares at 20 per cent. discount? He would omit the last year, 1860, as an exceptional one, and then he found that taking the twenty-three years of the existence of this bank, up to the end of 1859, with a capital of 600,000*l*, it had made a total profit of 1,726,000*l*. In the shape of dividends and bonus the amount of 1,491,913*l* had actually been paid into the pockets of the proprietors, besides the income-tax, amounting to 29,632*l*; so that the returns made to the proprietors upon their 600,000*l* of capital, came to rather more than a million and a half. In addition to that a guarantee fund had been created, which was 205,195*l* at present, though liable to some depreciations or augmentations, at one period or another, from the fluctuating value of the securities in which it was invested. All this had been done out of the profits gained in twenty-three years, the total of which was 1,726,741*l*, or not much less than 250 per cent. upon their capital. Of course, in the early years of the bank, the profits were not so large as they had lately been; but taking the five years ending with 1859, the average annual amount of dividends and bonus paid had been 22½ per cent. Even in the past year, 1860, which was quite exceptional, he found that if he only took the ordinary bad debts, without including the 60,000*l* lost by those unfortunate events in the leather trade, he could show a total of profits which would have paid a dividend of 22 15-16 per cent.; and even when the 60,000*l* was deducted, there was a dividend of 12½ per cent. left for the past year. The loss of 60,000*l* was, after all, no more than 1*l* per share on the capital of this company. Any gentleman who owned 500 shares, and who, being an original proprietor, had got them at par for 5,000*l*, might feel that he had not been ill-used when he had already got 12,500*l* returned into his own pocket, and his shares, instead of 5,000*l*, were now worth 15,000*l*, so that in twenty-four years his 5,000*l* had actually been turned into 27,500*l*. Not including this 60,000*l*, the whole amount of the bad debts of this bank since its establishment was 124,000*l*, or an average of 5,435*l* in each year, whilst they had eleven millions and a half of money passing through their hand, and the bad debts had always been estimated at more than they really turned out to be. In the past year the profit actually realised by the bank was 137,642*l*, of which 75,000*l* was paid to the shareholders in dividend, and 60,000*l* being written off for the recent losses, there remained about 2,000*l* to be carried to the guarantee fund. He therefore submitted that the directors, though he was ready to avow that they had shown a want of penetration in this instance, were, on the whole, not deserving of the charge of mismanagement cast upon them. (Cheers.)

Mr Tayler said he would not interfere with the unanimity of the meeting, and he had not meant to cast any imputations on the directors. He applauded the very frank avowal they had heard from Mr Moore, which went half way towards repairing the mischief; and he hoped the future prosperity of the company would justify them in giving the directors full absolution. (Cheers.)

The report was then adopted unanimously, and the five retiring directors were re-elected.

The Chairman, in returning thanks, said that he could take to himself but very little shame for what had happened, since it was impossible for the directors to guard against those dreadful failures, and the accounts of Messrs Streatfeild and Laurence were always regularly paid.

Mr Riley moved, not only a vote of thanks, but a vote of confidence in the directors, as he was quite satisfied with the explanation they had given.

Mr Woolsey seconded the motion, and he remarked that, since the profits of the last half-year were larger than those of the half-year preceding, it seemed that the public confidence in this bank was not at all disturbed.

A vote of thanks having been passed to the chairman, the meeting separated.

LONDON AND WESTMINSTER BANK.

The annual general meeting of the proprietors of this bank was held on the 16th January, at their house in Lothbury: Alderman David Salomons, M.P., in the chair.

The following was the half-yearly report of the directors, read by the general manager and secretary, Mr Ewings:—

The directors have to report that—after making ample provision for all bad and doubtful debts, paying the income tax, setting apart 2,000*l* towards the buildings of the bank, and presenting a gratuity of 10 per cent. on their salaries to all the officers of the establishment—the net profits of the bank for the last half-year amount to 112,816*l* 7s 8d. This sum, added to 11,222*l* 1s 2d, the unappropriated balance of the preceding half-year, will amount to 124,038*l* 8s 10d. Out of this

amount the directors have paid the interest on the rest or surplus fund, at the rate of 5 per cent. per annum, and they now declare a dividend to the shareholders at the rate of 6 per cent. per annum, and by way of further dividend out of the profits a bonus of 7 per cent. on the paid-up capital. After these payments are made, there will be a balance of 18,913*l* 8s 10d, and the directors recommend that the sum of 7,972*l* 0s 5d be applied in total liquidation of the alterations and repairs at the City office, and at the Westminster and Marylebone branches, and that the remainder, 10,941*l* 8s 5d, be carried to the profit and loss account of the current year. The vacancy in the direction, occasioned by the death of the late Charles Gibbes, Esq., has been filled up by the nomination of William Wallace, Esq., subject to the confirmation of the present meeting. The directors who retire by rotation are William Haigh, Esq., Joseph Esdaile, Esq., and James William Gilbart, Esq., F.R.S., all of whom, being eligible, offer themselves for re-election.

The dividend and bonus (without deduction of income tax) will be in course of payment on Monday, the 21st instant.

The Chairman said he had great pleasure in moving the adoption of this report, and as there were in it several points of interest, he had a few observations to make. In the first place, with regard to the great source of their profit, the deposits, the proprietors would see by this report that the deposits had amounted to nearly twelve millions and a half. This very large amount was made up almost wholly of deposits on current accounts, with some other items, and it presented an increase of about 1,300,000*l* over the last year, the amount of deposits now being above half a million more than it was last July. The effect of enabling persons to bring their money to be employed safely by this bank, and to be returned to them with a fair rate of interest, calculated according to the present condition of the money market, when money was so much in demand, was naturally to attract this amount of capital to the London and Westminster Bank, by which it was made to circulate securely and beneficially for the public. The directors had been enabled, during the past year, by the high rates allowed for money, to realise a profit from which dividends and bonus could be paid, amounting to 20 per cent. altogether, which was more than they had ever been able to do before. As the result of their operations in working the proprietors' capital for the year now concluded, they had been able to return to each original shareholder one-fifth part of his subscribed capital. He (the chairman) hoped the proprietors would think that this was a pretty fair return for their capital intrusted to the directors' management and care. (Cheers.) Last year, indeed, at the period corresponding to this, they paid a dividend of 10 per cent. for the half-year which had just then concluded, but the dividend for the preceding half-year was then only 8 per cent., so that the whole amount of that year's dividends was 18 per cent., and in the year now terminated the dividends amounted to 20 per cent. Having accumulated, over and above this amount of profit, a balance of 18,900*l* to go towards the commencement of the present half-year, the directors thought it best to write off a sum of 8,000*l* for the repair of all the buildings, and for the cost of such alterations as had been found necessary, so that all their house property, whether freehold or leasehold, might be held as without any incumbrance upon it. After this deduction from the balance, they would still be able to carry forward about 11,000*l* to the account of the current half-year, since it was always an agreeable and satisfactory thing, whether in good or bad times, to have a nest egg which they might lay by, and which might perhaps help to produce them an additional rate of dividend in the next half-yearly account. Now, the proprietors were of course all aware that the past year had not been without some drawbacks to its commercial prosperity. When he last had the pleasure of meeting them in July, it was just at the time when those large failures in the leather trade occurred, which had since been the subject of so much discussion; and the directors then stated that they had thought it prudent to reserve, out of the profits of that half-year, the sum of 10,000*l* to meet any contingent losses that might arise from those failures, particularly in a district were the London and Westminster Bank had a large branch —the borough of Southwark. He was now happy to say, that their anticipations as to the limited amount of losses that might arise from those leather transactions had so far been realised, that the sum of 10,000*l* referred to had proved more than amply sufficient to cover them. (Cheers.) The directors and managers of this bank might indeed take some credit to themselves in saying that the expected loss to be sustained by this bank, from those astounding failures which had shown such a reckless abuse of commercial credit, was little more than 5,000*l*. There was another matter of public interest to which he would direct attention. Whether we were now entering on troublous political times or not was what no one could say; but there could be no doubt that we were passing into a period in which more than ordinary care would be required in all commercial transactions. The troubles on the Continent, the political divisions in America, and the bad harvest we had got, had created such a drain on the bullion of the country, in consequence of which the rates of the Bank of England were now high. The directors of the London and Westminster Bank, having had the experience of a somewhat similar emergency in 1857, would not be worthy of the confidence of their proprietors if they did not now show that they had gained some wisdom by that experience. They had now therefore endeavoured to correct the system of 1857, by not continuing applying to such extraordinary times the same rates allowed in receiving money on deposit that they had been in the habit of allowing in times of ordinary commercial facility. With a view to determining this question, a meeting of the joint stock banks took place, which this bank took the lead in calling; and for the interest of this bank and of all the other banks, a measure was suggested, which had been ratified by public opinion, and happily carried into effect. It was considered that, at a time when the Bank of England was resorting to extraordinary rates of discount for the purpose of protecting its bullion, the London and Westminster and other banks should not, in receiving money on deposit, tread too closely upon those rates which the Bank of England fixed for its discounts. The directors had therefore fixed those new rates of interest on deposit which, he was happy to say, had received the sanction of the press and of public opinion, as being just to all their depositors, and a fair bargain for the banks, which had to bear all the brunt of stormy times; and it could not afterwards be said of them, in any case, that they had pushed forward to receive the money of all sorts of people, by offering to pay more for it than it was really worth. One other matter, which had occurred that very day, he would just allude to. The directors had voted 150*l* to be sent to the various metropolitan police offices, with a view to contribute a little towards mitigating the distress that now prevailed. (Cheers.) They felt that this great bank, making money as it did by means of trade, should do something in its corporate capacity, along with its neighbours, to relieve the distress caused by a stoppage of so many trades in this extraordinary weather; and he was glad to find that they had acted according to the wish of the proprietors. In conclusion, he was ready to answer any questions about the accounts, for there were no secrets in the management of this bank, which by prudence and judgment would continue, as he hoped, to deserve the confidence of the public, as one of the great establishments of the country. (Cheers.)

The resolution for adopting the report having been seconded,

Mr T. H. Smith said he would make one or two remarks. The directors had thought it right to set aside 8,000*l* to cover various items of outlay or expenditure on the buildings of the banks and its branches. He was happy to see they were thus able, after providing for the very satisfactory dividend now proposed, as well as for an increased reserve, to render their buildings free from debt. The building in which they were met was freehold; but he would venture to ask whether any of the other buildings were freehold, or were they all leasehold?

The Chairman would most readily answer that inquiry, and tell the proprietors, as nearly as he could, their condition with regard to buildings. That house in Lothbury, in order that it might be adapted to their present large business, had within the last ten years undergone two very expensive alterations to make it more commodious, and to give plenty of room for their customers, and breathing space for their clerks. They might see the great hall below, and a place underneath for keeping securities in, had been provided. These premises were suitable to their purposes, spacious and healthy; yet so well had the money been husbanded which was laid out upon them, that what the City office had cost altogether was 51,000*l*. The house was a freehold, and nearly 16,000*l* or 17,000*l* had been laid out in repairs and alterations. It now stood in their books as an asset of the value of 30,000*l*, but its real value was very much greater, and he presumed that if it should ever come to be sold, it might even realise as

much as the large building formerly belonging to Mr Moxhay in Threadneedle street, and now occupied by the Bank of London and other establishments, which was said to have realised 75,000*l*. The building of the Westminster branch was also a freehold, and had cost, with alterations, he believed, 18,000*l* or 20,000*l*; it stood in their books as an asset of 11,000*l*. The Bloomsbury branch was a crown leasehold; it had been rebuilt and made one of the best arranged places in the country; it had cost 21,000*l*, and now stood at 9,500*l*. The Marylebone branch in Stafford place was a copyhold, and had cost 3,000*l*. The Temple Bar premises were a recent purchase, which had cost them 21,000*l*, and was put down as an asset of 18,500*l*. The directors had been writing off 2,000*l* in the half-year for repairs or alterations of the buildings, but on this occasion, as they were doing so exceedingly well, they thought it better to propose that 8,000*l* should at once be written off from that account. There were two other branch buildings, one in Whitechapel and the other in Southwark, which were leaseholds, occupied at a rent, and there was no account due for repairs and alterations to them. The Southwark building was a good one, but required enlargement to accommodate the increased business, and the directors had therefore recently purchased a portion of the hotel adjoining it. They would either be able, with the sum written off on this account, and with the 2,000*l* to be applied to repairs and alterations this half-year, to pay off the whole amount on their buildings, or else they would ask the proprietors for an additional vote to pay it off, in some year of extraordinary prosperity.

The report was then unanimously adopted.

MANCHESTER AND SALFORD BANK.

AT the annual general meeting of the proprietors, held in the board room, in Mosley street, on Wednesday, the 13th of February, 1861, James Murray, Esq., in the chair, the following report was presented by the directors:—

The year which has elapsed since the proprietors of the Manchester and Salford Bank were last assembled, has been distinguished by reaction in those branches of commerce which had previously exhibited the greatest signs of activity and prosperity—by unpropitious seasons—and by a deficient harvest. Most of the mercantile disasters which have occurred are traceable to an abuse of credit. The published returns of the Bank of England indicate that the capital applicable to commercial purposes is gradually becoming less commensurate with the requirements of trade, and the exigencies of other nations have caused a drain upon the reserves of coin and bullion in this country. Frequent variations in the value of money have consequently taken place. The great extent of our foreign trade, the outlay taking place in buildings and machinery within this county, and the vast projects contemplated in public works, are all indications of a continuing high rate of interest, which will doubtless be maintained, unless there should be a great curtailment of business and until we are in the enjoyment of a plentiful harvest. Meanwhile, as it cannot be expected that any large concern can altogether escape from the losses incidental to critical times like the present, it is satisfactory to be able to state, that beyond the reserved surplus fund now amounting to 80,000*l* and a sinking fund of 7,000*l* against the new building account, we have in the guarantee account an amount of about 20,000*l* applicable to meet any further contingencies. The profits of the year 1860 having enabled the directors to declare a bonus of 6,250*l* beyond the usual dividend of 8 per centum per annum, they have followed the precedent of the last annual report by declaring it in the form of an addition to the joint stock capital, in the ratio of 4s 2d per share, being confirmed in the conviction formerly expressed "that it is the part of prudence to increase the capital of the bank concurrently with the extension of its business." The net profit of the business in 1860, after allowing for rebate of interest upon bills in hand, and deducting all charges, salaries, &c., amounts to 41,557*l* 9s 9d. Out of the above-named sum, transfers have been made to the guarantee account, as a further provision for bad debts, 7,000*l*; and to the reserved surplus fund, 2,000*l*; a further addition, by way of bonus, has been made to the capital stock of the bank, 6,250*l*; leaving as a balance out of which to pay the usual dividend of 8 per centum per annum and income tax, 26,307*l* 9s 9d; plus a balance in profit and loss account from 1859 of 442*l* 12s 9d. The paid-up capital of the bank is now at 10*l* 8s 4d per share, 296,145*l* 16s 8d; and the reserved surplus fund 80,000*l*. The lamented death of Mr John James Schmidt, their respected colleague, has so recently occurred that the directors are unprepared to recommend at this meeting a successor to his seat at the board. Mr Robert Stuart retires from the direction by rotation, and is eligible to be re-elected.

MESSRS MOORE AND ROBINSON'S NOTTINGHAMSHIRE BANKING COMPANY.

AT the twenty-fourth annual general meeting of the company, held at the George hotel, Nottingham, on Thursday, the 8th day of November, 1860 (pursuant to the forty-ninth clause of the deed of settlement), John Heard, Esq., in the chair, the following report was read:—

On this occasion of meeting the proprietors, the directors have much pleasure in stating that the business transacted during the past year has been in every respect satisfactory, and the condition and prospects of the company continue highly favourable. The directors find themselves enabled to recommend a further dividend of seven and a half per cent. (which, with the previous payment of five per cent. in June last, will make the annual dividend twelve and a half per cent., as has now been the case for five years past); and in addition, a bonus of two and a half per cent. to each proprietor upon the subscribed capital. A further sum of 1,473*l* 11s, arising from premiums upon the sale of reserved shares, has been added to the reserved fund, which now amounts to 22,473*l* 11s. The sum of 1,953*l*, being the amount of 3*l* per share paid-up capital, is added to the stock of the company, which now amounts to 87,855*l*. Since the directors last met the proprietors they have had to deplore the loss of Mr Allcock, a member of the committee, and it becomes the duty of the shareholders at this meeting to appoint a gentleman as his successor; and the directors, with the approval of the surviving members of the committee, have pleasure in recommending Mr William Gee, of East Bridgford, to fill that office. The retiring members of the committee are Mr Adams and Mr Hannay, who are re-eligible, and are recommended by the directors for re-election. The dividend will, as usual, be payable at the bank, on and after the 1st day of December next.—For the directors, JOHN HEARD.

NATIONAL PROVINCIAL BANK OF ENGLAND.

Subscribed capital, 1,500,000*l*, in 10,000 shares of 100*l* each, 35*l* paid; 25,000 shares of 20*l* each, 10*l* paid. Capital paid up, 600,000*l*. Number of shareholders, 1,130.

THE following is the twenty-seventh annual report, read at the meeting, May 10, 1860:—

The proprietors are now assembled to receive from the directors of of the National Provincial Bank of England their twenty-seventh annual report. The course of the money market, during the past year, does not present any changes calling for special remark, with the exception of those which occurred in April and May. The year opened with money at 2½ per cent., at which point it remained until the month of April, when, under the influence of alarm caused by the Italian war, the rate rose to 3½ per cent., and a further advance to 4½ took place in May; but there being no real ground for this enhancement in the value of money, the rate very shortly afterwards gradually fell, and by the middle of July it had returned to 2½ per cent. The demands, however, of an increasing trade, and the financial requirements of India and China, kept up a steady demand for capital, and the directors found a ready employment for the bank's funds throughout the year, and although, as above stated, the rate of interest was comparatively low, yet the result for the year, which the following summary of accounts exhibits, will not, they believe, disappoint the expectations of the proprietors.

1859.		£	s	d
Jan. 1.	Rest, or undivided profits, at 31st December, 1858, as exhibited at annual meeting, in May, 1859	249,698	3	2
	Less—			
	Bonus declared and paid in 1859 out of this amount	45,000	0	0
	Reserve fund set apart in Government securities	204,698	3	2
Dec. 31.	Net profits of 1859, after making allowance for bad and doubtful debts, and paying a bonus of 10 per cent. to officers	108,317	0	5
	Making	313,015	3	7
	Deduct—			
	Dividend on Company's stock for June, 1859 ..... £24,000			
	Ditto for December, 1859, paid January, 1860 24,000			
		48,000	0	0
		265,015	3	7

Out of the profits of last year the directors propose to declare, in addition to the half-yearly dividend paid to the proprietors as above stated, a bonus of 7 per cent., making the division of profit for 1859 in all 15 per cent. upon the paid-up capital of the company, free of income tax. After deduction of the bonus and the two half-yearly dividends, there will remain the sum of 18,317*l* 0s 5d, to be added to the reserve fund, which will then stand at 223,015*l* 3s 7d. Looking at the sound and prosperous condition of the bank, it appears to the directors that the time has arrived when the proprietors are entitled to a vested interest, in some portion at least, of this large accumulation of reserved profits. This benefit can be conferred upon the proprietors without trenching upon the banking power and resources of the company, by applying the reserve fund, on the 30th of June next, to the extent of 20 per cent. on the bank's paid-up capital, in paying 7*l* on each large, and 2*l* on each small share, making the amount paid on the former 42*l*, and on the latter 12*l*. This measure the directors accordingly now recommend to the proprietors for their adoption. After the above operation has been completed, the bank's reserve fund will stand at 103,015*l* 3s 7d, and its paid-up capital at 720,000*l*. In conclusion, the directors entertain a confident hope that they will be able in future not only to maintain the present dividend upon the increased amount of capital, but to add considerably to the reserve fund. Since last annual meeting the directors have given their attention to the establishment of a superannuation fund, for the benefit of the officers of the company, to be maintained by assessment on their salaries, and a yearly contribution from the bank. Having given the subject, in all its bearings, much consideration, the directors have come to the conclusion, that it is not advisable to establish any scheme based upon the principle just referred to. The directors have, in the exercise of their discretion, granted in past years pensions to certain officers of the bank, whose good conduct and length of service entitled them to liberal consideration at their hands. Such pensions have been yearly charged to the bank's profits. With a view of meeting the wish expressed on this subject at the last annual meeting, the directors recommend that the practice, which they have hitherto followed in this respect, should now, under certain regulations, be made the rule of the bank. Should the proprietors concur in this mode of dealing with the question, the directors, at no distant period, will lay down a general scale of pensions to officers, proportioned to their length of service and the salaries received at the period of their retirement, reserving to themselves the power, however, of considering each case upon its merits, and of giving a higher or lower retiring allowance than that fixed by the scale. In making this proposition for the approval of the proprietors, the directors confidently anticipate that they will be able to make suitable provision for their officers in their declining years, without taxing their incomes, or creating a charge that will unduly press upon the bank's profits. It is proper to add that, under the authority given to them by the annual meeting of 1854, the directors have assisted the officers in making provision for their widows and children, by paying a moiety of the

premium on policies on their lives. Eighty-eight officers have availed themselves of this aid. The total amount insured is 56,650*l*, and the annual charge to the bank is 857*l* 12s 4d. The following directors go out of office by rotation, but being eligible for re-election, offer themselves accordingly, viz. :—Charles Heaton Ellis, Esq.; John Kingston, Esq.; and Major J. A. Moore. A vacancy has occurred in the direction by the death of Isaac Nicholson, Esq., to supply which the following qualified proprietor has offered himself as a candidate, viz., the Hon. Eliot Thomas Yorke, M.P.

NORTH OF SCOTLAND BANKING COMPANY.

REPORT by the directors to the shareholders, at the twenty-fourth annual general meeting, held in the banking house, on Friday, November 2, 1860, agreed to at a meeting of the board held on October 10, 1860 :—

The period has again returned for the directors making their annual report on the affairs of the company.

Including a balance of 185*l* 3s 3d brought from the previous year, the free business profits of the year ending 29th September last amount to 34,320*l* 5s 1d after setting aside a sum to cover bad and doubtful debts, the whole of the anticipated loss on which has been provided for.

It has been resolved to allocate the profits in the following manner :—The sum of 20,000*l* in payment of a dividend of ten per cent.—half of which was paid in May last—the remaining half to be paid on 2nd November ensuing; 6,000*l* for a bonus of three per cent. payable along with the latter half of the dividend—making a return for the year on the capital of the company of thirteen per cent. free of income tax; and 7,672*l* 12s 9d to the reserved fund. There will remain a balance of 647*l* 12s 4d of unappropriated profit to be carried to next year's account.

The reserved fund amounted last year to 70,000*l*, and the interest received during the year on the investments for this account was 2,327*l* 7s 3d, which, with the sum of 7,672*l* 12s 9d now to be added, brings the amount to 80,000*l*.

In course of the year certain securities of the bank were realised, which yielded a surplus of 4,000*l*, and as this was a profit out of the ordinary routine of business, the directors thought it the more prudent course to carry it to the credit of the banking house property, which is thereby reduced from 8,000*l* to 4,000*l*.

The whole capital of the bank has now been invested in Government securities, in addition to the investment of the reserved fund; and it is proper to mention that, for several years past, the directors have adopted the practice of getting such investments annually verified by the Bank of England.

The contingent account remains at about the same amount as formerly.

All the directors retire from office, but may be re-elected, with the exception of Sir Thomas Blaikie and Dr Ogston, who are not eligible for re-election for twelve months.

Annexed is a statement of the assets and liabilities, and of the appropriation of the profits.

THO. BLAIKIE, Chairman of the Meeting.
JAS. WESTLAND, Manager.

NORTHAMPTONSHIRE UNION BANK.

THE annual general meeting of the shareholders in this bank was held at the George hotel, Northampton, on Thursday, the 7th instant, George Buxton, Esq., in the chair.

The directors, in their report, regretted that, in common with other banks connected with the leather trade, they had during the past year sustained considerable losses, but they were happy to inform the shareholders that, from the fund provided for bad and doubtful debts, they had been enabled to write off all ascertained losses without having had recourse to the guarantee fund. The profits for the past year amounted to 28,217*l* 18s 5d, and were appropriated as follows :—Two dividends of 8s each per share, 21,200*l*; bonus of 4s per share, 5,300*l*; income-tax, 1,177*l* 19s 2d; surplus carried to next year's account, 539*l* 19s 3d; total, 28,217*l* 18s 5d. The guarantee fund was the same as at the last report, viz., 50,000*l* consols and the bank premises.

OTTOMAN BANK.

THE directors beg to submit to the shareholders the accounts of the bank for the half-year ending the 31st December, 1860. After making the necessary deductions for expenses of management, and provision for bad and doubtful debts, these accounts show a net profit for the half-year of 21,842*l*. The amount brought forward from the 30th of June last is 10,154*l*. From this has to be deducted a sum of 250*l* subsequently subscribed to the Syrian Relief Fund, leaving 9,904*l*, which, added to the foregoing profit, makes a total of 31,746*l* disposable on the present occasion. The directors recommend that the usual dividend shall be paid at the rate of 8 per cent. per annum, free of income tax; and that an addition of 5,000*l* be made to the reserve fund (raising it to 68,196*l*), leaving 5,836*l* to be carried forward to the next account. In the conduct of the business at the various branches of the bank during the past half-year the directors have especially enjoined their managers to restrict their operations to the utmost; and they are gratified to be enabled to state that the losses by the troubles in Syria have proved much less than they could have anticipated. A sudden calamity at Galatz, caused by the overflow of the Danube and the lake Bratisch, has induced the directors a second time to take the initiative in a matter which properly belongs to the shareholders, and to make a donation on their behalf of 250*l*, in aid of the fund for relieving the victims of the catastrophe.

LIABILITIES AND ASSETS OF THE OTTOMAN BANK, December 31, 1860.

PARES'S LEICESTERSHIRE BANKING COMPANY.

AT the twenty-fifth general annual meeting of proprietors, held at the Bell hotel, Leicester, on Wednesday, the 6th February, 1861, Sir Frederick William Heygate, Bart., M.P., in the chair, the directors presented the following report :—

The return of the annual meeting affords the directors the opportunity of congratulating the proprietors on the satisfactory nature of the year's proceedings, notwithstanding that in many respects the trade of the town and district has been injuriously affected by the peculiarity of the season. The profits of the bank, after deducting expenses and losses, and paying for the alterations and enlargement of the bank premises, amount to the sum of 24,796*l* 4s 4d, ample allowance being made for doubtful debts: this, with the balance left from the previous year, makes 26,857*l* 16s 8d to be now disposed of. The proprietors have already received a dividend of twelve shillings and sixpence per share for the half-year ending 30th June last, and the directors now propose a similar dividend of twelve shillings and sixpence and a bonus of five shillings per share; that 1,000*l* be carried to the income tax account, a sum of 4,000*l* to the reserved fund, and the balance, 1,607*l* 16s 8d, to the credit of profit and loss for 1861, as under :—

	£	s	d
Balance from profit and loss, 1859	2,061	12	4
Profit of the year	24,796	4	4
	26,857	16	8

		£	s	d
To dividend already paid	£8,437	10	0	
To dividend and bonus now recommended	11,812	10	0	
To income tax account	1,000	0	0	
To reserve fund	4,000	0	0	
To profit and loss for 1861	1,607	16	8	
		26,857	16	8

The paid-up capital of the bank is 168,750*l* in 13,500 shares of

12*l* 10s each. The reserved fund, with the foregoing addition, will amount to 44,000*l*. The shareholders have been already informed of the extra vacancy in the direction occasioned by the death of Thomas Wood, Esq., and the only gentleman since nominated is William Evans Hutchinson, Esq. The board and the shareholders at large have sustained a heavy loss by the death of their chairman, who was elected a director four years ago, on the retirement of the late Isaac Hodgson, Esq.: during that period with the utmost assiduity he fulfilled the duties of his office, and his co-directors are happy to bear this testimony to his sterling integrity and zeal for the interest of the company. The two directors who retire by rotation are John Cartwright and Charles Burt Robinson, Esqrs., and no other names being proposed for election, those gentlemen are alone eligible at this meeting. CHAS. B. ROBINSON, Chairman.

ROYAL BANK OF IRELAND.

At the annual general meeting of the shareholders, held on the 14th November, 1860, pursuant to the deed of settlement, at the bank house, Foster place, Patrick Reid, Esq., chairman of the board of directors, in the chair, the following report from the board of directors was submitted to the meeting, viz.:—

The directors have on this occasion to present their twenty-fourth annual report. The mercantile failures, which prevailed so extensively during the past year in England, have acted injuriously on some branches of commerce in this country, by which more than the average amount of loss has been sustained by this bank; but, notwithstanding this adverse influence, the result of its operations are such as, the directors think, must prove satisfactory to the shareholders. The reserve fund now amounts to 95,000*l*—an addition of 5,000*l* having been made to it. The directors regret that the contractor for erecting the new cash office of the bank, and other buildings, has not yet been able to complete his accounts. This will explain the unusually large balance of unappropriated profits exhibited in the following statement. Assuming, however, that the proximate estimate of his ultimate claims, which the contractor has furnished, may prove nearly correct; and adopting the sum of 17,000*l* as an asset on the bank's books, substantially represented by the item "bank premises," the actual unappropriated surplus, to be carried over to next year's account, after defraying all outlays, will be about 6,000*l*. With respect to the new cash office itself, the directors have been gratified by the general admission that its spacious proportions and commodious details have afforded to the public those increased facilities for business which the directors anticipated would be obtained by its erection, and which they think have quite justified the outlay upon it. On a former occasion the directors alluded to their expectation of realising from the sale of certain securities, then undisposed of, an amount of profit sufficient to cover the outlay on the projected new premises, without trenching on the ordinary profits of the bank; and they have now the satisfaction to report the entire fulfilment of that expectation, as the whole cost will certainly be within the amount brought to the credit of "profit and loss" from the source then indicated. The directors have only further to invite attention to the following figures.—Signed, by order of the board, CHARLES COPLAND, Manager.

SHEFFIELD BANKING COMPANY.

REPORT of the directors of the Sheffield Banking Company to the twenty-ninth annual meeting of the shareholders, held on Friday, January 25th, 1861:—

It is with much pleasure the directors have to state that the returns of the bank during the year 1860 have exceeded those of any former year since the opening of the establishment. The result of this increase of business has been an increase of profit, the net amount of which is 28,502*l* 1s 8d. Out of this, the directors declare a dividend at the rate of 15 per cent. The income tax will absorb 1,575*l* 12s 10d, and the remainder, 3,139*l* 8s 10d, they have carried to the surplus fund. This dividend, for which the warrants will be issued in a few days, will be payable on Friday, the first of February. The multifarious business of the past year has been conducted so carefully, that the total number of bad debts is only two, amounting together to 102*l* 3s; and one or two trifling sums, formerly written off, having been recovered, the whole loss from this source is reduced to 85*l* 19s 2d. At the close of 1859, the surplus fund, which forms now a very important part of the bank's capital, amounted to 71,497*l* 1s 8d; since that time it has been increased by premiums on shares, granted to sundry persons, amounting to 660*l*; add the balance of profit and loss as above-mentioned 3,139*l* 8s 10d; and the total, with these additions, is 75,296*l* 10s 6d; from which is to be deducted for bad debts 85*l* 19s 2d; leaving on the 31st December, 1860, 75,210*l* 11s 4d. The paid-up capital was, on December 31, 1859, 157,840*l*; it has been since increased in consequence of the allotment of shares by the sum of 740*l*; making it at present 158,580*l*; add the surplus fund 75,210*l* 11s 4d; and the working capital of the company is 233,790*l* 11s 4d. To these gratifying statements the directors have the further pleasure of adding that the management of the bank, in its various departments, both at Sheffield and at Rotherham, continues to be conducted much to their satisfaction. The call which has just been made on the shareholders for a fresh instalment of capital was determined upon, as they are already apprised, in consequence of a considerable increase in the business of the bank. The directors take the present opportunity of saying further, that even if the business should not continue to advance in amount, or even fall off owing to the unfavourable state of commercial affairs, this accession to the capital of the company will operate most advantageously on the efficiency of their establishment.

J. H. BARBER, Manager.

SHEFFIELD AND HALLAMSHIRE BANK.

REPORT of the directors of the Sheffield and Hallamshire Bank to the twenty-fourth general annual meeting of the shareholders, held on Monday, the 23rd July, 1860:—

In submitting their report of the result of the bank's operations of the last year, the directors have the satisfaction to state that the business done was larger than that of the preceding year. During six months ending 31st December last, the value of money was unusually low. This more than counterbalanced the advantage arising from the increased business, and the effect has been diminished gain, as compared with that of the previous year. After payment of all expenses of the bank and the income tax, the net profit is 18,973*l* 1s. The amount of bad and doubtful debts is 331*l* 5s 2d. The small amount of bad debts is again the subject of congratulation, especially when the magnitude and variety of the bank's transactions are borne in mind. The directors have the pleasure to announce that the sum of 212*l* 3s 5d has been received from debts previously written off as bad. For the half-year ending 31st December last, the directors paid a dividend after the rate of ten per cent. per annum. They have declared a dividend after the same rate for the half-year ending 30th June last. This may be received on, or after, the 27th inst. Ten shares have been issued on the same terms as those last issued to the bank's customers. These have increased the capital by the sum of 250*l*; and the amount, 50*l*, received for premium on these shares, has been passed to surplus fund. In the spring of 1859, the paid-up capital of the bank was increased by the sum of 12,375*l*. The paid-up capital of the bank now is 178,350*l*. The amount required to pay the dividends for the year ending 30th June last, is more by the sum of 981*l* 5s than that required for 1859. The balance of profit remaining after payment of the dividends and the deduction for bad debts is 806*l* 15s 10d. This sum has been carried to the surplus fund, and with the 50*l* premium on shares referred to above, raises the fund to 43,396*l* 10s 2d. John Carr, of Eyre street, retires by rotation from the board. The directors nominate F. R. Appleby, of Renishaw, as incoming director. The shareholders, no doubt, have heard of the serious defalcations at the Union Bank of London. In consequence of these, your directors have felt it to be their duty to give double care in their late audit; and they have also instituted certain new rules tending to minimise the risk of fraud. They desire, however, to state that these new rules spring from no doubts of the integrity of any one connected with the bank, and that the high opinion they have ever entertained of their manager, and of the other officers of the bank, remains unimpaired. After such an exhibition as the "Pullinger frauds," your directors thought that their duty was self-evident, viz.:—to deal with the whole subjects of checks and safeguards fully and effectually, and in the clear sense of what they owe to the shareholders of the Sheffield and Hallamshire Bank. The continued success of the bank may reasonably be expected by the shareholders. The bank possesses a large capital, a numerous and strong proprietary, and an established sound business.

WM. WATERFALL, Manager.

SHEFFIELD AND ROTHERHAM BANK.

REPORT of the directors to the annual general meeting of proprietors, held at the bank, in Sheffield, February 6th, 1861:—

The directors have again the pleasure of meeting the shareholders, and of reporting to them the results of the past year's transactions. The profit and loss account shows a net gain of 27,008*l* 8d, after payment of all the usual expenses of management and the income tax. Out of this sum your directors have written off for losses 2,544*l* 13s 6d, and they now declare a dividend of twelve and a half per cent. on the company's paid-up capital. The balance remaining of 4,406*l* 19s 8d has been passed to the credit of the reserved fund. For many years the bank has held a number of shares in the company's stock, a portion of which your directors have recently sold, and the profit thereon, amounting to 1,012*l* 10s, has also been credited to the reserved fund. This fund, after these additions, and after payment of 700*l* to the directors, in accordance with a resolution of the last annual meeting, amounts to 63,472*l* 0s 9d. It is with much regret that your directors have to report that one of the clerks of the bank, of whose honesty and integrity not the slightest doubts were entertained, has succeeded in appropriating to his own private purposes a considerable sum of money from the funds of the bank, but a security is held from the Guarantee Society, and a claim has been made upon them for the amount. The dividend now declared, will be payable at the banks of the company on and after the 13th instant. Mr John Sorby and Mr Thomas Jessop are the retiring directors, and they offer themselves for re-election. It is with great regret that the directors have to announce that, in consequence of continued ill health, Mr Brown has expressed a wish to be relieved from the onerous duties that have hitherto devolved upon him as manager. The directors desire to express their very high sense of the services rendered by Mr Brown to the bank during a period of upwards of 27 years, and of the uniform good feeling that has existed between the directors and himself. Mr Brown will shortly retire from the management of the bank, and the directors have appointed Mr William Wild, now the sub-manager of the Sheffield Banking Company, as his successor.

GEORGE HOUNSFIELD, Chairman.

BALANCE SHEET, 31st December, 1860.

SHROPSHIRE BANKING COMPANY.

THE twenty-fourth annual report of the Shropshire Banking Company, 17th July, 1860:—

The directors of the Shropshire Banking Company have much pleasure in meeting the proprietors and presenting their usual annual report. The accounts, which have been duly audited by the auditor, Mr Banks, show the net profits for the year to be 4,600*l* 7s 3d, to which has to be added 174*l* 15s 5d, the balance brought forward from last year's statement, making a total of 4,775*l* 2s 8d. The directors recommend a dividend of four shillings per share, which will absorb 3,000*l*; and to place 1,646*l* to the guarantee fund, which will then amount to 3,500*l*; and to carry to next year's account 129*l* 2s 8d. Should this recommendation be adopted, the account will stand as follows:—

	£	s	d
Net profits for the year	4,600	7	3
Balance from last year	174	15	5
	4,775	2	8

	£	s	d
Dividend 4s per share	3,000	0	0
To be carried to guarantee fund	1,646	0	0
Balance to next year's account	129	2	8
	4,775	2	8

The guarantee fund will then stand as under:—

	£	s	d
Amount from last year's statement invested in 3 per cent. Consols	1,800	0	0
Interest at 3 per cent.	54	0	0
	1,854	0	0
To be added from this year's profits	1,646	0	0
	3,500	0	0

The directors have invested the amount of the guarantee fund standing in the company's books at last year's statement in the 3 per cent. consols. The directors regret to announce that the failing health of Mr Fisher, for many years a much-respected member of their board, has necessitated his retirement, creating a vacancy to be filled up at the present meeting. Mr Thomas Taylor, of Burleigh villa, has expressed his willingness to accept the appointment if it meet the wishes of the proprietors. Names of the present directors:—John Williams; Henry Dickinson (chairman); Francis William Yates; William Wyley; Thomas Wood (deputy chairman); William Cope. Of these, the first two retire by rotation, but are eligible for re-election.

HENRY DICKINSON, Chairman.

ULSTER BANKING COMPANY.

AT the twenty-fourth annual meeting of the proprietors, held at the bank, Belfast, on Thursday, the 27th of September, 1860, Robert Grimshaw, Esq., in the chair, the following report of the committee was presented:—

Your committee have to submit to the proprietors the annual statement of the affairs of the bank for the period ending 31st August last:—

	£	s	d
Reserved fund, as declared in September, 1859			67,643 19 0
Net profits of the year, after writing off all bad, and making full provision for doubtful debts	£22,329 17 1		
Out of which there have been *paid* two half-yearly dividends, free of income tax, viz.:—At March, at the rate of 9 per cent. per annum	£8,253 4 6		
At September, at the rate of 10 per cent.	9,170 5 0		
	17,423 9 6		
Leaving a surplus of	4,906 7 7		
To be appropriated as follows:—To credit of building fund	1,000 0 0		
And the residue			3,906 7 7
To be carried to the reserved fund, which now stands at			71,550 6 7

Though the rate of interest has been moderate, the profits of the bank have been larger than in the previous year, and your committee, on the recommendation of the directors, have been enabled to raise the dividend to 10 per cent. per annum for the last half-year, and to make a further addition to the reserved fund. Your committee have to report that the directors have been induced to extend the operations of the bank, by establishing branches at Strabane, Ardee, and Sligo, and arrangements for opening in these towns are now in progress. The new bank house in Belfast is almost ready for occupation, and it is expected that in a few days the business will be transferred to it. In pursuance of a resolution passed some time ago, and in conformity with the deed of co-partnership, your committee, with the concurrence of the directors, have to recommend the appointment of an assistant director, at a salary of 500*l* per annum, and accordingly now nominate their present chairman, W. J. C. Allen, Esq., of Faunoran, who is unconnected with business, as a fit and proper person for the office. Your committee and directors have to thank the shareholders for the interest they have taken in the bank, and they hope for a continuance of their valuable co-operation in still further extending the business and connections of the company.

W. J. C. ALLEN, Chairman.

UNION BANK OF AUSTRALIA.

SUPPLEMENTARY REPORT of the directors of the Union Bank of Australia, presented at the special general meeting of the proprietors, held on the 14th Jannary, 1861:—

Since the last annual meeting of proprietors some failures have been reported from Sydney and Launceston by which the bank will suffer loss; for this, and to meet further considerable depreciation in securities held against old dependencies, the directors have had to make provision out of the profits of the half-year now reported on. Of the general character of the current business the directors can speak with very great satisfaction. The inspector and general manager has firmly and prudently carried out the restrictive policy which the directors have announced at former meetings, and which has been approved of by the proprietors. Some minor branches and agencies at the gold fields have been closed, and arrangements are in progress for closing and reducing others. The establishments in New Zealand have, on the other hand, required increase, to meet the natural growth and commerce of that important colony. The warlike disturbances in its northern island, now we may hope terminated, have interrupted to some extent the business of our branches there, but have been unattended by failures or loss to the bank. The sum paid by this bank in the colonies, during the half-year ending 30th June last, as interest on deposit and current accounts, was very large; since that date the banks in Victoria and South Australia have agreed on certain modifications, which, if firmly adhered to, will no doubt be found, accompanied as they have been by a reduction in the rates of discount, beneficial to the banking and general commercial interests of those communities. The directors regard with great interest the recent discoveries of fertile lands in the interior and northern portions of Australia. It would be impossible to estimate the importance of opening up internal trade, or the establishment of northern ports in that great and hitherto almost unknown continent. The subjoined statement of accounts presents an amount of profit during the past half-year of 59,307*l* 2s 8d, which, with the previous undivided balance, 3,540*l* 2s 4d, leaves 62,847*l* 5s available for division. The directors have therefore determined to apply the sum of 60,000*l* as a dividend of 6*l* (six) per cent. for the half-year on the capital of the bank, payable in London, free of income tax, on the 29th instant; and in the colonies, with the addition of income tax, as soon as the inspector and general manager shall fix after the receipt of advices.

UNION BANK OF AUSTRALIA,

STATEMENT OF LIABILITIES AND ASSETS, at the Branches, on the 30th of June, 1860, and at the London Office, on the 31st December, 1860.

UNION BANK OF LONDON

The half-yearly meeting of proprietors was held at the bank premises in Princes street, on the 16th January: Mr P. Northall Laurie in the chair.

The Secretary (Mr H. Newmarch) read the report, and the balance sheet as follows :—

The directors have the pleasure of reporting that the net profits of the bank for the six months ending December 31st last, being the first half of this bank's financial year, after payment of all charges, and including the sum of 69,855*l* 9s for interest paid and due to customers on their current and deposit accounts, and making ample provisions for all bad and doubtful debts, amount to 63,063*l* 19s, 8d, which, with the sum of 3,406*l* 18s 4d brought forward from the 30th June last, leaves for appropriation 66,470*l* 18s. The directors uow declare a dividend of 12s per share, clear of income tax, for six months ending December 31st last, amounting to the sum of 36,000*l*, which will leave a balance of 30,470*l* 18s of undivided profit to be carried forward. The directors deeply regret that W. Scott Binny, Esq., has been obliged, by impaired health, to resign his seat in the direction ; and in accordance with the provisions of the deed of settlement, they have elected John Gilchrist, Esq., a duly qualified proprietor, to supply the vacancy.

General Balance.

Liabilities.	£	s	d
Paid-up capital of the bank	720,000	0	0
Deduct amount debited to capital account, per resolution of general meeting, July 11th, 1860	120,000	0	0
	600,000	0	0
Due by the bank on current accounts, deposit receipts (including interest accrued), and other obligations	10,352,703	1	4

Balance, being undivided profit carried forward to next half-year	30,470	18	0
	66,470	18	0

	£	s	d
Profit unappropriated on June 30th, 1860	3,406	18	4
Amount of net profit of the half-year ending December 31st, 1860, after deducting all expenses, and interest paid or due (69,855*l* 9s), allowed to customers on their current and deposit accounts	63,063	19	8
	66,470	18	0

The Chairman said that by the authority of the directors he had to declare a dividend on the half-year of 12s per share, clear of income tax, and payable on and after the 21st instant. As this was the first half of the financial year the report was brief, and the observations he should make upon it would be brief also. The directors certainly viewed the report, as he hoped the proprietors did, with unmixed satisfaction. (Hear. hear.) The increase of business during the six months, both at the head office and at all branches, was of a most satisfactory description, and he never presented accounts with greater confidence in the severity with which all the expenses were dealt with, and that the net hard balance put before them had been fully and fairly earned. The balance for the whole year of 1860 was 127,000*l*, which was a satisfactory proof of the confidence of the public in the bank, and that was also shown by the amount of their liabilities and assets. They now exceeded 11,000,000*l*, which was the largest amount ever shown by the bank except in the first half-year of 1857, which was a period of unusual commercial development. It must also be satisfactory that after payment of the dividend they were able to carry forward over 30,000*l*, which was a good security for the next dividend. But they hoped to be even more successful in the next half-year than they were in this, and if that were so, half of the amount which was debited to capital account by the resolution of last year would be written off. No doubt great caution would be required, as they were living in exceptional times, both with regard to the state of foreign politics and the uncertain condition of the money market. They believed that easy times were best for those who dealt in money, and that they found their best markets when their customers were prosperous. The directors had no communication to make with regard to any further amount recovered on account of the Pullinger frauds, but they were not without hope that more would be recovered. As the matter was in a state of uncertainty, however, it was not desirable to go further into details. The proprietors were aware that certain Chancery proceedings were taken against them by a shareholder, and that an injunction was asked for to restrain them from making the dividend which the proprietors received. But that injunction having been dissolved, a communication took place between the solicitors on both sides, and the matter was arranged. An intimation was given that it was not the desire of the shareholder in question to harass his brother proprietors, and they on their side agreed to the payment of costs. Although they had no doubt as to the result of the legal proceedings, they, on the advice of their solicitor, thought it better to put an end to the matter in this way than to remain in Chancery. (Hear, hear.) He might say that they had entirely escaped from contracting any bad debts during the last six months. (Hear, hear.) This was a gratifying circumstance, and this was due to the care and caution of the manager and of his brother directors. (Hear, hear.) It only remained for him further to say that they had to regret the retirement of Mr Scott Binny from the board, and the cause of that retirement. (Hear, hear.) Mr Binny was with them for ten years, and he brought to their aid great colonial experience. He was therefore a great loss ; but they did what they could to repair it by the election of Mr Gilchrist, who also possessed great colonial experience and influence. He was happy to say that Sir Peter Laurie was well, but he did not think it advisable at his advanced age to come out in such weather. (Hear, hear.) He had now to move that the report be agreed to.

Mr Farquhar seconded the motion.

Mr Hislop said it struck him from the prosperity of their affairs, as disclosed by the report, that 600,000*l* capital was sufficient to work the concern in a most profitable manner. It seemed to him that they should as soon as possible proceed to create a reserve fund, and with that view he was disposed to move that 25,000*l* out of the 30,000*l* carried forwards should be at once applied to create such a fund.

Mr Fitzgerald did not agree in the view expressed by Mr Hislop, that 600,000*l* was enough to work the concern. He therefore thought the directors were right in applying the 30,000*l* to the working of the concern.

The Chairman said this sum was carried forward as a balance to the next half-year. At the July meeting it would be the duty of the directors to submit a proposial for the appropriation of the money, and it would be for the proprietors to deal with it as they thought fit. (Hear.) No proprietor could be more anxious than himself for the accumulation of such a reserve fund as would be becoming and creditable to the bank, and he wished to remark that it was to the accumulation of such a reserve fund that they were indebted for the comparative immunity which they experienced under the recent trial they passed through. It was, therefore, a matter of primary importance to them.

Mr Hislop said that under these circumstances he would not press his motion.

The report was then agreed to, and a dividend of 12s per share (equivalent to 10 per cent. on 720,000*l*) declared.

The Chairman, in reply to a question, said that the premises in Chancery lane were advantageously let, and that Dixon's was now amalgamated with the Union Bank.

On the motion of Mr Anderton, seconded by Mr Maxwell, a vote of thanks was passed on the directors, which was acknowledged by the Chairman.

A similar compliment was paid to Mr Scrimgeour, the general manager, and the other managers and officers of the bank.

Mr Scrimgeour said he had often stood there upon similar occasions, and never felt anything but hearty gratification till the last meeting. The kind expression of the proprietors' thanks was therefore the more grateful to him now. (Hear, hear) In the last six months he believed they had gone through the labour of six years, but he and the other officers of the company had the satisfaction of witnessing the reward of their untiring diligence in the prosperous state of the affairs of the bank, and the same diligence would be shown till they stood in the same position as they did this time last year. (Cheers.)

The meeting then separated.

UNITY JOINT STOCK MUTUAL BANKING ASSOCIATION.

The directors submit to the shareholders the balance sheet of the bank for the half-year ending the 31st ult., by which it will be seen that the

losses, as shown in previous balance sheets, have now been written off the capital account, and that, after payment of the current expences, interest to customers, and making provision for bad debts, there remains (including the balance of profit of the previous half-year) an available surplus of 4,213*l* 11s 5d. Out of this amount the directors propose to pay a dividend of ten shillings per share, and carry over to the next half-year a balance of 2,753*l* 14s 5d. In December last a branch of the bank was opened in Lambeth, which it is believed will meet the requirements of a large trading district, up to that time without banking accommodation. The directors think it their duty to state that the business of the bank would show a far more successful result if its many wealthy and influential shareholders were to give it a larger share of support than they have hitherto done. J. J. MECHI, Chairman.

BALANCE SHEET, Monday, 31st December, 1860.

Unity Buildings, Jan. 17, 1861.

The dividend will be payable on and after the 5th February.

At the half-yearly meeting of the shareholders of the Unity Joint Stock Bank, held at the London Tavern, Bishopsgate-street, on Friday, the 25th January, 1861, at twelve o'clock, Mr Alderman Mechi in the chair, the Secretary having read the motion convening the meeting, with the report and balance sheet, the Chairman moved the adoption of the report. An amendment was proposed by Mr Cuthbert, and seconded by Mr Wynne—"That the payment of a dividend be postponed for six months." This was, after considerable discussion, negatived, and the report adopted unanimously. Mr Westacott proposed Mr Proctor seconded, and it was resolved, with two dissentients—"That a sum of 500*l* be voted to the directors, managers, and auditors.

(Signed) J. J. MECHI, Chairman.

Extracted from the minutes, THOMAS BURCH, Secretary.

WEST OF ENGLAND AND SOUTH WALES DISTRICT BANK.

AT the twenty-sixth annual general meeting of the proprietors of the West of England and South Wales District Bank, held at the company's banking house, Bristol, on Friday, January 18, 1861, Harman Visger, Esq., in the chair, the following report was read:—

The business of the bank continues to increase, and your directors are enabled to lay before you a satisfactory statement of the profits of the past year.

A dividend has been paid for the half-year ended the 30th June last, at the rate of eight per cent. per annum, free of income tax, and your directors now declare a dividend at the same rate for the half-year ended the 31st December, and by way of further dividend, out of the profits, a bonus of 5s per share, free of income tax, leaving a balance of 2,189*l* 1s to be carried to the credit of the reserved fund. The statement of account is as follows:—

WHITEHAVEN JOINT STOCK BANKING COMPANY.

THE shareholders of this company held their thirty-first annual general meeting at the bank, in Queen street, on Monday, Aug. 6, 1860. Henry Jefferson, Esq., of Springfield, was in the chair. Mr Cameron, the manager, read the report of the directors, which declared a dividend on the paid-up capital of the bank of 15 per cent., and a bonus of ten shillings per share, being together equal to 18½ per cent., the bank also paying the income tax, and leaving a balance of 1,107*l* 3s 9d to be carried forward to next year's account. The surplus fund remains as formerly, at 15,000*l*. Thomas Fox, Esq., of Whitehaven, was the retiring director, by rotation; and Richard Barker, Esq., of Woodbank, was elected his successor. The Chairman moved the adoption of the report, which was duly seconded and carried unanimously. The thanks of the meeting were cordially and unanimously voted to the directors and manager for their valuable and successful services during the past year. The dividend will be payable on the 20th August current.

YORK CITY AND COUNTY BANK.

REPORT of the directors to the proprietors, at their annual general meeting, held on the 31st day of January, 1861:—

The directors have the pleasure to state, in this their thirty-first annual report, that, after making provision for all bad and doubtful debts; allowing 1,500*l* in reduction of the York banking premises and the two houses adjoining, and crediting the reserved surplus fund with interest at four per cent. amounting to 1,157*l* 16s 2d, there remains a profit on the year 1860 of 19,049*l* 16s 5d; out of which the directors recommend a dividend of eight per cent. (8,000*l*), and a bonus of five per cent., or 1*l* per share (5,000*l*), both sums free from income tax; and that the balance, 6,049*l* 16s 5d, be carried to the reserved surplus fund, which will then amount to 36,152*l* 17s 9d.

JAMES MEEK, Chairman.

WINE TRADE—TO BE DISPOSED of, an Old-established Wine Merchant's Business in a Midland county, embracing connections in ten of the surrounding counties. The business is good and capable of much extension, and, being of undoubted respectability, offers an excellent opening to any person with capital desirous of entering the Wholesale Wine Trade. Every information may be obtained by applying in the first instance, by letter only, to A. W., care of Messrs Nissen and Parker, 43 Mark lane, E.C.

EDUCATION IN GERMANY.—There are a few vacancies for Young Gentlemen in a Celebrated Professional and Commercial Institution at Frankfort-on-the-Maine. The highest references. Terms moderate.—For particulars apply to Mr Geo. L. Wingate, Jun., 9 Copthall court, E.C.

PRACTICAL GEOLOGY.—King's College, London.—Professor TENNANT, F.G.S., will give a COURSE of LECTURES on GEOLOGY, having especial reference to the application of the Science to ENGINEERING, MINING, ARCHITECTURE, and AGRICULTURE. The Lectures will commence on Friday morning, April 12th, at 9 o'clock. They will be continued on each succeeding Wednesday and Friday, at the same hour. Fee, £1 11s 6d
R. W. JELF, D.D., Principal.

EVENING LECTURES ON GEOLOGY, at the Government School of Mines, Jermyn street.—Mr WARINGTON W. SMYTH, M.A., F.R.S., will commence a Course of TEN LECTURES on GEOLOGY, on Monday, 15th April, at Eight o'clock; to be continued on each succeeding Thursday and Monday evening, at the same hour. Tickets for the whole course, price £1, may be had at the Museum of Practical Geology,

PROFESSOR TYNDALL, F.R.S., will commence a course of THIRTY-SIX LECTURES on PHYSICS, at the Government School of Mines, Jermyn street, on Monday, 15th April, at 2 p.m.; to be continued on each succeeding Tuesday, Wednesday, Thursday, and Monday, at the same hour. Fee for the course, Thirty Shillings.
TRENHAM REEKS, Registrar.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

THE ECONOMIST.—FOR SALE, A SET from commencement, in 1843, to the present date, in good condition, complete, except the year 1846. —WANTED to purchase, the year 1846.—Address, H.E., care of Mr Nye, News Agent, 78 Theobald's road, W.C.

TO TEA BROKERS, MERCHANTS, &c.—A Gentleman of considerable experience is desirous of an engagement as Cashier, or Ledger keeper, in the City. First-class references.—Address A. B., 167 Aldersgate street, E.C.

WANTED, BY AN ACTIVE, intelligent Young Man, a situation as Clerk or Messenger; latterly been employed in House and Estate Agents' Offices. Good references from former employers. —Beta, 83 Bolsover street, Regent's park, N.W.

WANTED, IN AN EAST INDIA and General Merchant's office, an experienced Bookkeeper, competent to conduct the whole duties of his department.—Address, with full particulars, O. C., care of Messrs Skipper and East, St Dunstan's hill, E.C.

WANTED, in Liverpool, the Agency of a wealthy London house in the trade to and from China. The Advertiser has some Capital, and mercantile experience acquired in other foreign business.—Apply by letter to L. T. C., Post Office, Liverpool.

THE ADVERTISER WHO HAS just returned from abroad, where he has been representing a Commercial establishment in England, is open to a similar appointment, or to one of Cashier, Bookkeeper, or General Manager at home. He is 28 years of age, has had very great experience, and has testimonials with reference of the highest class.—Address T., 9 Cresswell street, Liverpool.

BRANCH BANK MANAGER.—An Incorporated Joint Stock Bank seek the services of a gentleman competent to take charge of a branch which they are about to establish at Port Elizabeth. It is essential that he should possess a thorough knowledge of exchange operations, and of general mercantile business, in addition to the ordinary routine of a banking house. Salary will commence at £500 per annum, with residence.—Address Manager, care of Messrs Baily Brothers, 3 Royal Exchange buildings.

PARTNERSHIP.—Wanted, a Partner to join the advertiser in an old-established Sugar Refinery in London. The partner must be a gentleman of business habits and able to undertake the counting house department, and must be able to introduce a capital of from £15,000 to £20,000. Most unexceptional references will be given.—Apply by letter to X. Y., care of Messrs Marten, Thomas, and Holland, Solicitors, Mincing lane, London.

ACCOUNTANT OR CONFIDENTIAL CLERK.—Wanted, a situation in either of these capacities, by a gentleman of 43 years of age, who has had considerable experience in the East India and Australian Trade. He is thoroughly conversant with the courses of exchange and everything connected with accounts and bookkeeping, and is also a good correspondent.

References unexceptionable in every sense. Any communications addressed to Mr William Graham, of the firm of Rose, Graham, and Wilson, 31 Threadneedle street, E.C., will be duly answered.

MERCANTILE SHIPPING AGENCY. Established upwards of 80 years.

The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.

W. J. HALL and CO., Sworn Brokers,
(Successors of Holmes, Hall, and Sons,)
Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, E.C., London.

THE "TIMES" £1 1s PER Quarter free by post, by the Mail of the evening of the day of publication. References as to regularity of supply to Clergymen and Gentlemen in all parts of England. Magazines, Periodicals, and all London Newspapers supplied to order by W. ABBOTT, Newspaper and Advertisement Agent, 7 Little Tower street, London, E.C

Alexander Matheson, Esq., M.P.
Mr Alderman and Sheriff Abbiss.
Mr Sheriff Lusk.
S. P. Low, Esq. (Grindlay and Co.)

With power to add to their number.

The attention of the Public is earnestly requested to the following facts:—

"The Committee have the pleasure to announce that they have already remitted £36,000 to India for distribution through the local authorities of the districts most urgently requiring relief. An impression is said to prevail that the distress is only temporary; the Committee, however, feel it their duty to inform the public that no permanent relief can be locally obtained until the autumnal rains; and it is, therefore, essential that, until direct intelligence to the contrary has been received from India, no relaxation should take place in the present movement.

Meantime, it is incumbent to state, that at a meeting of the Committee, held on the 12th inst., Sir John Lawrence, Sir Charles Trevelyan, Lord Harris, and many other important Indian authorities, bore testimony to the fact that the population of the districts afflicted is at least ten millions, whilst two millions are literally starving, and have nothing but the hand of charity between them and death. A Native gentleman, of high position, residing in the centre of India, writes thus to Sir Charles Trevelyan:—

"The distress in the N. W. Provinces, caused by the prevailing famine, is indescribable, and is daily on the increase. Where a man could live on a rupee and a half, he now wants ten to keep him alive. The usual price for grain in good seasons was a rupee for a maund and a half, or 120 pounds. It is now selling not more than 8 or 9 seers, or 16 or 18 pounds, for a rupee. How can large families provide themselves with means to live upon? Heaven alone knows what may be the result but the prospect is very gloomy and deplorable. Before, October next no effectual relief seems possible; but, till then very few cattle or poor men will remain alive Great crime and mortality are expected.

"Oujein, 7th March, 1861."

A statement of the facts will be forwarded upon application to the Honorary Secretaries.

Subscriptions may be remitted direct to the Mansion House, or through any banker in the United Kingdom, to the credit of the Indian Famine Relief Fund with the Bank of England.

The Committee gratefully acknowledge the receipt of several church and chapel collections, and trust all clergymen and nonconformist ministers will aid the movement by preaching sermons in behalf of the fund: and thus demonstrate to our Indian fellow-subjects that difference in creed does not prevent the flow of Christian charity.

The next mail will leave for Bombay on the 18th inst., when all sums received to that date will be remitted.

The General Committee will meet at the Mansion House on the first Friday in every month.

The Sub-Committee meets every Marseilles mail day (the 3d, 10th, 18th, and 25th of each month), at the Mansion House, at 3 o'clock.

The efforts of the Committee have received the Royal Sanction. The Nobility, Merchants, and Public generally, have responded nobly to the appeal which has been made; but so gigantic is the crisis, that continued and united efforts must be made, or thousands of our fellow-creatures must miserably perish under the most deplorable and heart-rending circumstances.

CONTRACT FOR CANVAS.

Department of the Storekeeper General of the Navy, Somerset place, April 4, 1861.

The Commissioners for executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland do hereby give notice, that on Tuesday, the 23rd instant, at Two o'clock, they will be ready to treat with such persons as may be willing to contract for supplying and delivering into Her Majesty's Dockyards at Deptford, Portsmouth, and Devonport, 23,450 ROLTS of CANVAS (including 1,220 Bolts of 18 inches wide), to be delivered by the 31st December next. Tenders may be made for any quantity not less than 1,000 Bolts, and no tender will be received unless made on the printed form properly filled up, which, together with "Instructions for making the Canvas," may be obtained on application to this office.

No tender will be received after Two o'clock on the day of treaty, nor will any be noticed unless the party attends, or an agent for him duly authorised in writing.

Every tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words "Tender for Canvas," and must also be delivered at Somerset place, accompanied by a letter signed by two responsible persons, engaging to become bound with the person tendering, in the sum of £25 per cent. on the value, for the due performance of the contract.

ACCIDENTS OF ALL KINDS,

and from Any Cause, may be provided against by an Annual payment of £3 to the RAILWAY PASSENGERS ASSURANCE COMPANY, which secures £1,000 at death by Accident, or £6 weekly for Injury.

No Extra Premium for Volunteers.

One Person in every Twelve insured is injured yearly by Accident.

£75,000 has been already paid as Compensation.

For further information apply to the Provincial Agents, the Railway Stations, or at the Head-office, 64 Cornhill (late 3 Old Broad-street).

Annual Income, £40,000.
Capital, One Million.

W. J. VIAN, Secretary.

64 Cornhill, E.C., January, 1860.

	304,161 13 7		
Accumulated fund, invested in Government securities, in land, mortgages, &c.	1,805,982	13	6

Average amount of new assurances annually for the last 14 years, Half a Million sterling, being the largest amount of business transacted in that period by any Insurance Company.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

NOTE.—An Adjourned Meeting will be held early in May, to receive the Report on the Division of Profits for the past Quinquennial period.

INDIA OFFICE, 4th April, 1861.

THE SECRETARY OF STATE FOR INDIA in COUNCIL

hereby gives Notice that he has received from the Government of Bengal the undermentioned schedules, viz.:—

A. Schedule of all Administrations whereof the final balances have been paid to the parties entitled to receive, specifying the amount of such balances, and the persons to whom paid, during the six months ending on 30th June, 1860.

B. Schedule of all sums of money, bonds, and other securities received by the Administrator-General, on account of current and unadjusted estates, not being Hindoo or Mahomedan, remaining under his charge, together with the payments made thereout and the balances in hand.

C. Schedule of all sums of money, bonds, and other securities received by the Administrator-General, on account of adjusted estates, not being Hindoo or Mahomedan, remaining under his charge, together with the payments made thereout and the balances in hand.

D. Schedule of all sums of money, bonds, and other securities received by the Administrator-General, on account of Hindoo and Mahomedan estates remaining under his charge, together with the payments made thereout and the balances in hand.

E. Schedule of balances in the hands of the Administrator-General, set apart to meet the admitted claims of creditors against the estates therein mentioned.

F. Schedule of unclaimed balances of estates under 500 rupees, deposited with the Sub-Treasurer, Fort William, under the Financial Secretary's Letter of the 8th Oct., 1852, interest being allowed thereon by Government.

And that the said schedules are open to the inspection of the public in the Department of the Official Agent to the Administrators-General at this Office.

THE DELICACY OF THE MONEY MARKET.

THE recent phenomena of Lombard street justify an observation which we have very frequently made, that the money market is a delicate one. An apparently small abstraction of capital immediately produces a great rise in the rate of interest; an apparently small surplus produces a rapid fall; and observers, who do not as a matter of business watch the real transactions of the day, are puzzled to account for either. But among those familiar with the accurate facts, there is no matter for wonder in either case.

Every sixpence in Lombard street, as a general rule, is used somehow. If there be a "little over," every one is eager to use that "little over." From natural motives this is more emphatically true of those who pay interest on their deposits, but it is not confined to them. On the contrary, no banker, no holder of money, likes to see it unemployed. He instinctively looks out for some mode of using it safely. If, then, safe modes happen not to be very plentiful, money will go down; it will legitimately depreciate in value, because the effectual demand, the actual amount of suitable investments, is less than the actual supply of money in the market of the moment.

Rapid changes in a market are only the natural consequences of its delicacy. We *call* it a delicate market, because it is liable to such changes. In the present instance, the value of money has fallen rapidly, not so much from any unprecedented supply of the precious metals, as from the want of employment of capital in trade. From several circumstances the disposition of men of business has of late been to contract their operations very largely; and this disposition tends, when it exists, to operate, if we may use the expression, on both sides of the money market account. It augments the *credit*, and it lessens the *debit*. In other words, if men of business contract their operations, there is more money in the market; they have some money of their own, and that money tends to be unemployed; on the other hand, their diminution of activity diminishes the amount of bills in the market, and lessens, consequently, the demand for money. If this contraction of operations should continue for any time, it has become certain, by abundant experience, that a diminution in the value of money is the inevitable result.

This phenomenon is the exact opposite of that which only a few weeks since it was our duty to explain and justify. Then we had to observe that abstractions of bullion from this market, which, though considerable in themselves, might not seem so to uninstructed persons in comparison with the store that remained, were, nevertheless, of the greatest national importance, and justified the Bank of England in the rapid elevation of the rate of interest. Now, we have to observe the reverse change. The *standstill* of operations, which is, as we have explained, a force peculiarly efficient, has operated on a delicate market, and has produced an effect singularly rapid.

So far is it, therefore, from its being true—as some not very considerate persons imagine—that the recent rapid fall in the rate of interest proves that the Bank was wrong in previously raising it, that we may even say that the present quick fall is the result of the preceding quick rise. If "things had been allowed to take their own course"—if the American drain had been suffered to proceed with no attempt to impede it—if an Indian drain, as at one time seemed likely, had been permitted to begin—if men of business had received no warning—if the Bank reserve had been, as it easily might have been, and as under other circumstances it frequently has been, reduced inconsiderately to a low point,—then we might justly have imputed error to the Bank, and expressed our censure in terms not overmeasured. But now the recent rise in the rate has, to use again our former expression, operated at the same moment on both sides of the account. It has diminished the amount of trade in the market, and it has attracted supplies of bullion from all quarters to this country: it has lessened our demands and increased our means, and this must be its justification.

THE FORTHCOMING BUDGET.

IN spite of many adverse prognostications, we venture somewhat confidently to say that there are the *materials* for a *not* unpleasant Budget. Some writers have endeavoured to frighten the public by computing the deficit for the year which has just ended. They say that in this year the difference upon the wrong side, between our income and our expenditure,—and some part of the public has not unnaturally been alarmed at the idea,—will be considerable. But, we must not overlook two facts:—first, Mr Gladstone calculated in his later estimates, after the outbreak of the Chinese war became certain, and after the deficiency of the harvest became apparent, upon such a deficit. He did not pretend to make the revenue equal to the expenditure. He proposed to reduce the balances in the Exchequer to a very important extent, and took first his power to issue 1,000,000*l* of Exchequer bonds, which power has not been exercised to the full extent. In dealing with a deficit for last year we are concerned therefore not with an unforeseen state of things, but with a state of things upon which the Chancellor of the Exchequer—the responsible calculator of last year—expressly reckoned. Secondly, we are to observe that the most material consideration is, what is the expenditure of the next year, and what will be its income. The Chinese hostilities have stopped. The bills probably are not all paid, but the operations are now at an end, and the *cause* of bills has ceased. With the finance of the coming year the expenditure of last year

has nothing to do. We may by last year's spending have reduced our balances in the Exchequer further than then we anticipated; or we may not; but, either way, our future income and our future expenditure will be precisely the same. We need not, therefore, dwell upon misfortunes which arise from temporary exigences, and are in consequence no valid reasons for future anxiety.

Mr Gladstone can point with pride to the state of the Customs revenue, notwithstanding all his alterations—he can show fair, if not stupendous, results from the French treaty—he will have an easy triumph over those rash writers who accused him of having ruined our indirect revenue, of having made a balance of national means and national expenditure henceforth impossible. On the other hand, his opponents will be able to ask how he would have stood if the Chinese war had been still in progress, and whether the funds derived from the Excise duty on paper have not been exceedingly useful to him; and, lastly, whether the "concentration of excellencies" into the Budget of 1860 did not expose the finances of the country to an unnecessary risk—to a risk which would have been obviated by a more cautious and dilatory policy. But even in answer to these opponents, the great orator—the great master of argumentative finance—will doubtless show us how much there is to be said.

How the *materials* of a good Budget will be used it is not for us to say; but we are sure that, without an oppressive addition to the burdens of the aountry, without any operation which the money market would ever hear of, it will be easy for a far less accomplished financier than Mr Gladstone to make both ends meet for the year which is coming.

IMMEDIATE DANGERS OF ITALY.

In addition to all the arduous difficulties and thick obstacles which gather round the path of the statesmen who are charged with the organisation of the new-born Italian Kingdom (and which we have already attempted to explain),—a very great and very imminent danger, there is too much reason to fear, menaces the very commencement of their work. We have little doubt that they will succeed in it, if they are allowed to devote themselves to it in security and peace. They will conquer internal difficulties if they remain unmolested by external attacks. But this—the very first condition of success—is beginning to seem questionable. Our last accounts, especially the more private ones, are exceedingly alarming. Austrian impatience, and Italian impatience, are conspiring together against the safety of the new State. The best allies of the Viennese Emperor are to be found among the more extreme patriots of the liberated Peninsula. In Venetia, entrenched behind the Quadrilateral, lie 200,000 of the picked troops of Austria, all burning to be led against the enemy whom they despise as well as hate, whom they believe they can crush with ease, whom they know they could have defeated at once in 1859 but for French intervention, and whom even French intervention only *just* succeeded in rendering triumphant. They are in admirable discipline; they are fully equipped with all the materials of war; they are costing the State almost as much as if they were actually fighting; their General, Count Benedek is beseeching the authorities at Vienna to give him the signal for action; and has promised Francis Joseph that he will be at Milan and Turin within a month, if only he may once be allowed to cross the Mincio. We have little doubt that his boast would be fulfilled. Italy, as yet, has no army which *unassisted* could offer any serious opposition; and a considerable portion of that army is still, and must for some time continue to be, occupied in maintaining tranquillity and suppressing outbreaks in the Southern Provinces. Benedek argues, and with much plausibility, that all he promises might be effected long before France, even if resolved to do so, could come to the aid of Sardinia, and long before an Hungarian insurrection, even if that be imminent, could be so effectually organised as to hamper his proceedings or paralyse his force. It is true, he admits, that a considerable portion of his army consists of Hungarians, who in their hearts are disaffected, and whose national Diet would never sanction their being employed to suppress Italian independence; but he is confident that, if once led against the enemy, the military instinct will prevail, and that they will fight and fight bravely, though little inclined to the cause in which they are engaged.

If Austria were to declare war and march at once, it is argued that a series of victories, such as are counted upon as certain, would restore the prestige of the Austrian Empire, now almost in a state of dissolution; would encourage all the partisans of Austria who still exist in Italy, to raise their heads; would foment insurrections everywhere, and would throw into Chaos, if not utterly overset, the new Kingdom that is still only half organised and not half fused. England, Austria feels certain, will not interfere by force, though she will remonstrate and protest; and the interference of France, even if certain, will come too late to prevent, though possibly not to undo, the catastrophe. But, further, the Austrian Government speculate, "May not both the remonstrances of "England and the intervention of France be, by skilful con- "trivance, blunted and discouraged, if not quite averted?" The former Power is known to be unfavourable to Austrian dismemberment; she has protested vehemently against any attempt on the part of Italy to attack Venetia, and has even intimated to Victor Emanuel that if he permits such an attack he will deserve his fate; and her Foreign Minister has astounded statesmen by avowing a lingering preference for a dual instead of a United Italy. Even France, while it is pretty certain that she will never permit Austrian influence to be re-extended over the Peninsula, is by no means bound to interfere to save Victor Emanuel from the consequences of a rash attack upon his powerful foe, which indeed Louis Napoleon has all but forbidden. Austria, therefore, may not unreasonably imagine, and does imagine, that if she can place herself in the position of the assailed in place of assuming that of the assailant—if she can procure the war she desires to be inaugurated by an apparently unprovoked invasion of Venetia on the part of the Italians—she may to a great extent avoid the condemnation and avert the hostility of both this country and France. In pursuance of this crafty policy, and in strict conformity with her traditional practice, she is now moving heaven and earth not only to goad the Venetians into a premature rising (which would naturally lead to the assistance of Lombard and Romagnese sympathisers), but to *organise an attack upon herself* by emissaries disguised as Garibaldians, who may deceive many honest and enthusiastic peasants and even soldiers into following the treacherous lure. Some of these emissaries of invasion, we are glad to say, have been discovered and arrested, and will shortly be brought to trial; but where such subtle arts are at work on the one side, and so much wild and fiery enthusiasm is ready to burst into furious action on the other, it is almost too much to hope that all rash enterprise can be prevented.

If France does not again interpose, then Italy will be rapidly overrun, and the whole work of 1859 and 1860 will, *for a time at least*, be undone;—for let no man deceive himself: till Hungary is up in arms, the Italians, however brave and desperate, *cannot* make head for a month against such an army as Austria now possesses in Venetia;—and Hungary and Austria are still endeavouring to come to terms, while the recent debates in the French Chambers have proved even more clearly than before, how unpopular the Italian cause is with Frenchmen generally. But suppose that France *does* come to the rescue, as before,—what then? Why, this: that she will once more become the arbiter of the destinies of Italy, and may attempt to write her own clumsy and selfish will upon them, as she did in 1859. If Italy is again saved by the interposition of the Emperor, what security is there that he may not recur to his wretched Villafranca scheme of a Federation? for it is pretty well understood that though he has accepted the fact of a unified Italy, he has not done so cordially or promptly. *It was not his idea;* it may not suit his ulterior designs; and we are well assured that it does not suit the fancy of the French nation generally. Be this, however, as it may: the event we are contemplating would pretty nearly enable him to dictate his own terms to Italy, whatever those terms might be; and they *might* be, either an unworkable Federation, or a Southern and a Northern Kingdom, or a Muratist Dynasty at Naples, or the cession of Genoa, or of the Island of Sardinia. The latter condition might perhaps be listened to in so desperate a conjuncture; but any of the others would of course be fatal to all the hopes of the Italian people, and to all the grand achievements of 1860.

The peril is tremendous, and the information we have received satisfies us that it is imminent. We earnestly hope that it may be at once notified to Austria, by our Government and that of the Emperor in unison, that her intrigues are watched and understood, and that a military movement beyond the Mincio, even though *apparently* provoked, will under no circumstances be suffered to be successful. We wish, too, though we can scarcely hope that the Hungarian Diet may take the bold step of intimating to the Hungarian regiments now in Venetia, that they must in no case serve against the Italian flag. We call attention to a letter in Thursday's *Times*, signed "One who has served under him," the statements of which we can fully corroborate.

THE TRUE ISSUE BETWEEN NORTH AND SOUTH.

We are waiting with deep anxiety the next news from America, which will probably decide the question as to peaceable severance or hopeless civil war. It is idle to speculate now, and the best-informed people both here and there seem in complete uncertainty as to the result. For ourselves—menacing as was the aspect of affairs at the date of the last accounts—we adhere to the opinion we formed at the outset, *viz.*, that there will be no re-union and no fighting; and we hold this view because we believe that no really practical ground for compromise exists, and that the Americans are too sensible to shed each others' blood without a clear reason and an adequate object. The only ostensible and sufficient justification for an attempt at coercion would lie in the knowledge that re-union was desired by a large and respectable minority in the South, who were intimidated, silenced, and overborne by mere numbers. But of any such fact there seems no indication.

Meanwhile, do not let us deceive ourselves by permitting the controversy between the old Federation and the Seceding States to be placed, even in our own minds, upon false issues. As the matter at present stands, both parties seem wedded to a grievous economic error and to a sad social injustice and moral wrong. The North is bent upon a Protective Commercial policy, which will injure themselves and wrong the Western States; and the South is bent upon perpetuating and extending Slavery, which will be fatal to their future prosperity, and is a shameful iniquity against the African race. We do not mean for one moment to put the two follies and the two wrongs *on a level* as regards either their social gravity or their moral heinousness,—especially as the one must soon be abandoned, while the other may be persisted in for generations. But, in the lines they have respectively taken, each of the two Confederations, while conciliating one of our predilections, have done grievous violence to another. The Northern States are Free-soilers and Protectionists: the Southern States are Slave-holders and Free-traders. We can, therefore, contemplate their relative position with some degree of calm impartiality. Do not, then, let us mistake their several aims and principles, and give our sympathies under mistaken pleas. If, indeed, the Northern Federation were prepared heartily, resolutely, and unanimously—as no doubt a few of their citizens are—to take their stand on the solemn principle of prohibiting and preventing the extension of Slavery to any States and Territories where it does not now exist, then such a ground might be well worth an obstinate struggle and even a long civil war, if there were any reasonable prospect of ultimate success; because if Slavery were strictly and for ever confined within its present limits there is every hope that it must ultimately die out. An object like this, if attainable, would be worth fighting for, and might perhaps justify even civil war:—but what ground is there for assuming that any such distinct and noble aim is in the heart of Mr Lincoln's Government when they speak of coercion? Mr Lincoln, indeed, contends for the right of Congress to make laws for all unannexed, unsettled, and unadmitted territories:—he has never, so far as we are aware, taken up the high ground of saying that Slavery *shall not* be introduced into any new districts. This is the ground of the Abolitionists; but it is not the ground of the Republican party as a whole; still less is it the ground of the mass of the people in the Northern and Western States. On the contrary, nearly every compromise yet proposed—and *all the proposed compromises have come from the North or from the Border States*—has stipulated that Slavery shall only be prohibited *North of a certain line* (North of which Slavery cannot profitably exist, and consequently need not be prohibited);—but that South of this line, its introduction shall be left to the decision of the inhabitants themselves. Some of the suggested compromises, indeed, have contained a proviso that no new territory shall be acquired without the consent of the majority of all the States, both Slave and Free. But we can scarcely regard this as likely to be at all effective in *really* limiting the area of Slavery, when we consider, first, the enormous space *already acquired* and peculiarly adapted for Negro cultivation; and, secondly, that even the North and North-Western States have never yet, as a whole, shown the slightest reluctance to the extension of the dominion of the Republic in any direction or by any means. Do not, therefore, let us give our sympathies to those Northerners who would appear to be preparing to maintain the old Union by force, on the erroneous impression that they are about to fight on the grand, intelligible, and worthy ground of confining Slavery for ever within its present area. If it were so, and there were a fair prospect of success, we could almost wish them God speed, though a terrible civil war was the only means to their cherished end. But, alas! it is not so. Abhorrence of Negro-slavery, as we feel it here, and determination at all hazards to clear their nation's fame and future from so foul a blot, are sentiments confined to but a small minority of the citizens of the Northern Federation. What *all* these are anxious for—and what some are meditating war in order to ensure—is that the vast and rich territories which are still unsettled or which may in future be acquired (and which chiefly lie to the South of lat. 36.30), shall not fall into the hands of slave-holders and planters, and thus give them a preponderance in the Senate and control over the policy of the Union. And this object we believe can scarcely be secured by war, and would not be worth a war even if it could.

The real issue between the North and South, then, is not the abolition or the extension of Slavery, but the decision whether a Free-labour or a Slave-holding Republic shall henceforth hold the reins and direct the policy of the Great American Federation, or the chief part of it—a vast question, no doubt, and a momentous one, but not rising to the moral magnitude of the other. And if it shall really appear that the future of the Negro race is not at issue in this controversy, then there is much in the position and conduct of the Seceding States to add strength to our hope and desire that no attempts at forcible re-union shall be hazarded, but that they shall be allowed to separate and to reorganise themselves without interference. They have evidently some sagacious heads as well as some resolute wills among them; and they seem scarcely more intemperate and much more wise than their Northern brethren. In the framing of their new Constitution they have laid their finger on nearly every blot of the old one, and seem resolved to profit by experience. They give their President a longer term of office and forbid his re-election. They provide, in a great measure, for the irremoveability and independence of the Judges, which had become so fatally impaired. They restore dignity and security to the Civil Service, by declaring virtually that all except the highest *employés* shall be considered to hold office for life, or during good behaviour. And they empower the Ministers (who have hitherto been excluded from Congress) to sit and speak there—but without votes. By these enactments they go far to rectify what were felt by all observers to have become most dangerous and spreading evils under the old system. They have adopted a moderate tariff, which will at least discourage smuggling, and bring some considerable and reliable revenue into their coffers; and, as they have not yet—any more than the Northerners—the nerve or the virtue to establish an onerous scheme of direct taxation, and yet *must have* funds, we are by no means sure that the plan of an export duty upon cotton is not open to as few objections as any other. Certainly, it is not deserving of the unmeasured condemnation which has been passed upon it. If the States were the *only* cotton-producing country in the world, then such a tax would obviously be the right one to impose: it would be analogous to the case of saltpetre in India, which the sagacity of Mr Wilson at once fixed upon as fit to bear an

export duty. America is not the only cotton-producing country, but it is the principal one; and so long as the duty is moderate and the demand brisk, it is not probable that it will perceptibly check exports, though it may prospectively encourage rivals. Of course, as the American cotton thus burdened will have to meet Indian and Egyptian cotton in the markets of the world, the duty will to a great extent come out of the pockets of the American producer;—but then, if ten millions of dollars are wanted and *must be got*, how could they be extracted out of those buttoned pockets at once less noxiously and less vexatiously? It is as if the planter surrendered (say) every tenth bale to the State, to be sold and exported for the public benefit. We by no means say that it is a good financial measure, but if a property tax will not be endured, we do not know that any better could be substituted.

THE IMPORTANCE OF INTRODUCING A PAPER CURRENCY INTO BRITISH INDIA.

THE currency is not a popular subject, and India is not a popular subject. The Indian currency, therefore, we may not unreasonably expect to be a very unpopular one. We return, however, to the subject because its importance is not as yet duly appreciated, and because we are certain that as soon as the magnitude of the interests involved is distinctly comprehended, the intelligent opinion of qualified persons will enforce a decided change in the policy of the Government.

The truth is, that English experience and English associations may very easily mislead us in the matter. It is not too much to say that the bank-note circulation is in England a secondary subject, and that it is in India a first-rate subject. In England we have a vast accumulated capital, which is growing rapidly year by year, which is the fruit of centuries of security and improvement, which is fairly and reasonably sufficient for our wants. We have a banking system which has attained unprecedented efficiency; we have a subsidary currency of cheques and book-credits which is the medium of thousands of transactions —of transactions in amount and importance far greater than that effected by the ruder medium of bank notes. In consequence, bank notes are here but secondary instruments. On the one hand, we have a great deal of capital, and do not prize economy as much as we should otherwise prize it; on the other hand, when we do wish to economise our capital, we have at our disposal expedients developed by the recent extensions of banking which are as cheap as bank notes, which are in practice more elastic and more convenient. For these reasons, the active circulation of the Bank of England does not increase, though the wealth of England is growing with extreme rapidity, and the transactions of trade are augmenting year by year.

In India every material circumstance is wholly different. There is in that country no large accumulated capital. The extravagant idea which the older travellers entertained of the wealth of Asiatic countries has passed away. We know India far too well now to be deceived in that respect. We know what her resources are; we know the difficulty of making her revenue equal to her expenditure; we see how completely during a famine she is dependent on our charity; we have found by trial that she is a poor country even when compared with poor European countries. No want of India is so extreme and urgent as want of capital.

The very circumstance which led the first observers to fancy that India was a wealthy country, is, in truth, a main cause of her true poverty. They saw immense quantities of the precious metals; they were struck with the hoards of monarchs and with the accumulations of private persons; and they inferred that those who had so much gold and silver must have a proportionate sum of available wealth. But the deduction was the exact reverse of that which should have been drawn. Accurate consideration shows that these vast sums in specie were so much capital lying unproductive; that the country was poor, precisely because they formed so large a part of its accumulated wealth.

No economical improvement in an ancient Asiatic country is at all comparable to the introduction of a paper currency. From the beginning of mercantile history, the precious metals have been flowing incessantly to the East, and they are so durable that a large part of that vast aggregate is unquestionably still to be found there. If it could be brought into profitable use, it would be one of the most remarkable triumphs of science and civilisation. It is scarcely ever possible to confer on so poor a country as India such a sudden accession of wealth.

It is with great regret that we cannot but observe that the present financial administration of Calcutta is practically insensible to these important considerations. We showed a fortnight since that Mr Laing's Bill confined the economy of a paper circulation to the amount which was previously practicable. His own words are these:—"I must ex- "plain why that sum has been limited to the existing "paper issues. The existing paper issues of the Chartered "Banks of Bengal, Bombay, and Madras being confined to "five millions sterling, it was proposed, that as those Banks "under the charter were obliged to have one million of "specie in reserve, the amount might be limited to four "millions. At present it was not thought expedient to "exceed that amount, but hereafter if from experience they "found that it would be necessary to increase it, a Bill "might be brought in to give effect to such a measure.' This is in itself an admission that it is not desirable to extend the benefit of a paper circulation to India at this moment.

The details of the measure have been framed in the same spirit. Every one in any degree acquainted with Asiatic countries is aware of the extreme minuteness of the ordinary transactions of Oriental trade. The population is very poor and very parsimonious. "Man's life is cheap"; for the necessaries of life are to be procured for sums to our notions inconceivably minute. Accordingly the discussions on Indian coinage have been continually directed to the issue of coins sufficiently small for the dealings of the people. But, nevertheless, up to the present hour there exists below the authorised metallic coinage a subordinate currency of cowries, which are alone adequate to the minuteness of transactions to which in the East the currency must be applied. Mr Laing, however, will not permit the issue of any notes under 20 rupees—a sum much too large for the ordinary dealings of life in Asia. He considers this sum to be analogous to the 5*l* note of England; and though there may be much doubt if the analogy is accurate, it would not, even if accurate, at all uphold his inference that no lower notes should be issued. We do not in England make use of bank notes except for what may be called "middle-class dealings." The infinity of ordinary transactions are performed by sovereigns. Of these middle-class dealings, there are scarcely any in India. There are in India, as everywhere, a few wholesale transactions, and there are also an infinite amount of retail dealings, but there is not the intermediate class. If we reform the currency of India, we must deal with the ordinary transactions of daily life—with the class of transactions to which the 1*l* note of Scotland and Ireland is adapted, and for which it was created. Even, therefore, if Mr Laing could prove that the 20 rupee note of India exactly corresponded with the 5*l* note of England, he would have exactly proved that he had selected the inapropriate sum. He would prove that he intended to neglect the numerous transactions of daily life, and to confine the use of a paper currency to those intermediate transactions which must be rare in a country where the middle-class is scanty, and to the larger transactions of commerce.

Mr Laing's proposal for the introduction of a gold currency is likewise a measure dictated by the same policy. Instead of introducing a currency which will economise capital, he introduces one which employs capital. To the use of gold when the population desire it, or under the natural circumstances of commerce, there can be no objection. We, at least, should be the very last to raise any. But we see grave objections to an artificial introduction of a new metallic currency into India at the very moment when it is of the utmost importance to economise every rupee of her available capital. Mr Laing proposes to fix the value of gold against silver every six months, and hopes in the course of time to introduce by this means "a considerable "auxiliary gold currency." But in this country it would certainly be impossible to induce persons to hold in any considerable quantities a coinage of unsteady and fluctuating value. Whenever the light gold is "called in," considerable loss is necessarily inflicted on bankers and other large

holders. Mr Laing's measure is equivalent to calling in the "light gold every six months." There would be a constant chance of loss by fluctuation in value, to which no sound banker would ever subject himself here. Such possible fluctuations must necessarily more impede the circulation of a new currency than of an old one, to which the people had been long accustomed. It is true the loss would not fall heavily on the holders of single pieces, but unless some one keeps a store there will soon be no single pieces to be found. It is true, likewise, that there is a possibility of gain by fluctuation as well as of loss, but no one but a bullion dealer can estimate such chances. It is not to be expected or wished that the holders of a Government currency should be subjected to the continual necessity of making the most refined and intricate calculations known to the commercial world. If, indeed, it had been a principal object of sound policy at this moment to extend the metallic circulation of India, these objections might have been overlooked for the sake of contemplated advantages. But when the soundest policy certainly is to restrict and to economise the metallic circulation, these objections at once become of insuperable weight.

The alteration of the "circles of issue" seems to be dictated by the same over-anxiety as to the possible dangers of a paper issue, but our limits will not allow us to enter now on a collateral and subordinate branch of the subject.

It is quite true that all convertible paper circulations are exposed to the danger of sudden panics, and it is possible that in the unknown recesses of the Asiatic mind there may be some peculiar liability to such emotions. Before we have specific experience, it would be folly on such a subject to speak with certainty. But we may now remark, first, that Mr Laing's scheme, as it involves an issue on securities, is, as far as it goes, exposed to the risk of discredit whatever it may be. And, secondly, that what we know of our Indian subjects may seem to indicate that in this case the dread of discredit to a Government currency is not so great as it would be elsewhere. Such at least is the judgment of some very well-qualified persons. The principal dread of the Hindoo is the dread that he may offend the Government; and he will certainly fear, rightly or wrongly, that if he runs for his money the Government will be evilly disposed to him. Some persons have, indeed, argued that in such a state of national feeling a paper currency cannot be really convertible, and is, therefore, liable to important objections. We do not think the argument conclusive; but it seems to us that it should have its weight in counteracting the opposite arguments derived from the contingency of panic and the vague apprehension of possible discredit.

THE PARLIAMENTARY REPUDIATION OF REFORM.

We confess that we feel considerable sympathy with the *feelings*, though little with the *convictions*, of the small band of democrats who, under Mr James Stansfeld's able guidance, protested indignantly against the euthanasia of the Reform agitation on Wednesday last, on occasion of Mr Baines's motion in favour of the 6*l* franchise in boroughs. It is impossible to deny that Mr Stansfeld was justified in his charge that the professions of the Liberal leaders had been "volunteered without faith and abandoned without "shame," though we cannot think that the abandonment involved nearly so much shame, as it would have done to persevere to the end in forcing on the country a measure in which the men who originated it had no earnest belief. It is not good for England that any great political change should be brought forward by statesmen who accept it timidly and reluctantly at the dictation of a fancied public necessity; and we heartily rejoice that the leading members of both the great parties have disburdened themselves of an intolerable weight on their political conscience, and are once more free to deal with Reform as their own sober judgment and the exigencies of the time appear to demand.

Thus far we do not sympathise with Mr Stansfeld's invective. The false step, as we have frequently urged, was taken when Lord John Russell first committed himself to a *mere* extension of the principles of the Act of 1832, and when the other members of his party were unfortunately over-persuaded to accept this rash *programme*. To be obliged to retrace that step is no doubt humiliating and temporarily discrediting;—for the brunt of public discredit of course attends, not the error itself, but the public confession of the error. But, without retracing that step, without explicitly recognising the mistake which had been made, we could not have hoped for any future Reform founded on truer principles.

Yet little as we sympathise with Mr Stansfeld's eloquent indignation against the Liberal leaders for the step they are now taking, we do sincerely sympathise with the disappointment which he and his friends feel at the uncomfortable and discreditable situation in which the question is now left. Both the Conservative and the Liberal statesmen, in the first rash impulses of that self-dissatisfaction which always accompanies a great failure, declare that in future they will not attempt to guide,—they will only follow in the wake of public opinion. We confess this seems to us the querulous decision of men who have already degraded their judgments to the level of an imaginary public opinion, instead of attempting to lead and direct it, and who are disgusted with the result. It is no wonder that measures should fail which are prepared, by politicians who do not believe in their wisdom, on a conjecture,—for it was no more,—that a large portion of the country had made up its mind on the matter. This conjecture proves to be untrue; the more the thinking part of the political public has considered the reforms proposed, the better it has felt satisfied that the scruples of our statesmen are more deeply grounded than their desire for compromise. And now when their plans are rejected, the statesmen turn round on the people and say, 'Since you will not have a measure which we conceded 'against our own convictions to what we thought was your 'wish, we will neither consider nor propose anything more. 'You must yourselves take the initiative in future.' We must say this seems to us somewhat wayward and pettish treatment. If any one of our greater statesmen would identify his name and reputation with any broad and statesmanlike proposition, such as his own political conscience could honestly accept, we should have some chance of judging as to the real indifference of the English people to constitutional reforms. But while a responsibility which none but statesmen can properly assume is tossed back impatiently to the people as often as it seems to rest with the Ministry, it is impossible to test fairly what the convictions of the nation are.

Of one thing we are well persuaded—that Lord John Russell was not right in throwing the responsibility of his failure on the selfishness of the middle class. There is throughout that class a very real and genuine wish to admit the working men to a fair share of political responsibility. It is admitted as a right, it would be willingly conceded in fact. And if the propositions of 1859 and 1860 have been unpopular, it is not certainly due to the assumed exclusiveness in the state of middle-class feeling. No one is called exclusive towards another who is sincerely willing to halve his power with that other. And had any measure been suggested which would have honestly divided the electoral power *equally* between the middle and working classes, we believe it would have been received gladly; and that the right of the more educated classes to wield a *larger* portion of the electoral power in virtue of their superior education, would have been—whether wisely or unwisely—waived, in consideration of the larger numbers of the working class. But, in fact, the ultimate tendency of every measure of Reform that has been introduced has been to absorb the middle and educated class of the country entirely in the larger one below it; and it is scarcely fair to charge any class with exclusiveness, not because it declines to admit another to *equal* privileges with itself, but because it declines to assert a principle which implies that the *whole* of its own power should be sooner or later surrendered.

The history of the not very creditable Reform movement which has gone on during the last ten years, yields one clear moral,—that statesmen gain nothing by sacrificing their own genuine principles to a public opinion which has not yet attained force and clearness to create any statesman of its own. We may take it as a political axiom, that any healthy or deeply-rooted current in English politics will have the strength to bring out a sincere and able exponent of itself,

with sufficient sagacity to reconcile it with the spirit of the constitution. It is a sure sign that a political policy is not yet ripe,—even where it is sound and strong,—when it can raise up no earnest advocate for itself among the ranks of statesmen. The old Reform movement, the Free-trade movement, as well as all the great legislative changes of earlier times, had the power to conquer the convictions of statesmen, before they got a legislative sanction. The democratic Reform movement has never done so. It has tempted several statesmen to make "professions volunteered without faith," but none to embrace heartily the creed they profess. *Till* it does so, we may look to see Reform unsuccessful. *When it does so*, we may hope that Reform will no longer be democratic.

THE MONEY MARKET AND THE CAPITAL MARKET NOT IDENTICAL.

[COMMUNICATED.]

THE money market, in the common acceptation of the term, is understood to be a place, and the persons engaged in it to be a class, where and among whom all loans of money are negotiated, and likewise all purchases or sales of public obligations.

But a loan of money and a purchase or a sale of a public obligation are transactions so distinct from each other in almost every relation, that they ought not to be talked of as if affected, except, indeed, very remotely, by the same causes.

When a person lends money he may take a public obligation as his collateral security, and it is possible enough that this collateral security may be conveyed and reconveyed in the manner of a purchase and sale, but, not the less, the essence of the contract is a loan of money—money lent and money after a short interval to be returned :—this is a transaction of the money market.

When a person buys a public obligation as an investment the circumstances are totally different. The buyer divests himself for ever of his money, and becomes clothed or vested with a symbol of capital in its place; it may be a British Government annuity or the bond of a Foreign Government, or a share of some railway at home or abroad, but, whatever it is, he takes it as an interest-paying obligation, subject to all the chances of rise or fall of market, and treats it as so much of his property or capital :—this, therefore, if a separate name could be assigned to it, is a transaction of the capital market.

In the one case, it will be observed, the money is only temporarily parted with, in the other case it is parted with in perpetuity, and conveys away so much capital, which the purchaser or somebody preceding him must have saved and set aside out of profits, in exchange for something supposed to be its equivalent in a different form, namely, that of an annuity or of a reversion, or of any other irrevocable investment.

Occasionally, as in the instance of a railway debenture at three or five years term, the obligation is for a given amount of money to be repaid at a given time; but, unless the lender prefers to wait out that time, he has often to accept from intermediate persons a sum different from that which would be ultimately due to him. This is an instance in which, between a loan of money and an investment of capital, the two species or varieties of business seem to converge.

Nor is it asserted that such two species or varieties are altogether unrelated even at their remotest points but that they may be, and at this time are, affected by the same operative force with very different intensity; just as a long enduring condition of high or low freights eventually raises or depresses the price of ships, or as any material change in the cost of ships is sure to act on the rate of freights.

It might be said that as the words money or capital are but expressions of measure or of power, they have less title to be connected with the term *market* than the variously priced objects dealt in, namely, the loans or the investments to which the money or the capital is to be respectively applied. In this view, our meaning would perhaps be better carried out if we were to speak of the same things in different language, and call them the loan market and the investment market.

Names are not of much importance, but a distinction of the two ideas as here relied on is important, in order to perceive the bearings and calculate the position of these respective markets, their past and future course, as exhibited or reflected by the rate of discount or interest in the one, and by the varying price of securities or investments in the other.

The now prevailing rate of discount or interest in the principal centres of European exchange is but too significant of the opposing effect of war or warlike expenditure to the accumulation and advantageous distribution of wealth. At Constantinople it is 8 or 10 per cent.; Turin, 7 per cent.; Vienna and St Petersburg, 6 per cent.; Paris and London, 5 per cent.; Berlin and Brussels, 4 per cent.; Frankfort and Amsterdam, 3 per cent.; Hamburg, 2½ per cent. These vestiges are hard to be mistaken, when we observe that in the countries which have been chiefly engaged in war a certain charge upon the profits of industry is high, whereas in the countries where peace has been hitherto preserved the same charge remains uniformly low.

The pathology of finance, although so different a subject from that of physics, is in some respects akin. The physician tells us that diseases are usually complex, and that a simple disease is rather a rare occurrence. So it is in the financial disturbance through which we are now passing: it is a disturbance not only of considerable magnitude, but of a kind peculiarly complex and obscure; a disturbance of which the monetary irregularity is or has been only a superficial symptom, the real and deeper-seated disorder being an entanglement of capital, either by application or dislocation, greater than the national savings have been able to keep pace with.

To estimate the various causes in question, so as to assign to each of them its due weight, would be impossible, but it is not difficult to enumerate them, which may thus be done in the order of proximity to the effect: that is, putting the one which is nearest the surface first, and that which is deepest seated last; in this order they seem to be (1) monetary derangement, (2) large imports of commodities in comparison with exports, (3) large engagements at home of public nature, (4) departure of capital from excess and manner of taxation, (5) large engagements abroad, both public and private, especially in the colonies.

I.—Monetary derangement, by which nothing more should be understood than a want of equilibrium of money between two or among more than two countries having commercial relations. Such want of equilibrium is always self-corrective by the escape of either one of the precious metals which may be the standard of value. The effect of this is to contract the money of the spendthrift country, and thus, partly inducing and partly compelling a higher price to be put upon the use of such money as remains, it is sure to be applied with the more providence and economy.

A high price for the use of money is technically called a high rate of discount, which, if an evil, is only so in the same sense as that a high price of corn or of any other commodity is an evil. In either case the calamity begins a stage or two back. A short yield of corn in proportion to a given demand or rate of consumption is a sure cause of high price, and in like manner any check to the accustomed accumulation of profits in proportion to a certain expenditure, a kind of dead charge, which, in the civilised nations of the world, is ever prone to go on, cannot fail to be followed by some disturbance of the monetary system of a country such as this, wherein a credit so enormous as to exceed all that has been witnessed previously is blended with and supported by a comparatively small amount of metallic money.

Under such conditions the metallic money cannot be trifled with, except at the hazard of vast sacrifices, if not of ultimate collapse. Any misfortune of that kind has been, during the recent crisis, entirely avoided by a natural and steady augmentation in the price of loans on the part of those who had the power to make them, until, by the operation of the exchanges, the bullion demand from America and India was effectively answered by the supply from Australia and Continental Europe, without materially diminishing the central store at the Bank of England. There has consequently been no disruption of commercial credit, and the rate of discount, which in some degree indicates the facility or otherwise of obtaining loans for purposes of trade, seems to be subsiding to a moderate level.

II.—Imports and Exports.—It appears from the Board of Trade returns that the computed real value of foreign and

colonial merchandise imported during the last three years has been for each year, ending 31st December, as follows:—

1858.		1859.		1860.
£		£		£
164,583,832	...	179,182,355	...	210,648,743

The excess thus presented for the past year over the two preceding years is partially explained, to the extent probably of eight or ten millions, by the increased quantity of food, and all beyond that is mainly attributable to the higher scale of prices. This excess of imports has unabatedly continued; while the exports, instead of offering any counteraction, exhibit an extraordinary diminution, being less by about three and a half millions for the first two months of 1861 than for the first two months of 1860.

There is a kind of importation not to be found in Board of Trade returns which has an influence on the London money market even more striking than that of food, namely, the importation of colonial or foreign bonds; and, however strange it may seem, we must absolutely classify in the same category with our loans to colonial or foreign debtors that increase of the public expenditure at home which is a clear and indisputable fact of the present period.

It may be, and doubtless is, the duty of the statesman and political financier to provide for the safety and defence of his country, nor ought any good subject to grudge the taxation which is inseparable from naval and military preparations, if they are necessary, on a great scale. But the financier of commerce is a citizen of the world, who looks on with different eyes. He is apt to view any application of capital that is not promply reproductive as a species of waste; discards patriotism, calculates by the rule of profit and loss, pronounces the cost of war to be only another term for destruction of capital, and, as the place selected for such destruction is of no importance, home expenditure of that nature he considers just as prejudicial to the result of the national balance sheet as expenditure abroad.

III.—Public Works at Home.—Assuming that what has been said above is incapable of being controverted, we must estimate all the outlay upon the national defences, in the construction of arms or ships or fortifications, exactly the same as if it was incurred on a foreign expedition, such as the Peninsular war, or the war in the Crimea or in China. It is of no use to say that the money is spent at home: the money is paid to the workman at home, but he spends it in food and clothing imported from foreign countries; and so are the materials, such as hemp and timber, upon which his labour is employed in the construction of enormously expensive ships.

IV. Taxation.—Here arises the spectral image of Government expenditure, and, without any design of assessing one and the same item twice over, it is impossible not to perceive how very prejudicial to the increase of the national wealth is the modern expedient of taxing property and income. It always has had and must have the effect of driving capital abroad. An income tax of 4 or 5 per cent. for four or five years is not of great importance; but when the tax, as now, has assumed a character of permanence, it is tantamount in that degree to confiscation, and persons who hold their capital in a moveable form will naturally proceed to put it out of harm's way. Moreover, capitalists will take themselves abroad—will reside in one foreign country while they derive their income from another; and foreigners, even for considerations of safety, are not likely to leave their capital here to be gradually diminished by the operation of a tax.

V.—Foreign or Colonial Engagements.—Of foreign engagements, if separated from those of the colonies, the catalogue, though by no means inconsiderable, is not more serious than we are accustomed to. There have been, however, the Turkish loans and the Russian loans, and no doubt these as well as other of the Continental Governments would soon appear as borrowers if the London market were to offer an opening. And when we turn to the Colonial Governments, we find that their demands upon the capital of England have been large indeed. The Grand Trunk Railway of Canada, which is still incomplete, has removed from this country about twelve millions of capital, and three or four railways, all by English companies, are in course of construction in the Brazils. Next there is a regular supply of Six per Cent. Australian Bonds. Lastly, we are witnessing the application of British capital to the construction of railways in India, and, since the mutiny of 1858, the enormous expenditure of the Indian Government. Formerly there was a regular and sure tribute of three or four millions a year from British India to Great Britain; but recently the case has been entirely reversed, and, the railways included, Great Britain has become tributary, in a three or fourfold degree, to British India.

The considerations that have thus been passed under review bring us now to a point at which we may fairly enough raise the question,—Are the resources of this country so boundless as to be able to bear such an enlarged process of exhaustion, and if they are not, under what form are we likely to feel the inconvenience? If the premises contended for are correct, and that a deficient harvest, a loan to a Foreign State or to a Colony not being immediately reproductive, or home expenditure with increased taxation, are all of one effect in giving disturbance to the foreign exchanges, then it is almost certain that while the same conditions last, such disturbance will always be imminent, and that its natural counteraction will appear in what may be termed an irritable state of the short loan or money market. A temporary cause of inconvenience will thus again arise and be again dispelled by a temporary expedient; but the fundamental and more serious derangement may continue not the less, because there is too much reason to apprehend that it is a derangement, not of the money of the country, but of the capital.

INDIAN *VERSUS* AMERICAN COTTON.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The City article of yesterday's *Times* contained a letter on the probable supply of cotton for the ensuing year, which intimated an impression on the part of the writer that some unaccountable *prejudice* existed in the minds of Lancashire manufacturers against the use of East Indian or, as it is usually termed, *Surat* cotton, of which, it is alleged, but for this "prejudice," almost any amount could be supplied. "It is impossible (says the writer) to ascertain what are the real objections on the part of English manufacturers to Surats."

It is not only not impossible, but it is very easy. Any Lancashire spinner or manufacturer could at once give the required information; and we need scarcely observe that to charge men of business like English manufacturers with a "prejudice" against any article which is cheap to buy and profitable to use, is simply childish. The objections to Surat cotton (as compared with Orleans, or American, descriptions) are intelligible enough.

1. In the first place, it yields more "waste," to speak technically; *i.e.*, it loses more in the process of spinning. This arises partly from the fact that it is usually, though not always, more full of dust and dirt, which has to be winnowed out; partly from the fact that this dirt is commonly of a heavier sort than that of the Orleans cotton; and partly from the fact that most of the cotton is of so short a fibre that it flies away in the process of cleaning. The result is, that whereas 10 lbs of Orleans raw cotton will yield perhaps 9 lbs *net*, 10 lbs of Surat will only yield 8 lbs or 7½ lbs.

2. The Surat cotton when cleaned, though of a richer colour than the bulk of the American, is always much *shorter* in "staple" or fibre;—the result of which is, that in order to make it into equally strong yarn, it requires to be harder twisted:—say, the one quality requires twelve turns per inch, while the other needs only eight turns. The consequence is (the technical reason it is useless to explain) that the same machinery will give out from 10 to 20 per cent. more of American yarn than of Surat yarn.

3. The workpeople must prefer the better, or American, quality. The yarn produced from it "spins better," and the spinner consequently, can turn out more of it; it breaks less, and, consequently, the weaver can weave it with less interruption. The workpeople can earn better wages, in fact, when using the higher quality of cotton, and of course have a strong "prejudice" in its favour.

4. The cloth made from Surat cotton, though of an excellent colour, does not take the "finish" so well, and is apt after once washing to look poor and thin. The reason is, that the fibre of the Surat cotton is at once drier and less silky than the American, and does not absorb the bleaching matter so thoroughly, and, being shorter and less tenacious, is more easily washed out.

In short, in all respects (except colour) the Indian cotton is *an inferior article*, and as such can only find purchasers at such a relatively lower price as will compensate for the various disadvantages of using it. Still, it is largely consumed, and will always continue to be consumed, when 30 per cent. cheaper than its rival.—I am, yours obediently, A PRACTICAL MAN.

THE PENNY TAXES.

THE following memorial to the Chancellor of the Exchequer suggesting the abolition of the *new* taxes "in aid of charges for collection of revenue," was presented on the 9th of April.

TO THE RIGHT HON. THE CHANCELLOR OF THE EXCHEQUER.

London, March, 1861.

Sir,—We, the undersigned merchants, brokers, and traders of the port of London, beg leave to claim your attention to the results of certain new taxes imposed on the trade and commerce of the country in the last Session of Parliament "in aid of the charges for collection of revenue."

Many of your memorialists were opposed to these new taxes at the time of their creation, upon the generally recognised principle that the main object of taxation is to produce the largest amount of revenue with the least possible inconvenience to its payers, neither of which conditions are fulfilled by these new imposts, while they cause great trouble, obstruction, and delay, both to merchants, traders, and revenue collectors, for which the extremely slender financial results offer no adequate compensation.

These new taxes have now been in operation for a period sufficient fairly to test their pecuniary value, as well as the consumption of time, clerical labour, constant delays arising from error in calculations, unavoidable in the intricacy of many of the items, and the immense multiplication of figures which have thus been created.

Thus the tax of ¼ per cent. on the Customs revenue is equivalent to little more than a fee of 1s upon every entry for payment of duty in the United Kingdom. Payment of all such fees was abolished about 25 years since, as being alike unwise and impolitic; but the tax as now levied requires special calculation for every entry, and the employment of a series of figures which, under the existing forms of business, have in each case to be repeated several times, thus causing an immense number of varying calculations for an income of little more than 50,000*l*.

The one penny stamp on units of entry is yet more intricate, vexatious, and obstructive, owing to their varying and complex application—in some cases including many packages in one unit, in others dividing one package into several units; so that it has been found necessary to establish "a tariff of units." Thus, while large sacrifices of revenue have been made to establish simplicity and freedom in the national tariff, this tax has engendered the necessity of establishing a small tariff, which brings its irritating and hindering powers into action upon every article, however unimportant or insignificant, of the imports or exports of the United Kingdom, frequently stopping the delivery and clearance of cargoes, involving delays, consumption of time, and obstructions to commerce, for which the revenue of 130,000*l*, raised upon the entire commerce of the country, is an utterly inadequate compensation.

Again, the penny stamp on delivery orders has been prolific in delays, contention, and difficulty of collection, raising nice points of law as to ownership, and from its nature constantly open to variation in its application; it is believed that this tax yields little more than 5,000*l* per annum, while its application has given rise to more annoyance and discontent than any other source of Customs revenue.

The threepenny tax on warrants (which appears to yield the small sum of 9,000*l*), although not liable to many of the objections which exist in regard to these other taxes, yet is found to be extremely partial in its application, being mainly paid in the port of London, in consequence of such documents being little used at the other ports; tending also to the gradual disuse of a most valuable commercial document. So also the tax on bills of lading proves in practice unequal, troublesome, and inquisitorial.

Your memorialists respectfully suggest that whatever taxation the State may require should be raised in the mode least onerous and annoying to the class from which it is to be obtained, and they earnestly hope that provision may be made for the abolition of these small vexatious duties in the forthcoming Financial Statement, as being alike annoying and obstructive to trade and commerce, without equivalent advantage to the revenue.

Agriculture.

WAGES IN HUSBANDRY.

To those who remember the state of the agricultural labour market in this country some years ago, the actual position of the agricultural labourer and the tone of all the discussions of the present day on wages in husbandry are satisfactory and hopeful. Then the problem was how to dispose of the surplus labour with which the rural districts, especially in the South and West of England, were thought to be encumbered. Then all kinds of devices for employing the surplus labourers, on the roads, by rotation on the different farms of each parish and otherwise, were resorted to. Now the question is how to obtain a sufficient number of hands when the work of the farm presses, and how to turn the labour of those labourers ordinarily employed to the best account. Last month the subject of discussion at the London Farmers' Club was "the several merits of day and piece work," in the course of which much light was thrown upon the present condition of the rural labour market. During the period of depression and abasement of the agricultural labourer which preceded the passing of the New Poor Law, piece work, which had been largely adopted by all farmers antecedently, fell into disuse. The farmer being compelled to employ more labourers than he wanted was never willing to set any of his men to work by the piece, and thereby to enable them to earn more money than the ordinary daily rate of wages. Now, again, the farmer has no object in avoiding piece work, provided he can secure the work being properly executed. Generally agricultural labourers are extremely honest and fair in doing their piece work properly, and wherever they are under a competent superintendence we usually find their piece work as well done as if they had been employed by the day, but some will unquestionably scamp their work, especially if the farmer or his managing foreman be negligent or incompetent. The greater vigour, however, with which agricultural labourers work at piece work—working as they then do for their own benefit—in most cases fully counteracts the tendency which may be assumed to exist to get over, rather than properly to execute, the job they have undertaken.

All these points were brought out first by Mr C. Howard in his lecture and also in subsequent discussion. Labour, as he truly said, is the largest item of outlay on a well-cultivated farm, and time is well spent in discussing the best mode of paying for that important article. "The want of knowledge as to the best mode of directing labour, and of the value of various operations in husbandry that manual labour has to perform, has been the cause of many a good man's downfall." It is indispensable to a farmer's success that he should have a practical knowledge of how much work a man can do in a day, and of the quality of the work when finished. This knowledge it should be the business of the young farmer to acquire while preparing himself for his calling. It is of no use trusting to help or advice from more experienced neighbours, he should learn how to do the work himself; then he will not only be aware of the prices he ought to pay, but of the quality of the work he has got for his money. Unlike the manufacturer, the farmer must always be compelled from the nature of his business to employ many of his labourers by the day. Feeding and attending to stock may be mentioned as instances. The elements too prevent the constant adoption of piece work in his field operations. "Again," says Mr Howard, "some farmers are situated like myself, with a good and well-conducted set of men whom they are disposed to keep all the year through; and at certain seasons when work is not very plentiful, there is no inducement to the farmer to set his men to piece work, which would have the effect of raising his weekly expenditure." Still he considers the system might be advantageously extended; and he always found that upon farms where piece work is generally adopted, the work of the farm is more forward than where the day system prevails. This is found also in the analogous cases of trades. There is also an opportunity of making a difference between a good and an indifferent labourer, by setting the one piece work and employing the other by the day, without exciting feelings of dissatisfaction in the mind of the inferior man. Having stated the results of applications he had made to farmers in various districts for information on the subject, he said: "I am justified by the correspondence I have read in stating that a well-adjusted system of piece work, particularly in busy times, appears to be approved by practical men. With the increasing demand for labour, with a decreasing supply in many parts of England, it behoves us as farmers to adopt a course by which to meet this state of things. The extension of piece work I hold will have this tendency. Our position differs materially from the farmers of a former generation. At the present day we have more expensive machinery, with well-fed teams to be kept going, a greater number of much more valuable animals to be tended, larger crops to be gathered, and *higher rents* to pay; we cannot afford, therefore, to have fellows crawling through their work as in times gone by. We must, like the manufacturers, have more activity if we pay more for it." And he said piece work enabled the farmer to perform all his operations more expeditiously, in better season, and with less supervision; that generally it is less expensive, payment being made only for work actually done; the workman is incited to industry by piece work, and it gives an advantage to the skilful and industrious man; and by placing higher wages within reach of agricultural labourers, it prevents them seeking other employments. One thing essential to a system of piece work is that the price should be fixed before the work is commenced, or with only a day's previous trial if the men desire one. In reference to the men, Mr Howard said: "I do not agree with those who speak harshly of the English agricultural labourers.....I have found in the main that those who are treated with kindness and consideration appreciate it, and evince their gratitude by taking a greater interest in their masters' concerns.....But we must not forget that neither charity, philanthropy, nor other good feelings of the same class, will enable farmers to pay labourers good wages; nothing but good profits will, in the long run, enable us to do this; and good profits can

only be obtained by a close adherence to the well-known maxims and laws of business."

All this is eminently satisfactory as a practical exposition of sound views on the part of farmers, and as indicating hopeful prospects for their working men.

Mr H. Trethewy said: "It had been objected to piece work, that it required much more supervision than day work. For his own part he was of a contrary opinion. He thought it was much more easy to check piece work than day work." And, though higher wages were earned at piece work by the labourer, the farmer would get his work done more cheaply. Mr Spearing said there was very much work on the farm which would only be done by day work; and though he was aware of the desirableness of having as much work as possible done by the piece, he found, on referring to his labour book, that last year out of 800*l* he paid for labour, 300*l* of it only were paid for piece work. "He had no hesitation in saying that a practical farmer who was a judge of his business had no difficulty in obtaining a fair day's work for a fair day's pay." Mr Coleman pointed out that piece work was not so easily adopted on small as on large farms, and that the labourers were sometimes reluctant to take piece work. They must be, of course, offered the opportunity of earning more money than they could do by ordinary day work. Mr Thomas had found the labourers on his farm when he entered it unwilling to take piece work; they said, "they were not accustomed to it, and did not like it." He, however, insisted that others must be found if they would not work by the piece, and now they had fallen into it, earning more money than formerly, and requiring less supervision. Men who formerly earned on his farm only 10s a week by day work, now frequently earned 15s a week by piece work.

Mr Bradshaw said, wages in his own parish had risen from 9s to 12s per week, and last year the able-bodied labourers on his farm had earned 13s 8d a week. "One result of such an improvement was the raising of a superior class of labourers—a class of men who were not seen in his district (Surrey) fifteen years ago." Piece work tended to improve their physical condition.

Mr James Howard, implement manufacturer, testified to the advantages of piece work, and the extension of that system could alone avert the migration of labourers from agricultural to other employments. It should also be remembered that labourers when at piece work, making greater exertions, required more food to maintain them. It is also the fact that men habitually employed at piece work made but indifferent day labourers. Mr Sidney said, several visits he had made to the country confirmed all he had heard that evening, the impression "that the moral character and general position of the labourer had greatly improved; and that the carrying out of the sentiments expressed that evening would aid the work of improvement."

We commend to the landowners of England the indications of progress on the part of both farmers and labourers the preceding extracts manifest, with the expression of a hope that they, the proprietors of the soil, will be no longer laggards in the race, but will regard the present position of husbandry with business eyes rather than as game-preservers or party politicians.

Literature.

COMMERCIAL LITERATURE.

Une Dette Espagnole. Par Henri Mathorel. Paris: Librairie Nouvelle, Boulevard des Italiens.

This is a fair and temperate claim on the Spanish Government that the obligations contracted towards the holders of the Passive Debt in 1851 and 1855 should be fully carried out. M. Mathorel, in commenting upon a petition presented for that purpose from French capitalists, points out that since the introduction of the railway system to Spain, mainly, he says, through French capital, the resources of the Peninsula have been rapidly augmenting, and Spanish stocks have been steadily increasing in value. The credit of the Government has thus been raised to a higher point than that at which it stood for years, and it is urged that a more faithful recognition of the claims of the Passive Debt will prove of even greater importance by removing the last default arising from her previous embarrassment. This, however, is not exactly correct, M. Mathorel being in error when he supposes that the London Stock Exchange is closed against any new Spanish securities on the ground that the Passive Debt holders have been unfairly treated. The reason of the prohibition has nothing to do with the Passive stock; it is that on the arrangement of the debt some years ago the Government deliberately confiscated one-half of the dividends in arrear, by forcing the acceptance of bonds of 50*l* for accrued interest amounting to 100*l*. The Committee of the Stock Exchange at that time gave to the injured holders certificates of the coupons not funded, and on the redemption of these certificates, either by payment in full, or by a compromise to be agreed upon, the present prohibition will cease. Spain has thus another class of creditors besides the holders of the Passive Debt to whom she is bound to do justice.

GENERAL LITERATURE.

Tchinovnicks: Sketches of Provincial Life, from the Memoirs of the Retired Conseiller de Cour Stchedrin (Saltikow). Translated, with Notes, from the Russian, by Frederick Aston. L. Booth, 307 Regent street.

A very able article in the January number of the "National Review," on "Tests for the Public Service," points out, among other grave objections to "open competition," the danger of its exposing us to "that mean continental malady from which hitherto we have been almost free,"—to that place-hunting, namely, which from the highest to the lowest saps the public spirit, independence, and self-reliance of a people. "It is worth while," the reviewer goes on to say, "to give one thought to the possible consequence of establishing virtually, for the first time in England, an organised Bureaucracy." If anything were needed to convince us of the advisability of giving not merely one but many thoughts to the danger of such a "possible consequence of proposed alterations in the method of supplying our Civil Service," we have only to turn to Russia, where we may see the working of a great organised Bureaucracy fully displayed, and read in such works as this of M. Stchedrin what the Russians themselves think of the "hated class," "the festering sore that has spread over the length and breadth of the land," to use the emphatic words (whose strength is however justified by the reality) of M. Stchedrin's translator.

It has long been the policy of the Russian Government—(perhaps among other happy reforms the present reign may witness a deviation from it)—to counterbalance the power of the landed nobility by fostering a wide-spread and highly-organised body of men, who should be everywhere influential and everywhere devoted to its interests. In this it has succeeded; with the one drawback that it has become itself, in great measure, enslaved by the very tool it has created. For this end it has swelled the ranks of the army and civil service at the expense of the more independent industry of the nation, till at length, among a peace-loving and mercantile people, "the civil or military profession is coveted by every one." A large number of men from the lower ranks, ambitious of rising and unscrupulous as to the means, find in the service of Government the readiest road to success. Salaries, it is true, are low, but opportunities of "taking" are numerous and safe;—the regular grade of ranks that must be passed through and the universal corruption of the service render merit of little consequence compared with the facility of a Tchinovnick in the arts of flattery and bribery;—his repute outside his own body does not much affect him, since he has learnt to look down upon the unofficial public, from the superior heights of office, with calm indifference, and to regard "*les autres*" as merely tribute-payers to his greatness;—his sole aim, in most cases, is to rise into a higher "tchin"—the very word, in its Eastern ring, is suggestive of bribes—or rank, and in the end to attain to the serene and honourable haven of an income "entirely without a stain," when, receiving the accustomed presents through the medium of his subordinates, and asking no questions, he is free from direct acts of taking, and from the harassing possibility of being one day offered up as a scape-goat to some official investigation from headquarters, or some fit of insane virtue in a newly-appointed superior.

The point of view of an enlightened Tchinovnick, who has attained this beatific state, as well as the quiet cutting sarcasm of M. Stchedrin's style, are well represented in the following passage. The affectation of French phrases would seem to be a necessary mark of refinement among certain classes in Russia. "*Mais vous parlez Francais*," exclaims a great personage in delight, when in a provincial ball-room he is accosted by a subordinate in this curious bastard language of fashion:—

"If you think that we have anything to do with this dirt, *avec cette canaille*, you are very much mistaken. For such work as that, there are clerks, and other people; it is their duty, and they were created for it. *We* have all been too well-educated, we have studied different sciences, we have a fancy that everything about us should be clean, and we have such orderly views with respect to administration—you must allow, that *comme il faut* prevents us from dirtying our hands. A fellow like Ivan Petrovitch, the doctor, or Police Master Feuer—that is understandable; he was bred and born so; but we are cast in a very different mould, we wish our formula to be clean, and our reputation kept up. *Vous comprenez.*

"I repeat to you, that you are much mistaken if you think that I send for a *monjick*, and begin to flog him with my own hand—fie! you have forgotten that he smells: by heaven he does!.....Besides I don't quite wish to give myself so much trouble. I simply call a clerk, or somebody or other of that stamp, *et je lui dis*: '*Mon cher, tu me dois tant et tant*,' and the business is done. How he manages never comes to my ears.

"I myself cannot bear bribery; fie, abominable! It is only the Feuers and the Triascouchkins who take bribes; we look at the matter in quite a different light; with us, there are no bribes, everything is administration; I only demand what is *due*, and I have nothing to do with the manner of getting it. My duty is merely to count up the different heads; to see, for instance, whether there has been any cattle driving, any road tax, or recruiting, and so on. *Tout cela doit rapporter.*"

The mystery of the latter phrases is easily solved. If by chance one out of a dozen of cattle dies, an inquiry is put on foot as to infectious disease, and the owner is not allowed to continue his journey without a clean bill of health; this is not gained without

long delay or "roubles." The choice of well-to-do persons for the conscription is of course a ready means of extortion to the Tchinovnick.

It is of this class, not amiable in itself, and seen in its worst light perhaps in the provinces, that M. Stchedrin writes. The Emperor has himself owned the merit of these "Provincial Sketches," if the story be true, that when the book was sent for his condemnation he returned it, with "the remark that he had read and been amused" by it; they are generally received in Russia as "severe because true satires;" and they have about them an air of truthfulness that adds to, while it vindicates the repulsiveness of the pictures of social life they give. We have seldom, indeed, read a more disagreeable representation of human nature. "Man pleaseth me not or woman either," we may truly exclaim as we close the book; and yet the impression it leaves of the mass of the Russian peasantry is not unfavourable: patient, good tempered, submissive, industrious, believing in the Czar with a child-like reverence which Alexander II., at least, is doing something to deserve. Their chief vice is intoxication, their chief defect a stolid ignorance, at once the cause and the effect of their degraded position. When the measure for their emancipation shall have taken effect, and time has been given for them to realise the novel sense of freedom, a spirit will be roused in these trodden-down and disheartened millions that will penetrate all classes, and make the present an epoch even more important in the history of Russia than when she was moulded into the semblance of European civilisation by the genius and despotic will of her first Peter.

The state of society in the Southern States of America, and, though with considerable differences, in Russia, are striking illustrations of the fact that no true civilisation can be founded upon a people systematically debased and enslaved; no real enlightenment of the few coexist with the degradation of the many. Nothing has struck us more forcibly in reading these "Sketches" than the superficial character of Russian refinement. Beneath the gloss, the French polish of the higher ranks, there lurks a poverty and barrenness of mind, a narrowness of idea, and even sometimes a barbarism akin to that which lies uncared for and despised among the lower—a barbarism deep at the roots of the nation's life. We are reminded of the brilliancy and luxury of St Petersburg built over a stagnant marsh, where a few stones torn up in its most imposing streets would reveal the sullen waters below. And as in the wealthy and fashionable quarters of the town such an unpleasing sight is rarely seen, a sound pavement making all solid and clean to the eye, but in the less frequented or less respectable parts it is of not very unfrequent occurrence; so provincial life reveals, what is hidden beneath the gaiety of the capital, to how very small a depth the influences of education and of refinement extend, even in some of those who from their rank and position have been most favourably exposed to them. As an instance of this, we may cite the story of Princess Anna Loovna, a gay lady visiting in a small town, where her father has "rested from the troubles of the world" in a lucrative post in the Civil Service. The coarseness and ignorance that pervade the whole society of this town of Krutogorsk is painted in lively colours by the writer in his assumed character as a Tchinovnick. It does not impress us favourably as to the advantages of a country-town residence in Russia. It would not be easy to match the following scene in any other continental or English ball-room:—

Meanwhile the dances follow in wonted order in the ball-room. The Protocolist of the Orphan Court excels himself; he dances at the top and at the side, because there are twice as many ladies as gentlemen, and everybody wishes to dance. Consequently the gentlemen are obliged to dance the same figure with two different ladies.

"Pnui, I am all of a sweat," says the Protocolist, wiping off with his handkerchief the drops of perspiration which stood upon his forehead. "Dimtri Borisitch, if you would only treat the dancers to a little brandy. You see, this is downright death! Not even galley slaves would stand such work!"

"No, no!" answers Dimtri Borisitch, waving his hands. "What, do you want—you, to make a beast of yourself again, as you did the other day? When His Honour is gone, you may drink a whole decanter full, if you like. Hey, musicians!"

The music strikes up, but it is not easy to bring the dancers to reason. They stand in the middle of the room in a square, take counsel among themselves, and determine not to dance till the just demand of the Protocolist has been complied with.

"What a shame this is! If they'd only give us *something to cool* ourselves with," says the Protocolist.

"Don't dance, brothers, and there's an end of it," insinuates the ringleader of the council, Peter Triascouchkin.

"We won't dance!" re-echoes from all.

The great agitation continues. The Police Master's wife hastens to inform her husband that the officials are mutinying, are demanding brandy, but brandy they must not have; for only a few days ago at the Judge's, the *chef de bureau* Podgenyaichikoff, was so far gone in drink that he even imagined he had gone home to bed, and began to undress before everybody. Dimtri Borisitch runs off to reprove them.

"Fear ye not God, ye pigs?" says he. "Know ye what an individual is amongst you? Do you really think I grudge the brandy? Do you understand?"

"Pooh! what's brandy to us? but it's quite impossible for us to dance."

"But why impossible?"

"Why! because it's such a trouble!"

"Gentlemen! Ivan Perphilitch, my dear fellow; come, you are a reasonable man! Cool yourself for once, like a man of breeding! You are not well. Then drink water, or look out into the street—but brandy! I don't look to that, Ivan Rerphilitch. What's brandy to me? God bless you! to-morrow morning I'll treat you all to a couple of glasses a-piece—on my word—but you must hold hard now, and there's an end of it! Hey, musicians!"

This time, the persuasive words had their effect, and the quadrille was formed somehow or other.....When eleven o'clock strikes His Honour takes up his hat. Dimtri Borisitch is in despair.

"Your Honour, be good enough, do not refuse to take a little something," he utters in a transport of devotion, almost venturing to touch His Honour's hand.

Alexis Dimtrich is evidently moved. But, notwithstanding this, his will is immutable. His head aches; he has had so much work to-day; he must get up early to-morrow; and so on.

"Thanks, Mr Jelvakoff, thanks!" says His Honour. "You have done well in making efforts to keep people together! I shall bear this in mind Mr Jelvakoff." And he leaves the "abode" with slow steps.

Having put His Honour into the carriage, as was his duty, Dimtri Borisitch Jelvakoff returns to the ball-room, and presses both hands of Michael Trophinitch for a long period.

"Thank you," says he, affected to tears; "thank you. Had it not been for you——hey, brandy!" he roars out, perfectly unexpectedly.

Mr Aston has not given us the whole of Mr Stchedrin's "Provincial Sketches," but selected such only as seemed best to illustrate the various aspects of Tchinovnickism, connecting them together by explanations and remarks of his own, drawn from a long residence in Russia. His concluding chapter on the emancipation of the serfs is of peculiar interest at the present moment.

LECTURES CHIEFLY ON SUBJECTS RELATING TO LITERARY AND SCIENTIFIC AND MECHANICS' INSTITUTES. By H. WHITEHEAD, M.A., Curate of Clapham; T. C. WHITEHEAD, M.A., Incumbent of Gawcott, Bucks; and W. DRIVER. Bosworth and Harrison.

NOT much more need be said of the subjects of these lectures than is said on the titlepage. Most of them are upon, and all of them appear to have been delivered to, book societies, working men's discussion societies, and similar associations. The former will be particularly interesting to those who are engaged in the *getting up or management* of such societies, as they contain much sound and sensible advice, derived from the experience of educated, thoughtful, and thoroughly practical men; while all of them are full of wise hints and valuable anecdotes for the friends and members of such societies. This is of course the portion of the public to which they are more especially addressed, but the lecturers are men so earnest in their work, the lectures are so direct, simple, and lively, and so full of illustrations drawn from busy, working life, that they may be read with pleasure and profit by everybody. We could not help fancying, in reading some of the anecdotes, how they would go home to the hearts of many of the good people that heard them, rivetting there, perhaps for life, some important truth or moral lesson. A man might talk very finely and very philosophically about the way in which children should *not* be brought up, without making the impression, and conveying the gentle reproof, which homely minds would receive from the following anecdote:—

I am afraid a great many parents view their duties and responsibilities in much about the same light as one man with whom I had a short conversation some months back. He was complaining that his son was so unruly he could do nothing with him: and he added, in a manner which told me that he thought his conscience could not reproach him for neglect, "I am sure I don't know what to do with him; I have been a good father to him, for I've hided him whenever he wanted it."

In the lecture on the Life of George Stephenson, in which this anecdote occurs, there are some very sensible remarks on the shallow and mischievous "moral" frequently deduced from the lives of men who have raised themselves to eminence. The lecturer says:—

I have referred to a very mischievous practice most persons adopt when addressing young people, of urging them to fit themselves to rise into a higher state of society. I call it mischievous, because one class cannot export itself wholesale, or even in considerable numbers, into another class in that way, and it would not be right if it could. It seems to be an indirect way of admitting that a lad has fallen upon hard lines because a life of labour is before him, and that work is to be escaped from as soon as possible. Such advice is often taken in a way it is not intended it should be; for instances are only too common of boys refusing to work, and getting their living in a less honest and more easy manner. It would be far better to be faithful, and to tell them that work *is* honourable, and to be liked for its own sake, that only a very few of them can expect to be any other than workmen, and that to the man who has but an average amount of skill and the mind to exercise it comfort and happiness are always within reach.

Here, again, is a very humorous and doubtless most seasonable anecdote from a lecture read at a discussion society:—

I very well remember seeing a man in a mixed company become quite an authority by the sheer force of holding his tongue. It was down in the forecabin of a Ramsgate steam-boat. A number of persons were there, arguing and discussing on various subjects. Nearly every one seemed prepared to take a side at a moment's notice. There was one man however who happened to be sitting in a prominent place, and never removed his pipe from his mouth unless when appealed to, and then he invariably made the same remark, "Well, there's a good deal in that." Now it is a literal fact that this man became in this way a sort of chairman in that company. He was appealed to on all sides, and never said

anything but, "Well, there's a good deal in that." If you ask how it came to pass that such a man came to be of any consequence at all in such an assembly, I answer, as an eye-witness and as being much interested in the phenomena which then came before my notice, that the whole tone of the man, as one evidently slow to make up his mind and to all appearance ready to attach weight to argument from every side, did really present a refreshing contrast to the disputatious dogmatism that was going on all arround him.

It is no little thing for a "Working Man's Institute" in Soho to hear such sound truth as this respecting the ultimate effect of public improvements on the dwellings of the poorer classes—truths which, it seems, may now and then escape the perception of an ex-premier:—

And yet, whilst we rejoice in Ingestre Buildings, one cannot help asking, What became of all the poor people of the old block? Did they get all the more huddled together somewhere else? This is a question often asked in reference to similar improvements, and never, so far as I know, satisfactorily answered. The only consolation is that sooner or later such improvements must reach even them. There are two ways of benefiting the masses. One is to begin with the lowest, hoping to work upwards. The other is to begin higher up, trusting to work downwards by degrees. It is right that both should be tried. Perhaps the last produces the best effect in the long run. One almost immediate consequence o. Ingestre Buildings was that most of the surrounding houses did certainly get somehow or other improved inside and out, and Tom Rice at least got as far as doing up the outside of Husband street.

The lecture on "Lending Libraries," by the Rev. H. Whitehead, is rich in valuable data as to the intellectual tastes and habits of working people, but we must refrain, though tempted, from quotation. As far as lectures can do people any good, these are the sort of lectures to do it.

THE UNDERGROUND RAILWAY FROM SLAVERY TO FREEDOM. By the Rev. W. MITCHELL, of Toronto, C.W. William Tweedie, 337 Strand.

Mr MITCHELL, who pleads in this little book the cause of the fugitive slave, is himself a man of colour, but one who has never personally suffered under slavery. By a law of the United States the descendants of Indians are free, and his Indian mother saved him from the fate he would have inherited on his father's side. His evidence is therefore the freer from the exaggeration almost inseparable from the remembrance of personal wrongs; while his birth, his education, his employment for many years as an overseer on a large plantation in North Carolina (his native State) have given him every means of knowing the real position of his enslaved brethren, and his subsequent positions as a *station* on the Underground Railway, and as a missionary among the fugitives in Canada, have supplied him with the tales of hairbreadth escapes, of courage, endurance, and generosity on the part of the escaping slave and his protectors, that form the staple of his book, and lend it an interest of its own irrespective of any ulterior aim.

In the motive for its publication, however, lies its chief claim to the favourable notice of the public. Among the number of men, women, and children who reach Canada exhausted, starving, and almost naked, bringing with them in general nothing but the careless and improvident habits, the ignorance and disinclination for labour, that are the natural fruits of slavery to the enslaved, there cannot fail to be much poverty and distress, and a real inability to provide for themselves the necessary means of instruction. For this reason, moved by the wants of his growing congregation at Toronto, Mr Mitchell has visited England in the hope of raising funds for the erection of a chapel and school house by means of lectures and the help of friends. This book is an attempt at the same end. It has already reached a second edition, and will, we trust, meet with the success that the zeal and disinterested devotion of its writer deserves.

In itself it is what one might look for from a self-educated man whose whole mind is absorbed in one topic, and who has become accustomed to use the flowery language and somewhat spurious eloquence of the platform. It is in its facts that it excites our attention and interest. Twelve hundred fugitive slaves, it tells us, take refuge year by year in Upper Canada, where the number has increased to 45,000. The majority of these fugitives are now employed in agriculture, not from choice so much as from necessity; the natural leaning of the negro being to settle in villages or towns, and to live from hand to mouth with as little labour as possible. It is, however, encouraging to hear from one who knows as much about them as Mr Mitchell has the means of doing, that they are, on the whole, neither idle nor unprogressive. "I am decidedly of opinion that no people could do better under similar circumstances than the fugitive slaves and the coloured population are now doing in Canada. I often think many of the friends of the negro race expect too much in so short a time from the emancipated. The growth of a nation is slow, especially when degraded as the African race *is*. The nefarious system of slavery has entailed upon them almost inconceivable evils, which it requires generations to eradicate, and these are only the first generation."

Mr Mitchell's account of the working of the systematic plan for helping fugitives, called the Underground Railway, is curious. The slaves brought to his house in nineteen months numbered no less than 265 by one individual alone. This was an escaped slave who made it his business to help others on their first stage of their journey northwards. He was eventually captured, and sold at new Orleans; yet in less than two years he was again in Canada. Where the love of freedom has once been roused, no difficuties, no suffering seem sufficient to secure a slave from escaping.

We cannot refrain from quoting the following anecdote as a proof that the negro, under tolerably favourable circumstances, is not deficient in intelligence or in a spirit of manly independence, although our remarks have already run to a length somewhat disproportionate to the little work under our notice.

There is, it appears, a class of men in the United States who make it their business to buy up runaways at a low price, taking their chance of a large profit if they are successful in the capture. "In this way Mr Godwin purchased a slave called Zeke."

Mr Godwin came to Philadelphia, and called on Isaac T. Hopper, a strong Abolitionist, as to the whereabouts of this Zeke. While talking with Mr Hopper, up came a black man, who paid the utmost attention to the conversation: when finished he said, "How do you do, Mr Godwin? don't you know me?" He answered that he did not. "Then you don't remember a man that lived by your neighbour Mr ——?" continued he. When he specified the time and some other particulars, he said he did recollect such a person. "Well," answered the black man, "I am he, and I am Zeke's brother." The speculator inquired if he knew where his brother was. "Oh yes, Mr Godwin, but I am sorry you have bought Zeke; you'll never make anything of him." "Why, what is the matter with Zeke?" "When such fellows as my brother come to Philadelphia they get into bad company; they are afraid to be seen almost in the daytime, and they go prowling about at night. I am sorry you have bought Zeke; he is just such a character, though he is my brother." Mr Godwin, thinking it was rather a bad case, said, "Suppose you buy Zeke?" "I should have to maintain him if I did," replied the black man. "Suppose however I should, what would you take for him?" The trader asked 150 dollars, which the black man most decidedly refused to give; however he came down to sixty dollars. The black man went out, and soon returned with the money. Mr Hopper, the Abolitionist, drew up the deed of purchase, and when duly signed the black man said "Zeke is free?" "Yes," said Mr Godwin. The black man, not believing the trader, turned to Mr Hopper the Quaker, saying, "Zeke is free, nobody can take him: can they, Mr Hopper?" Mr Hopper replied, "Wherever Zeke is, I assure thee he is free." Being thus assured, the black man made a low bow towards the ground, and with a droll expression of countenance, said, "I hope you are well, Mr Godwin; I am happy to see you, Sir. I am Zeke!" The trader seized Zeke by the collar, and began to threaten and abuse him. Zeke said, "If you don't let go, Mr Godwin, I'll knock you down; I am a free citizen of these United States, and won't be insulted by anybody." Zeke was taken before the magistrate, who, after hearing the particulars, said to Mr Godwin, "Zeke is as free as any one in this room, and you have been outwitted."

THE DUBLIN UNIVERSITY MAGAZINE. No. 340. April. Hurst and Blackett.

THIS is rather a dull number of the "Dublin University Magazine." The lesser articles, with the exception of that on "The Work-a-day World of France," are poor; the poetry, and criticisms on poetry, especially poor; while the three principal articles are not sufficiently good to redeem the whole from falling beneath the average mark of this, in general, well written-magazine. Of these, the first is a studiously temperate remonstrance with Dr Williams for his share in the much-canvassed "Essays and Reviews." The writer, we think, has scarcely met Dr Williams fairly on his own ground, or faced the real question at issue between them. "Income Tax Grievances" defends the present mode of levying the tax against the proposed reductions upon professional or business incomes. The writer has carefully collected and fairly stated all the arguments that can be produced on his side of the question. "The French Navy in 1861" is, perhaps, the most important paper in this number, yet it owes this priority far more to its subject than to its own deserts. It is simply a careful review of M. De la Tour's recent article in "La Revue Contemporaine" on the French Marine Service; valuable as spreading a wider knowledge of the state of the French navy, and the ideas of French statesmen with respect to the naval supremacy of England, but containing nothing of any value separate from the work upon which it comments.

FRASER'S MAGAZINE. April. Parker and Bourn.
THE CORNHILL MAGAZINE. April. Smith and Elder.
MACMILLAN'S MAGAZINE. April. Macmillan.
THE TEMPLE BAR MAGAZINE. April. Temple Bar office, Fleet street.
THE ST JAMES'S MAGAZINE. No. 1. April. Saunders and Otley.

THE monthly magazines multiply rapidly, and seem to pay. Of those placed at the head of this notice all but one are barely a year and a half old; one, half a year old; and one only a month old. The only one of any antiquity is "Fraser's," which has lost some of its interest for us in the termination of Mr Peacock's quaint and characteristic novel "Gryll Grange," but it is ably conducted, and its political articles are thoughtful and written in a high and pure tone. The opening article on America is high-principled and good, and the rest of the magazine is of an average cast for "Fraser,"—though of a high one for the monthly magazines in general.

The "Cornhill" for this month concludes "Framley Parsonage," which has been its most delightful element since the first birth of th magazine. Mr Trollope henceforth vanishes from its pages and conducts a periodical tale of his own. There is an admirable paper on "The Irish Convict System," and some others of con-

siderable merit. Mr Thackeray is as cynical as ever; his tale will scarcely supply the *hiatus* which Mr Trollope leaves.

"Macmillan" is also good. There is an excellent instalment of "Tom Brown at Oxford," and of Mr Henry Kingsley's "Ravenshoe;" and a painful but very interesting paper by Miss Cobbe on English Workhouses.

The "Temple Bar Magazine" can scarcely be said to improve. Mr Sala, clever as he is, is in a more and more exaggerated degree "of the street, streety," and his view of life as superficial and disagreeable as a "streety" view of life necessarily must be.

But the "St James's Magazine" seems almost as frivolous as the "Temple Bar." Except a paper on Miss Nightingale and her Nurses, and another on the scientific origin of the discovery of the new purples, *Mauve*, *Magenta*, &c., there is little of any pretence at usefulness in the magazine. The new poem by V. is poor,—and the tales are not of the highest literary description. The magazine will probably succeed, but will scarcely deserve to do so.

---

1. Hand-Book of Natural and Experimental Philosophy. Illustrated with Ninety Diagrams.
2. Hand-Book of Amusement and Instructive Experiments.
3. Hand-Book of Elocution and Oratory. London: Cassell, Petter, and Galpin; and Park buildings, New York. 1861.

The information contained in this cheap little "Hand-Book of Natural Philosophy" is of course scanty, but it is told with clearness and ease, and may prove useful to many working-class students, whose time and means are limited. The "Hand-Book of Experiments" is full of materials for ingenious amusement of all kinds. The "Hand-Book of Elocution and Oratory" contains much excellent advice to novitiate speakers "how *not* to do it," and is so far useful. But the suggestions as to what *should* be attempted are largely tainted with a conventionalism which we greatly dislike. The writer seems to see no moral difference between those cases in which the speaker is understood to be personating another, as on the stage, and those in which a man utters his own thoughts or feelings on public or semi-public occasions. For the latter case, no less than for the former, we are here supplied with directions for the simulation of a manner suited to the occasion by conscious and elaborate foresight. For instance, if you have to speak at a wedding breakfast, "above all, let your face be full of smiles, and your whole manner demonstrative of the utmost concern for the future happiness and welfare of the newly-married couple." For the speaker at a funeral, "there should be an assumption of reverence in his whole bearing," "his words should apparently come from the very well-springs of his feelings," and "there should also be an uneasy tremulousness in his speech, to denote how deeply the orator is moved." We thought Dickens and Thackeray had sufficiently shown up this sort of cant long ago, and are sorry to see it revived.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

A reduction of the rate of discount of the Bank of France was expected to-day, but none was announced at the Bourse. It is probable, however, that the telegraph will inform you of one, especially after the new reduction which has taken place at London.

As was inevitable, the Bill for abolishing the sliding scale on corn, and imposing a fixed duty on imports, encounters much opposition, on the ground that it will ruin agriculture, &c.; but it will pass the Legislative Body in the form in which it has been presented by the Government, and the objections made to it have been so often refuted that they are not worth attention.

It appears from the Amiens journals that some sensation was lately caused in that city by a report that in the commercial treaty about to be concluded with Belgium, the duties on Belgian cotton fabrics and on certain descriptions of cotton yarn imported into France would be lower than those on imports from England, and that consequently the duties on such English articles would have to be reduced to the same figure, article 19 of the treaty between England and France stipulating that "each of the two contracting powers engages to allow the other to profit by any favour, privilege, or reduction of tariffs which may be accorded to a third power." But one of the local journals, the *Memorial*, affirms that "the Emperor has given a formal assurance that the tariff for Belgian goods is the same in every respect as that on English productions."

The Tribunal of Commerce has, as was expected, decreed the dissolution of the Company of the Caisse Generale des Chemins de Fer of M. Mirès, and it has done so, as the judgment says, in consequence "of the Company not being able to continue the operations for which it was established, owing to the diminution of its capital and the situation of its *gerants*." The Tribunal has at the same time charged two men of business, M. Bordeaux and M. Richardière Goame, to wind up its affairs. In consequence of the dissolution, Count de Germiny, Governor of the Bank of France, has ceased to have anything to do with the enterprise. The judgment of the Tribunal has caused general satisfaction; as in the first place, it is in accordance with the regular form of business, and in the next is for the interest of all parties. A hope is entertained that the Caisse may escape being declared bankrupt; but that its shareholders and creditors will have to suffer rather severely is considered probable. As regards the Roman Railway Company which was got up by Mirès, and which is involved in the Caisse Generale, an attempt is to be made to continue it. To complete the lines which it has undertaken to execute would, it appears, require about 125,000,000f in addition to the 100,000,000f already disbursed; and it is proposed by interested parties that the sum shall be raised in this way: first, to take 8,000,000f, which it appears the Caisse General was to restore to the Company; next, to obtain 17,000,000f by the issue of shares which had been reserved; thirdly, to procure a like sum by making the shares already issued pay another 100f each,—in other words, to have the nominal value of the 500f paid up, instead of, as Mirès did, regarding them as "liberated" on the payment of 400f; and lastly, to raise the remainder of the 125,000,000f by an issue of bonds at a figure sufficiently low to tempt the public.

The Directors of the Eastern Railway announce that in the approaching annual meeting of shareholders they will propose to fix the dividend of 1860 at 40f. A sum of 20f has already been paid on account, and the remainder is to be paid from the 1st May next.

Notwithstanding the political anxieties which have prevailed since the beginning of the year, the situation of French railways is very satisfactory. They all, for example, present an increase, some of them a marked one, in receipts, for the first quarter of this year, compared with the corresponding period of last year. The augmentation in the Lyons line has not been less than 509,057f, that in the Orleans 2,067,062f, Eastern 1,580,660f, Southern 1,397,270f, Western 364,151f, Northern 297,026f, Geneva 259,812f, Bourbonnais 267,051f, Dauphiné 116,512f, Ardennes 70,322f.

The Directing Committee of the Owners of Fishing Boats and of Fishermen of Boulogne-sur-Mer has just made a remarkable demonstration in favour of a liberal commercial policy. They have published a document which argues that, as the English fishery has flourished under liberty, liberty would be advantageous to France, and they demand:—1. The repeal of all the laws and decrees which limit the fishing trade; 2, the repeal of all the "preventive measures" existing in that trade; 3, complete liberty of fishery as a branch of commercial enterprise; 4, the admission of salt free of duty for salting fish on board vessels, and permission to salt at all epochs on board; 5, the admission of salt free of duty from all countries and in unlimited quantities for salting ashore; 6, to obtain from England equitable concessions as regards the fishing limits reserved by the Convention of 1839; 7, the total and immediate suppression of the reserved limits on the coasts of France; 8, the intervention of the Government to obtain the reduction of the charges for conveyance of fish inland, of the duties on the sale of it, and of the octroi duties on it; 9, an active *surveillance* of fishery, so as to prevent the purchase of fish already caught from foreign vessels at sea; and lastly, the free admission of all sorts of nets. These demands show against what terrible obstacles French fishermen have hitherto had to contend.

A return of shipping of the port of Havre may be interesting at this moment. It sets forth these results:—

	Entered.		Sailed.	
First three months of	French Vessels.	Foreign Vessels.	French Vessels.	Foreign Vessels.
1861	992	420	1030	412
1860	994	484	972	452
1859	1052	395	1180	456

The movements of the Bourse during the past week have not presented anything remarkable, and the following is the result:—

	Thursday, April 4.	Thursday, April 11.

The following is an account of the markets:—

FLOUR.—The quotation at *Paris*, yesterday, was 69f to 74f the sack

of 159 kilogs, and the four marks were 71f 25c for disposable, 71f for the current month, 71f 25c to 71f 50c for May and June.

WHEAT.—At *Paris*, yesterday, business was calm, and the quotations were 38f to 40f and 40f 50c the sack of 120 kilogrammes. Of the provincial markets, 30 present a rise of from 10c to 1f 35c the hectolitre, 77 a fall of from 10c to 2f; 17 are reported firm, 27 without variation, and 25 calm.

COTTON.—The sales at *Havre*, in the week ending Friday, were 9,636 bales, and the importations 16,728. Closing prices remained unchanged: low New Orleans 99f the 50 kilogrammes, and very ordinary ditto 104f. The stock on the 1st of the present month was 263,870 bales. This week, a fair amount of business has been done, and low New Orleans has risen to 100f.

SUGAR.—In the week ending Friday, at *Havre*, a fair amount of business was done. 832 casks French West India went at 49f to 49f 25c the 50 kilogrammes duty paid; 1,096 casks Havana, at 36f 25; 2,000 ditto expected, 38f; 113 casks Porto Rico, 52f; and 185 casks and 32 sacks Rio, 34f. The arrivals were 4,700 sacks Pernambuco (which, however, were despatched to Marseilles), nearly 2,000 casks French West India and Havana, and upwards of 5,000 casks Mauritius. The stock of French West India on the 1st of this month was 4,534 casks. This week, French West India has been at 49f and 49f 50c, and for choice 50f; San Yago, 52f; Havana, 37f; Reunion, 53f; Mauritius, 32f 75c; Bahia, 35f 50c to 36f 25c. At *Nantes*, last week, transactions were extremely important: 22,715 sacks Reunion, at 52f 50c; 9,716 Mauritius, 42f; 4,000 Havana, part at 38f 50c, the rest crystallised at 51f and 52f. This week, some lots of Reunion have been sold at prices not stated. At *Bordeaux*, last week, about 400 casks French West India went at 49f 50c to 50f; 1,133 bales Reunion, part at 53f, part at prices not stated; a small lot of India, 57f 25c. This week nothing of importance has been done. At *Marseilles*, last week, 5,000 bales Reunion went at 53f to 55f 50c.

COFFEE,—At *Havre*, in the week ending Friday, the sales were 100 sacks Hayti Port-au-Prince, 80f to 80f 50c the 50 kilogs in bond; 94 Jeremie, 79f; 235 Cayes, 78f; 300 Gonaives, 82f 50c to 83f; 250 Saint Marc, 82f 50c; 315 Rio, not washed, 68f; and 120 Porto Rico, 87f. In addition, some lots of damaged Rio and Hayti were sold. The arrivals were about 9,000 sacks. The stock in bond on the 7th of the present month was 6,591 tons. This week, some Rio has been sold at 66f to 82f; some Guadeloupe *bonifeur*, 140f; ditto *habitant*, 133f 75c to 135c; also various lots of different sorts of damaged. At *Nantes*, last week, two small lots of Reunion *feve pointue* went at 129f to 130f. This week, there were no sales. At *Bordeaux*, last week, business was calm. 400 sacks Guayra *non grage*, at 89f; and 70 Rio, not washed, 76f. This week, some Guayra, Rio, and Ceylon plantation have been sold, but the prices are not given. At *Marseilles*, last week, 3,200 sacks Guayra went at 87f to 92f; 1,000 sacks Rio, at 63f to 72f. Various lots of different sorts of damaged were also sold. This week, some damaged Hayti has been sold; and also a quantity of Guayra sound at 88f to 93f.

INDIGO.—At *Havre*, in the week ending Friday, only 11 cases Bengal was sold, and the prices of them were kept secret. The stock on the 1st was about 580 cases. This week, there have been no sales. At *Bordeaux*, last week, the sales were 16 cases Java, 10 Kurpah, 4 Madras, and prices remained unchanged. This week, some small lots of different sorts have been sold; prices not stated.

HIDES.—At *Havre*, in the week ending Friday, 9,800 dry La Plata went at 115f to 135f the 50 kilogs; 1,026 Monte Video salted, 51f 25c; 100 Buenos Ayres salted, 75f; 2,000 Valparaiso drysalted, 97f 50c; 1,400 New York salted, 50f 50c; 3,000 New Orleans, 47f 50f to 48f. Some lots of damaged were also sold. The arrivals approached 4,000. This week, New York has been at 50f 50c to 52f; Chili, 71f; Irish, 43f; Monte Video salted, 74f; La Plata horse, 10f each.

TALLOW.—At *Havre*, in the week ending Friday, 40 casks Buenos Ayres were offered by auction, but not more than 58f the 50 kilogs having been offered, they were withdrawn. The arrivals were not important. This week, 70 casks California, indifferent quality, have been sold at 60f. At *Paris*, yesterday, the 100 kilogs were 130f 50c.

WOOL.—At *Havre*, last week, 110 bales La Plata unwashed went at 1f to 2f 55c the kilog; 3 bales Donskoy, 2f; 12 bales Russia, 8f 55c; 103 bales La Plata sheepskin unwashed, 1f 25c to 1f 85c; and 27 ditto washed, 1f 42½c. Some lots of damaged La Plata were also sold. The arrivals exceeded 1,000 bales. This week, Africa has been sold at 160f the 100 kilogs; Peru, 125f; Buenos Ayres unwashed, 177f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, disposable, was 104f to 105f the hectolitre; Montpellier, of 89 deg., 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c; beetroot, first quality, 107f.

TURIN, April 8.

The Government will, it is not doubted—(in spite of contradictions of its semi-official newspapers)—soon be under the imperative necessity of raising a loan; and as the foreign bankers whom it has asked for aid have proposed conditions which seem to it perfectly exorbitant, it will most likely make the loan a *forced* one. In connection with this matter, it may be of interest to your readers to see an account of the financial situation just presented to the Chambers by the ex-Minister of Finance:—

Years.	Receipts. f	c	Expenses. f	c	Excess of Receipts. f	c	Deficit. f	c
1853.....	155,556,399	47...	154,784,051	62...	772,347	85...	...	
1854.....	151,161,825	0...	148,064,059	67...	13,097,765	33...	...	
1855.....	157,430,999	3...	166,471,364	66...	...	...	9,040,365	63
1856.....	167,783,285	4...	180,313,042	82...	...	...	12,529,757	78
1857.....	138,375,655	18...	165,086,404	96...	...	...	26,710,749	73
1858.....	177,603,716	28...	163,613,031	56...	13,990,684	72...	...	
1859.....	228,295,845	4...	274,976,380	47...	...	...	46,680,535	43
1860.....	603,278,877	65...	563,302,905	0...	39,775,972	65...	...	
	1,789,486,603	69...	1,816,611,240	71...	67,836,770	55...	94,961,408	57

Deducting these surpluses from the deficits, there remains 27,124,638f 2c; to which, says the table, must be added 35,896,368f 45c for the deficit of 1852—total, 63,021,006f 47c. But, in point of fact, what are put down as excesses of receipts over expenses are not so at all:—they are purely and simply caused by loans. Indeed, since 1849, not a single year has passed in which Piedmont has not had to borrow; and in certain years she has raised loans two or three times.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Government officials at the Liverpool Emigration Office have just completed the quarterly emigration returns from the port of Liverpool. From these returns we perceive that the emigration for the present quarter has not been nearly so active as that of the past year; yet, still there is sufficient to show that the exodus continues in a diminished but steady course. The figures show that during the quarter ending March 31 there sailed "under the Act" to the United States 40 ships, of 62,186 tons, with 214 cabin and 6,093 steerage passengers; to Victoria there were 8 ships, of 12,830 tons, with 139 cabin and 1,740 steerage passengers. To the United States, "not under the Act," there were 47 ships, of 60,341 tons, with 1,237 cabin and 1,305 steerage passengers; to New Brunswick there was 1 ship, of 939 tons, with 16 cabin and 6 steerage passengers. To New South Wales there was 1 ship, of 1,137 tons, with 4 cabin passengers; to Victoria there were three ships, of 2,858 tons, with 15 cabin and 63 steerage passengers; to Jamaica there was 1 ship, of 472 tons, with 10 cabin passengers; to South America there were 10 ships, of 3,115 tons, with 40 cabin and 28 steerage passengers; to Madeira, Western Africa, St. Helena, &c., there were 6 ships, of 3,120 tons, with 117 cabin passengers. Total, 48 ships "under the Act," of 75,015 tons, manned by crews amounting to 2,561 men, and carrying 214 cabin and 6,093 steerage passengers; and 69 ships "not under the Act," of 72,052 tons, manned by 3,623 of a crew, and carrying 1,237 cabin and 1,305 steerage passengers; or a grand total of 117 ships, of 147,067 tons burthen, manned by 6,184 of a crew, and carrying 1,451 cabin and 7,398 steerage passengers, left the Mersey during the past three months of the present year. Of this number 353 cabin passengers sailed under the Act, and 1,439 not under the Act; and 7,833 steerage passengers under the Act, and 1,402 not under the Act. The total emigration during the quarter was 11,027 souls, which, when compared with the corresponding quarter last year—when 13,812 souls left the port—shows a decrease of 2,785. The month's returns for March show that to the United States there sailed 17 ships, under the Act, with 3,386 steerage and 59 cabin passengers on board; making a total of 2,427 passengers. To Victoria there were 4 ships, with 818 steerage and 26 cabin passengers, making a total of 844, or a grand total of 21 ships, with 4,186 steerage and 85 cabin passengers. Of ships not under the Act there sailed during the month to the United States 12 ships, with 859 passengers; to Victoria, 2 ships, with 44 passengers; to New Brunswick, 1 ship, with 22 passengers; to South America there were 3 ships, with 30 passengers on board; to the West Coast of Africa, &c., there was 1 vessel, with 40 passengers—making a total of 19 ships and 995 passengers. The returns for the past month, when compared with the same month last year, give the following result:—In March, 1860, there sailed from Liverpool 7,760 passengers; in the same month of the present year there sailed 5,266, showing a decrease of 2,494 when compared with March, 1860. In consequence of there being a kind of abeyance in the Government emigration to Australia, only one vessel, the Utopia, sailed during the past quarter, having on board 300 passengers.

The following return shows the state of the note circulation of the United Kingdom during the four weeks ending March 9, 1861, compared with the previous month:—

	Feb. 9, 1861.	March 9, 1861.	Increase.	Decrease.
	£	£	£	£
Bank of England.....	20074511	19504830	...	569681
Private Banks	3350959	3205513	...	145446
Joint Stock Banks	2940755	2867926	...	72829
Total in England.....	26366225	25578269	...	787956
Scotland.....	4094767	3936969	...	157798
Ireland	6918944	6682077	...	236867
United Kingdom.....	37379936	36197315	...	1182621

And, as compared with the month ending the 10th of March, 1860, the above return shows a decrease of 1,462,680*l* in the circulation of notes in England, and a decrease of 2,050,073*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,199,422*l*, the English joint stock banks are below their fixed issue 434,431*l*,—total below fixed issue in England 1,633,853*l*; the Scotch banks are above their fixed issue 1,187,698*l*, the Irish banks are above their fixed issue 327,583*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 6th of March was 11,933,273*l*, being an increase of 246,424*l* as compared with the previous month, and a decrease of 3,229,058*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 9th March:—Gold and silver held by the Scotch banks, 2,602,166*l*; gold and silver held by the Irish banks, 2,557,105*l*; total, 5,159,271*l*; being a decrease of 63,138*l* as compared with the previous return, and a decrease of 211,914*l* when compared with the corresponding period last year.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An ACCOUNT, pursuant to the Act 7th and 8th Victoria. cap. 32, for the week ending on Wednesday, the 10th day of April, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,848,700	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	11,525,338
		Silver Bullion	848,362
	26,848,700		26,848,700

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,222,938
Rest	3,167,563	Other Securities	18,816,006
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4 902,527	Notes	6,690,360
Other Deposits	13,201,791	Gold and Silver Coin	748,732
Seven Day and other Bills	653,155		
	36,478,036		36,478,036

Dated the 11th April, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,811,495	Securities	28,960,944
Public Deposits	4,962,527	Coin and Bullion	13,122,432
Private Deposits	13,201,791		
	38,915,813		42,083,376

The balance of Assets above Liabilities being 3,167,563*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£381,230
A DECREASE of Public Deposits of	2,921,142
An INCREASE of Other Deposits of	1,566,311
A DECREASE of Government Securities of	385,086
A DECREASE of Other Securities of	1,402,057
An INCREASE of Bullion of	122,302
A DECREASE of Rest of	691,249
A DECREASE of Reserve of	212,068

The chief variations in the above return are attributable to the payment of the dividends. The decline in the Government deposits is nearly balanced by the increase in the other deposits and the reduction in the other securities. The Government securities are lower, owing to the repayment of the advances during the shutting. Although there is a decrease in the reserve, a satisfactory augmentation has taken place in the bullion.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
	£	£	£	£	£
Circulation, including bank post bills	21,089,574	21,317 325	22,685,398	24,173,084	20,811,495
Public deposits	4,723,323	2,989,489	5,026,939	5,878,135	4,902,527
Other deposits	10,164,340	16 915,987	15,981,833	14,670,717	13,201,791
Government securities	14,086,798	9,743 824	11,371,118	9,728,943	10,222,938
Other securities	11,901 832	16,408,424	16,938,400	23,534,388	18,816,006
Reserve of notes & coin	7,643,211	12,301,314	11,205,454	5,644,847	7,439,092
Coin and bullion	13,589,536	13,367,329	13,596,534	14,637,102	13,122,432
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	5 p. c.	5 p. c.
Price of Consols	97⅜	96½	95	94¼	91⅞
Average price of wheat	39s 0d	43s 1d	41s 0d	47s 9d	56s 4d
Exchange on Paris (shrt)	25 0 5	25 5 10	25 2½ 10	25 17½ 22½	25 30 35
— Amsterdam ditto	11 15½ 15⅝	11 15 15¼	11 14½	11 14 15	11 17½ 18¾
— Hamburg (3months)	13 8 8¼	13 6	13 5¼	13 6 6½	13 8½ 8¾

In the corresponding week of 1851 continental affairs afforded a strange contrast to the present day; the attitude of France being eminently pacific, while Germany and the rest of Europe were enjoying profound tranquillity. At no period, indeed, did it appear that the peace of the world was more assured. In Parliament the Budget was being actively discussed. The discount market was free from pressure, the general rate being 3 per cent.

In 1858, there was also great ease in the money market, and the payment of the April dividends had been attended with a decrease of only 339,744*l* in the Bank's reserve.

In 1859, an Indian debenture loan had been announced, and the official notification was expected immediately. The idea of a congress of the European Powers was being ostensibly entertained by France, the Government not having yet completed their preparations for war.

In 1860, the insurrection in Sicily was making progress, notwithstanding the daily reports published in the Neapolitan official press to the effect that tranquillity had been restored and the King's authority re-established. The treaty between Spain and Morocco had been ratified. The sum of 2,650,000*l*, proposed to be raised for railway purposes in debentures of the colony of Victoria, had been tendered for, and proposals had been put forth for 2,320,000*l* for the Algerian railways. The money market was unsettled, owing to the sudden withdrawal by some of the leading discount establishments of a million and a half of notes from the Bank.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 1,737,492*l*; in 1858, an excess of 507,493*l*; in 1859, a deficiency of 956,567*l*; and in 1860, a deficiency of 8,963,671*l*. In 1861, the deficiency is 5,614,215*l*.

DISCOUNT AND MONEY MARKET.—The Directors of the Bank of England, at their weekly court yesterday, reduced their minimum rate of discount from 6 per cent., at which it was fixed last Thursday, to 5 per cent.

It was fully anticipated that this alteration would shortly be made from the steady influx of bullion into the Bank, the rise in the American exchange, and the abundance of capital in the general market. In Lombard street, in the early part of the week, the best bills could be cashed at ¾ per cent. below the Bank, and after the reduction to 5 per cent. the general rate was only 4¾, with exceptional transactions at 4⅝, or even 4½. A change was, therefore, considered imminent; but there was some doubt whether it would not be delayed till next Thursday. The announcement, yesterday, was therefore received with satisfaction, and for a short time exercised a favourable effect on the stock markets. The supply of money continuing large, there is some expectation that the Bank will go to 4½ per cent. within a few weeks.

On the Stock Exchange, money has been very easy, the payment of the dividends having brought in some considerable amounts, and loans on Government securities can be readily obtained at 3½ to 4 per cent.

It is reported that the French Government are about to bring out a loan of 20,000,000*l*, and the Italian Government one of 8,000,000*l*. The second statement is probably more or less correct.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2¼
Amsterdam	3	3
Turin	7	6
Brussels	4	4
Hamburg	...	2½
St Petersburg	6	...

BANK OF FRANCE.—The summary by telegraph of the monthly return of the Bank of France shows a decrease in the bullion of 725,000*l*, and of 10,000*l* in the advances. In the bills discounted there is an increase of 366,000*l*, in the notes of 290,000*l*, and in the Treasury balance of 56,000*l*.

ENGLISH FUNDS.—Consols have shown increased flatness this week, partly owing to some large sales of stock, and partly from the adverse political reports which were especially prevalent this afternoon. The announcement of the alteration in the Bank rate caused a little temporary firmness, but it was not maintained, and the market again assumed a heavy appearance. Consols for the 9th of May, which last Friday closed at 92 to ½, remained dull, but without much variation until this morning, when a rumour that the French Government have notified to the Paris and Lyons Railway Company to prepare for the transport of 60,000 fresh troops to Lyons, together with the unfavourable Bank of France return, caused a rapid decline, and there were for a few moments sellers at 91⅝. A recovery then occurred to 91¾, which was the last official quotation. After regular hours the prices were 91¾ to ⅞ for the account, and 91⅝ to ¾ for money.

The increased ease in the money market has caused a further recovery in Exchequer bills, the quotation this afternoon being 5s discount to par. India bonds are also firmer, closing at 25s to 20s discount.

India 5 per Cent. Scrip has been in demand during the week, some of the sales of Consols Reduced and New 3 per

Cents. having been made for reinvestment in this security. The price, which last Friday was 100⅛ to ⅜, has now improved to 100⅜ to ⅝.

FOREIGN STOCKS.—Business in this department of the Stock Exchange continues limited, and the general tone is again rather unfavourable. Mexican has again fallen, the establishment of the new constitutional authority making slower progress than had been expected. Turkish 6 per Cents. have also receded, the speculative character of this stock causing it to be especially liable to fluctuation on any adverse or favourable reports. Spanish Passive has again been flat, and the Certificates remain without recovery. Russian stocks are quoted about the same as last week. Brazilian descriptions have shown a drooping tendency.

The closing price of French Three per Cents. on the Paris Bourse this evening was 67f 55c, showing a decline on the week of nearly a quarter per cent.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

RAILWAYS AND OTHER SHARES.—British railway stocks have been generally neglected, the daily transactions having been mostly unimportant, and between the dealers themselves. The public at present do little business, although from the increased supplies of stock brought forward at the settlement commencing to-day, it would seem that they are effecting sales. It is probable, however, that this supply proceeds rather from the realisation of stock held on borrowed money. Compared with last week, prices generally show little alteration except South-Western, which has been steadily advancing. This afternoon the rumours from Paris caused a general decline, from which, however, after some fluctuation, a rally has since taken place.

The announcement that the Canadian Government do not propose to introduce any measure for the relief of the Grand Trunk Railway, caused a decline in the securities of that Company, from which there has been little recovery. Great Western shares have improved on the decision of the meeting yesterday in favour of the Directors. East Indian stocks are steady.

South-Austrian and Lombardo-Venetian shares have been affected by the flatness on the Bourse, and have fallen to 2 to 1⅞ dis. American descriptions have improved on the better news from New York.

In the miscellaneous market there has been a renewed inquiry for London and Westminster, London and County, and Union Bank of London shares, and another decline in Australasia.

United Mexican Mining have again relapsed, closing at 5½ to 6.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

FOREIGN EXCHANGES.—Owing to the reduction in the Bank rate, the foreign exchanges have been less firm, and a general though slight reduction has taken place.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, giving an account of the transactions in bullion during the week, and also of the business in Indian rupee paper:—

Gold.—Gold continues to be sent into the Bank; the amount purchased by that establishment since the date of our last circular (4th inst.) being about 388,000*l*; and, as there is not any demand for export, the stock of bullion held by the Bank is likely to be further increased, more especially if some of the vessels now due from Australia should soon arrive. The ships now on the way are the Kooria Mooria, with 10,000 ozs; the Calliance, with 31,513 ozs; the Southampton, with 21,544 ozs; the Copenhagen, with 51,206 ozs; the Empress of the Seas, with 5,940 ozs; the Owen Glendower, with 14,157 ozs; the Kleber, with 8,872 ozs; the Kent, with 26,054 ozs; the Marco Polo, with 6,570 ozs; and the Peru, with 14,562 ozs—making about 758,000*l*, of which 252,000*l* may be considered as due. The Niagara has taken 35,052*l* to New York, making a total of 4,853,000*l* sent to America; the Magdalena, 1,940*l* to Brazils; and the Ellora, 45,900*l* to Bombay. The Athenian has brought 12,000*l* from the West Coast of Africa, and about 50,000*l* has been received from Constantinople.

Silver.—The bar silver, ex Tasmanian, has been sold at 5s 0⅞d per oz standard, but the price is now firm, and we quote it as 5s 0½d to 5s 1d per oz standard. The Magdalena has taken 14,500*l* to the Brazils, and the Ellora 100,635*l* to Bombay.

Mexican dollars are in demand, and, with scarcely any on the market, their value has naturally risen; we quote the price as 4s 11⅛d per oz nominally.

Exchange on India for Banks' drafts, at sixty days' sight, is rather lower. We quote 1s 11⅛d to 2s for Calcutta; drafts on Bombay, 1s 11¾d to 2s 0⅛d; Madras, 1s 11⅛d to 2s; document bills, 1s 11d to 1s 11⅜d.

India Government Loan Notes continue nearly as quoted in our last, the 5 per Cents. being from 93½ to 94, and the 5½ per Cents. 99¾ to 100¼.

Quotations for Bullion.—*Gold*—Bar gold, 77s 9d per oz std; bar gold, refinable, 77s 10½d per oz std. *Silver*—Bar silver, 5s 0⅞d per oz std, last price; bar silver, containing 5 grains of gold, 5s 1⅛d per oz std, last price; fine cake silver, 5s 5½d per oz, last price; Mexican dollars, 4s 11⅛d per oz, last price; Spanish dollars (Carolus), 6s 6d per oz, last price.

The Atrato arrived this morning from the West Indies with 46,000*l*.

About 6,000*l* in gold was taken to the Bank to-day.

PUBLIC COMPANIES.—A petition was recently presented to the Committee of the Stock Exchange, requesting that the shares of the Bank of Turkey might no longer be quoted on the official list; the motive for this demand being certain charges with reference to the arrangements of the Bank. After a full and complete investigation, however, the Committee have decided that the charges were not proved, and the petition consequently falls to the ground.

The half-yearly meeting of the Surrey Consumers Gas Company was held yesterday, when a report was presented, stating that the gross rental in the six months ending in December was 22,787*l*, and the net income 8,241*l*. After deducting interest and other expenses, the balance will admit of a dividend at the usual rate of 8 per cent. per annum, clear of income tax, leaving 247*l* to be carried forward. The committee of shareholders appointed to settle the terms of the determination of Mr Croll's contract have satisfactorily arranged the question. Resolutions were passed adopting the report, and declaring the proposed dividend.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The stoppage has been announced of Messrs Pedder and Co.

(the Preston Old Bank), with liabilities estimated at 700,000*l*. The bank was formed as far back as 1775, and was considered to rank in respectability and solvency among the highest establishments in the kingdom. The immediate cause of the stoppage was the sudden death of the senior partner, Mr Edward Pedder, who it was then found had largely overdrawn his account, in order, it is said, to purchase land and enlarge his country seat. It is believed that a rumour had been circulated that the books of the bank were in an unsatisfactory position, and a run consequently commenced. In order to protect the interests of all parties, it was therefore determined to stop at once. There appears little doubt, from the large private property of the partners in the firm, that the creditors will eventually receive 20s in the pound. Meanwhile, to prevent individual proceedings and to afford time for investigation, a petition of arrangement has been presented in the Court of Bankruptcy. Annexed is the circular issued :—

Old Bank, Preston, April 10.

Dear Sir,—In consequence of the sudden death of my late brother and partner, Mr Edward Pedder, who had the entire management of the bank, I have been engaged for the last few days in looking over the accounts, and in trying to form new arrangements which would give satisfaction and security to the public. In this latter attempt, I am sorry to say, I have not been successful; and, after consultation with some of my best friends, I have come to the conclusion that in justice to all parties I had better close the bank, and have its affairs wound up. From the accounts, as they stand in the books, there would appear to be sufficient to pay all demands in full; but in any case there seems no probability of any serious deficiency.

With great regret for any inconvenience this may cause the numerous friends of the bank, and with gratitude for all past kindness, I remain, dear sir, your obliged and obedient servant,

HENRY NEWSHAM PEDDER.

The closing of the Faringdon and Wantage Bank (Messrs Barnes, Medley, and Ansell) has also taken place, but the causes that have led to the step have not transpired. The general liabilities are believed to be moderate. The bank had a note circulation limited to 8,977*l*, but the actual issue was only between 5,000*l* and 6,000*l*.

The following statement has been circulated with reference to the affairs of Messrs Ede and Co., Levant merchants, who failed last January :—

16 George street, Mansion House, April 12.

Since the meeting of our creditors on February 26, we have received intelligence from all our correspondents, fully verifying the anticipations we then expressed of a satisfactory liquidation of our affairs.

Our Constantinople firm has likewise called a meeting, at which a resolution of adjournment to the 30th of April was passed, to enable them to ascertain with accuracy the result of their current liabilities.

We have further been advised that our Smyrna and other debtors have made arrangements either to meet their engagements as they become due, or to liquidate them within a reasonable period.

Inasmuch, however, as the last of our engagements will not mature until the 19th inst., and the exact position of our Constantinople firm, upon whose movements we are mainly dependent, cannot be known on this side until the middle of May, we have to solicit your further indulgence until the 20th of that month, when we confidently anticipate being in a position, either then or at an early period, to liquidate all our engagements in full with interest.

Trusting this will be deemed satisfactory and meet with your concurrence,—We are, &c., EDE AND CO.

An adjourned meeting of creditors of Messrs Schilizzi and Vuros, a Greek firm, that stopped on the 2nd February, took place yesterday, when a composition of 10s in the pound was accepted, 6s being paid in cash, and 4s on the 20th of October. The debts and liabilities ranking on the estate were stated by Mr Coleman, the accountant employed in the case, to amount to about 34,500*l*, while the assets were estimated to be worth rather more than half that sum.

A meeting of creditors of Mr Phineas Abraham, West India merchant, who stopped a fortnight ago, was held to-day, when it was resolved to wind up under inspection. The balance sheet showed liabilities expected to prove upon the estate 49,528*l*, with assets estimated at 32,491*l*, or about 13s in the pound. On the 31st December, Mr Abraham had a capital of 21,322*l*, and his present deficiency arises from losses by bad debts and an acceptance for other parties, the principal being for Mr Castle, Mr Abraham's correspondent at Jamaica.

The creditors of Mr Leopold Samson, buying agent of Manchester, whose suspension followed that of Messrs J. G. Behrends and Co., East India merchants of London, have held a meeting, when a balance sheet was presented showing liabilities 26,446*l*, and assets 25,266*l*, leaving a deficiency of 1,180*l* only. It was resolved to adjourn to this day week, in order to allow the offer of a composition. A committee of investigation was appointed to act in the interim.

BANKRUPTCY AND INSOLVENCY.—The Committee of the Mercantile Law Amendment Society have issued a further report on the new Bankruptcy and Insolvency Bill, lately read a third time in the House of Commons. A general approval is expressed of the measure as one which will confer immense advantages on commercial classes, but modifications are required in some important matters of detail. The clauses respecting the creditors' assignee are considered to be defective, and exception is especially taken to the one requiring him to find security. While recognising the value of the principle that in case of necessity a paid manager may be appointed to assist the creditors' assignee, the Committee contend that the nomination of that officer should not, as at present provided, rest with the creditors at large, but rather with the creditors' assignee, on the ground that the latter will be alone responsible for all the acts of his assistant. This defect, however, and another of less importance, have been brought under the notice of the Attorney-General, and will probably be amended in the House of Lords. Another point to which the Committee direct attention is the proposal that an act of bankruptcy shall be committed by the levy of an execution on a debtor's goods for a liability of at least 50*l*, or his arrest for that amount. The Committee, however, would prefer that there should be no limitation to 50*l*, since the fact of a man's goods or his person being seized for a smaller sum is *pro tanto* a more certain proof of his insolvency. The clauses to enable private arrangements to be carried out are viewed with general approval. The Committee regret the loss of the clauses for the distribution of deceased insolvents' estates, and they object to the principle of paying the official assignee a fixed salary, instead of, as at present, a per centage; but looking at the bill as a whole, they consider that it will satisfactorily fulfil the large expectations of the mercantile community, and greatly increase the reputation of Sir R. Bethell, its author.

MISCELLANEOUS.—The last advices from Brazil mention the discovery of some gold deposits in the province of Bahia, within a few miles of the Bahia Railway. Nothing authentic, however, has transpired with regard to their extent or value.

From a circular of Messrs Schlusser and Co., of St Petersburg, it appears that the quantity of tallow for export this year will not exceed 95,000 casks. The prices asked by the holders were considered too high by the English merchants, and business was consequently at a standstill. No estimate is given of the quantity of grain for shipment this year, because everything will depend on the demand prior to the opening of the navigation. The exchange is very favourable for drawing.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.37½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 5-10ths per cent. dearer in London than in Paris.

The course of exchange at New York on London for bills at 60 days' sight is 107½ to 108 per cent., which, as compared with the mint par between the two countries shows that the exchange is against England. But, after making allowance for interest and charges of transport, the present rate leaves no profit on the transmission of gold to the United States.

Imports of the week ..... 319,902 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Very little business was transacted in English wheat at Mark lane to-day, and Monday's prices were barely supported. Foreign qualities commanded very little attention. All other kinds of produce were dull, at about previous rates. The imports from abroad amount to 20,570 quarters of wheat, 7,010 barley, 68,720 oats, 1,280 sacks and 1,210 barrels of flour.

At Liverpool, this morning, the corn trade, generally, was heavy, at about Tuesday's currency.

Writing from Alexandria on 27th ult., Messrs Briggs and Co. observe:—"All reports from the interior concur in stating that the stocks of cotton remaining in the country are now excessively small, and that they consist of little else but the lower descriptions and refuse of the crop. In the Alexandria market, good sound qualities of the staple continue in active demand, and readily find purchasers at full prices. The following are the sales since our last, with present prices, free on board:—1,754 bales very ordinary to middling, 6.40d to 7.59d; 210 bales good middling to fair, 7.62d to 7.80d; 509 bales good fair to good, 7.86d to 8.38d per lb—total, 2,473 bales. Freights.—By steamer to Liverpool, ¼d per lb; by sailing vessel, ⅜ths of a penny per lb, with usual gratuity."

A very animated demand has prevailed throughout the past week in the Liverpool cotton market, resulting in total sales of 95,000 bales, including 63,000 bales to spinners, 19,000 bales on speculation, and 13,000 bales for export. The lower descriptions of American have enhanced their value ¼d per lb since Friday last, the middling qualities ⅛d per lb, whereas East India are barely a quotation dearer than on that day. The strong accounts from America of a short crop have had a favourable effect upon the market, and a further reduction in the Bank rate of interest, yesterday, has tended still further to an improvement. To-day the market closes firm, with sales of 10,000 bales.

The annexed return shows the exports of cotton from Bombay to the 12th March:—

All good and fine raw sugars have sold steadily, at very full prices; but low and damp parcels have met a dull inquiry. Refined goods are steady, at quite previous rates.

There has been a steady, though by no means active, inquiry for coffee, at full currencies. Cocoa has commanded rather more attention; but the inquiry for rice, owing to the large quantities on passage, and the decline in the value of wheat, has been much restricted.

The state of the silk market during the past month is thus reported by Messrs Durant and Co.:—"We have to report a month of large business in silk. There has been much hesitation and doubt and reluctance, still large quantities have found their way into consumption—the deliveries being the largest for the last eight months. At one moment the pressure upon the market was rather severe, and prices were pushed to a very low point for common silk, but that is rather passing away, the arrivals being less heavy, and in some cases an advance of 6d to 1s per lb has been realised. Japan silk shared in the generally large business and depression of prices, and is now participating in the partial improvement. Chinese thrown silk continues to be completely neglected. In Bengal silk the deliveries are decidedly beyond those of previous months, but this has not yet induced any improved demand. In Italian, Brutia, and Persian silk, nothing worth notice."

Baltic hemp has moved off steadily, at previous rates; but Manilla parcels have commanded very little attention. The wool trade is still in a very inactive state. Prices, however, are somewhat firmer.

We extract the following from Messrs Schlusser and Co.'s circular, dated St Petersburg, 1st inst.:—

Hemp—The shipments of hemp during the past year amounted to 1,752,429 poods, showing a slight falling off as compared with 1859; the quality was on the whole good, and at the close of the navigation there remained only 13,521 poods unsold. The new supply for this season's shipment is estimated at about 1,500,000 poods; the demand has been very brisk during the past winter, 900,000 poods having already en contracted for, principally clean, sorts being comparatively neglected, although in larger supply than usual, and will therfore be cheaper. The quality of the new hemp is on the whole satisfactory, We quote to-day:—Clean hemp for June, July, cash, 26*l* 17s; ditto, 3 ro. hand-money, 27*l* 15s; outshot hemp for June, July, cash, 24*l* 10s; ditto, 3 ro. hand-money, 25*l* 8s; half-clean hemp for June, July, cash, 22*l* 12s; ditto, 3 ro. hand-money, 24*l* per ton free on board at town. Tallow—The export of this article in 1860 amounted to 127,547 casks or 3,321,940 poods, of which 3,048,073 poods were destined for England. Prices ruled high during the entire season, owing principally to the support our market received from the Russian speculators, whose operations seem still far from being brought to a close. The contracts made in our market during the winter have been principally speculative, very little having as yet been done for export. According to the most reliable accounts, the new supply will be about 93,000 casks, and there only remained about a couple of thousand casks unsold at the close of last season. Our present quotations are for yellow candle tallow for August, 53*l* 12s; ditto on the spot, cash, 57*l* 17s; Ukraine tallow for June, 3 ro. hand-money, 56*l* 5s per ton free on board at town. Flax was shipped to the extent of 1,034,058 poods during the past year, which shows a slight increase on the export of 1859; prices ruled high during the entire summer. The exact quantity we are likely to receive this year is as yet unknown, and it is difficult to form a reliable opinion on the subject; the quality will, however, prove better than that of last year; so far about 800 to 1,000 tons have been contracted for. Our present prices are for Archangel for June, cash, 49*l*; Rjeff for June, cash, 42*l*; 12, 9, and 6 head for June, half cash, 36*l* 16s. Wheat—Only 265,395 chetverts were shipped last season. On the spot there remains about 30,000 chetverts for sale, but it is impossible to say what further quantity we are likely to receive this year, as the supply will be entirely regulated by the demand there may be. The quality of the Saxonka is not so satisfactory as usual this year, but Morshansky turns out very fine, and shows the highest samples of this year's supply of soft Russian. So far, the contracts made have been but small. The present prices are for hard Kubanca for August, cash, 47s 10d; soft Russian for August, cash, 46s 9d per quarter free on board.

Rum is firm in price; but brandy is lower to purchase. Fine saltpetre has advanced 3d per cwt.

The oil market has been devoid of animation. Linseed oil, on the spot, is selling at 28*l* per ton. Tallow is dull, and cheaper. P. Y. C., on the spot, 58s; April to June, 57s 3d to 57s 6d; October to December, 55s. Town tallow, 54s net cash.

"Distrust of the future," observes the New York *Shipping List* of the 27th ult., "is still making an impression upon every department. Capitalists continue to discourage enterprises requiring an outlay of money; merchants restrict their credits, and though the country was never richer than it is at this moment, yet never was there so marked a paralysis in all of its leading material interests. The leading features of the money market continue about as before noticed. The supply is largely in excess of the demand, and with the increasing difficulty in finding profitable employment for it, lenders are less disposed than they were to refuse paper that is not of strictly prime grade. On call, transactions not unfrequently take place at as low a figure as 4 per cent. We quote:—

	Per cent. per annum.
Loans on call, stock securities	5½ to 6½
Do. other good securities	6½ 7
Prime endorsed bills, 60 to 90 days	7 8
Do. 4 to 6 months	7½ 10
First-class single signatures	9 12
Other good bills	12 15
Names less known	18 24

The stock market on Saturday was moderately active, with firmer prices for the speculative list. Government bonds were rather unfavourably influenced by the announcement of the new loan. State stocks and railroad bonds were in fair request at full prices. On Monday the general market was very buoyant, with a further improvement in prices, which was maintained to the close. Yesterday, the advance of the day previous was scarcely maintained."

We have had a good demand for cotton throughout the week, though with less animation during the last few days. The trade have again added to their stock, and exporters have operated to a full average extent. Prices of American have advanced ⅛d to ¼d per lb, the greater improvement being in the lower qualities. Egyptians have been freely dealt in, but with an abundant supply they do not command any advance. Brazil are held at very full rates. East India also tend upwards. The sales to-day are 10,000 bales. There is a fair inquiry, but no animation. The reported export amounts to 13,460 bales, consisting of 8,530 American, 220 Brazil, and 4,710 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The reduction in the price of money at the Bank of England to 5 per cent. has had a favourable influence in the markets in the manufacturing districts. Although the amount of business doing in goods has been only moderate, prices, generally, have shown considerably more firmness. In iron, the transactions have been limited, and coals have further receded in value.

MANCHESTER, April 11.—In the beginning of the week, a considerable increase of demand was shown in this market. Sellers, however, were influenced by precisely the same motives, as those which brought forth the demand, the reduced estimates of cotton supply, and refused to sell much except at an advance. Transactions have in consequence been greatly curtailed. The stoppage of Messrs Pedder's Old Preston Bank has had a discouraging effect, it being well known and trusted in the county. And the reduction of the Bank rate to 5 per cent. seems to have little or no effect as yet, except in adding to the firmness of yarns, and rendering the position of manufacturers more unsatisfactory. Calcutta telegrams to the 18th March have increased the feeling of caution.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—Wool is very firm in price. There is a fair inquiry, but staplers are not heavily stocked, and are not very anxious to sell. There is very little doing in short wools for this district, and still less for the clothing districts. There has been considerable inquiry for yarns for export, but the prices offered have been very low. A few orders have been given for Russia, but these are not material. The improvement in the home trade is but slight. The general condition of the trade for pieces is unaltered.

LEEDS.—The markets in the cloth halls have been slightly better, and both light fabrics and plain cloths sold rather more freely. The manufacturers and merchants alike are cautious in their operations, and the general tone of the trade is one of great quietness.

ROCHDALE.—The flannel and wool trades have manifested little or no improvement. Prices generally are firm, nor are they likely to recede soon, as staplers hold wool stiffly. The foreign trade in the woollen fabrics of this district is slack.

HUDDERSFIELD.—We have had more business doing, both in the Cloth Hall and manufacturers' shops. Purchases have been more freely made in various descriptions of regular market goods, such as crapes, sataras, diagonals, hairlines, &c., at prices varying from 3s 10d to 4s 6d per yard. Black doeskins and other plain goods are yet, however, slow of sale, and stocks on hand in the warehouses and shops continue larger than is usual at this season.

LEICESTER.—Most branches of the hosiery trade remain extremely dull for the time of the year, and business generally is very flat The foreign demand is inactive. In the adjacent districts very little is doing, and both town and country hands are but partially employed. Stocks in the manufacturers' hands are pretty generally low. The yarn market is dull, with very little demand for material. In wool there is no change.

NOTTINGHAM.—There has been a little more doing in the silk branch of the lace trade this week. The hosiery trade remains without material change; business is, on the whole, very dull, and many framework knitters are out of work. Yarns are unaltered in value.

BIRMINGHAM.—The second meeting of the ironmasters of this district for the current quarter has been held. The attendance was large. The reduction of the rate of discount at the Bank of England imparted a cheerful tone to the meeting, perhaps beyond that which the nature of the transactions warranted. The best that can be said is, that prices of finished iron were not lower, and that there was more business done than a week ago was anticipated.

BELFAST.—Exports of finished linens have been to a large extent, chiefly for the American market; the entire quantities sent away are still, however, much below the point of last year. For France there is little doing; the Brazil trade takes off large lots of goods, and for the West India market considerable orders have been placed. Cuba continues to absorb extensive parcels of light linens. There is some little turn in the home trade; sales are larger, and inquiries more active, but the aggregate amount of business done is very far under the average of former seasons. Prices in the meantime are firmer, and prospects much more satisfactory than they were last week.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, made with Lord Ward's thick coal warm air, 4*l*; Old Windmill End Mine forge pig iron, made with Lord Ward's thick coal, 3*l* 12*s* 6d; best native hydrate pigs, 3*l* 10*s* to 4*l*; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 10*s*; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2*s* 6d; Seend Mine melting pigs, 3*l* 10*s* to 3*l* 15*s*; good mine pigs, with a modicum of flue cinder, 2*l* 10*s* to 2*l* 15*s*; mine pigs, deteriorated by cinder, 2*l* 7*s* 6d to 2*l* 12*s* 6d; Cleator Moor hæmatites, 3*l* 7*s* 6d to 3*l* 10*s*; Barrow hæmatites, 3*l* 7*s* 6d to 3*l* 10*s*; Workington hæmatites, 3*l* 7*s* 6d to 3*l* 10*s*; Kirkless Hall hæmatites, 3*l* 6*s* 3d to 3*l* 8*s* 9d; grey forge cinder pig iron, 2*l* 5*s* to 2*l* 10*s*; white forge cinder pigs, 2*l* 2*s* to 2*l* 7*s* 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12*s* 6d to 2*l* 17*s* 6d; superior makes of mine melting iron, 3*l* 2*s* 6d to 3*l* 15*s*, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Favourite Shropshire and Forest of Dean brands, 4*l* 5*s* delivered; Northern hæmatites from 3*l* 6*s* 3d to 3*l* 10*s*, according to brand or quality. The quarterly meeting of the ironmasters of the district commenced on Wednesday. The attendance of the trade was small, and it was almost confined to firms in the district,

few of the Liverpool houses or others engaged in the export department of the iron trade being present; a similar observation is also applicable to those who are engaged in the iron trade in other parts of the country.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, March 27.—There has prevailed a tolerably active demand for State and Western flour during the three days, both for consumption and shipment to Great Britain and France, and holders have realised an advance of about 10c to 20c per brl on nearly all grades. Canada flour is steady and firm. The demand for Southern flour has likewise been more active, and prices are about 10c per brl higher.

EXPORT from 1st to 26th March.

	1861. barrels	1860. barrels
Wheat Flour	121,567	53,157

With more favourable advices from abroad, there has prevailed an increased demand for wheat for export, leading to a slight advance on previous quotations. The demand has been checked somewhat, however, by the advance in the rates of freight, but the aggregate sales have, nevertheless, been to a fair extent. Corn is in fair demand for home consumption, and active for shipment, at very full prices; the sales aggregate 160,000 bushels, including 75,000 yesterday, at 67c to 68c for old mixed Western, in store, 68c to 69c for inferior to fair ditto, delivered, 65c for new ditto, at the depot, 65c to 70c for new Southern yellow, 71½c to 72c for old ditto, and 71½c for white Southern.

EXPORT from 1st to 26th March.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that only moderate supplies of English wheat have been on offer this week in nearly the whole of our leading markets of consumption, the demand for both red and white qualities has ruled somwhat heavy, at a decline in the quotations of from 1s to 2s per quarter. The general quality of the samples has exhibited some improvement, when compared with several previous weeks; nevertheless, both red and white descriptions still require a large admixture of dry foreign to make good saleable flour. There has been a fair inquiry for fine foreign wheat, at about previous currencies. Low and damp parcels, however, have commanded very little attention, on somewhat easier terms. Fine barley has supported late quotations. Other descriptions have sold slowly. The malt trade has continued in a sluggish state, at about stationary prices; but oats have declined in value 6d to 1s per quarter. Beans and peas have moved off steadily on former terms. The flour trade has been in a most inactive state.

Advices from New York state that there was an improved demand for wheat, flour, and maize for export purposes, and that prices were well supported. The continental markets have continued steady for fine wheat, barley, and oats, at full quotations.

In Scotland, wheat has sold somewhat heavily; yet prices have ruled about stationary. There has been much less activity in the sales for spring corn and flour.

The Irish markets have been fairly supplied with wheat, in which only a limited business has been passing on easier terms. Maize has changed hands to some extent; but other descriptions of produce have commanded very little attention.

The annexed table shows the extent of the arrivals of grain and flour into London during the first quarter of the present year :—

	Wheat. qrs	Barley. qrs	Oats. qrs	Beans. qrs	Peas. qrs	Flour. brls	Flour. sacks
English	17,291	24,405	4,101	5,479	1,790	...	18,694
Scotch	300	20,615	5,825	...	562	...	50
Irish	...	92	21,547	...	...	...	24
Foreign	269,650	131,375	140,887	26,198	12,762	241,654	14,571
Eastern Counties Railway	21,808	21,037	30,461	4,233	1,588	...	127,493
Great Northern Railway.	3,869	1,644	38,552	388	109	...	31,322
South-Eastern Railway	1,007	1,485	2,463	1,457	1,360	...	5,355
Grand total	313,925	190,653	243,836	37,755	18,171	241,654	197,509

At Mark lane, to-day, the supply of English wheat was moderate, and the general quality of the samples was tolerably good. All descriptions, however, were a dull inquiry, and, to effect sales, lower rates were submitted to. Foreign wheat moved off heavily, and, in some instances, prices were decidedly in favour of buyers. Barley continues very dull, with a downward tendency in value. Good sound oats were scarce, and, in some instances, 6d per quarter dearer; but other kinds—the supply of which was large—with difficulty realised previous currencies. Beans and peas quite maintained late quotations. The flour trade ruled inactive, yet no change of importance took place in prices

With regard to floating cargoes of grain, Mr E. Rainford observes:—"There have been 36 arrivals at ports of call since the 3rd inst., consisting of 22 cargoes of wheat, 6 maize, 3 barley, and 5 miscellaneous, viz.:—Wheat, 4 from Venice, 4 Odessa, 3 Trieste, 1 Santander, 1 Terra Cabras, 2 Berdianski, 4 Alexandria, 2 Ibraila, 1 Sulina; maize, 2 Saffi, 1 Constantinople, 1 Ancona, 2 Trieste; maize and wheat, 1 Enos; barley, 1 Taganrog, 1 Ibraila, 1 Scala Nova; beans, 1 Terra Nueva; beans and maize, 1 Saffi; locust beans, 1 Faro, 1 Calpé. A few of these had been previously sold. Business in cargoes afloat continues inanimate. The following are the transactions reported since the 5th:—Wheat, arrived, per 492 lbs, Marianople, supposed 56s and at 55s 6d; Odessa Ghirka (some damage) at 51s 6d; ditto (perfect), 53s 9d; new Odessa Ghirka (dry but warm, delivered sound), 55s; ditto (nearly perfect), 54s; ditto (partly damaged), 53s 6d; Venetian, 57s 9d and 57s 6d; Mantua, 58s; per 480 lbs, Polish Odessa (not quite perfect), 53s; Galatz (some injury), 47s; white Spanish, 47s; Ibraila (partly injured), 42s; ditto, 43s; per imperial qr, Saide at 40s; Behara, 38s 6d. Maize, arrived, per 480 lbs, Ibraila, 39s 3d; do. (some damage), 37s; Danube (four lay days), 39s; barley, per 400 lbs, Ibraila, 26s 1½d and 25s 6d; ditto (warm throughout), 24s 6d; mixed cargo, arrived, per 480 lbs, Saffi maize at 40s and Saffi beans at 36s."

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The demand has continued very steady, the better qualities being occasionally slightly dearer than at the close of last week. Soft brown East India and Mauritius remain without change. Floating cargoes of Havana have realised extreme rates. West India is very firm.

190 casks Barbadoes of the new crop, offered by auction, found buyers: brown, 34s to 37s 6d; low to fine yellow, 38s to 44s; also a few parcels, including Jamaica, at 37s to 39s 6d: grainy Demerara, 39s to 43s 6d; heavy brown and low yellow, 37s to 38s 6d per cwt. The week's delivery was 5,350 tons, and 4,340 tons landed; leaving the stock at the close 51,800 tons, against 53,100 tons last year at the same date.

Mauritius.—28,000 bags were principally sold, at and after the sales: crystallised white, 46s to 46s 6d; dark grey to fine yellow, 38s 6d to 44s; low soft grey to good yellow, 36s to 41s; brown, 31s to 36s; grainy sorts, 38s to 43s per cwt. Several parcels have changed hands by private contract within the range of the above quotations.

Bengal.—1,839 bags about three-fourths met with purchasers: Cossipore, 41s 6d to 42s 6d; low to low middling soft Gurpatta date, 37s 6d to 38s 6d; white Benares, 43s to 46s 6d; syrups, 38s per cwt.

Madras.—Some of the bought-in parcels left over from recent sales have been disposed of. 1,531 bags, by auction, this week found buyers: brown and yellow native, 31s to 33s 6d; soft brown date sort, 29s 6d.

Manilla.—20,000 bags clayed are reported privately, chiefly at 35s to 35s 6d per cwt.

Foreign.—A floating cargo of Havana No. 10 has sold at 25s, and one No. 12 at 27s, both for near continental ports. On the spot, a few parcels Havana have sold, including white at 32s, and 4,500 bags brown Paraiba at 34s 6d in bond. 173 casks Cuba, by auction, sold at 38s to 43s 6d for low to very good yellow, and 35s to 37s for brown to low middling grey. 1,711 boxes Havana were partly sold: florettes and white (16s duty), 46s to 47s 6d; yellow (13s 10d duty), 40s to 44s 6d; brown and grey (12s 8d duty), 33s 6d to 37s 6d. Of 210 casks melado, a few lots sold at 31s to 33s; the remainder partly taken in at 28s to 30s per cwt.

Refined.—With a better supply of goods on show, the highest prices paid last week have not been maintained. Common to middling grocery goods are now quoted 50s to 50s 6d per cwt. The production is still proceeding steadily.

Molasses.—No sales of importance have transpired in West India. A parcel of common Cuba is reported at 15s 6d per cwt.

Rum.—The large purchase noticed at the close of last week, and said to be on French account, has not since influenced the market materially. It is, however, firm, and common kinds have sold at full prices, there being still an inquiry for these. The stock is 22,900 puns 4,505 casks, against 26,600 puns 6,000 casks in 1860 at the same period.

Cocoa.—905 bags Grenada were only partly sold, and the common kinds went rather cheaper: superior quality obtained 61s to 65s; grey to fair mixed red, 54s to 58s. 271 bags Trinidad were bought in at 64s to 67s. A few lots superior red realised 82s 6d to 91s per cwt.

Coffee.—As the vessels just in from Colombo will shortly furnish better supplies, transactions are upon a comparatively limited scale by private contract. 170 casks 99 barrels 410 bags Jamaica sold at 61s to 96s for ordinary to fine. 520 bags native rather small berry, 62s to 62s 6d. 77 casks 24 barrels plantation, 68s to 71s for small berry to middling palish. 593 cases East India sold as follows: Naidoobatum, 64s to 72s 6d; palish to middling Cochin kind, 65s to 70s.

Tea.—A fair amount of business has occurred by private contract, and shipping qualities of green have commanded higher rates. On Wednesday, 9,700 packages were brought to public sale, when 4,203 packages sold without material change in prices. Further sales are announced for next Monday.

Rice.—At the close of last week a floating cargo of Necrancie Arracan sold at 10s 9d for the United Kingdom. The market is now quiet, with limited transactions on the spot, including 5,000 bags new Necrancie at 10s 6d cash. By auction, 5,838 bags Bengal were about half sold, at and after the sale, at 11s to 12s for low middling broken to middling white, the remainder being taken in at 12s to 14s 6d. The sound portion of 16,500 bags Necrancie Arracan was withdrawn at 10s 9d to 11s; 4,500 bags sea-damaged selling at 8s 6d to 10s for third to first class. Of 6,854 bag Java, the sound was taken in at 13s to 15s for broken yellowish to good white, and since part sold at 14s 9d per cwt.

Imports and Deliveries of Rice to April 6, with Stocks on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons

Stock	30840	57400	80000	82500

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

Sago.—1,200 boxes were partially disposed of; very good to fine small grain, 18s to 18s 6d per cwt.

Spices.—The market has not been at all active. 2,328 bags common dusty Penang pepper sold at 3½d to 3⅝d, and 500 bags greyish Alleppy were bought in at 4⅜d. 140 bags fair Singapore white partly sold at 6d. 9 cases brown nutmegs were taken in above the value. Some holders of pimento will not sell under 3d, at which several piles were held yesterday. Of 1,213 bags, a portion only met with buyers at 2⅝d to 3⅛d for ordinary to fine. 165 boxes cassia lignea partly sold at 83s to 90s for low to good quality, but mixed. 102 bags African ginger sold at 36s 6d. 140 barrels Jamaica realised 56s to 72s per cwt.

Saltpetre.—The few sales made in Bengal privately have been at about former rates, viz., Bengal, refraction 6¼ to 3½, sold at 36s 6d to 37s 6d. By auction, 1,040 bags Bengal sold at 36s to 38s per cwt, refraction 6¼ to 4 per cent.

Imports and Deliveries of Saltpetre to April 6, with Stocks on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	4020	3750	6850	2830
Delivered	3150	3920	5400	4200
Stock	4670	3680	3415	5020

Deliveries last week 210 tons.

Cochineal.—There has not been any materia change in prices, and quotations for common kinds are slightly cheaper. 376 bags. by auction, partly sold: Honduras silver, 2s 9d to 3s 3d; Teneriffe silver, 2s 8d to 2s 11d; black, 2s 11d: Mexican silver bought in at 2s 8d, and black at 2s 9d to 2s 10d per lb.

Shellac.—Some parcels have sold at rather irregular prices: middling to fine bright button at 8*l* 7s 6d to 8*l* 17s 6d, being cheap; native orange, 9*l* 2s 6d; but a parcel of middling strong orange of old import realised the full valuations, viz., 8*l* 15s to 8*l* 17s 6d. UC orange was bought in at 10*l* 10s per cwt, at which the market is firm.

Other Dyestuffs.—Good Bengal turmeric bought in last week has since obtained 15s for a small portion, the remainder being held at that price. Privately, 14s to 14s 6d has been paid. 296 bales Bengal safflower sold at about the previous value: very low to good, 2*l* to 7*l* 12s 6d per cwt. There is no alteration to report in Gambier or Cutch.

Drugs.—No change of importance occurred at the public sales yesterday. Camphor has been sold rather under 11*l* per cwt.

Metals.—The general demand has not improved. There seems less desire on the part of the ironmasters to sell at present low quotations; no decided change for the better can be noticed. Scotch pig iron is firmer, at 47s 9d per ton for mixed numbers. Spelter has been steady, and 18*l* 5s to 18*l* 7s 6d may be considered the nearest quotation on the spot, but some business is reported for spring shipment at 18*l* 7s 6d per ton. Foreign tin has been unsettled by the recent sudden reduction in English, but the demand is now better. Good Straits sold at 116s. Copper is not at all active, and English lead remains rather quiet.

Hides.—At the public sales of East India held yesterday, common shipping qualities did not sustain their former value, good to fine commanding previous rates.

Jute.—The market here is devoid of animation. On Wednesday 3,940 bales, offered by auction, were nearly two-thirds sold, and generally upon former terms, ranging from 12*l* 2s 6d to 19*l* 17s 6d per ton according to quality.

Hemp.—1,541 bales, offered in public sale, partly met with buyers, including Sorsogon at 22*l*; fine selected quality obtained 32*l* 15s to 33*l* 10s per ton. Yesterday, 1,452 bales roping offered "without reserve," sold at 19*l* 15s to 21*l* 12s 6d per cwt, being rather cheaper in some instances.

Oil.—Olive remains almost neglected. For sperm 105*l* per tun has been demanded, which prevents business. Linseed steady, at 28s to 28s 3d. A good demand prevails for rape: foreign refined, 40s to 41s; brown, 38s. Large sales have been made for forward delivery. The market for palm is steady, at 44s 6d. Cocoa-nut has been offered on the spot and to arrive at reduced quotations.

Turpentine.—Rough has sold at 9s 6d for fine. Spirits has sold slowly at 31s per cwt.

Tallow.—There is no new feature of importance to notice in foreign, the market being dull during the week. This morning, first sort Petersburg Y.C. is quoted 58s; for delivery in April to June, 57s 6d; October to December, 55s per cwt.

Particulars of Tallow.—Monday, April 8.

POSTSCRIPT. Friday Evening.

Sugar.—The market was firmer to-day. 10,148 bags Mauritius sold with spirit, and fine grocery sorts were occasionally dearer. 100 bags Bengal realised 42s 6d for good Goosery. 596 bags native Madras and 125 casks crystallised Demerara sold at the former quotations. The week's business in West India is 2,567 casks. Three floating cargoes of Mauritius have sold for the United Kingdom at 40s landed; and one of Havana, No. 11 to 11½, at 26s 6d per cwt.

Coffee.—77 casks 55 cases 25 bags Neilgherry were partly sold at 75s to 86s; and 356 bags native Ceylon at 63s to 63s 6d per cwt.

Rice.—1,867 bags, 2,000 bags Bengal were taken in: good middling to good white, 12s to 13s 6d; good cargo at 10s 6d. Privately, 2,500 bags have changed hands at 11s 9d to 12s 3d per cwt.

Saltpetre.—410 bags Bombay chiefly sold at 31s to 31s 6d for 54½ to 34½ refraction. 170 bags Bengal kind from Gibraltar, refraction 5, were taken in at 37s 6d. Privately, refraction 6½ sold at 36s 6d per cwt.

Cochineal.—126 bags Teneriffe sold at previous rates.

Cutch was bought in at 21s per cwt.

Turmeric part sold at 14s per cwt for good Bengal.

Oil.—1,830 tubs Japan seed went at 29s to 31s. 350 casks part sold at 40s to 44s 6d. 1,320 casks cocoa-nut, by auction, partly sold at a heavy decline: Cochin, 46s to 48s; Ceylon, 44s 6d to 45s 9d per cwt.

Tallow.—254 casks 318 boxes South American were mostly bought in at 54s to 56s. 165 casks North American went at 50s to 53s. 780 casks Odessa part sold at 52s to 55s; and 147 casks 68 cases East India, 49s to 50s 6d per cwt.

ADDITIONAL NOTICES.

Refined Sugar—The home market for refined sugar has been very inactive this week, and rather lower prices have been accepted by the refiners. Treacle very scarce, and rather dearer. Dutch crushed continues very firm in Holland.

Green Fruit.—Market lower in consequence of arrivals: Some parcels oranges from St Michael's and Valentia sold, by Keeling and Hunt at public sale, went at a reduction of 2s per package. No improvement in the price of lemons. More doing in black Spanish and Barcelona nuts; both descriptions to be had at easier rates.

Dry Fruit.—The market for currants is firm, but not quite the amount of business doing that was experienced a fortnight since. Finest sorts are in request, and sales have been made at 32s at auction, and 33s for Vostizza by private sale. Raisins are quiet; but one or two sales of Valentias have been made during the week at full rates, Cheames selling slowly at 34s. Sultanas are held for higher rates, notwithstanding the large parcels that are coming forward.

English Wool.—The trade continues very much the same; some few sorts are fetching ½d per lb advance, and the market is bare of stock.

COLONIAL WOOL.—The market is without change.

FLAX.—But little remaining here.

HEMP.—Market quiet at the quotations,

COTTON.—Sales of cotton from Friday, April 5, to Thursday, 11th, inclusive:—950 bales Surat at 5⅜d for good fair sawginned, 5⅜d to 5½d for fair to fully fair Dholleras, 5d to 5¼d for middling to fair Oomrawatty, 4 11-16d to 4¾d for middling to middling fair Compta; 200 bales Tinnevelly at 5¾d for good fair; 50 bales Western Madras at 4¾d for fully fair. Notwithstanding the recent accounts from the United States are favourable to the holders of cotton, the demand here has been limited, and the transactions moderate, buyers being disposed to wait until the late arrivals of Surat and Tinnevelly are placed on the market. Prices of Dholleras and Tinnevelly are in partial cases a shade easier; other descriptions are unchanged.

TOBACCO.—The market has been quiet for most descriptions. Prices remain firm and unchanged.

LEATHER AND HIDES.—A steady but limited business has been done in leather, at the quotations of last week. There was not a large supply of fresh goods at Leadenhall on Tuesday, but no article was particularly scarce, or met with any prominent demand. Prices are generally unaltered.

METALS.—A somewhat better feeling prevails in our market from the improved position of the money market, but we have not yet attained to any activity. Copper has found rather better inquiry at low rates, and some considerable business has resulted in English. A little foreign has changed hands, but there are few sellers. Iron is wholly unchanged. Tin is steady at the last week's decline, but there is an absence of animation. Spelter has stiffened 2s 6d to 5s a ton. Lead continues to be flat. Tin plates realise more readily, and at better rates.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	56	6
Fat by ditto	2	11
Yellow Russian	59	6
Melted stuff	37	6
Rough ditto	22	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market brisk at 71s f. o. b. Friesland dull at 116s. Bosch at higher rates, and all cleared.

METROPOLITAN CATTLE MARKET.

MONDAY, April 8.—The total imports of foreign stock into London, last week, amounted to 3,258 head. In the corresponding period in 1860, we received 2,114; in 1859, 2,425; in 1858, 806; in 1857, 1,033; in 1856, 705; and in 1855, 1,090 head.

There was a fair average supply of foreign stock on offer in to-day's market; and the demand for it ruled steady, at quite last week's currency. Notwithstanding that the arrivals of beasts fresh up from our own grazing districts were considerably on the increase, when compared with Monday last, all breeds moved off steadily; and in some instances prices were the turn dearer, the general top figure for beef being 5s per 8 lbs. The quality of the stock was good. From Norfolk, Suffolk, Essex, and Cambridgeshire, we received 2,000 Scots, crosses, &c.; from other parts of England, 600 various breeds; from Scotland, 325 Scots and crosses. On the whole, we were fairly supplied with sheep, the condition of which was by no means first-rate. The mutton trade was steady at prices fully equal to Monday last. The best old Downs in the wool sold at 6s per 8 lbs. Prime lambs sold readily at from 7s 8d to 8s per 8 lbs. Other breeds moved off slowly at from 6s 8d to 7s 6d per 8 lbs. The arrivals from the Isle of Wight amounted to 125 head. Calves were in short supply and good request, at extreme currencies. We have to report a fair time-of-year inquiry for pigs, at full quotations,

Supplies	April 9, 1860.	April 8, 1861.
Beasts	3240	3630
Sheep and lambs	18870	19680
Calves	119	59
Pigs	380	370

THURSDAY, April 11.—The supply of beasts on offer in to-day's market was seasonably good, and the demand for all breeds ruled very inactive, at, in most instances, a decline in the quotations of 2d per 8 lbs. The extreme value of the best Scots was 5s per 8 lbs. With sheep we were well supplied, and the mutton trade was in a sluggish state, at barely Monday's currency. The best old Downs in the wool realised 6s per 8 lbs. Prime lambs sold readily at full prices. otherwise the lamb trade was heavy, at late rates. Calves were in short supply and steady request, at full prices. Pigs commanded extreme rates; but milch cows were a dull inquiry.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	8	Prime Southdown sheep	5	10	6	0
Second quality ditto	3	10	4	2	Large coarse calves	5	0	5	6
Prime large oxen	4	4	4	8	Prime small ditto	5	8	6	0
Prime Scots, &c.	4	8	4	10	Large hogs	4	0	4	6
Coarse and inferior sheep	3	8	4	0	Small porkers	4	8	4	10
Second quality ditto	4	2	4	6	Suckling calves.....each	19	0	22	0
Prime coarse-woolled do.	4	10	5	8	Quarter old store pigs	23	0	30	0

Lambs, 6s 8d to 8s 0d.

Total supply—Beasts, 1,020; sheep and lambs, 8,200; calves, 76; pigs, 290.
Foreign supply—Beasts, 154; sheep, 780; calves, 45.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, April 8.—During the past week the arrivals coastwise have been very moderate, the trade still continues dull, and very little alteration in prices. The following are this day's quotations:—Yorkshire Flukes, 130s to 140s; Lincolnshire Regents, 100s to 110s; Dunbar red soil ditto, 140s to 160s; North Berwick, 120s to 130s; Perth, Forfar, and Fife ditto, 100s to 115s; ditto, ditto, ditto Rocks, 85s to 95s; ditto ditto, ditto Reds, 75s to 85s; French Whites, 60s to 90s; Belgian ditto, 60s to 80s; Dutch ditto, 60s to 80s per ton.

BOROUGH AND SPITALFIELDS, April 12.—The supplies of potatoes on sale at these markets have been very moderate; and all descriptions have met a fair inquiry, at full quotations.

HOP MARKET.

BOROUGH, Monday, April 8.—Our market has been very active the last few days, and a large business effected in yearlings and hops of earlier dates at an advance of from 15s to 20s per cwt from the lowest prices. Last year's growth has received more attention, and the comparatively low price at which they are offering must lead to a better demand. Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 168s; Sussex, 60s, 80s, 126s; Yearlings, 110s, 135s, 180s.

FRIDAY, April 12.—The market for all kinds of hops is very firm. Fine yearling and old qualities sell freely, and prices are on the advance, Medium and inferior parcels, as well as hops of last year's growth, although in only moderate request, command extreme rates.

HAY MARKETS.—THURSDAY,

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 18s to 2*l* 4s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 0s to 5*l* 8s; clover, 3*l* 0s to 5*l* 15s; and straw, 2*l* 0s to 2*l* 4s per load. Trade steady.

WHITECHAPEL.—Meadow hay, 2*l* 2s to 5*l* 5s; clover, 3*l* 0s to 5*l* 18s; and straw, 1*l* 18s to 2*l* 4s per load. Supply moderate.

COAL MARKET.

FRIDAY, April 12.—Walls End:—Tees, 18s 3d—Hartlepool, 18s 3d—Heugh Hall, 17s—Cassop, 17s 6d—Kelloe, 17s 9d—Eden Main, 17s—Framwellgate, 17s—Shincliffe, 15s 3d—Walker Primrose, 12s 6d—Craghead, 16s 6d—Dickson, 17s 9d. 33 ships at market.

LIVERPOOL MARKETS.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 12.—The market has been dull, and there is hardly any change to report since Tuesday, the transactions being restricted to the supply of pressing wants, and buyers generally have obtained a slight advantage in prices.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 12.—During the past week the market for manufactured iron has presented little or no appearance of improvement, and the business transacted has been pretty generally at previous rates. Scotch pig iron is somewhat firmer. In copper there has been more doing, and there is now less disposition to realise on the part of holders. Lead continues dull. The demand for tin plates still improves.

The Gazette.

TUESDAY, April 9.

BANKRUPTCY ANNULLED.

E. Pritchard, Liverpool, wine merchant.

BANKRUPTS.

W. Watson, Gravel lane, Southwark, licensed victualler.
W. P. Poad, Portsmouth, draper.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 30th of March amounted to 513,470*l*, and for the corresponding week of last year to 476,870*l*, showing an increase of 36,600*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 222,395*l*, and for the corresponding week of 1860 to 202,955*l*, showing an increase of 19,440*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, April 8.—The railway market was flat to-day, nearly all the leading stocks showing a fresh decline. Midland was prominently heavy. South-Western and North British exceptionally improved. In the colonial market there was a fall in Atlantic and St Lawrence shares. Great Western of Canada stock remained without recovery at 20 to ¼. Foreign descriptions were also rather heavy, and Lombardo-Venetian closed a fraction lower, at 1⅞ to ¾ dis. American securities continued firm. Mines were inactive, but the general tendency was favourable. In joint stock banks, London and County and London and Westminster were in demand. In miscellaneous descriptions there was a rise in National Discount and a decline in Red Sea Telegraph.

TUESDAY, April 9.—The railway market remained inactive, the daily transactions being mainly confined to the dealers. In some descriptions the public make small purchases for investment, but this demand was chiefly supplied by stock held against borrowed money. The closing prices were a shade firmer than yesterday, but in most cases no material alteration was shown. Great Northern, however, was ½ per cent. higher. In the colonial market another reduction occurred in Grand Trunk of Canada securities, the stock leaving off at 19¾ to 20¼; the ordinary bonds, 36 to 38; and the preference, 63 to 66. Great Western shares were also flatter, at 11⅜ to ½. In foreign descriptions, Pernambuco advanced, while Lombardo-Venetian receded to 2 to 1⅞ dis. Canadian Government debentures were higher. American securities again showed a firm tendency, especially Illinois Central bonds and Pennsylvania Central. Illinois shares, on the other hand, were weaker at 26 to 25½ dis. Mines were inactive at an occasional decline. No change of importance took place in joint stock banks. In miscellaneous descriptions a rise occurred in Crystal Palace stock.

WEDNESDAY, April 10.—The railway market opened steadily, and experienced only trifling fluctuations during the regular hours of business, but after the official close a fair improvement took place. Lancashire and Yorkshire advanced nearly 1 per cent., the present traffic return being less unfavourable than had been expected. Other descriptions mostly left off ¼ to ⅜ per cent. better, Midland, South-Eastern, and Caledonian being the highest. The general transactions continued limited. In the colonial market the only change of importance was a rise in Great Western of Canada shares to 11½ to ⅝. Indian stocks were steady. Foreign descriptions generally left off the same as yesterday, but Lombardo-Venetian were a shade firmer. American securities continued with an upward tendency. Illinois Central shares have in particular rallied to 25⅝ to 24½ dis. No material alteration occurred in mines, joint stock banks, or miscellaneous descriptions.

THURSDAY, April 11.—The railway market was uninfluenced by the reduction in the Bank rate, and the closing prices showed little change. In some stocks, however, a slight reduction took place, especially Lancashire and Yorkshire and South-Western. North-Eastern descriptions, on the other hand, improved. The transactions of the day were unimportant. In colonial market, Grand Trunk of Canada securities rallied, the stock leaving off at 20 to ½. Great Western shares were the same as yesterday, at 11½ to ⅝. Indian guaranteed stocks were fairly supported. Foreign descriptions showed a better tendency, and South Austrian and Lombardo-Venetian recovered to 1⅞ to ¾ dis. Mines were flat, and in several cases showed a decline.

FRIDAY, April 12.—The railway share market experienced a general fall towards the close of business to-day, in consequence of the receipt of disquieting telegrams from Paris. The reduction, compared with the closing quotations of yesterday, amounted to ¾ per cent. in Great Western stock, and ¼ to ½ in most of the other principal lines. Lombardo-Venetian Railway shares declined to 2 to 1⅞ dis. Great Western of Canada Railway shares however advanced. In mining shares a moderate business was doing, at about previous rates.

UNIVERSAL PRIVATE TELEGRAPH COMPANY (Limited).

The Terms for use of this Company's Wires are £4 per mile per annum, including maintenance. Professor Wheatstone's Alphabetical Instruments, requiring no battery, can either be purchased or rented.

L. C. HERTSLET, Secretary.

3 Hanover square, W.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

UNDER HER MAJESTY'S ESPECIAL PATRONAGE.

ROYAL GERMAN SPA—BRIGHTON.

STRUVE and CO. beg to inform the Medical Profession and the Public in general that the PUMP ROOM is OPEN from the First Monday in MAY until the end of OCTOBER, offering every facility for taking a course of the most RENOWNED CONTINENTAL MINERAL WATERS, with the same happy results as at the Natural Springs.

The Waters, carefully bottled, are sold throughout the year at the Pump Room, and by all respectable Chemists, where also a short account of the CURATIVE EFFECTS of these Waters may be had gratis.

None are genuine which have not the name of "STRUVE" on the Label, and on the Red Stamp over the Cork.

KEATING'S COD LIVER OIL.

Just Imported. The Pale from Newfoundland, and he Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within he reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, Imperial measure, at 79 St Paul's Churchyard.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

A BOON TO NERVOUS SUFFERERS.

—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

VOLUNTEER PIPE.—RIFLE BORE.

—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

DR DE JONGH'S (Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

pronounced by the most eminent Medical Men throughout the world to be incomparably superior to all other kinds.

CONSUMPTION.

The investigations of the most experienced pathologists have conclusively proved that Dr de Jongh's Oil is unequalled as a remedy for Consumption, and that no other Oil can possibly produce the same salutary results. ALLEN G. CHATTAWAY, Esq., the eminent Surgeon to the Leominster Infirmary, writes:—"Having for some years extensively used Dr de Jongh's Light-Brown Cod Liver Oil, both in public and private practice, in the treatment of consumption, I have no hesitation in stating that its effects are very far superior to those of any other Cod Liver Oil."

GENERAL DEBILITY.

In cases of *General Debility*, the restorative powers of Dr de Jongh's Light-Brown Cod Liver Oil have been remarkably *manifested*, and it has been resorted to with the most beneficial effects, after the whole range of ordinary tonics had been in vain exhausted. BENJAMIN CLARKE, Esq., M.R.C.S., F.L.S., in testifying to its extraordinary efficacy in his own case, observes:—"Having myself taken both the Pale Oil and Dr de Jongh's Light-Brown Oil for Debility, I am able, from my own experience, to *remark* upon their effects and *comparative* usefulness as remedial agents. After the Pale Oil, and all other remedies that I could think of had failed, I tried, merely as a last resort, Dr de Jongh's Light-Brown Oil; I received immediate relief, and its use was the means of my restoration to health."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

RUPTURES—BY ROYAL LETTERS PATENT

WHITE'S MOC-MAIN LEVER TRUSS

is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 2s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c.,

for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

MEDICAL ADVICE.

DR WATSON, U.S., F.R.A.S., &c.

(specialist), may be consulted daily from 11 till 2 and 6 till 8, or by letter, on all those secret ailments and infirmities peculiar to youth, manhood, and old age, and which tend to embitter and shorten life. All desiring invaluable information on these subjects, or having doubts as to their state of health, should consult the Doctor's new Essay "SELF-TREATMENT SIMPLIFIED," which enables Invalids (in the majority of cases) to Cure themselves easily, privately, and at a small cost. Post paid to any address on receipt of six stamps by the Author, Dr Watson, 27 Alfred place, Bedford square, London.

VALUABLE INFORMATION.—

GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London,

CHUBB'S PATENT SAFES

—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

KEATING'S COUGH LOZENGES.—

Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your *Lozenges*, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

DR CURTIS'S MEDICAL WORK. "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN,

with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES,

Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills"—TIMES.

Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.

London: J. Churchill, and to be had of all booksellers.

MEDICAL CONSULTATIONS.—

Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,

37 BEDFORD SQUARE, LONDON.

Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.

These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.

Dr L. La'Mert may be consulted in Glasgow until the 31st March, at 56 Rosebank terrace, St George's road.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

COLLARD AND COLLARD'S NEW WEST-END ESTABLISHMENT, 16 GROSVENOR STREET, BOND STREET, where all communications are to be addressed. Pianofortes of all Classes for Sale and Hire.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

FINE TEA CHEAPER.

STRACHAN & CO.'S justly celebrated DRAWING ROOM TEA is now reduced to 4s per lb. Guaranteed the finest and Cheapest Tea in the United Kingdom.

26 Cornhill, London, E.C.

TRADE B/P MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"'This is superior to anything of the kind known."

FIRST OF THE KIND Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

CAUTION.—It has been discovered that some persons are selling a counterfeit of DR LOCOCK'S PULMONIC WAFERS. The public is therefore cautioned to examine well each box (before purchasing), to see that the words Dr Locock's Wafers are printed on the Government stamp, in white letters on a red ground, which none but the genuine can have. Dr Locock's Pulmonic Wafers give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all medicine venders.

HOLLOWAY'S PILLS AND OINTMENT.—All the maladies incidental to Spring can be prevented, checked in their course, or ultimately cured, by these fine purifying and cooling medicaments. The pills rouse the stomach, regulate the liver, stimulate the kidneys, and act gently on the bowels. The ointment rubbed over any part penetrates to neighbouring organs, which it frees from all noxious and irritating humours; and, aided by the pills, expels them. By these remedies the skin is cleansed of all freckles, spots, and disfigurements without driving them inwards or doing harm. It is wonderful how weakness, low spirits, and enervation give way to vigour and vivacity under a course of Holloway's medicines, which may be safely used at all times.

CHIMNEY-PIECES, TOMBS, MONUMENTS, FONTS, &c.—EDWARDES BROTHERS and BURKE, 17 Newman street, Oxford street, London, W., beg to inform the nobility and gentry that they manufacture at their own establishments, in Italy and Belgium, as well as at the above address, every description of marble work, at the lowest possible prices. Their galleries contain specimens of all foreign and British marble quarried, in Chimney Pieces, from 25s to 300 guineas each; MONUMENTS AND TABLETS, from £5; Head and Foot Stones, from 30s each.—Sole agents to the Invernettie Granite Company.

OVERLAND ROUTE.—COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

Twenty-third Half-yearly General Meeting.

Notice is hereby given, that the Twenty-third Half-yearly General Meeting of the Proprietors in this Company will be held at the London Tavern, Bishopsgate street, London, on Friday, the 26th day of April instant, at Twelve o'clock at noon precisely, for the general business of the Company, pursuant to the Act.

The Books for the Registration of Stock and Shares will be closed from Saturday the 13th, to Friday the 26th instant inclusive, and Transfers will not be received during that period.—By order,

THOS. R. WATT, Secretary.

Company's offices, No. 3 New Broad street, E.C., London, 5th April, 1861.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the amount which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, of converting them into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London, 1st January, 1861.

GREAT WESTERN RAILWAY OF CANADA.

At a Meeting of the Shareholders of the Great Western Railway of Canada, held at the London Tavern, Bishopsgate street, London, on Thursday, April 11, 1861, at 12 o'clock,

Robert Gill, Esq., President, in the chair;

It was proposed by the Chairman; seconded by Mr Leo Schuster; and resolved: That the reports of the Directors for the half-years ending July 31, 1860, and January 31, 1861, this day submitted, be received and entered on the minutes,

It was proposed by Mr E. Watkin; seconded by Mr J. Harris: and resolved: That the Committee of Investigation appointed at the meeting in London on April 4, 1860, be discharged.

It was proposed by the Chairman; seconded by Mr John Young, Vice-President; and resolved: That a dividend for the half-year ending January 31, 1861, be now declared at the rate of three per cent. per annum, and that the same be payable in London on and after April 30, 1861.

It was proposed by Mr Sidney Smith; seconded by Mr J. Harris; and resolved: That ten of the retiring Directors be re-elected, viz., Mr Robt. Gill, Mr T. Cullen, Mr A. Hoyes, Mr F. S. Head, Mr J. Young, Mr R. Juson, Mr F. W. Gates, Mr H. C. R. Becher, Mr C. J. Brydges, and Mr T. Reynolds, and that Mr Thomas Faulconer be added to the London Board.

It was proposed by Mr Sidney Smith; seconded by Mr E. Watkin; and resolved: That Mr G. Lance and Mr H. Waite be elected auditors of the Company.

It was proposed by Mr A. Hoyes; seconded by Mr S. Scott; and resolved: That the account of the expenses of the Committee of Investigation be rendered to the Board of Directors, and that the same be examined and settled.

It was proposed by Mr J. Harris; seconded by Mr W. Bowler; and resolved: That the thanks of the meeting be given to the Chairman, Board of Directors, and Managing Director.

The meeting then separated.

True extract from the minutes.

BRACKSTONE BAKER, Secretary.

126 Gresham House, Old Broad street, London.

ROYAL DANISH RAILWAY.—

Flensburg Husum Tonning Railway Company.—Notice is hereby given, that the Guaranteed Interest of 6 per cent. per annum upon the Shares, and 5 per cent. per annum upon the Bonds, for the six months ending 25th inst., will be payable on and after that date. The Coupons, detached from the shares and bonds, must be deposited at the London office, 69 Old Broad street, or with the Resident Director, at Flensburg, for three days, when drafts will be issued, payable at Messrs Glyn, Mills, and Co.'s, Lombard street: and at the offices, in Flensburg.

GEORGE GRENFELL GLYN, Chairman.
FREDERICK H. GEACH, Sec.

No. 60 Old Broad streeet, London, April 8, 1861.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par, in sums of not less than £50.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years from the 15th December, 1860, transferable by endorsement without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, April 9, 1861.

EAST INDIAN RAILWAY COMPANY.

Notice is hereby given, that the Fourteenth Annual General Meeting of the East Indian Railway Company will be held at the London Tavern, Bishopsgate street, on Tuesday, the 30th day of April, 1861, at One o'clock precisely, in conformity with the terms of the Company's deed of settlement; and

Notice is hereby further given, that an Extraordinary General Meeting of the Proprietors of the East Indian Railway Company will be held at the London Tavern, Bishopsgate street, in the City of London, on the 30th day of April, so soon as the business of the Ordinary General Meeting shall have been transacted, for the purpose of considering, and, if deemed advisable, of passing resolutions for increasing the capital of the Company, by the creation of new shares to such an amount as shall be then determined. And also for the purpose of determining upon the allotment, issue, sale, and disposition of the shares so to be created.

The Transfer Books of the Company will be closed from the 17th to the 30th day of April, both days inclusive.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, London, April 9, 1861.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

By order of the Assignees of the Estate and Effects Mr Thomas Barton, a Bankrupt.

TO FARMERS AND OTHERS.—Important Sale of an OLD-ESTABLISHED TAN YARD, known as the Kirkdale Tannery, in Liverpool, by Mr BRANCH, on Tuesday, the 7th day of May, 1861, at Twelve for One o'clock in the afternoon precisely, at the Public Sales Room, Liverpool and London Chambers, Exchange, Liverpool, subject to such conditions of sale as will be then and there produced.

A valuable Freehold Tan Yard, containing 4,454 square yards of land or thereabouts, situate in Dingle lane, Kirkdale, known as the "Kirkdale Tannery," containing 235 pits, and comprising all the limes and bates, for the process of unhairing and working hides, and all the handlers, layers, and latches, the latter heated up by steam (the layers are very large and constructed for tanning crop hides, for which the late owner was so well known), steam engine and boiler, and two good bark mills, water and liquor pumps, stocks, &c., comprising all the apparatus of the most approved kind for modern tanning.

Very capacious sheds, having a double tier of floors, the lower of which is heated by steam pipes, good drying room and stoves, bark and valonia stores, &c. There is also a cottage for the foreman's residence with a stable.

The yard is capable of tanning from 300 to 400 heavy hides per week. There is also a considerable quantity of unoccupied land attached to it, suitable for storing barks, fleshings, hair, &c.

These premises are sold subject to a mortgage thereon for securing £2,800, and interest at the rate of £4 10s per cent. per annum, payable half yearly.

Particulars, with a plan, will shortly be ready, and may be obtained of the Auctioneer, Chas. Turner, Esq., Official Assignee, South John street, Liverpool; or Mr Edward Banner, Solicitor, Liverpool.

ECONOMIST WANTED.—All numbers of 1843, January to July, 1844, July 27, August 3, August 10, 1844: also the whole of 1846. A liberal price will be given for the same. The advertiser has several duplicate numbers, principally of 1857, 1858, and 1859, which he would be glad to dispose of, or, if preferred, exchange.—Address to W. G., at Barker's, Throgmorton street, E. C.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.		Amount payable up to Dec., 1854.	
£	£	s	£	s
5,000	1,987	10	6,987	10
1,000	397	10	1,397	10
100	39	15	139	15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, *without security* or deposit of the policy.

The Assets of the Company at the 31st December, 1859, amounted to £690,140 19s, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, P. L. BOYD, Resident Director.

IMPERIAL LIFE INSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman.

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

NATIONAL PROVIDENT

INSTITUTION, 48 Gracechurch street, London, for Mutual Assurance on Lives, Annuities, &c. Established December, 1835.

DIRECTORS.

CHAIRMAN—Samuel Hayhurst Lucas, Esq.
DEPUTY-CHAIRMAN—Charles Lushington, Esq.

John Bradbury, Esq.	Robert Ingham, Esq., M.P.
Thomas Castle, Esq.	Charles Reed, Esq., F.S.A.
Richard Fall, Esq.	Robert Sheppard, Esq.
John Feltham, Esq.	Jonathan Thorp, Esq.
Charles Gilpin, Esq., M.P.	Charles Whetham, Esq.
Charles Good, Esq.	

PHYSICIANS.

J. T. Conquest, M.D., F.L.S. | Thomas Hodgkin, M.D.

BANKERS—Messrs Brown, Janson, and Co., and Bank of England.

SOLICITOR—Septimus Davidson, Esq.

CONSULTING ACTUARY—Charles Ansell, Esq., F.R.S.

MUTUAL ASSURANCE WITHOUT INDIVIDUAL LIABILITY.

Extracts from the Report of the Directors for the year 1860:—

		£	s	d
Number of new policies issued during the year	988			
Assuring the sum of		481,231	1	10
Producing an annual income of		16,053	15	7
Making the total annual income, after deducting £50,112 annual abatement in premium		298,251	10	4
Total number of policies issued	23,573			
Amount paid in claims by the decease of members, from the commencement of the institution in December, 1835		1,034,368	5	4
Amount of accumulated fund		1,393,895	14	11

The effect of the successful operation of the society during the whole period of its existence may be best exhibited by recapitulating the declared surpluses at the four investigations made up to this time:

		£	s	d
For the 7 years ending	1842	32,074	11	5
— 5 —	1847	86,122	8	3
— 5 —	1352	232,061	18	4
— 5 —	1857	345,034	3	11

The next division of profit will be made up to the 20th November, 1862. Policies effected prior to that date, if subsisting at the time of division, will participate in such profit for the time they may have been in force.

The Prospectus, with the last report of the Directors, and with illustrations of the profits for the five years ending the 20th November, 1857, may be had on application, by which it will be seen that the reductions on the premiums range from 11 per cent. to 98½ per cent., and that in one instance the premium is extinct. Instances of the bonuses are also shown.

Members whose premiums fall due on the 1st of April are reminded that the same must be paid within 30 days from that date.

March, 1861. JOSEPH MARSH, Secretary.

EARLY PARTICIPATION IN PROFITS.

CLERICAL, MEDICAL, AND GENERAL LIFE ASSURANCE SOCIETY, 13 St James's square, London.

Policies in existence on June 30th, 1861, will participate in the Seventh Bonus to be declared in January, 1862; so that persons who complete Assurances before June 30th, 1861, will share in that Division, although one Premium only will have been paid.

Tables of Rates and Forms of Proposal can be obtained of any of the Society's Agents, or of

GEORGE CUTCLIFFE, Actuary and Secretary.

Government Officials.—Reduction in Scale of Premiums.

THE EUROPEAN ASSURANCE SOCIETY ISSUES POLICIES of GUARANTEE,

at reduced rates, for Officials in on under the Treasury, Customs, Inland Revenue, Board of Trade, Poor Law Board, Admiralty, and other public departments, and for Bank and Railway Clerks, and persons in commercial employments.

Further reductions on the combination of Life Assurance with guarantee. Annuities granted on favourable terms.

Forms and every information may be obtained at the Chief Office, No. 2 Waterloo place, Pall Mall, London.

SPECIAL NOTICE.

PELICAN LIFE INSURANCE

OFFICE, Established in 1797,
No. 70 Lombard street, E.C.; and 57 Charing cross, S.W.

DIRECTORS.

Octavius E. Coope, Esq.	Henry Lancelot Holland, Esq.
William Cotton, Esq., D.C.L., F.R.S.	Wm. James Lancaster, Esq.

Edwd. Hawkins, Jun., Esq.	Matthew Whiting, Esq.
K. D. Hodgson, Esq., M.P.	Marmaduke Wyvill, Jun., Esq., M.P.

Robert Tucker, Secretary and Actuary.

BONUS.

All Policies effected on the Return System, and existing on the 1st July, 1861, will participate in the next division of profits, subject to such of them as have not then been in force for five years, being continued until the completion of that period.

LOANS

On Life Interests in possession or reversion: also upon other approved security in connection with Life Assurance.

*** For Prospectuses, Forms of Proposal, &c., apply at the Offices as above, or to any of the Company's Agents.

THE STANDARD LIFE ASSURANCE COMPANY.

Established 1825.

LONDON—82 King William street.
EDINBURGH—3 George street (Head office).
DUBLIN—66 Upper Sackville street.

ANNUAL REPORT, 1861.

The Thirty-fifth Annual General Meeting of the STANDARD LIFE ASSURANCE COMPANY was held at Edinburgh, on Monday, the 25th of February. The following results were communicated in the Report by the Directors, showing the operations of the Company during the year 1860:—

		£	s	d
Amount proposed for assurance during the year, contained in 1,384 proposals		807,747	0	0
Amount of assurances accepted, and for which policies were issued, contained in 1,207 policies		705,897	0	0
Annual premiums on new policies		22,565	4	6
Claims by death during the year, exclusive of bonus additions		104,326	14	8
Annual revenue at 15th November, 1860		304,161	13	7
Arising from premiums	£227,595 4 1			
From interest on the invested funds	76,568 9 6			
	304,161 13 7			
Accumulated fund, invested in Government securities, in land, mortgages, &c.		1,805,982	13	6

Average amount of new assurances annually for the last 14 years, Half a Million sterling, being the largest amount of business transacted in that period by any Insurance Company.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

NOTE.—An Adjourned Meeting will be held early in May, to receive the Report on the Division of Profits for the past Quinquennial period.

WANTED,

in Liverpool, the Agency of a wealthy London house in the trade to and from China. The Advertiser has some Capital, and mercantile experience acquired in other foreign business.—Apply by letter to L. T. C., Post Office, Liverpool.

WANTED, BY AN ACTIVE,

intelligent Young Man, a situation as Clerk or Messenger: latterly been employed in House and Estate Agents' Offices. Good references from former employers.—Beta, 83 Bolsover street, Regent's park, N.W.

A GENTLEMAN OF GENERAL

business experience desires to obtain the London Agency of a Mercantile or Manufacturing Firm of good position.—Address W. E., care of Benjamin Way, Esq., 3 Hare court, Temple.

A GENTLEMAN

who has managed a line of large steamers, has superintended the working of a mineral concern abroad, has had extensive experience in railway traffic, and who, during the Russian war, directed the shipments of one of the leading coal firms, wishes for an engagement in any responsible branch of commerce. He speaks and writes French, has a knowledge of Spanish, acquired by two years' residence in the country, and has travelled the whole of Europe. Age 27. Is a first-class practical chemist, and would have no objection to go abroad. References to firms and individuals of the highest respectability.—Apply to T.H.F., Tavistock hotel, Covent-garden, London, W. C.

TO CAPITALISTS.—

An opportunity now presents itself, of joining respectable parties in entering into a Commercial undertaking in New Zealand, which is likely to be very remunerative.—For particulars apply to Messrs Hancock and Sharp, 20 Tokenhouse yard, London, E. C.

TO CAPITALISTS, &c.—

A Gentleman of good connections and considerable banking experience would be happy to make the acquaintance of a few others with a view to the formation of a new Joint Stock Bank in London.—Address primarily, by letter only, with real name, to D. T. B., City News Rooms, 66 Cheapside, E.C.

TO CAPITALISTS.—

Wanted, a Gentleman, to take a small share in the expense and risk of promoting a sound public undertaking, now near maturity. Return five-fold the amount advanced. Full information given to applicants possessing the necessary means and business experience. Address A. Z., post office, Hampstead, N. W.

TO RAILWAY AND JOINT STOCK

COMPANIES.—A Gentleman, of 12 years' experience in the position of Accountant and Registrar to English and Foreign Companies, holding at present a responsible appointment which he is about relinquishing, seeks another post, either as Secretary, Accountant, or Registrar. First-class credentials as to qualifications, integrity, &c. Age 32. Security will be given.—Address Secretary, care of Mr Vickers, 2 Cowper's court, Cornhill, E.C.

PARTNERSHIP.—

Wanted, a Partner to join the advertiser in an old-established Sugar Refinery in London. The partner must be a gentleman of business habits and able to undertake the counting house department, and must be able to introduce a capital of from £15,000 to £20,000. Most unexceptional references will be given.—Apply by letter to X. Y., care of Messrs Marten, Thomas, and Hollams, Solicitors, Mincing lane, London.

PARTNERSHIP.—

A Merchant, of well-known experience and probity, about to establish himself in London, desires, as Partner, a gentleman of business habits, possessing capital, to enter into a general agency business of a thoroughly commercial character. The advertiser has first-rate connections in Sweden, Denmark, and neighbouring countries with exporters of grain, iron, timber, &c. First-class references will be given. Principals or their solicitors only treated with.—Address F. F., care of Messrs Lowin and Co., solicitors, 32 Southampton street, Strand, London.

IMPORT AND EXPORT.—

A Gentleman with first-class references, of great practical experience, who lately filled an important position in a public company connected with the dock, shipping, import and export interests, offers his services either in or out of the office.—Address L. E. L., 21 Ash grove, Hackney, N. E.

THE "TIMES" £1 1s PER

Quarter free by post, by the Mail of the evening of the day of publication. References as to regularity of supply to Clergymen and Gentlemen in all parts of England. Magazines, Periodicals, and all London Newspapers supplied to order by W. ABBOTT, Newspaper and Advertisement Agent, 7 Little Tower street, London, E C.

MERCANTILE SHIPPING

AGENCY. Established upwards of 80 years.

The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.

W. J. HALL and CO., Sworn Brokers,
(Successors of Holmes, Hall, and Sons,)
Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, E.C., London.

THE CITY TURKISH BATHS,

5 SOUTH STREET, FINSBURY.

Open daily, Sundays excepted.

The bath, in addition to being a great curative agent is the greatest physical luxury in the world.

MR GLADSTONE'S SURPLUS.

VERY many persons were surprised at finding that Mr Gladstone has a surplus, and almost every one was surprised at the magnitude of that surplus. After all that was done last year and all that was said—after the Budget of 1860 and the harvest of 1860—after the Chinese war—after the many lugubrious predictions of many prophets,—it was wonderful to find plenty just where famine had been expected. The question in every one's mouth during the past week has been, "How can this be?"

The simple explanation is contained in the concise remarks which we last week submitted to our readers. We then ventured to prophecy a *not* unpleasant Budget, and assigned the reason. A Budget is not a history, but an anticipation; it deals not with the actual receipts and expenditure of the past, but with the *estimated* receipts and outgoings of the future. The material consideration, as we on that occasion said, is what will be the expenditure of next year, and what will be its income. "The Chinese hostilities have stopped. The "bills probably are not all paid, but the operations are now "at an end, and the *cause* of bills has ceased. With the "finance of the coming year the expenditure of last year "has nothing to do. We may by last year's spending have "reduced our balances in the Exchequer further than then we "anticipated, or we may not; but, either way, our future in- "come and our future expenditure will be precisely the same. "We need not, therefore, dwell upon misfortunes which "arise from temporary exigencies, and are in consequence no "valid reasons for future anxiety."

No more emphatic commentary upon the observations could possibly be imagined than the figures of Mr Gladstone. He tells us, on the one hand, that the

	£
Expenditure of last year was (after applying a correction of 288,000*l* to the formal published account)	72,554,000
The income of last year	70,283,000
Consequently the deficiency was	2,271,000

On the other hand, for the coming year he estimates that the expenditure will be as follows:—

	£
Charge for the public debt	26,180,000
Consolidated Fund	1,930,000
Army and Militia	15,256,000
Navy	12,029,000
Vote of credit for Chinese expenses	1,000,000
Packet service	995,000
Collection of revenue	4,780,000
Miscellaneous	7,730,000
	69,900,000

And he expects that a revenue of the following sums would accrue from the following sources, *if all our present taxes were continued*:—

	£
Customs	23,585,000
Excise	19,463,000
Stamps	8,460,000
Taxes	3,150,000
Income tax	11,200,000
Post Office	3,500,000
Crown lands	295,000
Miscellaneous	1,420,000
Chinese indemnity	750,000
	71,823,000

Consequently, according to Mr Gladstone's anticipation and estimate,

	£
The aggregate revenue of 1861-1862 will be	71,823,000
The entire expenditure	69,900,000
Showing a surplus of	1,923,000

Nothing in themselves can be plainer or simpler than these figures. All that is necessary is to bear in mind that every Budget is from its very nature prospective, not retrospective; that it is a calculation of the fortunes of the future, not a summary of the results of the past.

But it will be asked, 'What then has become of last year's deficit; you say it has not to be provided for; how has it been met?' It has been met in three ways. The balances in the Exchequer—the ready cash which the public have at their bankers has been reduced; certain casual sums (of which the principal arises from the Exchequer Loan Commissioners, and the Commissioners for Public Works in Ireland having this year received in payments of old advances considerably more than they have this year lent) have been spent; and, lastly, the National Debt has been increased.

			£
Reduction of balances			1,450,000
Casual receipts by excess of repayments over new loans			627,000
INCREASE OF DEBT:—			
Exchequer bonds issued		£594,000	
Less Exchequer bills paid off	£139,000		
Interest on donations and advances (in the nature of a sinking fund)	23,000		
		162,000	
			432,000
Issued for fortifications loan			50,000
			2,559,000

which is the amount of the *deficit* of 2,271,000*l*, *plus* the 288,000*l*, which, as before stated, Mr Gladstone omits from the account of 1860-1861, because it was only included in the published returns in consequence of a legal formality, and really and substantially belonged to the account of 1859-1860.

Again, it will be asked, Why is the result of the two years —of the past year and of the coming year,—so different?

The answer appears on the face of the figures.

	£
The expenditure of 1860-61 was	72,554,000
— — 1861-62 is estimated to be	69,900,000
Being a reduction of	2,654,000
And the revenue of 1861-62, is estimated to be	71,823,000
— — 1860-61 was	70,283,000
	1,540,000

showing, therefore, that by Mr Gladstone's calculations the receipts next year are to be much more than the receipts of last year, and our outgoings much less than the outgoings of last year; and there is plain arithmetical reason why the concurrence of the two should transform a heavy deficit into an important surplus.

But then the question returns after all—Is this surplus real? As it is an anticipation, may it not be an unfounded anticipation? Every estimate rests on certain reasons more or less plausible: what, then, are the reasons for this one?

The general principle on which the estimates have been framed is that of supposing that almost every branch of revenue will yield a little more than it did last year. Mr Gladstone reckons on an increase

	£
In the Customs of	280,000
— Excise	28,000
— Stamps	112,000
— Taxes	23,000
— Income tax	277,000
— Post Office	100,000
— Crown lands	5,000
	825,000
Less decrease—Miscellaneous	33,000
	792,000

And on the correctness of this principle much argument will doubtless be raised. It will be said that trade is falling off; that transactions are daily diminishing in number; that the consumptive power of the masses is rapidly on the decline; that the aspect of the American question is worse at this moment than it has ever before been; that our exports to the other side of the Atlantic will probably diminish; that our Indian commerce is not likely to be very flourishing; that the state of Europe is deterring. On the other side—the favourable side—it will be said that in the last year we experienced the greatest financial difficulty which can happen to this country—a bad harvest; that the effect of this single cause is likely to be far greater than that of all other causes; that a bad harvest is worse than the American revolution, or the Indian famine, or all such causes; that last year the financial effect of the bad harvest was aggravated by the augmented price of meat and by other minor influences which may not recur to the same extent:—in a word, that if we have a good harvest, there is every reason to hope for a better revenue than last year; and that at this time of the year it is always fair, reasonable, and suitable to speculate on a good harvest.

These arguments will make a different impression on each person according to his temperament, and it is not easy on such subjects to set up an absolute or infallible standard. But thus much we may say without contradiction, if we take the sanguine and favourable side of this question—of this cardinal question on which the whole Budget hinges, we should be prepared, by way of fair balance and due compensation, to take a strict, careful, and almost desponding view of all other questions relating to it. In calculations of futurity the plain and reasonable method is to decide some points with our hopes and some points against our hopes, so that, on the whole and to the best of our limited anticipatory power, we may balance the chance or error in one direction by an equal chance of error in the opposite. It is very unlikely that everything will turn out as we hope, or that everything will turn out as we fear; the overwhelming probability is that the future will be very mixed, and our estimates should accordingly be mixed likewise.

Does Mr Gladstone adhere to this sound rule? We consider it clear and unquestionable that he does not. He had a very excellent opportunity for balancing a rather sanguine anticipation against an over-cautious one, and he has neglected it.

There is an unusually anomalous item on both sides of the national account this year,—the Chinese item. There are bills to be paid in China, and there is a sum of money that is expected from China. As we have formed a cheerful estimate of the regular revenue, it seems only reasonable and sensible that we should take rather a depressed view of these casual receipts and casual outgoings. Mr Gladstone has taken a sanguine view certainly of one, perhaps of both. He calculates that we shall receive all the indemnity money we can claim, and he calculates that we shall only have to charge this year 1,000,000*l* of Chinese expenses, which seems but a meagre remnant for the formidable bills of a noble expedition.

It is very important that the clear and distinct explanations of Mr Gladstone on this subject, in reply to Sir Stafford Northcote, should be borne in mind.

	£
The vote of credit for the Chinese war last year was	3,800,000
The actual money spent	3,043,000
	757,000

And this money will be required as well as the 1,000,000*l* now asked for. Mr Gladstone observed, "that the "sum of 1,000,000*l*, together with the three-quarters of "a million in round numbers still remaining available out "of the vote of last year, was, as far as he could form a "conjecture rather than a judgment at the present date, "likely about to cover the whole liability of the country in "respect to China, together with a further liability that was "indirectly incident to the Chinese war—viz., the heavy extra "charge arising from the necessity of allotting Indian pay and "allowances to the British force in occupation of China;" though he afterwards guarded himself even from this degree of precision, by saying that votes of credit being for anomalous and undefined expenses, were in their nature indefinite and 'elastic.' With the technicalities of 'votes of 'credit' men of business at large have nothing to do, but it appears certain that 1,750,000*l* of Chinese expenses are still payable out of some English money or other,—what year's money we do not care; and it is quite evident that it must be impossible to predict at what moment such bills will be presented for payment.

On a careful survey of these admitted facts, it therefore appears to us certain that Mr Gladstone has taken a sanguine view of the casual receipts he anticipates, of the casual incomings that may fall in, as well as of the regular revenue on which he relies. The surplus of the Budget is in consequence a magnified surplus. It is a surplus to deal tenderly with.

Does Mr Gladstone deal tenderly with it? His warmest admirers, and on many points we are among his very warmest, cannot say that he does. He takes off from the permanent revenue of the country more than his surplus,—more than his surplus even as his own calculations make it. He reckons his surplus at 1,961,000*l*, but he takes off from the permanent revenue of the country—

	£
One penny of the income tax	1,100,000
Paper duty	1,300,000
	1,400,000

It is true that in the present year he has a nominal surplus of 400,000*l*, for he only takes off three-quarters' income tax this year, and half a year's paper duty, dating from the 1st of August; but in subsequent years the revenue will suffer the whole diminution we have stated. Only parts of the proposed reductions will be in operation during this financial year, but the whole will be in operation during the next.

And it is further to be remembered that the mere expectation that the paper duty is to be repealed in the autumn will greatly diminish the revenue to be derived by the Excise between this period and that. The paper manufacturers will properly and reasonably manufacture only the minimum which is possible. When the duty is taken off, the actual paper in the country will be reduced far below the average, and the revenue will have suffered in consequence. Mr Gladstone did not say that he allowed for this circumstance, but it will certainly and inevitably diminish his Excise revenue to the extent of the actual surplus, whatever it may be. There will scarcely be a question that the reduction of the income tax has a prior claim to every other remission whatever. It presses more hardly, not of course on the richest persons who pay it, but on that subordinate, numerous, and straitened class of persons whom we call the lower middle class. Clerks with 200*l* a year would feel relieved by the diminution

of the income tax more than by anything else; and if a fair person will compute the comparative pressure on different classes, they are probably the most burdened class of all.

Moreover, 1d taken off the income tax is not taken off for ever. It may be reimposed if the public necessities require it. A reduction of a Customs or an Excise duty is difficult to place; an abolition once made is made for ever.

Of indirect taxes, we think it tolerably certain that, apart from political considerations and all recent and temporary antecedents, the tea and sugar duties have a superior claim to the paper duty. We do not underrate the importance of the latter. We do not join in the superficial and frivolous talk which treats its abolition as of no importance or of slight importance. We believe it would give real relief in those almost innumerable transactions, such as the cost of packing, parcels and other similar things, in which the expense of paper enters as a constant and permanent, though subordinate element. We think it would improve the penny papers, one of the most valuable instruments at the present moment of public instruction. We think it would aid and assist education, not so much perhaps in its most interesting and costly portions, as in its humbler and more immediately practical departments,—not in poems, but in school-books. But, nevertheless, the great outstanding fact remains, that a reduction of the tea and sugar duties, and especially of the former, would be a relief to the whole multitude of the lower classes in their closest and most intimate necessities; and with this no refined, theoretical, and, so to say, invisible considerations, such as can be urged in favour of the reduction of the paper duty, can in pure political economy, in the view of an abstracted calculating reasoner, for a single moment effectually compete or contend.

The conclusion, therefore, of simple, pure finance is, that we have hardly a greater surplus than is sufficient to justify or repeal of one penny of the income tax; that this reduction has a preferential claim on that surplus; and that among other diminutions of taxation—among diminutions of indirect taxation, the abolition of the paper duty is not that which can show the most pressing need, or the most clear immediate advantage.

But it would be most rash to assume that mere financial considerations would be permitted to have conclusive weight even on a question which in superficial appearance is exclusively financial. It would argue not only ignorance of the world (for that is an inconclusive and superficial phrase,—there is no greater source of error than that very special and remarkably informed aggregate which is emphatically called the world), but it would argue a great ignorance of true substantial politics—of actual true business—to suppose that mere arithmetical considerations, mere computations of profit and loss to the revenue, would be in truth conclusive on a question such this

Doubtless it is easy to fancy a hypothetical and imaginary world, in which only pure economical considerations should have weight and influence. But this is not the world in which we live. The practical statesman takes a wide range of ideas —includes complex elements in his judgment—and he is justified in so doing. It is not for *us* to make light of pure financial considerations; we may be charged with other errors, but not certainly with that; nevertheless it becomes us to admit that there are certainly cases when economical and financial considerations are subordinate to those of politics; and, though with less certainty, but still with real substantial belief, to maintain that this may be one of them.

The paper duty has two great political defects. *First*, it has been the issue, the cause, the bone of contention between the two Houses—between the House of Commons and the House of Lords. We are certainly not advocates of the extreme pretensions of the House of Commons; on the contrary, when the contention on the subject was the principal topic of financial interest, we, almost alone among Liberal organs, were bold enough to maintain that it was desirable that the revising Legislature, the House of Lords, should have the same power of regulating the reduction of taxation which it has of regulating and criticising all other subjects,—and to that opinion we adhere. We can quite imagine cases when the opinion of the House of Commons, a body peculiarly subject to intermittent and transitory influences, should on questions of money, the least intermittent and transitory of all subjects, be subjected to some sort of check, superintendence, and control. But we are not so blinded by an abstract theory as to be unaware that the mere fact of having been the ground and issue of such contention is one of the greatest calamities which any established institution can have—is an almost insuperable calamity to the paper duty, which has all the objections we have stated, which no one at heart and on conviction really likes, which combines in popular belief at once the two objections of being the worst of Excise duties and of being the only duty on knowledge.

And even if this difficulty could be permanently surmounted, which is not easy to surmount, (for after the censure and the degradation which the paper duty has in fact incurred, we cannot conceive of its remaining as an enduring and permanent source of revenue,) a further great difficulty of the present moment would remain. It may be sincerely and credibly said that the repeal of the paper duty is essential, not merely to the existence of the present Government—which, though by no means a slight, is nevertheless in the eye of the public a subordinate matter—but to the existence of *any* Government.

The paper duty has become what no subject of finance ever ought to become—the watchword of party. Its repeal is identified not only with the success of a small and extreme section of the Liberal party, but in fact with the superiority and *amour propre* of that party itself. Even if the Conservatives came into office at the present moment, they could not resist its repeal. They would be in a very considerable minority on general questions. And if a resolution unfavourable to the paper duty be proposed in the House of Commons, where the Liberals have a decided if not an imperious majority, they could not—especially after the admission and adhesion of Mr Disraeli at a former time—effectually and really resist its repeal. It may, indeed, be said that the exceptional and critical power of the House of Lords may a second time be called into practical action on the same question. But if so, it might imperil the existence of this power itself; and, what is a more persuasive, if not a more thoroughly well-founded argument, a repeated rejection by the House of Lords would rather animate than cool the zeal of the Liberal party, and especially of the more advanced and radical part of it. After no long time, they would *compel* a Conservative Government to pass it through the House of Lords, by those familiar expedients by which Conservative Governments have on so many occasions in the last twenty years compelled or induced the House of Peers to pass the very propositions which, of all others, they most of all and especially disliked and detested.

And lastly, it is no light matter that the present Government should be broken up at this moment. As far as we can judge, we say this simply and truly, though we acknowledge that our individual sympathies and liberal opinions may on such a subject mislead us. But who is to reign in their stead? Are we again to have a Conservative Government in a professed minority,—to see it concede everything it would retain, and propose everything it would dislike,—to see it most absurdly, illogically, and yet, as the inexorable logic of facts would rule it, necessarily propose the repeal of the paper duty? Why should we break up a Government of the ablest men we have—a Government with which the country is satisfied—a Government which has real thoughts, real intentions, fairly in accordance with the most cultivated opinion and the most chastened sentiment of the country, to bring in a Conservative Government, which would be Conservative only in name, —which would, as in 1852 and 1858, attempt to be Liberal in policy and in legislation without the abiding check and warning guidance of being Liberal in conviction—which in a month or two would probably repeal the paper duty—which, though far from destitute of good intentions, yet, being in a helpless and exposed minority, would probably in that way, and in far worse ways, too, disorganise our finances after all.

Upon these political considerations, as far as we can judge, the present Budget ought to rest; and by the strength of these we believe it will in fact be carried. No reasoning person can be blind to their argumentative strength, and the practised politician will probably feel them more acutely and convincingly than he can analyse or explain.

One person there is, indeed, who will object to this sort o

reasoning—who will probably regard it as a worse offence than systematic dissent and clear antagonism. This one person is Mr Gladstone. Though others may regard this Budget as a political move, we may be sure he does not so regard it. He believes every iota of those figures, many as they are. In reply to everything we have urged by way of economical objection, he would have one powerful, effective, and, to his own mind, convincing argument ready. He would say, "*We will reduce the expenditure.*" We only wish he would take the only true way of reducing it. We wish, instead of holding up to public astonishment the enormous sums we expend, he would employ his rare zeal and his marvellous powers in rendering those means effectual. Every one believes that we squander unnecessary millions on the army and navy. If Mr Gladstone would make the really requisite money, or even a distant approximation to it, equally effectual, there is no recompense of power or popularity which England would think too great or magnificent for her to give or for him to receive. But less than that will not content her. She will buy military safety somehow or other. If Mr Gladstone or some one else do not show—not on mere paper, for that is easy, but in actual difficult practice—how she is to buy safety cheap, she will buy it dear; she is determined at some cost to have it. She will not have her shores unprepared, nor will she descend among the Powers of Europe, nor will she be evidently unable to give an effectual support to the liberty she approves and the policy she desires.

THE AMERICAN NEWS AND ITS LESSONS.

There is a painful sense of imbecility produced by all public criticism on a tide of events apparently so irresistible, and yet so uncertain in direction, as those which are rushing forwards in the United States. Even the American journals feel this: they comment on the stream of events without any hope of influencing it, and with little hope even of divining its immediate tendency. The truth is, that the time for criticism is past; and until some final act of the competing Administrations either precipitates the country into civil war, or opens a definite prospect of peace, there is little to do but to bear the political suspense with as much patience as possible. The next mail may, it is feared, bring news of the disaster which we have so long feared yet hoped to see averted—a collision between the seceding and non-seceding States. It was feared at the date of the last advices that such a collision had already taken place at Pensacola, as no telegraphic despatches had been received for several days from Fort Pickens; and three United States frigates were on the point of sailing under sealed orders, whether to succour Fort Pickens or to put down the Spanish filibustering attack on St Domingo, was not known. Another mail must probably clear up the question of peace or war,—and it is only too probable in the worst way.

If we could look forward to even a civil war as decisive, —as likely to end soon, and without ulterior evil consequences, in the triumph either of Union or of Disunion, we should not shrink even from that terrible remedy for a terrible malady. Unfortunately, we fear it would only result in the further disintegration of what remains of the Union, and in a new and grievous exacerbation of the hatreds and rivalries between the various fragments. At present, the six Northern Slave States that have not seceded,—Arkansas, Tennessee, North Carolina, Kentucky, and Virginia,—are waiting with suspended judgments to watch the steps of the rival Administrations. On the course of these Border Slave States almost everything depends. Their free population is double that of the seceded States, and far more adapted to military purposes. Should they ultimately join the South, the Confederated States would have a *free* population more than one-third of that of the Northern Union, and a Government probably much more compact and formidable. But the chances are that the Border States will never join the South, though a civil war would in all probability ensure their recoil from the North. Their interests are in many respects different from those both of North and South. To a very large extent they are of course identified with slavery;—but they are not for the most part cotton States; they have very large districts in which free labour would be more effective than slave; and they are warmly interested in preventing any renewal of the Slave Trade. The result, therefore, of any fresh impulse of disgust towards the North would probably be to cement them into a new Union of their own. And a still worse result of civil war would of course be the growth of that intense jealousy and mutual hatred of which American States seem but too susceptible.

While awaiting the result, it is impossible for Englishmen not to observe that the whole mischief has been, not *caused* but painfully exasperated by the unfortunate mixture of flexibility and inflexibility in the United States constitution. It is the peculiarity of that constitution to have a Prime Minister elected periodically by the mass of the people, and yet, during his reign, almost independent of the confidence of the people's representatives. The first effect is that the choice of a President being a much less remediable transaction than the choice of an English Prime Minister, it has more tendency to induce acts of popular resistance such as we have recently seen. It may be doubted whether the Southern States would have acted so violently, and it is nearly certain that they would not have acted with so much unanimity, if a Congressional defeat could at any moment have relieved them, as a Parliamentary defeat does in England, of their unwelcome master. They would have hoped, whether justly or not, that the first audacious step would so modify the views of the doubtful supporters of Government, as to turn victory into defeat,—and they would have strained all their energies to secure such a defeat rather than to organise a rebellion. No doubt the issue might have been some rapid succession of Governments such as we see in our democratic colonies in Australia, which is doubtless a grave evil. Still it is not an evil so great as that which results from rendering the Executive independent of the people's representatives. Rapid changes of administration disgust the people, and in the end cure themselves. In the meantime a great change of policy comes gradually though certainly on, and the force of the change is broken to the minority by little successes which modify its influence. But in the American Union the changes of Presidents carry a certain exasperating hopelessness with them. The Presidents are almost free from Congressional influence, and they are in for four years at least. *This* evil at least will be aggravated by the extension of time adopted in the Southern Confederation, though others may be diminished.

Another bad effect of the American form of constitution is that the President, when once he has announced his policy, is far more personally responsible for it, far less able to modify it with credit from time to time as occasion seems to require, than the English Prime Minister. He does not in the same manner *share* his responsibility with his Parliament,—nor his Parliament with him. He sometimes tries, indeed, as Mr Buchanan did, to cast the whole responsibility on Congress; but the only effect is that Congress, being a quite unfit body for executive resolves, does nothing, and finally leaves everything to the President. But what is really wanted for the effective administration of a free country in times of excitement, is, that the Government should be in such connection with the people as to direct the national policy in harmony with their gradually forming convictions. For this purpose, the ruler must himself belong to the representative body—must fit himself for the guidance of the country by guiding the opinion of that body—must, in short, try his power both of influencing and yielding on the ruling assembly first, as his best aid in trying it on the nation. There is no provision for this in the American constitution. The Government is in almost as little direct contact with the people as the Russian Government, and yet it has to guide itself by the wishes of the people, which the Russian Government does not pretend to do. If anything has been made manifest by the recent American discussions in Congress, it is this, that it was a fatal mistake to suppose that the administration of a popular Government could be strengthened by being raised above the direct influence of Parliament. On the contrary, it is seriously weakened. To carry popular opinion with them is, in fact, a necessity of both the American and English Government; but the English Government, by its immediate dependence on Parliament, has a powerful *aid* for this purpose, which the American

Government wants. The mutual influence of the Cabinet on the House, and the House on the Cabinet, keeps the country in a vital connection with the Ministry which does not exist in America. If Mr Lincoln, in making up his mind as to his policy, had felt that the first necessity was to carry Congress with him—that his power was limited by the support of Congress,—he would have first applied himself to testing his influence over Congress. In the course of this process he would in all probability have modified his own view in some measure, as well as that of the body he had to lead, and so have brought the two into distinct and practical harmony. But as it is, nothing of this kind takes place. Now and then, indeed, he sends a message to the Houses; but there is no closer connection between him and them. His policy is formed in the Cabinet, and there is no channel by which he can exert on Congress, or Congress on him, those multiplied influences which connect an English Premier and an English Parliament. His responsibility is far more exclusively his own. And the result is, that he has neither done anything to persuade Congress that coercion is necessary, nor Congress to persuade him that coercion is dangerous. We fear that he is going to attempt a policy in which Congress will never support him powerfully enough to give any chance of success,—and yet from which it will not attempt to withhold him. A more fatal relation between the Government and the people can scarcely be conceived. The popular power is strong enough to weaken the Government without overthrowing it.

THE SPANISH RAID ON ST DOMINGO.

The Spanish filibusters who have so suddenly proclaimed the reannexation of the half-caste Spanish Republic in St Domingo to the Crown of Spain are not likely to stop short at the limits of the Spanish settlement. It is said that three frigates have already been despatched from Havana with more than 5,000 regular troops to St Domingo, that large bodies of troops are on their way from Spain to Cuba, and that the Haytian people are already in the most profound alarm, feeling satisfied that President Geffrard has no force at his disposal competent to resist this invasion. No doubt the step contemplated is the reannexation of the whole of the island to the Spanish Crown. The moment is favourable, for the Southern States of America are certainly not strong enough to enter at present on a war with Spain; and the Northern Union, under its present Republican Government, will not probably have the will, even if it have the power, to interfere. The last democratic Administration would certainly have seized the opportunity for a quarrel which might have ended in the conquest both of Cuba and Hayti. But Spain has no longer the same occasion to fear this; and she may doubtless think that Cuba will be safer in her hands if she is able successfully to "*révendiquer*" her right to this missing link in the chain of islands which commands the Carribean Sea. Hayti once more in her hands, and connecting Cuba with Porto Rico, will stretch a Spanish cordon completely across the space between the Windward West India Islands and the Peninsula of Florida; and thus Spain will be able to meet the Confederated States with a far more imposing force than before. We are, however, happy to learn from Lord John Russell's reply to Mr Gregory on Thursday night, that it is still doubtful whether Spain will accept the addition to her dominions which the filibusters are anxious to press upon her. In this case the Governor of Cuba must be acting on his own responsibility in sending aid, and ought to be recalled.

The blow, if it falls, will be felt severely by the Anti-Slavery party and coloured people throughout the United States as well as by the natives of Hayti. Since the overthrow of Soulouque, the Western or African side of the island has made considerable advances towards a better Government. President Geffrard, who now governs the African republic, is, we believe, a man of high purpose and character, who is doing everything in his power to favour immigration, which is the great want of the island. There, as elsewhere, the African race are lazy and animal unless stimulated by the severest competition for the necessaries and luxuries of life, as they are in Barbadoes. Accordingly, the new Government has done all in its power to invite immigration, and has appealed especially to the free coloured population in the United States. The most liberal terms had been offered by the Government to poor immigrants; and the remarkable facilities of Hayti for growing cotton of the finer kinds, would have, it was hoped, stimulated this immigration at the present crisis in the history of cotton supply. It is but too probable that if Spain appropriates this new stroke of policy, Hayti may supply the vacuum in the cotton market, as Cuba supplies the sugar market. The free black population of Hayti is already near a million, while Cuba, though half as large again as Hayti, has, according to the best estimates, not more than half a million slaves. It is obvious, therefore, what an opening there is, even without any stimulus to the Slave Trade (which would, however, necessarily follow), for introducing Slavery into Hayti by the subjugation of its free Negroes. Such a soil with a million of labourers under the "benefi-" cent whip," would be a source of wealth such as richer countries than Spain might envy. And we think it will be essential to watch her proceedings very carefully, for it would be disgraceful in Great Britain to allow an extension of Slavery and, as an almost necessary consequence, of the Slave Trade, at the hands of a Power to which we have actually paid a large sum of money to abolish the latter. Yet how the island of Hayti, once conquered, is to be ruled by Spain on principles wholly different from those which govern her in Cuba and even in Porto Rico, it is difficult to see. Indeed it will scarcely *pay* to conquer Hayti at all without the reintroduction of Slavery; and certainly to forbid absolutely the introduction of Slavery into the one island while it is so universal and so lucrative across the channel, will be a difficult policy. We fear that the Spanish annexation of Hayti could mean but one thing,—the assimilation of its social and political condition to that of Cuba.

But if this be so,—if we were to receive any proof that Spain is really bent on restoring Slavery in the island,—and, worst of all, on reimposing the yoke on the African population who have now for two generations been free from it,—it is not a case in which England should remain passive. On the fate of Cuba and St Domingo the growth or the extinction of the Slave Trade probably depend, and, in a great measure, the future history of Slavery itself. If it is once stopped at Cuba, it is, as we now know, extinguished in the civilised world,—and the growth of the Southern Federation must be remarkable indeed, before they will be able against the will of Europe and North America to revive it. But if at this critical juncture Spain be allowed to take the wrong turn,—to compete with the Southern States in the cruelty of her agricultural system, and to beat them hollow in the cheapness of her labour,—we know how it must be. The Southern Confederation will then reopen the Slave Trade, which they will find no difficulty in doing when the Gulf of Mexico is commanded by Slave-importing islands; and both the traffic and the social system which England has taken such pains to suppress and discourage will spring into new vitality and on a gigantic scale.

We do not know when a powerful Government, like that of Great Britain, is warranted in intervening, if it be not to prevent such a calamity as this. If Spain should invade the African Republic of Hayti, after revolutionising the Dominican Republic, she would commit a distinct breach of the laws of nations. Of course, we are not always bound to interfere to prevent such a breach of international law. The measure of our duty to interfere is, our power and the calamity which might ensue. No calamity can be greater than a new and powerful impulse to the cause of Slavery and the Slave Trade, at the very moment when the prosperity of the Confederated Slave-Commonwealths probably depends on their supply of forced labour. We have long been reviling Spain for her bad faith in encouraging the Cuban Slave Trade. Only the other day Lord Palmerston's bitter words provoked the Spanish Administration into some promise of more effective measures to suppress it. But if Spain is permitted to invade and reconquer the African portion of Hayti, we may be pretty sure that these good resolutions will follow their predecessors. It is hardly possible for a foreign Power to rule so large a population of Negroes without reintroducing Slavery; and the pecuniary temptation will be probably irresistible. If we would prevent the consequences which are sure to follow, now is our time,—before the revolution in the Dominican Republic takes the extension of an invasion of Hayti. We have permitted Spain to enjoy her

criminal gains too long, when treaties give us ample power to compel her to resign them. Are we now going to sanction her snatch at an island which may enable her to secure and probably to double them? Or is it, as we may fairly hope, Lord John Russell's strong protest which induces Spain to hesitate in giving her sanction to the course taken by the Governor of Cuba?

THE NEW SMALL TAXES.

The alterations which Mr Gladstone has proposed in the small taxes are as follows:—On foreign bills he proposes so to modify the stamps, so that instead of abrupt increases of charge, the duty shall rise 1s for every 100*l*. Upon chicory the duty (which is at present 6s per cwt on raw or kiln-dried chicory, or 4d per lb on roasted or ground chicory) is to be doubled. The duty on refreshment houses is to be extended to tobacco shops kept open for the purposes of smoking, and is to be levied on all refreshment houses, whether open at night or only in the day. By payment of a licence duty of 3*l* 3s per annum, the wholesale spirit dealer is to acquire the right to sell retail. There is to be also a stamp of 2s 6d on each part of every agreement for a lease, and the stamp varying with the rent is to be abolished. And it is proposed that all house agents shall take out a 2*l* licence. Mr Gladstone computes that these small duties will yield in all about 50,000*l* annually.

THE BALANCE-SHEET.

1.—An Account of the gross public income of the United Kingdom of Great Britain and Ireland, in the year ended the 31st day of March, 1861, and of the actual issues or payments within the same period, exclusive of the sums applied to the redemption of funded or paying off unfunded debt, and of the advances and repayments for local works, &c.

INCOME.	£	s	d	£	s	d
Customs				23,305,776	10	7
Excise				19,435,000	0	0
Stamps				8,348,412	9	4
Taxes (land and assessed)				3,127,000	0	0
Property tax				10,923,816	7	9
Post office				3,400,000	0	0
Crown lands (net)				290,568	4	7
Miscellaneous:—

Treasury Chambers, April 12, 1861. F. Peel.

THE BUDGET RESOLUTIONS.

The following resolutions will be proposed in Committee of Ways and Means by the Chancellor of the Exchequer on Monday next:—

2. Income Tax.—That, towards raising the supply granted to Her Majesty, there shall be charged, collected, and paid for one year, commencing on the 6th day of April, 1861, for and in respect of all property, profits, and gains mentioned or described as chargeable in the Act passed in the 16th and 17th years of Her Majesty's reign, cap. 34, for granting to Her Majesty duties on profits arising from property, professions, trades, and offices, the following rates and duties (that is to say):—For every 20s of the annual value or amount of all such property, profits, and gains (except those chargeable under Schedule B of the said Act), the rate or duty of 9d. And for or in respect of the occupation of lands, tenements, hereditaments, and heritages chargeable under Schedule B of the said Act, for every 20s of the annual value thereof, in England the rate or duty of 4½d; and in Scotland and Ireland respectively the rate or duty of 3d. Subject to the provision contained in the said Act 16th and 17th Victoria, cap. 34, sec. 28, for the relief of persons whose incomes are under 150*l* a year respectively, from so much of the said duties as shall exceed the rate of 6d for every 20s of their respective profits and gains, computed as in the said enactment is mentioned, and subject also to the provision therein contained for the exemption of persons whose whole incomes from every source shall be less than 100*l* a year respectively.

3. Tea and Sugar.—That, towards raising the supply granted to Her Majesty, the duties and drawbacks of Customs now charged and allowed on the articles undermentioned shall continue to be levied, charged, and allowed on and after the 1st of July, 1861, until the 1st of July, 1862, on importation into Great Britain and Ireland, or on exportation therefrom to foreign parts, or on removal to the Isle of Man for consumption therein,—viz., tea; sugar as denominated in the tariff; sugar cane juice; molasses; almonds, paste of; cherries, dried; comfits, dry; confectionery—ginger, preserved, marmalade, plums preserved in sugar, succades (including all fruits and vegetables preserved in sugar not otherwise enumerated).

4. Excise—Paper Duty.—That on and after the 1st day of October, 1861, the duties of Excise now payable upon or in respect of paper of any denomination, and button-board, millboard, pasteboard, and scale-board, made in the United Kingdom, and also all allowances and drawbacks of or in respect of any such

duties shall cease, and shall be no longer charged, levied, allowed, or paid respectively.

5. Customs—Paper Duties.—That the duties of Customs chargeable on the articles undermentioned imported into Great Britain and Ireland shall cease and determine on and after the 1st of October, 1861,—viz., paper, as denominated in the tariff; millboard, paste-board, books, as denominated in the tariff; prints and drawings, as denominated in the tariff.

6. Excise—Chicory.—That, towards raising the supply granted to Her Majesty, and in lieu of the duties of Excise now payable on the article hereinafter mentioned, there shall be charged and paid for and upon all chicory, or any other vegetable matter applicable to the uses of chicory, or coffee, grown in the United Kingdom: for every hundredweight thereof, raw or kiln-dried, until the 1st day of April, 1862, the duty of 8s 6d, and on and after that day the duty of 11s, and so in proportion for any greater or less quantity than 1 cwt. And for and upon all chicory of other such vegetable matter as aforesaid, upon the importation thereof into the United Kingdom from the islands of Guernsey, Jersey, Alderney, and Sark, for every hundredweight thereof, raw or kiln-dried, until the 1st day of April, 1862, the duty of 9s; and on and after that day the duty of 12s, and so in proportion for any greater or less quantity than 1 cwt.

7. Excise—Spirits.—Retail License to Dealers—That, towards raising the supply granted to Her Majesty, there shall be charged and paid upon every additional excise license to be taken out by any licensed dealer in spirits to authorise and empower him to sell by retail any quantity, not being less than one reputed quart bottle, of foreign or British spirits, not to be drunk or consumed on the premises, the sum of 3*l* 3s.

8. Excise—Refreshment Houses.—That towards raising the supply granted to Her Majesty, every person who shall keep open any house, room, shop, or building for the purpose of selling therein, or who shall sell therein at any time between the hours of nine of the o'clock at night and five of the clock of the following morning, any victual, or refreshment, or cigars, or tobacco, to be consumed on the premises where the same shall be sold (except beer, cider, wine, and spirits, sold respectively under a proper licence in that behalf, and except also cigars and tobacco sold by a person duly licensed to sell beer by retail to be consumed on the premises, and also duly licensed to sell tobacco), and every person who shall keep open any house, room, shop, or building for the consumption therein by the public of any victual or refreshment, cigars, or tobacco (except as aforesaid), although the same shall not be sold therein, shall respectively be deemed to keep a refreshment-house, and shall, unless he shall be duly licensed by the justices to keep a common inn, alehouse, or victualling house on the same premises, take out a license to keep a refreshment house chargeable with the duty imposed by the Act of the last session of Parliament, chap. 27.

9.—Stamp Duties—House Agents.—That, towards raising the supply granted to Her Majesty, there shall be charged for and upon a license to be taken out yearly by every person who shall use or exercise the business, occupation, or calling of a house agent, not being an auctioneer, or an appraiser, duly licensed as such, the stamp duty of 2*l*.

10.—Stamp Duties—Furnished Houses.—That, towards raising the supply granted to Her Majesty, in lieu of the stamp duties now chargeable for or upon any lease or tack of any furnished dwelling-house, for any term or period of time less than a year, or any agreement, minute, or memorandum of agreement, containing the terms and conditions on which any such house is let, occupied, or held for any such term or period of time, where the rent for such term or period of time shall exceed 25*l*, there shall be charged the stamp duty of 2s 6d, with progressive duties respectively, to be calculated as in the case of deeds and instruments in general of the same amount. And for the duplicate or counterpart thereof the like duties.

11.—Stamp Duties—Hawkers and Pedlars.—That, towards raising the supply granted to Her Majesty, in lieu of the stamp duty of 4*l* now chargeable for or upon a license in Great Britain granted to any hawker, pedlar, or petty chapman who shall trade only in the manner hereinafter mentioned, there shall be charged the stamp duty following—that is to say, for or upon a license to any such trading person who shall travel and trade on foot without any horse or other beast bearing or drawing burden, and who shall carry his goods, wares, or merchandise to, and sell or expose for sale the same at other men's houses only, and not in or at any house, shop, room, booth, stall, or other place whatever belonging to or hired or occupied or used by him for selling or exposing the same for sale in any town to which he may travel; where such license shall be granted for any period not exceeding six months, 1*l*; and where the same shall be granted for any period exceeding six months and not exceeding a year, 2*l*.

12.—Stamp Duties—Foreign Bills.—That, towards raising the supply granted to Her Majesty, in lieu of the *ad valorem* stamp duties now payable for or upon bills of exchange drawn out of the United Kingdom for the payment of money exceeding 500*l*, there shall be charged for and upon every such bill of exchange the stamp duty of 1s for every 100*l* and part of 100*l* of the money thereby made payable.

Agriculture.

THE FARMER'S CALENDAR.

DRAINAGE—MANURES—LANDLORD AND TENANT.

The form of a calendar suggests from month to month the various and varying circumstances which go to make up the somewhat precarious incidents of the farmer's year. There is no man whose success in business is more dependent on forecast and promptitude, or by whom the precept *carpe diem* must be so inevitably regarded. He must not only do the proper work of each month in due season, but he must always have works of different kinds which can be done, as they say, "at any time," yet withal are indispensable, so forward that he, his men, and his horses are ever ready to avail themselves of the shortest intervals of favourable weather. This in some seasons will make all the difference between success and failure. We have known many instances in which farmers, taking advantage of a few fine days in a bad season, have been able to show good crops, when their neighbours, less prompt or less prepared, have suffered the affliction of bad ones.

It is a cardinal point with the farmer to look ahead as well as to go ahead, and upon his so doing depends the order so essential to the prosecution of husbandry. Thus there is no form in which rural instruction has been more usefully conveyed than in that of a monthly calendar of the business to be performed, and the considerations to be attended to during each period of the year. Our earliest agricultural writers adopted this form, and Arthur Young's "Farmer's Calendar" has long been a model for agricultural instructors. A twenty-first edition of that work, re-written and extended by Mr John Chalmers Morton, is now in the course of publication in ten monthly parts, of which the first part, for January and a small portion of February, now before us, affords the prospect of a work of much value and practical utility.

The month commences with a table of the ordinary weather in January in different parts of England, with the average temperature, the rainfall, &c., for a series of years, with the authorities from whom the information is derived, Then follows a brief summary of the works of the farm in January; after which some of the more important of those works are dealt with in a full and comprehensive manner.

Land drainage is naturally one of the chief works on the farm in January when not stopped by severe frosts. This is now enlarged on, former editions of the Calendar having only mentioned the subject incidentally. Drainage is the foundation of good farming on all lands save those resting on open subsoils. And the two last wet winters with the intervening wet summer have not only enforced the necessity of drainage on everybody's attention, but have shown all who are open to profit by experience or observation the advantages of the modern system of drainage. Yet how slow many are to learn is everywhere apparent. In Hertfordshire, toward the Middlesex side, we noticed a gentleman draining his park and home meadows with drains about 18 inches deep laid at 16 feet apart, though he had advanced upon the received system of the district by laying his drains straight down the fall of the land instead of across it "to catch the water," as is most erroneously supposed to be the object. Our own meadows have been drained at three feet deep, down the fall of the land, the drains being laid at from 27 to 33 feet apart, according to circumstances. The land, a strong loam with in part a clay subsoil and in part clay and gravel, has continued sound and solid throughout the wet weather, and has dried well whenever the rain has ceased for three or four days. The manager of our neighbour and landlord—bred a gardener, and an intelligent and improving man—had hitherto objected to our plans, and had drained his employer's own park and meadows by shallow drains, never exceeding two feet, and seldom so deep, laid across the fall of the land. The last eighteen months of wet weather have, however, effectually proved to him the advantages of deeper drains, for he said to us the other day: "I have been over your meadows in all kinds of weather during the late wet seasons, and I have always found them solid and dry, far better than our own, and I am now convinced the plan of deep draining is the best." The fact is, his meadows during the last two winters scarcely exhibited any benefit from draining.

To return to the Calendar. On the very essential question of obtaining money for drainage works, the Calendar refers to the Acts under which four millions of public money have been advanced on drainage loans, repayable by rent-charges, and also to three public companies established by Acts of Parliament with the same objects. In commencing the drainage of land, the first thing to be done are to straighten the brooks and channels which constitute the outfalls, then to drain off any springs by drains laid deep enough to tap them at their sources, and finally to lay the general drains for the removal of surface water. This in many cases implies the necessity of draining more than a single farm, and requires the whole estate to be dealt with at once. An instructive illustration in the Calendar is drawn from the drainage of the Hinxworth estate in Hertfordshire, conducted by Mr Bailey Denton. As to the depth of drains, a very important question, for the cost always tends to induce the drainer to adopt the least depth he may be led to consider to be efficient, the Calendar says:—"What is the depth which the interests of fertility require? And

there need be no hesitation in saying that the general experience of agriculturists as to land drained from two to three feet, and from three to four feet deep respectively, has proved the superiority of the greater depth. Our tillage operations would some of them interfere with drains laid so shallow as the smallest depth here named, and indeed, except perhaps in pasture lands—and here they are not justifiable—we never hear now of drains laid so near the surface as 24 or 30 inches. The roots of plants would use a greater depth of soil if it were accessible." And the right way of looking at it is to bear in mind that the deeper drains fertilise an enormously increased mass of the soil. We must also recollect that a considerable portion of the land above the drains remains wet so high as capillary attraction lifts the water, and thus the deeper the drain the greater the mass of really dry soil obtained. The stronger the soil, the greater is the force of capillary attraction. The frequency of drains must depend on the character of the soil; but we have found that, as a rule, four-feet drains, laid 21 to 24 feet apart, in arable land, will effectually drain the strongest soils, provided care is taken to secure a good outfall; and that for grass land, drains three feet deep, at the distances of from 27 to 33 feet apart, will secure its complete drainage. The various cheap expedients for drainage which have been used are mentioned in the Calendar, but we think that the best advice to be given to agriculturists is, "have nothing to do with them."

Of manure the January Calendar naturally treats, for with the spring will come that demand for its use, on the response to which the fertility of the farm for years to come must depend. The object of every farmer should be to increase the extent of his farm-yard manure, to preserve it from waste, and as much as possible under cover. In January much of it is carted on the land and laid in heaps, to be added to as the year proceeds, until wanted for root crops. Dung heaps should be compressed as much as possible, and covered with earth to prevent the escape of volatile substances. Mangold wurzel ought to have fully thirty cart loads of farm-yard manure to the acre, and turnips at least half that quantity, and both ought also to receive some artificial manure. Beans, clover seeds, and potatoes also require good dressings of manure. Meadow land, too generally neglected in this particular, will amply respond to frequent dressings of farm-yard manure.

In the small portion of the Calendar which refers to February, we find in a section on "the relation of landlord and tenant," the necessity of defining the terms of holding by a written agreement strongly insisted on. "The impolicy of old-fashioned articles of agreement, handed down by copy after copy from models of a century ago, stands out boldly and therefore usefully, when their proper fruit is borne. No tenant of intelligence and resolution and ability—if he be a free agent—will undertake the cultivation of land, except on conditions which permit the exercise of that judgment by which he expects his capital to yield its annual return.....It is perfectly competent for the owner of land to require and do all this [the enforcement of cropping and other regulations by penalties], or even to descend to still greater detail, and enforce his own mode of cultivation with minuter particularity—connecting every departure from his rule with a severer penalty than any named in the particulars of the agreement before us [the Duke of Northumberland's with Mr Wetherall.] But such a system produces its natural results, when the land, as its consequence, falls into the hands of an inferior order of men, as to intelligence, capability, and independence. Mr Wm. Wetherall, of Kirkbridge, pointed out to his landowner that some of the conditions to which he was required to bind himself were impossible of fulfilment—that others were unjust when taken in connection with those on which he had entered into his land. It needed no one to point out that in his case no stringency was needed to ensure good culture—*that* had already been exhibited. His farm but lately had received—its tenant from its owner—the premium as the best cultivated in the district. The dismissal of such men is the natural consequence of attempts to enforce the observance of conditions such as have been named; and it is an instance of self-inflicted injury on the landlord, when he insists on detailed and absurd stipulations as to cultivation in the case of land let on lease for a term of years." This, however, is only a sample of the unintelligent way in which so many English landowners manage their property, and by a variety of obstacles prevent the most active and independent minds of the country from turning their attention to husbandry as a business. The injury done to agriculture in this way is incalculable.

Of yearly tenancies our Calendar thus speaks:—"Of the results of entire uncertainty of tenure, excepting only that security which custom and public opinion give, we have ample evidence in the condition of whole districts. Compare Norfolk, Lincolnshire, portions of the North of England, and great part of Scotland, on the one side, where leases, or their equivalent, have long been customary, with Midland, Southern, and Western England, on the other, where leases are not customary. It is singular how, in a degree which cannot be altogether explained by differences in soil or climate, the first-named districts are almost entirely arable, while the last-named are pasture." The differences between the enterprise of the tenants in the one case and the other are equally great. These views are as necessary to be understood by farmers as the routine and operations of farming; for in the present day it is only where rendered secure by a long lease, and freed from restrictive regulations, that the farmer can hope to obtain any substantial remuneration for the capital, care, and enterprise requisite for modern farming.

Literature.

COMMERCIAL LITERATURE.

A Letter to the Right Hon. W. E. Gladstone on the Mail Packet Service. By the Rev. William Peach, M.A. Mitchell and Son, Wardour street.

This work is a short *resumé* of the arguments in favour of subsidising a mail service, and is intended to refute the principles of the report of the Select Committee of the Commons in 1860 on Packet Contracts. The writer labours to prove that to maintain fleets of the size and efficiency of our mail services, a liberal subsidy is absolutely necessary, and that, so far from the present amounts being excessive, only one joint stock company can be considered really prosperous. He also contrasts the amounts paid by the British Government with the larger sums granted to the French Brazilian line and to the Collins' Company, which in the latter case did not even prevent failure. The proposed system of unrestricted competition would, the author considers, be fatal to the profitable continuance of those companies whose large fleets are not only serviceable for the carriage of mails in peace, but in war are of material value to the nation.

The Bankers' Magazine. April. Groombridge and Sons, Paternoster row.

The Assurance Magazine. April. C. and E. Layton, Fleet street.

Hunt's Merchants' Magazine. March. W. B. Dana, New York.

The "Bankers' Magazine" for April contains, as usual, a full account of all the leading monetary events of the past month, besides other information useful to the banking and mercantile public. In the original matter is a well-written article on "The Leather Trade Delinquencies," and one on a subject of much interest at the present moment, viz., "American and Canadian Banking."

The "Assurance Magazine" is published under the auspices of the Institute of Actuaries, and is more exclusively confined to the transactions which its names imports. In the present number is reprinted an able essay by the celebrated Dr Halley on "Compound Interest," which was first published in 1761.

"Hunt's Merchants' Magazine and Commercial Review" appears to aim not merely at giving statistics and other facts useful to the trading community, but also seeks to enlighten the world in general. The present number has a continuation of an essay on the Different Systems of Social Philosophy, written at much length, and purporting to be an introduction to a better and more comprehensive plan. It is impossible to give any opinion on the merits of this essay, as only Part II appears in the present number, and there are no indications that it is even approaching an end. The chief wonder is that in a go-ahead city like New York any one can find time to read such an elaborate performance.

GENERAL LITERATURE.

Calendar of State Papers, Domestic Series, of the Reign of Charles I., 1629—1631, preserved in the State Paper Department of Her Majesty's Public Record Office. Edited by John Bruce, Esq., V.P.S.A., under the Direction of the Master of the Rolls, and with the Sanction of Her Majesty's Secretary of State for the Home Department. Longman and Co.

The labours of Mr Bruce on the important section of our national records intrusted to his examination increase in the interest of their results with each successive volume. The present introduces us to those eleven years of misgovernment which preceded the meeting of the Parliaments of 1640. The foreign policy of the Government is indicated by the conclusion of the peace with Spain, which, however necessary from the King's point of view, in the face of the expenditure incurred by the discreditable expeditions to Cadiz, Rhé, and Rochelle, and of the unwillingness of English Parliaments to grant new supplies without the redress of public grievances, was considered by the Queen of Bohemia as an abandonment of her cause, and by the English nation generally as a desertion of the interest of the Reformation in Europe at the very time when the rising fortunes of Gustavus Adolphus of Sweden seemed to call for and encourage every effort on the part of Protestant Princes. The ambassador through whom the peace was negotiated was no other than the celebrated Rubens; and the association thus created between an unpopular peace and a painter-courtier, may be taken as one example of that unfortunate antagonism between constitutional liberty and the fine arts of which the histories of other countries besides this afford many instances. From foreign affairs we pass to the internal condition of England, and are at once plunged into a sea of Government prosecutions. First come the proceedings against Sir John Eliot and his associates in the House

of Commons—as Secretary Dorchester expresses it—"to let the world see that Parliament men must be responsible for their words and actions in other courts, and so they will be more moderate and circumspect hereafter, and the King, when he finds good, may meet his people with so much the more assurance, that they will never transgress in the point of due respect and obedience." Then we have the prosecutions against merchants for refusing to pay "tonnage and poundage" without the sanction of Parliament. Among other Government prosecutions referred to in this volume may be noted the proceedings for libel against the Earl of Bedford, Sir Robert Cotton (the celebrated antiquary), and others, and the Star Chamber judgment of Alexander Leighton for libel on the Bishops. Among these political defendants the name of Oliver Cromwell makes its appearance more than once. Mr Bruce, who some time ago called attention to this fact in the pages of a literary contemporary, is now enabled to present the matter in a clearer and more complete form. A new charter had been imposed on the town of Huntingdon, by which the popular element in the Corporation was taken away; and this change had, it seems, been effected chiefly through the agency of a Mr Robert Barnard or Bernard, a person who will be recollected by readers of Mr Carlyle's Correspondence of Cromwell, and who was "a practising barrister who resided in that town, held the office of feodary for the county, and had lately acquired an estate at Brampton, in the immediate neighbourhood." He was supported by the Earl of Manchester, Lord Privy Seal, who had succeeded to much of the influence possessed formerly by the Cromwells at Huntingdon, and no doubt also by the Earl's brother, Sir Sidney Montagu, the new proprietor of Hinchinbrook. Oliver Cromwell, the nephew of the late proprietor of that seat, was a leading man in the ranks of the party opposed to the new charter, "and strong expressions were hurled by him against Mr Lionel Walden the new Mayor, and Mr Barnard who had been elected Recorder, and ultimately the Council was appealed to on behalf of the new-made dignitaries." In consequence, "a messenger was despatched to Huntingdon, with a warrant for the apprehension of 'Oliver Cromwell, Esq.,' and another person described as 'William Kilborne, gent.' The warrant was duly executed, and on the 26th of November, 1630, Oliver Cromwell made his appearance in custody before the Lords of the Council. He was remanded to the custody of the messenger, and after five days' detention the case was gone into," and there being much "contrariety and difference" in the allegations as to facts, the matter was referred by the Council to the Earl of Manchester, whom, by a slip, Mr Bruce designates as the owner of Hinchinbrook. Mr Bruce is now able to supply the decision of the Earl, which appears to have been highly creditable to his good sense. The following is his "Report" to the Council:—

Whereas it pleased your Lordships to refer unto me the differences in the town of Huntingdon, about the renovation of their charter, and some wrongs done to Mr Mayor of Huntingdon, and Mr Barnard, a counsellor-at-law, by disgraceful and unseemly speeches, used of them by Mr Cromwell, of Huntingdon, as also the considerations [*sic*] of divers abuses and oppressions complained of against one Kilborne, post-master of Huntingdon, and Brookes, his man; I have heard the said differences, and do find those supposed fears of prejudice that might be to the said town, by their late altered charter, from bailiffs and burgesses to mayor and aldermen, are causeless and ill-grounded, and the endeavour used to gain many of the burgesses against this new corporation was very indirect and unfit, and such as I could not but much blame them that stirred in it. For Mr Barnard's carriage of the business in advising and obtaining the said charter, it was fair and orderly done, being authorised by common consent of the town to do the same, and the thing effected by him tends much to the good and grace of the town.

Some doubts were propounded, especially three:—As that the mayor and aldermen might now alter the rate of their cattle in the commons; secondly, that the mayor and aldermen alone, without the burgesses, might dispose of the inheritances of their town lands; thirdly, that it was in the power of the mayor and aldermen to fine men that might be poor at 20*l* for refusing to be aldermen. These things, though they cannot be warranted by the new charter, yet, to satisfy fears, I have directed that there shall be amongst their constitutions for the good government of the town three constitutions made to these purposes. First, that the number of men's cattle of all sorts which they now keep, according to order and usage, upon their commons, shall not be abridged or altered, but to common as they have anciently done, both for number and kind. Secondly, for disposing the inheritance of any their lands; no inheritance of houses or lands to be disposed of but by consent of the burgesses, as hath anciently been used and accustomed. Thirdly, for the fining of refusers to be mayor or aldermen; the fine of him that refuses to be mayor not to exceed 20 marks, the fine of him that refuses to be alderman not to exceed 20 nobles, if he be a burgess resident that is chosen.

For the words spoken of Mr Mayor and Mr Barnard by Mr Cromwell, as they were ill, so they are acknowledged to be spoken in heat and passion, and desired to be forgotton; and I found Mr Cromwell very willing to hold friendship with Mr Barnard, who, with a good will, remitting the unkind passages past, entertained the same. So I left all parties reconciled, and wished them to join hereafter in things that may be for the common good and peace of the town.

For the particulars concerning Kilborne and Brookes, his man, for their oppressing the country by colour of his office as post-master, though some particulars were affirmed by two or three, yet because it so much concerneth the country in general, and the abuse so great if it prove true that is affirmed, I have thought best to write my letters to some justices of peace of the county, to make precise inquisition, and certify me how this office of post-master is used for the service of the King, and how abused to the injury of the country, and of all other points contained in the petition exhibited. H. MANCHESTER.

December 6th, 1630.

Another fact of interest not hitherto known respecting the early life of the Protector, is noticed by Mr Bruce in his preface, although it appears from a State Paper not included in the present volume:—

Among the measures "lawful, but extraordinary" which were had recourse to at this time for raising money, one was that of enforcing the payment of a composition from all persons who having 40*l* per annum in freehold lands, did not attend at the coronation to receive the degree of knighthood. The levy of this composition was turned over to Commissioners whose head quarters were in London. But persons resident at a distance from the metropolis were inclined to disregard the monitions of a body of Commissioners with whom they never came into personal contact. To stimulate their activity commissions were issued into all the counties of England. The principal gentry were appointed Commissioners, and the ordinary country machinery was put in motion, both to ascertain who possessed 40*l* per annum in land, and to bring such persons before the Commissioners. It appears, from the paper to which allusion has already been made, that the Cromwells of the county of Huntingdon were not forgotten on this occasion. Henry Cromwell, senior, of Upwood, son of the Golden Knight, and uncle of the future Protector, attended the Commissioners in London and entered into composition with them, taking back into the country the tally of his payment into the Exchequer, which he subsequently exhibited to the local Commissioners as his discharge. Henry Cromwell, junior, of Ramsey, son of Sir Philip Cromwell, and a cousin of the Protector, compounded with the local Commissioners at the sum of 10*l*. The third person of the family whose name occurs in these papers is "Oliver Cromwell of Huntingdon." Equally disregarding the London and the local Commissioners, Cromwell was returned with various other persons of his own county to the Council as a defaulter. Two measures were taken by the Government almost contemporaneously against these Huntingdonshire defaulters. Writs were sent to the Sheriff of the county for summoning 33 or 35 of them to appear in the Court of Exchequer, in the succeeding Easter term, to answer for their default. At the same time a fresh commission was addressed to the former local Commissioners, and whilst the terror of the Exchequer summons was still recent and its penalties were hanging over the defaulters, they were again summoned to appear at Huntingdon. The Commissioners enlarged to them upon his Majesty's grace and favour in renewing the commission once more for their ease and benefit, and also upon the inconvenience which would ensue to them if they were left to the law. Meetings were held by the Commissioners at Huntingdon on the 20th and 28th April, 1631, and finally, 11 of the defaulters are reported as not having appeared at all, 15 as having appeared and made excuses, principally that they had not an estate in freehold of the required value, and seven others as having paid their composition money to the Commissioners. Among them, at the head of the list, stands "Oliver Cromwell, of Huntingdon, Esq., 10*l*." The name stands as I have remarked, at the head of the list, but it does so with a peculiarity. It is obvious that it did not form part of the list as it was originally framed and added up. The intention was to have returned the list without it. It was clearly added afterwards, and was apparently inserted at the top of the list because in that place there was the largest vacant space, where it could be most easily written in. Does this indicate a yielding at the last moment to the friendly persuasions of his aged uncle and godfather Sir Oliver Cromwell, who was the chief Commissioner present at both the final sittings? Or did the uncle, as has been suggested, shield the unyielding nephew, by paying the amount, and directing the insertion of his name?

Scarcely less interesting is the notice of the proceedings attending Sir Edward Coke's death, which the present series of State Papers supply to us:—

The King's personal attention to public business, and the watchful care which he at this time exercised over the movements of professional and official persons, is exemplified in a letter in the present volume, which contains an important allusion to Sir Edward Coke. Dorchester was at this time, 24th of January, 1631, unwell, and therefore not in attendance upon the King, who was at Newmarket. The Earl of Holland was occasionally employed to convey the King's commands by letter to the absent Secretary, and in one of the letters written by him in that character, he thus expresses himself:—

"I am commanded by his Majesty to tell you that you must send to my Lord Keeper about a book that Sir Edward Coke is setting forth, in the which the King fears somewhat may be to the prejudice of his prerogative, for he is held too great an oracle amongst the people, and they may be misled by anything that carries such an authority as all things doth that he either spreaks or writes, for the prevention of which the King thinks it fit it should not come forth. His Majesty hears that Sir Edward Coke, though he be in no present danger, yet, they say, through a late indisposition he is not likely to last long. He would have you choose some person that you may trust to inquire after his health, and, if he be in any present danger, that care may be taken to seal up his study, if he dies, where such papers are as use may be made of them (having passed through so many great places of the State), for his Majesty's service, and some suppressed that may disserve him. His Majesty is resolved likewise that the papers and despatches that my Lord Conway hath left should be recovered, but he leaves the manner of it to your Lordship, to do it in what fair form or way you please, but have them he will; they are his own words."

The information which Dorchester obtained respecting Sir Edward Coke convinced him that, although the great lawyer was, in his own words, afflicted with a disease which "all the drugs of Asia, the gold of Africa, the silver of America, nor all the doctors of Europe could cure—old age," there was no immediate expectation of his death. The King's purpose remained therefore at this time unexecuted. But it was not forgot-

ten. In September, 1634, the inevitable hour approached, and the Council, within a few hours of Coke's death, granted a warrant to Sir Francis Windebank to take possession of all his papers. The authority was executed in the very spirit of the above letter. His house, probably even his very dying chamber, was entered, and his last will and above fifty manuscript volumes, with his title deeds, and a multitude of private papers of every kind, were carried off. Among the articles taken away was a trunk locked, which Windebank did not think himself authorised to break open. The King directed it to be sent to him, and himself opened it. Besides marriage settlements, it contained a few articles of jewellery, relics perhaps of her whom he termed his "first and best wife," some old gold and silver coins, and among a variety of private papers "one paper of poetry to his children." All the papers seized were retained for many years. Upon a motion made respecting them by one of Coke's sons in the long Parliament, the King directed them to be given up. "Such as could be found" were delivered, but his will and many others were never recovered. A copy of Littleton's Tenures which Coke used to call his Vade Mecum, and in which he inserted a variety of autobiographical and genealogical memoranda, which was one of the books seized, is now in the British Museum.

What Dorchester did with reference to Lord Conway's official papers does not appear. They were not recovered at that time, but it is worthy of remark, that a large portion of them was ultimately, in the year 1858, restored to the Crown in the way mentioned in the preface to the first volume of this series of Calendars of Charles I., and is now preserved in the State Paper Office.

The samples which we have given will afford some idea of the interest and value of this series of publications. We need hardly add that they could not be in the hands of an abler or better-qualified editor than Mr Bruce, whose conversance with the whole of this period, and general antiquarian and literary information, enable him to seize and draw attention at once to the special "discoveries" by which every fresh research in these repositories of our national history is being richly rewarded. It is impossible to over-estimate the light thus thrown on the motives and bearings of men and facts, which have hitherto been left unexplained or distorted by the ingenious theories of light-of-nature historians. We shall await with much interest the next volumes, which will complete the prelude to the great drama of the "Long Parliament."

THE OLD PARISH CHURCH. By JOHN GIBBS.
Ward and Lock, 158 Fleet street.

THIS is a thoroughly vulgar and absurd little story, whose vulgarity is all the more absurd as its scene is laid among the most *genteel* circles. Noble lords, reverend clergymen, and rich young ladies adorned with every virtue and accomplishment figure conspicuously, and after a novel fashion, in its pages.

THE ENGLISH WOMAN'S JOURNAL. April.

THE most interesting paper in this number of the "English Woman's Journal" is that which concludes the account of the curious colony of lunatics established at Gheel, in Belgium. The treatment, and the results of the treatment pursued there, may give valuable hints to us in the management of our own asylums. The "Fruits in their Season" gives us some amusing "Data on Dates." It is, as usual, well and pleasantly written. Besides these two articles, and one on the necessity of a more careful education for girls of the middle classes, addressed chiefly to fathers, and deprecating that prejudice that finds in the mere words "domestic altars" and "woman's sphere" a sufficient reason for condemning their daughters to idleness and superficial accomplishments, there is little worth reading in this number. On the whole, it is not so good as most of its predecessors.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

Serious news reached this city yesterday from Marseilles. It was to the effect that the eminent firm of Messrs Baltazzi had been obliged to suspend payment, and that numerous others, among them that of Ava and Co., were either in the same predicament or very seriously menaced. As these houses are largely engaged with Constantinople and the Levant, fears were of course entertained that their failure would bring down numerous Greek houses in Constantinople, Paris, London, and other places. It was said, too, that by the disasters at Marseilles the Bank of France was seriously compromised, it having recently discounted bills to a very large amount for many of the parties concerned. By the news something very like consternation was caused on the Bourse, and the Bank of France shares fell as much as 50f. To-day, the statement is that there was considerable exaggeration in what was said, and the Bank shares have recovered 25f. The difficulties of the Marseilles houses spring out of the failure of the Mirès loan for Turkey and of the sort of commercial crisis which has for some time prevailed at Constantinople. When Mirès was arrested, failures at Marseilles were expected as a matter of course, but it will be remembered that none of any great importance took place, owing to extensive aid having been afforded to houses in embarrassment. It was hoped that the difficulties had been altogether set aside, but it now appears they were only postponed. The failure of Messrs Corbière and Co., bankers, of Alençon and Le Mans, is announced. The firm was established for some years, and did a very extensive business. Its liabilities it is feared are very large. M. Corbière, who was mayor of Alençon, has disappeared. Rash speculations, which turned out ill, are stated to be the cause of the disaster.

In the last number of the *Revue des Deux Mondes*, an article by M. Cochut, entitled *La Politique du Libre Echange*, has excited very general interest. In this lucubration M. Cochut, who stands high in the foremost ranks of French economists, gives a succinct but complete history of the economic changes which have been effected in England from the time of Pitt down to that of Gladstone, and he shows that it was they which have put an end to the political discontents which for years agitated our country, and even menaced her national stability; also that they have had the effect of so transforming her as to make her "an England quite different to that which existed at the beginning of the century, and assuredly much more preferable." M. Cochut possesses in an eminent degree the talent of exposition, and he has exercised it with such singular happiness on the present occasion, as to make his article one of the best and clearest accounts of the commercial reforms in England which has ever appeared in a narrow space. He has at the same time, with infinite art, impressed on the reader's mind the magnitude of those reforms in themselves, and the grandeur of their political consequences. His conclusion is, that by them "the fear of internal revolutions has been completely dissipated in England." And that such has been the case is, he remarks, "a peculiar phenomenon, unique perhaps in history, and scarcely credible to persons who are not accustomed to economic analysis." To complete the demonstration on this point, he understakes to show in a future article that whilst England has gained political peace by making the economic changes which the times required, France has been exposed to political convulsions by refusing them. If, as is not to be doubted, the latter part of his *travail* be equal to the first, M. Cochut will have given to the world a work which may justly be considered as an exposition of the Philosophy of Commercial Reform.

In the last meeting of the shareholders of the Mines (Coal-pits) de la Loire, it was stated that in 1860 the extraction of coal was 387,009 tons, which was 59,011 tons more than in 1859; and the sale 394,724 tons, or 61,877 more.

The conclusion of the treaty of commerce between France and Belgium has been delayed, owing to the Belgian negotiators wishing to reserve to their Government the power of favouring Belgian alcohols by imposing on them an excise duty less than the import duty on French alcohols.

Negotiations for a commercial treaty between France and Switzerland, are about to be commenced.

The Director of the Board of Customs, in a circular to his subordinates, decides that the decree allowing foreign cotton fabrics to be imported into France free of duty for printing, subject to the condition of their being exported afterwards, shall be applicable to such goods brought in to be dyed.

It is believed that the dividend of the Credit Mobilier for last year will be 25f, in addition to the 25f already paid as interest. This is little; but it is the same as that last year. In 1857 and 1858, no dividend at all was distributed; in 1856, the dividend was 90f; in 1855, 178f 70c; and in 1854, 34f.

The Government has published returns respecting the taxes for the first quarter of the present year. It appears from them that of the direct taxes, which for the whole of the year amount to 482,153,000f, the sum paid in the course of the quarter was 113,329,000f, leaving due 368,824,000f. By law, direct taxes are only payable by monthly instalments, and the 113,329,000f actually paid up were more by 32,970,000f than could have been legally exacted, and more by 1,378,000f than was paid in advance in the corresponding period of last year; but, on the other hand, it appears that this year the expenses of law proceedings to enforce payment have been at the rate of 46c per 1,000f, whereas last year they were only 43c the 1,000f. The conclusion to be drawn is, that the Government has been very pressing for its money.

As regards indirect taxes, the returns are not favourable. The amount received in the quarter was less by 5,931,000f than that of the same period of 1860, and by 2,373,000f than of 1859. Comparing the present quarter with the corresponding one in 1860, a marked decline has taken place, not only in the Customs duties, as the necessary consequence of the recent reforms and of the English treaty, but in the duties on the manufacture of native sugar, and (the first time in a long period) in the registration and mortgage duties. These diminutions, it is true, are counterbalanced to some extent by an increase in the duties on wine, &c., and in the revenue for the sale of tobacco. The increase in wine may be

accepted as satisfactory; but as to the augmentation from the sale of tobacco, the pleasure it may occasion to French financiers will certainly be tempered by the regret that so much money should be spent in an idle and perchance pernicious luxury.

The following is a detailed account of the indirect taxes:—

	First quarter of 1860.	1859.	Difference between 1861 and 1860. Increase.	Difference between 1861 and 1860. Decrease.	Difference between 1861 and 1859. Increase.	Difference between 1861 and 1859. Decrease.	1861.
	f	f	f	f	f	f	f

Annexed is an account of the markets:—

FLOUR.—The quotation at *Paris*, yesterday, was 70f to 74f the sack of 159 kilogs. The four marks in the early part of the day were 71f 50c to 71f 75c for the current month, 73f and 73f 25c for May, 73f 50c for June and July; but in the latter part of the day numerous offers were made, and prices fell for these epochs 50c to 75c.

WHEAT.—At *Paris*, yesterday, transactions were limited, and quotations were 38f to 40f the sack of 150 kilos. As to the country markets, 85 present a rise of from 17c to 1f 66c the hectolitre; 22 a fall of from 5c to 1f; 28 are reported firm; 26 without variation; and 8 calm.

COTTON.—At *Havre*, in the week ending Friday, the sales were 13,757 bales, and the arrivals only 300, which were from England. The closing prices were the same as in the preceding week, and low New Orleans was consequently 99f the 50 kilogrammes; very ordinary ditto, 104f. On Monday, very little was done; on Tuesday and yesterday there was a large demand, and prices were firm.

SUGAR.—The demand at *Havre*, in the week ending Friday, was tolerably active: 340 casks French West India disposable, or in the port, went at 49f to 49f 50c the 50 kilogs duty paid, and 30 ditto choice, 50f; 2,400 bales Reunion disposable, 52f 37½c to 53f, and 400 ditto at 54f; 2,500 sacks Mauritius, 52f 75c; a lot of San Yago at 48f, and another ditto, 52f; 1,300 casks Havana, 36f 25c in bond; 55 ditto white, 37f; 53 Bahia, 35f 50c. The arrivals consisted only of a small lot of French West India. This week, French West India has been at 49f 50c; Porto Rico, 48f 50c; Havana, 36f. At *Nantes*, last week, business was calm: 2,196 sacks Reunion, 52f 50c, and a small lot of French West India at 49f, were the only sales. This week, there have been no sales. At *Bordeaux*, last week, 542 casks French West India, went at 50f duty paid; 300 ditto, usine, 63f; 3,200 bales Reunion, 53f. This week, French West India has been at 49f 50c; Reunion, 53f. At *Marseilles*, last week, business was active. This week, a lot of Havana has been taken at 35f.

COFFEE.—Business at *Havre*, in the week ending Friday, was calm. 100 sacks Hayti Port-au-Prince, disposable, went at 79f the 50 kilogs in bond; 171 sacks Rio, not washed, 72f 50c to 74f; a lot of Guadeloupe *habitant*, 133f 75c to 135f duty paid; and one ditto, *bonifeur*, disposable, 140f. A quantity of damaged Hayti (Cayes), Porto Rico, and Rio was sold by auction. The arrivals were nearly 4,000 sacks, chiefly Rio. This week, Hayti has been at 79f; ditto St Marc, 84f. At *Nantes*, last week, a small lot of Reunion *feve ronde et pointue* went at about 130f. This week, some damaged Port-au-Prince has been sold. At *Bordeaux*, last week, 190 sacks Rio, washed, went at 89f the 50 kilogs; a small lot of Ceylon plantation, 121f; one of San Yago, 94f in bond; 1,500 sacks La Guayra, 91f 96f. This week, a small lot of Reunion and one of Guadeloupe have been disposed of; prices not mentioned. At *Marseilles*, last week, nothing was done.

INDIGO.—At *Havre*, last week, no sales were made, and the arrivals were only 6 cases from England. This week, there have been no sales. At *Bordeaux*, last week, 14 cases Madras, and 12 Kurpah were sold; prices not stated. This week, only a very small lot of Kurpah has been disposed of.

HIDES.—The demand at *Havre*, in the week ending Friday, was regular: 1,900 La Plata dry, 120f to 122f 50c the 50 kilogs; 500 Monte Video salted for delivery, 74f; 3,000 Rio Janeiro salted, 57f 50c; 1,100 Maraguan drysalted, 84f 50c; 400 Texas dry, prices kept secret; 1,250 New York salted, 50f to 52f; 1,000 New Orleans ditto, 50f 50c; 661 Chili salted, 71f; 1,000 Lima salted, of indifferent quality, 50f; 577 horse La Plata dry, 10f each; 3,500 ditto salted, 90f to 91f the 100 kilogs. By auction, 1,450 Irish salted sound went at 43f the 50 kilogs. This week, La Plata dry has been at 120f to 122f 50c; ditto salted cow, 70f; Texas salted, 49f.

WOOL.—At *Havre*, in the week ending Friday, 32 bales La Plata unwashed, went at 1f 67½c to 2f 65c the kilog; 116 bales Africa unwashed, 1f 60c; 2 ditto, at different prices; 103 bales Peru unwashed, 1f 25c; 2 bales sheepskins, Buenos Ayres, unwashed, 1f 77½c, and 14 ditto, 1f 7½c. The arrivals exceeded 600 bales. This week, Buenos Ayres unwashed has been at 210f to 270f the 100 kilogs; Monte Video unwashed, 1f 7½c the kilog; German, 227f 50c the 100 kilogs.

TALLOW.—At *Havre*, in the week ending Friday, 40 casks Buenos Ayres, indifferent quality, went at 60f the 50 kilogrammes; 70 California, also indifferent, same price. No arrivals. This week there have been no sales. At *Paris*, yesterday, the 100 kilogrammes were 131f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was 104f to 105f the hectolitre; Montpellier, of 89 deg., 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c; beetroot, first quality, 107f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The annexed commercial intelligence is dated Calcutta, March 8:—Produce Market.—The amount of business transacted during the interval elapsed since our former report has been very limited; rates have not suffered any serious decline, but stocks of nearly all descriptions of produce are increasing, owing to the almost entire withdrawal of the regular shippers for the present. Import Market.—The slight improvement noticed in last report cannot be said to have continued. Advices of large shipments has mainly contributed to check any improvement in rates; a considerable business has been doing within the last few days, but at barely remunerative prices. Government Securities.—The purchase of a few lacs of 5½ per cent. paper for remittance to Bombay is the only change to be noted in Government securities. This purchase at from 101.0 down to 100.12 serves as a better remittance than either bullion or bills of exchange, it being saleable in Bombay at par. In other denominations of paper there is nothing doing. Money Market.—Money remains in free supply, without any apparent increase in the demand, and can be had easily at or even under Bank of Bengal rates.

Commercial advices from Barbadoes state that the crop of sugar would reach 45,000 hogsheads.

The *Moniteur* has published the following monthly debtor and creditor account of the Bank of France, made up to Thursday se'nnight. The corresponding figures of last month and of the corresponding period in 1860 are added :—

Debtor.	April, 1861.	March, 1861.	April, 1860.

The following is extracted from the New York *Journal of Commerce* :— It will be remembered that owing to the charging off, from the record, of many vessels which had been missing for years, and the decline in the shipbuilding interest, the official summary of our national tonnage showed a decline for a year or two, and even with the subsequent gain had not at this date of last year reached the total recorded in 1854-5. The increase has continued, however, and we are now again in the ascendant, the total on the 1st July, 1860, amounting to 5,353,868 tons. As a matter of interest to those connected with this trade, we have compiled a summary showing the general movement throughout the last year. Our books post up as follows :—

	Tons.	95ths.
Balance of tonnage June 30th, 1859	5,145,037	39
Built, registered, enrolled, and licensed for the year	306,891	23
Total supply	5,451,928	62
Sold to foreigners	17,418 79	
Condemned	15,080 0	
Lost at sea	65,561 36	
	98,060	20
Total tonnage July 1, 1860	5,353,868	42
Increase during the year	208,831	3

This is a greater gain than was expected, the increase during the previous year being only 95,229 tons. We annex a classification of the vessels built during the year :—

	No.
Ships and barques	110
Brigs	36
Schooners	372
Sloops and smaller craft	289
Steamers	264
	1,071

This is a favourable showing, considering the previous depression of the shipping interest, but it looks small beside the production of some former years. Number and tonnage of vessels built in the United States during the last 16 years :—

Year ending June 30.	Number of Vessels.	Tons.	95ths.
1844	766	103,537	29
1845	1,038	146,018	2
1846	1,420	188,203	93
1847	1,598	243,732	67
1848	1,851	318,075	54
1849	1,547	256,577	47
1850	1,360	272,218	54
1851	1,367	298,203	60
1852	1,444	351,493	41
1853	1,710	425,572	49
1854	1,774	535,616	1
1855	2,034	583,450	4
1856	1,703	469,393	73
1857	1,434	378,804	70
1858	1,225	242,286	69
1859	870	156,602	33
1860	1,071	212,892	48

The difference between the tonnage last above given as built, and the total additional supply for the year, as stated at the opening of this article, comprises the increase in registered and enrolled vessels brought forward from the preceding year. The tonnage owned in the United States, as returned to the Treasury Department, was last employed as follow :—

	Tons.	95ths.
In the foreign trade :—		
Permanent registered tonnage	1,866,763	23
Temporary ditto ditto	679,471	71
Total in the foreign trade	2,546,237	9
Permanent enrolled tonnage	2,745,570 87	
Temporary ditto ditto	7,366 60	
	2,752,937	52
Licensed under 20 tons	54,693	76
Total United States tonnage	5,353,868	42

Of the enrolled and licensed tonnage there were employed :—

	Tons.	95ths.
In the coasting trade	2,648,647	8
In the cod fishery	136,653	70
In the mackerel fishery	26,110	50
Total enrolled and licensed	2,807,631	33
Registered vessels in whale fishery	166,841	30
Registered otherwise employed	2,379,395	74
	5,353,868	42

Employed in steam navigation :—

	Tons.	95ths.
Registered tonnage	97,296	16
Enrolled tonnage	770,641	33
Total in steam navigation	867,937	49

The total quantity of coal and coke exported from the various coal ports of the United Kingdom during the month of March was of coal, 498,170 tons, and of coke 20,570 tons. Of this quantity, which shows a considerable increase when compared with the returns for the preceding month, Newcastle-on-Tyne exported 133,930 tons of coal and 12,366 tons of coke; Shields, 6,128 tons of coal and 112 tons of coke; Blyth, 16,226 tons of coal; Sunderland, 77,395 tons of coal and 3,038 tons of coke; Seaham, 2,912 tons of coal; Hartlepool and West Hartlepool, 41,918 tons of coal and 2,262 tons of coke; Middlesborough, 9,742 tons of coal and 1,913 tons of coke; Hull, 13,916 tons of coal and 120 tons of coke; Goole, 1,126 tons of coal; Maryport, 585 tons of coal; Liverpool, 5,059 tons of coal; Cardiff, 72,673 tons of coal and 88 tons of coke; Newport, 10,273 tons of coal; Greenock, 6,266 tons of coal; Grangemouth, 3,773 tons of coal; Swansea, 27,795 tons of coal and 220 tons of coke; Alloa, 3,481 tons of coal; Charlestown, 2,689 tons of coal; Llanelly, 4,349 tons of coal and 270 tons of coke; Inverkeithing, 454 tons of coal; Ayr, 309 tons of coal; Glasgow, 6,175 tons of coal and 165 tons of coke; St David's, 3,471 tons of coal; Borrowstonness, 1,228 tons of coal and 16 tons of coke. The quantity of coal, coke, and culm shipped during the month to different ports in the United Kingdom was of coal 788,172 tons, of coke 3,797 tons, and of culm 4,982 tons. Of this quantity, which is larger than that shipped during February, Newcastle shipped 165,265 tons of coal and 801 tons of coke; Shields 943 tons of coal; Blyth, 9,187 tons of coal; Sunderland, 136,795 tons of coal and 271 tons of coke; Seaham, 58,062 tons of coal; Hartlepool and West Hartlepool, 107,721 tons of coal and 587 tons of coke; Middlesborough, 15,241 tons of coal and 240 tons of coke; Goole, 6,933 tons of coal; Swansea, 13,797 tons of coal and 4,982 tons of culm; Borrowstonness, 3,197 tons of coal; Maryport, 25,679 tons of coal and 100 tons of coke; Llanelly, 16,620 tons of coal; Charlestown, 3,912 tons of coal; Cardiff, 59,236 tons of coal and 1,025 tons of coke; Inverkeithing, 272 tons of coal; Ayr, 6,726 tons of coal; Newport, 145,114 tons of coal and 746 tons of coke; St David's, 69 tons of coal; Alloa, 600 tons of coal; and Whitehaven, 12,803 tons of coal and 27 tons of coke. During the month there were 5,555 vessels of different nations engaged in the coal trade, of which number 3,773 were employed in the home and 1,782 in the foreign coal trade.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 17th day of April, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,843,350	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	11,520,488
		Silver Bullion	848,362
	26,843,350		26,843,650

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,272,938
Rest	3,177,820	Other Securities	18,414,769
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4 195,906	Notes	6,548,635
		Gold and Silver Coin	763,353
Other Deposits	13,379,936		
Seven Day and other Bills	693,033		
	35,999,695		35,999,695

Dated the 18th April, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,988,248	Securities	28,609,707
Public Deposits	4,195,906	Coin and Bullion	13,132,203
Private Deposits	13,379,936		
	38,564,690		41,741,910

The balance of Assets above Liabilities, being 3,177,820*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£176,[illegible]
A DECREASE of Public Deposits of	706,621
An INCREASE of Other Deposits of	178,145
An INCREASE of Government Securities of	50,000
A DECREASE of Other Securities of	401,237
An INCREASE of Bullion of	9,771
An INCREASE of Rest of	10,257
A DECREASE of Reserve of	127,104

The above return is less favourable than might have been expected. The bullion shows only a trifling increase, but a rather considerable diminution has taken place in the reserve. In the other securities there is a falling off, but less than might have been looked for, from the stagnation in the money market.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
	£	£	£	£	£
Circulation, including bank post bills	20,905,412	21,392 488	22,810,347	22,503,202	20,988,248
Public deposits	4,102,458	3,324,285	5,079,902	5,838,581	4,195,906
Other deposits	10,256,573	16 007,987	15,121,305	15,512,425	13,379,936
Government securities	13,936,798	9,869 853	11,371,118	9,728,943	10,272,938
Other securities	11,638 650	15,515,010	16,808,520	22,790,338	18,414,769
Reserve of notes & coin	7,495,918	12,541,353	10,523,985	7,283,021	7,311,988
Coin and bullion	13,342,398	18 584,383	18,051,375	14,624,686	13,132,203
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	5 p. c.	5 p. c.
Price of Consols	97·	96¾	94⅛	94⅞	92¼
Average price of wheat	39s 5d	43s 2d	41s 2d	49s 1d	56s 10d
Exchange on Paris (shrt)	25 5 10	25 7½ 12½	25 2¼ 7½	25 15 20	25 12½ 20
— Amsterdam ditto	11 15¼ 15⅝	11 14⅜ 15	11 14 15	11 14¼ 15	11 16 17
— Hamburg (3months)	13 8 8¼	13 6 6¾	13 5½	13 5⅛ 6	13 6¼ 7¼

In the corresponding week of 1851, an insurrectionary movement had just broken out in Portugal against the Thomar Ministry. The Provisional Federal Board of Germany was about to be dissolved and the Diet opened. From the Cape the advices were unsatisfactory, the Kaffirs appearing in many instances to have baffled the regular troops. Large numbers of people were preparing to leave New York for the Great Exhibition.

In 1858, the features immediately exciting attention in the political world were the complications arising out of the seizure of the Sardinian steamer Cagliari by the Neapolitan Government, and the dismissal by high authority of M. Renée from his post as political director of the *Constitutionnel*, in consequence of the appearance of an article insulting to England. The Bank rate of discount was maintained at 3 per cent., although the best bills were taken elsewhere at 2¼.

In 1859, great confusion had been occasioned in monetary circles by the news of the threat of an immediate declaration of war by Austria against Sardinia. The Paris Bourse indicated extreme alarm. The adjudication of the last Indian debenture loan of 7,000,000*l* had just taken place. The Government reserved price was 95 per cent., at or above which 5,077,000*l* had been subscribed.

In 1860, the voting had taken place in Nice on the annexation to France, and had resulted in a nominal majority in favour of the step. The advices from the East were disquieting, disturbances having taken place in parts of the Turkish Empire. At home, the working of the new Stamp Act on delivery orders and dock warrants was causing much inconvenience, and correspondence between mercantile houses and the Stamp Office was being almost daily published. The 1,550,000*l* in notes withdrawn by some of the leading discount houses in the previous week had been returned into the Bank. The Pullinger frauds on the Union Bank had just been discovered.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 1,882,077*l*; in 1858, an excess of 492,897*l*; in 1859, a deficiency of 1,687,215*l*; and in 1860, a deficiency of 7,277,913*l*. In 1861, the deficiency is 5,034,833*l*.

DISCOUNT AND MONEY MARKET.—The demand for money during the week has been very moderate, and the rate in the general market has fallen to 4¼ to 4½ per cent. The contraction of trade is, in a great degree, the cause of the apparent abundance of capital, the number of bills offering being much less than in ordinary periods. Yesterday, it was anticipated that a further reduction of a half per cent. might have been made in the Bank rate, but it is understood that the Directors were desirous of ascertaining the effect of the fall in the exchanges before adopting what might turn out a premature movement. It is expected that shipments of gold to the Continent will recommence almost immediately, and upon the result of these operations the future action of the Bank will probably depend. The news from America is also an additional incentive to caution. To-day there was a slight increase in the inquiry for discount, but the general rates remained without change.

On the Stock Exchange money has been very easy, and loans could be readily obtained this afternoon at 2 to 2½ per cent.

The following are the rates of discount in the principal cities of the Continent. The only change is a decline at Turin.

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2¼
Amsterdam	3	3
Turin	6.	5½
Brussels	4	4
Hamburg	...	2½
St Petersburg	6	...

ENGLISH FUNDS.—The market was rather depressed during the earlier part of the week, but has since improved on some large purchases for money, the London and Westminster Bank having, it is said, invested half a million, 100,000*l* in Consols, and 400,000*l* in Reduced and New Three per Cents. Against this operation, however, there have been sales for reinvestment in the new Indian loan, which have especially taken place to-day. The political news from New York has exercised less effect than might have been expected, owing to the receipt of private telegrams of the same date, showing a much better feeling among the commercial classes than is described by the New York press. Consols for the account, which closed last week at 91¾ to ⅞, opened firmly this morning, and at one time were quoted 92¼ buyers. A relapse, however, then took place, and the final quotations were 92⅛ to ¼ for the account, and 92 to ⅛ for immediate delivery.

Owing to the abundance of money, there has been a rally in Exchequer bills, the last price being par. India bonds have also improved to 13s to 8s discount.

India Five per Cent. scrip has been in active demand, the public continuing to invest freely in this security, and advanced to-day to 102½. A reaction, however, then occurred, and the final quotation was 101¾ to 102, or 1⅜ higher than last Friday.

The following notice was issued this afternoon by the Bank of England. Under this arrangement the dividends

will be paid without the previous closing of the transfer books for six weeks:—

Bank of England, 18th April, 1861.

Notice is hereby given, that in order to prepare the dividends due on 5th July, 1861, the balances of the several accounts in the following funds will be struck on the night of Saturday, the 1st June, viz.:—

3*l* per Cent. Consolidated Annuities
New 3*l* 10s per Cent. Annuities, 1854
New 5*l* per Cent. Annuities
New 2*l* 10s per Cent. Annuities
Annuities for terms of years
India 5*l* per Cent. Stock

On Monday, the 3rd June, the above-named funds will be transferable without the dividend due on the 5th July next.

N.B. When the day for closing the accounts for the dividends shall fall on Saturday or Monday, it will be regarded as a public transfer day, and no fee required for tickets placed in the boxes before 1 o'clock.

FOREIGN STOCKS.—The transactions in this department have been on a very limited scale, and the general fluctuations have been unimportant. Turkish Six per Cents. were at one time prejudiced by the news of insurrectionary movements in some of the outlying provinces of the Ottoman Empire, but to-day the tendency has been more favourable, and a recovery has taken place to the prices of last week. Mexican is also firm, after a slight temporary decline. There have been a few inquiries for Spanish descriptions, but no material change is shown. Venezuela bonds are dull.

The last price of French Three per Cents. on the Paris Bourse this evening was 68f 20c, showing a rise of more than a quarter per cent. compared with yesterday, and of about five-eighths on the week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

	CONSOLS Money Lowest.	Money Highest.	Account. Lowest.	Account. Highest	Exchequer Bills.

RAILWAYS AND OTHER SHARES.—Business in the railway market has been chiefly limited to a few speculative transactions on provincial account, but the traffic returns continuing comparatively good, in several cases an advance has been established. The result of the fortnightly settlement showed a scarcity of Midland, Great Western, and South-Western stock, while Lancashire and Yorkshire was more supplied. The improvement in the latter is hence less marked than in other descriptions. The market was generally steady at the close this evening.

In the colonial market, Indian guaranteed stocks have been firmer, chiefly in sympathy with the rise in Indian Five per Cents. Grand Trunk of Canada securities have rallied, the stock being now 20½ to 21.

Owing to the recovery on the Paris Bourse, South Austrian and Lombardo-Venetian shares have improved to 1⅛ to ½ dis. American railway bonds and shares are flatter on the decline in New York.

The miscellaneous market shows few features of interest. There has been a renewed advance in United Mexican Mining, the final price being 6 to ½.

The Committee of the Stock Exchange have resolved on reinstating the shares of the Ottoman Railway Company on the official list, "in consideration of the large amount of capital already embarked in the undertaking, the interests of the present shareholders, and the great benefit that must accrue to the Ottoman Empire from the introduction of railways."

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

RAILWAYS.	Closing prices last Friday.	Closing prices to-day.

FOREIGN EXCHANGES.—There has been another general reduction in the foreign exchanges this week, the rates on Hamburg and Amsterdam having especially declined.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, giving an account of the transactions in bullion during the week, and also of the business in Indian rupee paper:—

Gold.—Since our circular of the 11th inst., the arrival of the Kooria Mooria, from Melbourne, has been announced; she brings 80,000*l* in gold, and not 40,000*l*, as before notified; the gold will not be in London for a day or two. About 68,000*l* has been sold to the Bank of England since the 11th inst. The Atrato, from the West Indies, has brought 9,500*l*; and some considerable amounts in coin have been received from the Continent. The shipments to the United States have been almost entirely discontinued.

Silver.—The Atrato, from the West Indies, has arrived with 36,500*l* in silver; this has been sold at 5s 1½d per oz standard. The market has been firmer during the last day or two, and we quote prices 5s 1¼d to 5s 1⅜d per oz standard, 25,000*l* has been despatched by the Tasmanian to the West Indies. With the exception of about 160,000*l* on Government account, the shipments to the East by Peninsular and Oriental Company's steamer from Southampton of the 20th inst. will be of moderate amount.

Mexican dollars have been in demand during the last few days. The quantity on the market has been very limited. Sales have been effected at 5s per oz,—this we quote as the closing price. It is supposed that the West India steamer, due on the 29th instant, will bring a very considerable amount of dollars and bar silver.

Exchange on India for banks' drafts 60 days' sight, we quote 1s 11⅛d to 2s for Calcutta; and 1s 11¾d to 2s 0⅛d for Bombay; Madras, 1s 11⅛d to 2s; bills with documents, 1s 11d to 1s 11¼d.

India Government Loan Notes are a shade better than last week; we quote 5½ per Cents. 100 to 100½; and 5 per Cents. 93½ to 94.

Quotations for Bullion.—Gold—Bar gold, 77*s* 9d per oz std; bar gold, refinable, 77*s* 10½d per oz std. Silver—Bar silver, 5s 1¼d per oz std, last price; bar silver, containing 5 grains of gold, 5s 1½d per oz std, last price; fine cake silver, 5*s* 5⅞d per oz, last price; Mexican dollars, 5*s* per oz, last price; Spanish dollars (Carolus), 6s 6d per oz, last price.

The precise amount of specie that will be taken by the steamer with the India and China mail to-morrow is 244,570*l*, of which 20,259*l* is in gold, and 176,200*l* (including the Government remittance above stated) in silver for India, 3,879*l* in gold for Singapore, and 44,232*l* in silver for China,

The amount of gold bought by the Bank to-day was unimportant.

PUBLIC COMPANIES.—The annual meeting of the Agra and the United Service Bank was held on Saturday, when the report announcing that two dividends and a bonus have been declared for the past year, at the combined rate of 12 per cent. per annum, was adopted unanimously. The profit during 1860 amounted to 130,345*l*, being rather less than in the previous year, owing to several causes, but mainly to the very low rate of interest current at Bombay. Out of the surplus remaining after the payment of the above dividends,

10,000*l* has been carried to the reserve, which now stands at 200,000*l*. The Board are of opinion that it should remain for the present at this point; but in the event of a large extension of the business of the Bank, further augmentation might be advisable. The principal item among the doubtful debts is the claim upon the London and Eastern Banking Corporation now being wound up. The amount was originally 40,000*l*, which has been reduced by one dividend to about 33,000*l*. Half of this has been written off, and the debt now stands in the books of the Bank at 16,638*l*, against which security is held for 13,040*l*, while the deficiency of 3,598*l* is expected to be recovered from the shareholders of the London and Eastern. The Directors have added 1,876*l* to the superannuation fund, which now amounts to 5,000*l*, leaving a balance of 12,647*l* to be carried forward to the current year. A subscription has been made out of the funds of the Bank of 300*l* to the Indian Famine Relief Fund, an announcement which was received with general approbation. Owing to the rapidly increasing trade of Kurrachee, a branch has been opened at that port. Mr Mackintosh Balfour, the manager of the Calcutta branch, has been appointed the general manager of the Bank in the room of the late Mr Francis Neilson.

At a special meeting, yesterday, of the Chartered Bank of India, Australia, and China, the resolutions passed at the annual meeting on the 29th ult., approving the application to the Treasury for a supplementary charter to empower the issue of notes at Singapore, and authorising the postponement of the annual meetings from March to April, were confirmed.

At the half-yearly meeting of the Commercial Bank of Sydney, held at Sydney, on the 25th of January, the report stated that the available profits were 31,334*l*. Resolutions were passed, declaring a dividend at the rate of 15 per cent. per annum, and adding 4,000*l* to the reserve, which now stands at 62,000*l*. A balance of 3,334*l* was carried forward.

The business of the Nuneaton Bank (Messrs Craddock and Bull) has been transferred to the Coventry Union Banking Company, Mr Craddock, from age and infirmity, relinquishing business. The establishment has been in existence 46 years, and always held a high position. It had a fixed note issue of 5,898*l*.

The shareholders of the Mariquita and New Granada Mining Company have authorised the issue of 7,300*l* 10 per cent. debentures to provide a working capital. The last accounts from New Granada state that the contest between the Government and the revolutionary or liberal party was still going on, but that the latter continued to triumph. A decisive issue is expected to be announced by the next mail. The reports from the mines are generally favourable, although the working has been considerably impeded by the warlike operations on both sides.

The report of the Oriental Bank, issued preparatory to their annual meeting on Monday, states that the net profit during the year 1860 was 214,757*l*, out of which a dividend and bonus have been declared of 7 per cent. for the six months ending in June. A further distribution is proposed of 9 per cent. for the succeeding half-year, leaving a balance of 13,157*l* to be carried forward.

FAILURES AND MERCANTILE EMBARRASSMENTS.—A meeting of creditors of Messrs J. G. Behrends and Co., East India merchants, took place on Monday, when a balance sheet was read by Mr Quilter, of the firm of Quilter, Ball, Jay, and Co., accountants, showing liabilities expected to come upon the estate 25,668*l*, with assets estimated to realise 11,709*l*. From the explanations offered, it appears that the house has been in existence for nearly a century under various partnerships, but from the commencement of last year has been represented by Mr J. G. Behrends alone. Last June he entered into an arrangement with Mr. Nichols, a barrister and personal friend and a gentleman said to be unacquainted with business, by which Mr Nichols was to come into the concern with 5,000*l*, Mr Behrends agreeing to find a like amount. The partnership was not to commence until the present year; but, meanwhile, Mr Nichols paid in his 5,000*l*, taking a bond of Mr Behrends as security. Just before the close of 1860, Mr Behrends was struck with paralysis, and incapacitated from looking after his affairs. Mr Nichols, instead of terminating the arrangement he had entered into, and claiming as a creditor for 5,000*l* on Mr Behrends' estate, probably thought the business still a good one, and consummated the partnership, bringing in 1,500*l* more. The whole of this 6,500*l* has been lost with the exception of 100*l* or 200*l*, the drawings of Mr Nichols. The assets consist almost entirely of consignments to Messrs Ogle and Co., the Calcutta correspondents of the firm, and of sums due on current account for that house, the whole of which will be realised in due course. There is some difference as to the exact amount to be received, but Messrs Ogle have acknowledged that there is 9,000*l* coming from their house. The deficiency on Messrs Behrends' estate is accounted for by losses in merchandise 14,185*l*; bad debts, 3,184*l*; and 2,860*l* to the debit of Mr Behrends' capital account. In reply to a question, it was stated that the usual business of the house was to buy goods for consignment, and draw against them for 80 per cent. of their value. It was resolved, after some discussion, to appoint two inspectors to ascertain whether a composition can be offered, and to report at an adjourned meeting next week.

At a meeting of creditors of Messrs Pietroni and Draper on the same day, it was determined to wind up under inspection. The balance sheet prepared by Mr Coleman, the accountant, showed liabilities 20,822*l* (exclusive of 80,000*l* in bills receivable and foreign bills which will be duly met), and net assets 7,155*l*. In addition to the latter, however, Mr Pietroni has claims for two valuable railway concessions, the completion of which has been prevented by political difficulties. It is believed, however, that he will realise 7,000*l* at least on this account, and may probably get 70,000*l*. The present failure is attributed to the attention paid by Mr Pietroni to the obtaining of the above concessions to the detriment of his more regular business. The general trading has been good and safe. The house stopped previously in 1857, but subsequently resumed with a capital of 6,615*l*, lent by three friends, who are creditors on the estate for that amount.

The creditors of the Faringdon and Wantage Bank (Messrs Barnes, Medley, and Ansell,) have held a meeting and agreed to accept a composition of 10s in the pound. Mr Harding, the accountant, in whose hands the books of the establishment had been placed, explained that the liabilities were about 96,900*l*, of which 45,500*l* are expected to become claims upon the estate. The assets available for distribution, including the separate estate of Mr Barnes, are estimated to produce about 22,500*l*.

A meeting of creditors of Mr B. de Cuadra, Spanish merchant, was held yesterday, when a very satisfactory balance sheet was submitted, showing liabilities expected to come upon the estate 97,838*l*, and assets estimated to realise 117,905*l*, exclusive of private property. There were also at the date of the stoppage engagements of 267,000*l* expected to be retired by other parties, of which 74,000*l* have since been provided for. A liability of 7,590*l*, on account of bills drawn, appearing in the statement, may also be taken up, which will increase the present surplus by that amount. From the large sum of cash in hand and bills receivable, over 16,000*l*, Mr de Cuadra could have gone on for some time longer, but anticipating that he might have to stop at a later period, he thought it better to call his creditors together at once, and request an extension. The larger part of the assets consists of debts due 90,524*l*, the whole of which have been ascertained to be good. It was resolved to adjourn for two months, when most of the liabilities will have run off, and Mr de Cuadra will be in a position to propose some arrangement for paying his creditors 20s in the pound with interest.

At the adjourned meeting of creditors of Messrs Dalton Brothers, at Manchester, it was resolved to accept a composition of 5s in the pound, as recommended by the committee of investigation.

The advices from Sydney mention the suspension of the mercantile house of Raymond and Co., with liabilities for about 80,000*l*.

During the last few days, a rumour has been circulated of some large suspensions in the Levant trade at Marseilles; but a positive contradiction of its truth was last evening received by telegraph.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.30 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 3-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 426 per mark, and the short exchange on London is 13.6½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 5-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 108 to 108½ per cent., which, when compared with the mint par between the two countries shows that the exchange is against England. But, after making allowance for loss of interest and charges of transport, the present rate leaves no profit on the transmission of gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The show of English wheat at Mark lane, to-day, was very moderate; nevertheless, all kind's moved off slowly, at Monday's currency. In foreign wheat, very little was doing, at late rates.

All other descriptions of produce, including flour, were dull, but not cheaper. The imports from abroad are 13,320 quarters of wheat; 2,030 barley; 8,360 oats; and 720 sacks of flour.

At Liverpool, this morning, the trade, generally, ruled very inactive, at late rates.

At the commencement of the present week, the Liverpool cotton market was steady, with moderate transactions daily; but yesterday very warlike accounts were received from America. The President's motto seems now to be no surrender, and to force by military operations a compulsory return of the Seceded states into the Union. These accounnts produced their effect immediately upon the Liverpool market, which became at once very animated, and large transactions at higher rates have taken place both yesterday and to-day. The total sales of the week are 68,500 bales, including 48,500 bales to spinners, 15,000 to speculators, and 5,000 bales for export. Prices are fully $\frac{1}{8}$d dearer than at the commencement of the present week. To-day's sales are 15,000 bales, market closing very lively. The accounts from America speak for a crop not exceeding 3,700,000 bales, which also tends to strengthen the opinion in favour of the article.

The public sales of tea have gone off steadily, at full prices. Privately the demand is firm.

Letters from Hong Kong to the 2d ult. bring the following information in reference to the transactions in tea and silk:—

Canton Silk—Stock very small. Prices have advanced 30 dols to 35 dols per picul. No sales are reported. Tea—During the past fortnight transactions have been very limited. In black a slight decline has taken place in the highest and lower grades, but the medium descriptions have commanded an advance, owing to the limited quantity on offer. Scented teas are slightly lower. In country greens the settlements are nearly all for the United States, and the prices paid show no decline on the previous extreme rates. Foochow advices are to the 23d. Tea—The principal purchases have been for the colonial market, at easier rates. The recent arrivals consist solely of low and inferior kinds; the supply of fair medium qualities is now brought to a small compass, the bulk of the teas on the market being below good common. Estimated future arrivals to the end of this season are put down at about 10,000 to 12,000 chests A few hundred packages of greens are close at hand, and it is reported that about 20,000 half-chests may be brought to this market. Prices show a decline of fully 5 mace on most descriptions of congou. Shanghai advices are to the 21st ult. Silk—The market had only been reopened a few days, and the settlements are reported at 1,500 bales, making a total for the season of 71,500 bales. Stock estimated at about 8,000 bales, and the quantity still to arrive to complete the season's supply is reported at about 10,000 bales. Tsatlees, owing to strong demand, have advanced 10 taels all round. Taysaams remain as before. Tea—Supplies have continued extremely small, and prices of black leaf may be quoted about 1 tael lower, but other kinds show no alteration. The total export of tea from China to Great Britain is 68,569,700 lbs, against 61,096,600 lbs to same time last year, or an increase for this season of 7,473,100 lbs. To the United States the export is 21,375,100 lbs, against 25,782 000 lbs, or a decrease for this season of 4,406,900 lbs.

All good and fine raw sugars have changed hands freely, and, in some instances, prices have had an upward tendency. Low and damp parcels have commanded previous rates.

Coffee has realised very full prices, and the demand for it has continued healthy. Cocoa, however, has met a dull inquiry.

The following report of the coffee market at Ceylon to the 15th ult., is forwarded by Messrs Volkart Brothers:—

The weather has continued most favourable for the shipment of produce, of which a good deal has gone forward during the last month. The exports of coffee to date stand thus:—

PLANTATION COFFEE.

To Great Britain .....cwts	186,673	against last year, cwts		172,195
Foreign Ports	12,870	—	—	16,859
Australia and India.....	5,934	—	—	6,499
	205,477			195,553

NATIVE COFFEE

To Great Britain.....cwts	40,176	against last year, cwts		57,706
Foreign Ports.....	20,983	—	—	47,033
Australia and India.....	3,441	—	—	2,035
	64,600			106,774

Large arrivals of plantation coffee continue to take place from all parts of the interior, where, however, the means of transport are inadequate to the wants of planters. We hear good reports of the progress and appearance of plantations. The scarcity of native coffee and favourable advices from the home markets have enabled dealers to obtain higher rates: in some cases 42s have been paid for really good unpicked. But little remains to come forward. Plantation coffee, low, nominal; ditto, mountain, 11s 3d to 11s 6d per bhl; native coffee, unpicked, 41s to 42s per cwt; ditto, picked and dried, nominal. Cinnamon, plantation, 9d to 9½d; ditto, inferior, 6d to 7½d per lb.

There has been only a limited sale for rice, on former terms. Saltpetre has commanded very little attention. Rum has changed hands on quite previous rates: but brandy and grain spirits have sold slowly.

"During the latter part of March, and since the beginning of this month," write Messrs Arles Dufour and Co., of Lyons, "transactions in silk have gradually recovered some activity. This improvement must be ascribed to some supplementary orders having arrived for the European consumptions. Consequently, prices have shown a rising tendency, particularly for fine silk, and on the inferior descriptions the decline has at least been stopped.

From February 1 to 28, 1861	2,315	170,000

Messrs Moran and Co., of Calcutta, thus report the state of the indigo trade to the 8th ult.:—

The public sales of indigo during the past month have comprised about 3,200 chests, and by private contract about 210 have changed hands, and the whole of the Bengal and Tirhoot and very nearly all the Benares marks have now been sold. Oudes are now coming forward freely, and meet with ready buyers for the English market at about 25 rs per maund below last year's rates. To this date we estimate the quantity sold at about 1,01,000 maunds. No rain has yet fallen in Tirhoot, and the want of moisture in the lands continues to be a subject of much anxiety to planters. Exports of indigo from the 1st November, 1860, to the evening of the 7th March, 1861:—To Great Britain, 17,774; Havre and Bordeaux, 6,156; foreign Europe, 107; America, 484; Gulf, &c., 1,110—total 25,631 chests.

Linseed oil has sold at 28*l* to 28*l* 5s per cwt. Foreign refined rape is steady, at 40*l* to 41*l*; and brown, 38*l* 10s to 39*l*. Spirits of turpentine, 30s 6d to 31s 6d per cwt. Tallow has continued very firm in price. To-day, P. Y. C. on the spot has realised 59s; April to June, 59s; and October to December, 55s to 55s 6d per cwt.

"The Government loan," observes the New York *Shipping List* of the 6th inst., "has caused but a very slight ripple on the still surface of monetary affairs during the week. The amount of floating capital seeking investment is on the increase, but without meeting a corresponding outlet. It is scarcely within the bounds of probability that this stagnant condition of things is to continue much longer. The banks and the discount houses continue to be competitors for what little of A No. 1 paper is floating about. On call, the supply, as usual, is much in excess of the necessities of borrowers, who, in most cases, are now able to make their own terms. We quote:—

	Per cent. per annum.	
Loans on call, stock securities	4½ to 5½	
Do. other good securities	6	6½
Prime endorsed bills, 60 to 90 days	5½	6
Do. 4 to 6 months.....	6½	7
First-class single signatures	6½	7
Other good bills	8	9
Names less known	12	24

In the way of general trade there is but little to note that is new. The dry goods auctions are proceeding with considerable energy. The pressure to sell for awhile was irresistible, and prices, without exception, suffered a decline. Governments went down 1½ to 1¾ per cent.; Missouri 6's, 2¾; Tennessees, 1¾; Virginias, 1¼. Later in the day the Board measurably recovered from its fright; the market, however, closed very unsettled."

IMPORTS OF FOREIGN AND COLONIAL WOOL.

COLONIAL and FOREIGN WOOL imported into London, Liverpool, and Hull, from Jan. 1 to March 31, 1860 and 1861, and the total imports, including Bristol, Leith, Grimsby, and Hartlepool.

COTTON.

NEW YORK, April 2.

The following is a statement of the week's sales here and at the chief Southern ports, at latest telegraphic dates, with the closing prices f.o.b., with freight in sterling at current exchange:—

		Sales.	Closing.		Middling.		Freight		F.o.b.
New Orleans...Apr.	1	52000	⅛c higher	...	13c	...	⅛d equal to		7.13d
Mobile.....	1	10000	⅛c —	...	12¼c	...	⅛d	—	6.74d
Charleston	1	4000	⅛c —	...	12¼c	...	⅛d	—	6.65d
Savannah .....Mar.	29	3000	⅛c —	...	12c	...	⅛d	—	6.46d
New York .....Apr.	2	24000	⅛c —	...Upl.	12¼c	...	3-16d	—	6.69d
Total.....		93000 bales					Average		6.73d

There is now a decrease in receipts of 800,000 bales from last year, when the crop reached 4,675,000, and of 61,000 bales from 1858-9 (crop 3,851,000).

New York Market.—An active demand has prevailed in this market during most of the week, and with increased firmness on the part of holders, prices have steadily advanced. The business in cottons on the spot has been chiefly with the home trade, and middling Uplands is now worth 12¼c. Transit cottons have also been in good demand at rather higher prices. The week's sales reach about 24,000 bales, of which half in cottons afloat, at last week's rates.

The following is a statement of the movements of cotton for the past week, and since 1st September last, compared with the five preceding years:—

	Receipts. Week's Receipts. bales	Receipts. Since 1st Sept. bales	Exports for the Week. To Great Britain. bales	To France. bales	To other For. Pts. bales
1860-61.....	54000	3199000	104000	24000	23000
1859-60.....	96000	3999000	70000	10000	15000
1858-59.....	75000	3260000	66000	4000	20000
1857-58.....	100000	2442000	82000	2000	10000
1856-57.....	41000	2622000	54000	13000	10000
1855-56.....	83000	2909000	66000	10000	18000

	Exports since First September. To Great Britain. bales	To France. bales	To other For. Pts. bales	Total. bales	Stock. bales
1860-61.....	1751000	476000	285000	2512000	454000
1859-60.....	1868000	479000	349000	2696000	977000
1858-59.....	1206000	342000	416000	1904000	817000
1857-58.....	1017000	276000	218000	1457000	780000
1856-57.....	1003000	323000	295000	1621000	537000
1855-56.....	1200000	365000	368000	1933000	653000

Thus the receipts show a decrease of 800,000 bales from those of last year, and a decrease of 61,000 from 1858-9, and the exports exhibit the following results—

	To G. Britain.	To France.	To other F.P.	Total.	Stock.
Compared with last year.....	Dec. 117000	...Dec. 3000	... Dec. 64000	..,Dec. 184000	...Dec. 523000
Compared with 1858-9.....	Inc. 545000	...Inc. 134000	...Dec. 131000	...Inc. 548000	...Dec. 363000

Southern Markets by Telegraph.—At the South an active demand continues to prevail, and business is only restricted by the reduced supply offering and scarcity of desirable cottons. The advanced claims of holders have also tended to check business, but at New Orleans the week's sales reach 52,000 bales, while prices have further advanced ½ to ¾c, middling being now quoted 13c. and upwards. The Mobile market has been poorly supplied with the better grades, and the week's sales only reach 10,000 bales, but prices have advanced ¼c, and middling is worth 12¼c at the close. The Atlantic markets have also advanced, though business has been on a limited scale. Freights have further declined, the present rate to Liverpool being ⅜d from the Gulf ports and ¼d from the Atlantic. Sterling exchange has improved owing to the reduced supply.

Receipts.—The receipts at all ports this week by mail dates sum up to 54,000 bales, and compare against 96,000 same week last year and 75,000 the year before. Thus the falling off still continues, and the total deficiency now amounts to 800,000 bales as compared with last year and to 61,000 with the year before. By telegraph a further decrease is also apparent for the following week. We do not include in our tables any arrears which usually come in at the end of the season, as the comparison with former years would thus be destroyed. The total stock of cotton in all our markets is reduced to less than half that of the corresponding time last year.—*From Messrs Neill Bros. and Co.'s Circular, forwarded by Mr Ollerenhaw, of Manchester.*

NEW YORK, April 6.—The market remains pretty firm, but holders have been a little more flexible since our last, and sales to the extent of 10,000 bales have been effected at previous rates. We quote:—

NEW YORK CLASSIFICATION.

	Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	10½	10½	10½	10½
Good ordinary...	11½	11½	11½	11½
Middling	12¼	13	13¼	13¼

The cotton market has been animated, with hardening prices, throughout the week. The trade have bought freely, and a good business has been done for speculation and export. We quote an advance in American of ⅛d per lb, and may remark that a good style of cotton brings an extreme price, owing to its comparative scarcity. Egyptians have been in good demand, but do not improve in price. Brazil continue firm or advancing. East India are slightly dearer. The sales to-day are 12,000. The market is very firm. The reported export amounts to 5,430 bales, consisting of 2,620 American, and 2,810 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

Advices from nearly the whole of the manufacturing districts are of an improved character. Both for home use and export, the transactions have been on an increased scale, and, in some instances, the quotations have had an upward tendency. The stocks are only moderate for the time of year. Iron still continues duli, but there is rather more business doing in coals, at the late fall in value.

MANCHESTER, April 18.—Quotations rather more than support those of last week, and there has been probably more than an average business. The gloomy accounts from India have, to some extent, operated as a check, and there is still much difference of opinion as to whether any tangible improvement can be sustained in this market. To-day the warlike accounts from America, as affecting cotton, have brought out a full supply of orders which had been held back. Previously there had been a fair amount done in 7-lb to 8¼-lb shirtings, in some sorts of jacconets, and in T'cloths and longcloths, but now sellers hold for rates at which buyers are reluctant to act. Yarns are held for full rates, transactions being moderate.

BRADFORD.—Wools are generally firm in price, and the recent advance in bright-haired sorts has to be conceded by the spinners. Skin wools, which for a long time have been scarce, and are now becoming longer in staple, are dearer. The stocks in the hands of the staplers are not large. In half-bred and down wools there is little animation. Colonial wools are much as they have been for many weeks past; but little is passing either in short wools or combing sorts. There is more disposition on the part of export houses to do business in yarns, but the prices offered are so low that spinners are compelled to refuse orders. For home consumption there is little or no change. We hear of no extended operations in the piece market.

LEEDS.—The appearance of settled genial weather continues to impart more cheerfulness to trade, and causes some signs of animation both in the drapers' shops and in the wholesale warehouses. The plain cloth trade, however, is sluggish, and stocks generally, both in the hands of makers and merchants, are larger than is desirable.

ROCHDALE.—There was a slightly improved feeling, and a little more business was done than on last market day. The trades, however, are not very active, but there is a hopeful feeling that they will soon improve. The stocks, those of flannel as well as those of wool, are not large. There is no change in the demand for Yorkshire goods, and prices are firm.

HUDDERSFIELD.—Business is evidently improving in this district, although progress is as yet very slow. Reports from travellers engaged in the country trade are more encouraging now, and orders are being more freely given. The new winter styles in

fancy trouserings are for the most part confined to mixture grounds in silk and wool, striped or plaided in subdued contrasting colours. There are also various descriptions of ribs introduced in some styles, but these do not take so well as the plain surfaces. Business in the wool trade has been complained of during the week, manufacturers buying only when obliged to it by the necessity of completing orders in hand. Stocks of all kinds in the hands of local staplers are comparatively light.

LEICESTER.—There is a little improvement in the demand for goods suitable for the season, and prospects are becoming more cheering. The warehouses continue to do rather more. Manufacturers are still keeping down stocks. Yarns are not much in demand, without any material alteration in prices. Wools are without change.

NOTTINGHAM.—There is a better feeling in the lace trade this week. A little more is doing in cotton goods. Orders are in hand for plain mechlins and mechlin quillings. There is also a little doing in stiff plain nets for the home market. Muslins and cotton edgings are not much in request. There is more doing in silk goods.

BELFAST.—Yarns—A considerable demand for home consumption has existed, and transactions have been to an increased extent. More business has been doing with Scotch houses. Foreign orders have appeared to a moderate amount. Stocks in general are small, and not on the increase. Some spinners report being oversold in Nos. up to 200 leas. Prices steady, with a firm tendency. In some cases an advance of 1½d per bundle has been realised on a few numbers.

WOLVERHAMPTON.—Compared with last week, there is no change to report in the value of pig iron. The market, however, is firm.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, April 2.—Flour quiet at yesterday's prices. State and Western, superfine State, 5 dols 30c to 5 dols 40c; extra ditto, 5 dols 45c to 5 dels 55c; round hoop Ohio, 5 dols 70c to 5 dols 75c; extra Western, 5 dols 45c to 5 dols 70c; Southern unchanged; mixed to good, 5 dols 50c to 5 dols 80c; fancy and extra, 5 dols 85c to 7 dols 50c. Wheat advanced 1c. Chicago spring, 1 dol 22c to 1 dol 28c; Milwaukie Club, 131 dols to 1 dol 32c; red winter Western, 1 dol 35c to 1 dol 38c; white Western, 1 dol 45c to 1 dol 55c; amber Iowa, 1 dol 34c to 1 dol 35c. Corn dull: mixed Western, 68c to 70c; new do, 62c to 68c; white Southern, 67½c to 71c: yellow ditto, 65c to 70c.

NEW YORK, April 5.—Very little change has taken place in the value of either wheat or flour. The market, generally, is inactive.

NEW YORK, April 6.—The market for State and Western flour has been somewhat less buoyant, and holders have been compelled to grant a slight concession from our previous quotations. Canada flour has been in fair request, but prices are a shade lower. The demand for Southern flour has been fair for the most part, since our last, but yesterday the inquiry was light and the market was scarcely so firm.

EXPORT from 1st to 31st March.

	1861. barrels	1860. barrels
Wheat Flour	174,727	69,644

EXPORT from Jan. 1 to March 31.

barrels		barrels	
1861	527,366	1860	152,966

With only a moderate inquiry for wheat from the local millers and for shipment, nearly all descriptions have experienced a slight depreciation in value. The sales for the three days amount to 190,000 bushels, in good part for shipment, of which about 43,000 bushels changed hands yesterday. For corn the demand has been moderate, but prices are substantially the same.

EXPORT from 1st to 31st March.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that only limited supplies of home-grown wheat have been on sale in the leading markets of consumption held this week, the demand has exhibited little or no improvement. Good and fine samples have mostly changed hands at full prices; but low and damp qualities have given way in value fully 1s per quarter. Foreign wheat, the arrivals of which continue on a liberal scale, has met a dull inquiry, and the currencies have had a drooping tendency. There has been a fair sale for barley, and late rates are well supported. Malt, however, has commanded very little attention. Owing to the backward state of the season, oats have realised full prices, with a good consumptive demand. Both beans and peas have sold on former terms; but flour has somewhat given way in price.

Most of the Continental markets continue to be well supplied with wheat, for which the inquiry has been much restricted, at barely stationary prices. For most descriptions of spring corn the demand has improved, and the quotations have been well supported. Advices from New York state that both wheat and flour supported previous rates; but that the demand for them was by no means active. The supplies on offer were still large for the time of year.

In Scotland, the wheat trade has been in a most inactive state; but for barley and oats the inquiry has continued healthy, at full quotations. Other produce has ruled heavy.

The Irish markets, almost generally, have been in a most inactive state. In prices, however, very little change has been reported.

At Mark Lane, to-day, the show of English wheat was very small, but the samples were, for the most part, in fair condition. Good and fine qualities sold steadily, at full prices. Other kinds, however, were a dull sale. The transactions in foreign wheat were chiefly in retail, yet the quotations were quite supported. Fine malting barley fully maintained its value; otherwise, the trade was in a very sluggish state. Malt changed hands to a limited extent, on former terms, but the dealings were mostly confined to good and fine descriptions. Oats, beans and grey peas ruled firm in value. The flour trade was dull, yet both English and foreign qualities were held at previous rates.

As regards the market for floating cargoes, the business doing, observes Mr Edward Rainford, is much restricted, and, in some instances, prices have been with difficulty supported. There have been 30 arrivals at ports of call since our last, viz., 16 cargoes of wheat, 7 maize, and 7 miscellaneous.

The London averages announced this week are:—

	qrs	s	d
Wheat	2651	at 59	2
Barley	662	43	3
Oats	...	...	
Rye	19	24	5
Beans	222	37	0

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been a steady demand, and the market has exhibited increased firmness since the close of last week. Good descriptions are occasionally rather dearer, and some grocery Porto Rico went considerably above the valuations. Soft brown descriptions are about the same as before. The improved tone of the refined market, coupled with diminished receipts and good deliveries of raw sugar, tend to increase confidence on the part of the buyers. Owing to the reduced supply of West India on show, the sales to yesterday (Thursday) did not exceed 1,567 casks, at full prices to 6d per cwt advance. The deliveries for home consumption now exceed those of last year by 1,835 tons, and for export by 1,900 tons. There were 5,310 tons delivered last week, and 3,785 tons landed, leaving the stock at the close 50,250 tons, against 53,150 tons in 1860 at the corresponding date.

Mauritius.—A good business has been done by private contract. At auction, 7,170 bags were all sold: soft brown and yellow, 32s 6d to 39s 6d; grainy, 37s to 41s 6d; crystallised, 40s to 44s per cwt.

Bengal.—1,372 bags, offered by auction on Tuesday, were partly sold as follows: soft brown date kind, 31s to 35s; grey and yellow, 35s to 37s 6d per cwt.

Madras.—493 bags native brown and low yellow realised 31s 6d to 32s per cwt.

Penang.—1,283 bags found buyers at 38s to 43s 6d per cwt for middling to fine pale bright yellow.

Foreign.—218 casks Porto Rico, by auction, chiefly sold, and met with ready buyers at 40s to 48s for brown to fine pale yellow. 23,464 bags clayed Manilla partly sold: common to good, 34s 9d to 36s; damp and washed in proportion. 512 casks Cuba partly sold at 36s to 43s 6d for brown to good yellow, the bulk being taken in above the value. 1,263 baskets Java partly sold: fine grey and white, 16s duty, 45s 6d to 46s 6d; grey to fine greyish yellow, 13s 10d duty, 42s to 44s 6d. Transactions privately include 12,000 bags clayed Manilla at 35s 6d, and about 1,000 boxes Havana. Three floating cargoes of Cuba have sold for the United Kingdom at 24s 6d to 25s, one of brown Pernambuco at 23s, and four of Havana, Nos. 11½ to 13, 27s to 28s; 14½, 29s per cwt.

Refined.—The market is firm, and the trade have taken fair supplies of dry goods, the lowest qualities of which must be quoted 50s 6d to 51s; crushed, 48s to 49s 6d; low to fine pieces, 42s 6d to 47s; low to fine bastards, 30s 6d to 37s 6d per cwt.

MELADO.—365 casks Cuba partly sold at 23s to 29s per cwt.

MOLASSES.—100 casks Cuba have sold at 15s per cwt.

RUM.—Several sales have been made at the previous value, including Penang, at 1s 9d; Leewards, 1s 9½d to 1s 10d; good Demerara, at 1s 11d; Surinam, at 1s 9d; and fine Jamaica, at 4s 4d to 4s 6d per proof gallon.

COCOA.—Trinidad is dull; but partial inquiries prevail for Grenada, and 127 bags partly sold, by auction, at 54s to 58s per cwt; the remainder withdrawn.

COFFEE.—The Netherlands Trading Company's large spring sale, held on Wednesday, has gone off only ½ to 1½ per cents. under the valuations based on the late value of good ordinary Java. This market shows great firmness, and the further parcels of plantation Ceylon from the recent arrivals brought forward, comprising 1,133 casks 1,635 barrels and bags, found ready buyers at very full prices: fine ordinary palish to good, 67s to 77s. Of 1,000 bags native, a portion sold at 61s to 62s, being cheaper. 97 casks 843 barrels and bags were disposed of, chiefly at 61s to 63s for good ordinary to middling quality. 285 bales Alexandria Mocha were withdrawn, no fair offer being made. Privately, 600 bags of St Domingo sold at 60s 6d per cwt.

TEA.—There has been only a moderate amount of business done by private contract during the week, and the public sales on Monday, Tuesday, and yesterday went off without material change in prices. Of 28,550 packages, about 6,557 packages sold. Black leaf congous realised the full valuations. Oolongs went rather cheaper in some instances

RICE.—The fine weather has had some effect on the market which is now dull, with limited transactions by private contract, and white Bengal sold rather cheaper at the public sales. 5,299 bags chiefly found purchasers at 11s to 12s 3d for low yellowish to good middling white. Soft grain descriptions have not presented any alteration to notice.

IMPORTS and DELIVERIES of RICE to April 13, with STOCKS on hand.

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SALTPETRE.—The market has been steady, and 2,300 bags Bengal, by anction, partly sold at full prices: refraction 4 to 3½, 37s 6d to 38s; 7¼ 36s; 9½ since placed at 34s 6d. 951 bags low Bombay bought 30s 6d to 31s per cwt. Privately, several parcels changed hands at the above quotations.

IMPORTS and DELIVERIES of SALTPETRE to April 13, with STOCKS on hand.

Stock	4860	4050	3340	4900

Deliveries last week 244 tons.

SPICES.—The sales on Wednesday went off without alteration. 19 cases mace at 10d to 1s 4d for common and slight wormy to good. 117 cases small to middling brown nutmegs realised 1s to 1s 6d. Black pepper is steady, at 3⅞d to 4d per lb for Singapore. Business has been done in white, of which particulars do not transpire. 45 cases wormy Bombay ginger were bought in at 45s to 47s per cwt. 74 cases wild nutmegs taken in at 6d to 9d per lb.

SAGO.—410 boxes good small pearl were bought in at 19s per cwt.

COCHINEAL.—The public sales have been unusually heavy, containing 700 bags, of which about 300 sold, prices occasionally ruling 1d cheaper. Honduras, 2s 7d to 3s 2d; black, 4s to 4s 4d; Mexican silver, 2s 7d to 2s 8d; black, 2s 9d to 3s 1d; Teneriffe silver, 2s 7d to 2s 9d; black, 2s 10d to 3s 1d per lb.

OTHER DYESTUFFS.—A parcel of Bengal turmeric of middling quality, at public sale yesterday, was withdrawn. 500 bales Gambier sold at 16s to 16s 3d for dark, and 15s 6d for heated.

SAFFLOWER steady. A few lots good middling to good Bengal sold at 4*l* to 7*l* 5s per cwt.

SHELLAC.—A parcel of DC orange by auction realised 10*l*, being cheap; and some dark garnet sold at 8*l* to 8*l* 2s 6d per cwt.

METALS.—The reduction in the rates of discount and the abundance of money has not yet exercised any great influence upon the market, which is steady. Scotch pig iron last sold at 48s 6d for mixed numbers. A few sales have been effected in foreign tin at advanced rates: Straits quoted 117s to 120s; Banca, 125s, with a firmer market. A steady business has been done in spelter at 18*l* 5s to 18*l* 7s 6d and 18*l* 2s 6d per ton for July delivery.

JUTE.—This article meets with rather more inquiry. The sales on Wednesday comprised only 3,720 bales, and some marks went rather dearer: low to fine, 12*l* 15s to 21*l* 5s per ton.

MANILLA HEMP.—Holders appear less disposed to sell, and there are not many parcels offering in the market, which is firmer.

LINSEED.—Only moderate transactions have occurred: Bombay, 52s 6d to 53s; Calcutta, 49s 6d to 51s 6d. A cargo of Taganrog has sold at 50s per quarter for export.

TURPENTINE.—A large business has been done in spirits: American, 31s to 31s 6d per cwt.

OIL.—Nothing of interest has transpired in fish oils. Olive is neglected. Floating cargoes offer for early shipment: Gallipoli, 59*l*; Messina and Malaga, 57*l* to 57*l* 10s per tun. Owing to the extensive production of linseed oil, the large demand fails to influence prices: 28*l* 2s 6d to 28*l* 5s is the value. Rape has further improved: foreign refined, 40*l* to 41*l*; brown, 39*l*. Cocoa-nut has recovered the depression occasioned by forced sales last week: Cochin, 48s; Ceylon, 46s to 46s 6d. Palm is higher: fine being quoted 46s to 46s 6d per cwt.

TALLOW.—The market being well supplied with various kinds, which sell at moderate prices when contrasted with foreign, consumers still restrict their purchases of the latter. Speculators, however, have raised their quotations: viz., 1st sort Petersburg Y.C, 59s; the same for delivery in April to June, and 55s 3d per cwt for the last three months.

PARTICULARS OF TALLOW.—Monday, April 15.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The demand for all good qualities continues animated. 2,079 bags white Benares went much higher, there being export orders here: low to fine, 13s 10d duty, 45s 6d to 48s 6d. Khaur bought in at 32s to 32s 6d. 10,066 bags Mauritius all sold at previous quotations to 6d advance for fine. 6,880 bags clayed Manilla found purchasers at 34s 6d to 35s 6J. 121 bags soft yellow Madras at 37s to 38s. 394 casks Cuba sugar and melado, 24s to 30s per cwt. Including the few parcels by auction, the week's business in West India reaches 2,234 casks. 5,000 bags clayed Manilla sold privately at 35s 3d to 35s 9d, and a floating cargo of Java, for the United Kingdom, Nos. 11 and 11½, at 27s 3d per cwt.

COFFEE.—103 casks plantation Ceylon sold at full rates. 165 bags Java were sold at 67s. 38 cases 19 bags Neilgherry, 72s 6d to 75s per cwt.

RICE.—4,000 bags Bassein were bought in at 10s 6d. Privately, further business was done in white Bengal at 11s 9d to 12s 9d, and cargo sorts at 9s 6d to 9s 9d per cwt.

SALTPETRE.—Refraction 7¾ sold at 36s 4½d; 5¼ refraction, 37s 3d per cwt.

TALLOW.—580 casks Russian, by auction, part sold at 53s 6d. 320 casks Odessa at 52s to 54s 9d. No change in Y. C. or town melted.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been well maintained this week; in some instances higher prices have been paid. Treacle continues very scarce and rather dearer. In Holland, the Dutch market for crushed sugar remains unaltered.

GREEN FRUITS.—Market improved with a diminished stock of oranges. Some parcels St Michael, Terceira, and Valencia, sold by Keeling and Hunt at public sale, went at an advance of 1s to 2s per package. Lemons of good quality improved in value. Nuts in steady demand, the low price of black Spanish and Barcelona increasing consumption.

DRY FRUIT.—Currants are quiet this week. The quotations, however, are unaltered, the market presenting many healthy indications. Raisins also are dull, but firm.

COLONIAL WOOL.—The market looks rather firmer, owing to the reduction in the value of money and improvement in the weather.

FLAX unaltered.

HEMP very dull. Scarcely anything passing in Russian. In Manilla, owing to the present very low rates, we have had more inquiry, and a considerable quantity of late has changed hands.

COTTON.—Sales of cotton from Friday, April 12, to Thursday, 18th, inclusive:—1,800 bales Surat at 5 9-16d to 5⅞d for middling fair to good sawginned, 6d for good Broach, 5¼d to 5⅜d for middling fair to good Dhollera, 5d for middling Oomrawatty, 5d to 5⅛d for fair Mangarole, 5d for fully fair Compta; 600 bales Tinnevelly, at 5¾d to 5⅞d for good fair; 400 bales Bourbon Madras, at 6¾d for fair; 300 bales Western, at 4⅞d to 5d for fully fair to good; 100 bales Northern, at 5⅛d for good. The market opened quietly, and up to Wednesday the transactions were moderate, and prices barely maintained. Yesterday, owing to the activity in Liverpool, caused by the American accounts being more warlike, a good demand sprung up, and fully 2,000 bales were sold at a slight advance on previous rates, and the market closes with a decidedly improved tone, prices being slightly higher than last week. P.S.—Market quiet; sales to-day, 200 sawginned, at 5⅜d to 5⅝d per lb.

SILK.—A fair business has been done in silk, with firmer prices, which, for the moment, has been rather checked by the news from America.

TOBACCO.—The market remains very firm for all descriptions. Sales have been made to a limited extent, and almost confined to small selections for immediate consumption. There has been more inquiry for exportation.

LEATHER AND HIDES.—The leather market remains unaltered, with a fair average supply of fresh goods, but only the recent limited demand. There is very little change in prices, although the tendency of some articles has been slightly downwards. Calf skins may be quoted 1d per lb lower.

METALS.—Some general improvement has manifested itself in metals, and a steady business has been doing during the week. Copper is firm in price, with good demand for consumption and export, as well as a little for speculation. Foreign continues to be held for higher prices. Iron has found a readier sale for Welsh, but in other respects matters

are little changed. Tin has been buoyant for some days, and prices have stiffened materially in Straits. Spelter keeps steady at our quotations. Lead still rather dull of sale. Tin plates find a much better demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	56	6
Fat by ditto	2	11
Yellow Russian	60	6
Melted stuff	37	6
Rough ditto	22	6
Greaves	18	0
Good dregs	7	9

METROPOLITAN CATTLE MARKET.

MONDAY, April 15.—The total imports of foreign stock into London, last week, amounted to 2,615 head. In the corresponding period in 1860, we received 3,825; in 1859, 3,021; in 1858, 1,254; in 1857, 1,096; in 1856, 229; and in 1855, 951 head.

There was a fair average supply of foreign stock on offer here, to-day, for the time of year, and sales progressed slowly, on easier terms. From our own grazing districts, as well as from Scotland, the arrivals of beasts fresh up were moderately good, and of full average quality. All breeds met a dull sale, at a decline in the quotations, compared with Monday last, of 2d per 8 lbs, the general top figure for beef being 4s 10d. The receipts of beasts from Norfolk, Suffolk, Essex, and Cambridgeshire amounted to 2,100 Scots, &c.; from other parts of England, 300 various breeds; and from Scotland, 400 Scots and crosses. The show of sheep was on the increase, and of improved quality. The mutton trade was in a sluggish state, at 2d per 8 lbs beneath last week's currency. The best old Downs, in the wool, realised 5s 10d; out of the wool, 5s per 8 lbs. Lambs were in good supply, and heavy request, at a fall in value of 2d per 8 lbs. The top price was 7s 4d per 8 lbs. About 300 lambs came to hand from the Isle of Wight. We have to report a dull sale for calves, at a reduction in value of 4d per 8 lbs. The highest quotation for veal was 5s 6d per 8 lbs. There was a moderate demand for pigs, and prices were well supported.

SUPPLIES.

	April 16, 1860.	April 15, 1861.
Beasts	4240	3800
Sheep and lambs	23610	20030
Calves	126	116
Pigs	320	340

THURSDAY, April 18.—The supply of beasts in to-day's market was limited, and chiefly composed of those turned out unsold on Monday. All breeds moved off slowly, but no change took place in the quotations. The top figure for beef was 4s 10d per 8 lbs. We were scantily supplied with sheep, which met a dull inquiry on former terms. Lambs commanded Monday's currency, but the sale for them was inactive. Prime small calves were in moderate request; otherwise, the veal trade was dull, at late rates. In the value of pigs and milch cows no change took place.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	8	Prime Southdown sheep	5	8	5	10

Prime coarse-woolled do.	4	8	5	6	Quarter old store pigs	22	0	29	0

Lambs, 6s 0d to 7s 4d.

Total supply—Beasts, 570; sheep and lambs, 5,480; calves, 140; pigs, 330.
Foreign supply—Beasts, 180; sheep, 750; calves, 80; pigs, 40.

NEWGATE AND LEADENHALL.

FRIDAY, April 19.—The supplies of meat on sale here are large. Beef, mutton, lamb, and pork move off slowly, at our quotations; but veal is firm in price.

Per 8lbs by the carcase.

	s	d	s	d		s	d	s	d

Large Pork	4	0	4	8	Lamb	5	8	6	8
Inferior mutton	3	6	3	10					

HOP MARKET.

BOROUGH, Monday, April 15.—Our market continues firm at the recent advance, and a fair amount of business is doing in the best qualities of yearlings and the last growth. In old hops the demand has not been so well supported. Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 168s; Sussex, 60s, 80s, 126s; Yearlings, 110s, 135s, 180s.

FRIDAY, April 19.—We have to report a good demand for fine yearling and old hops, and fine samples of last year's growth command more attention. For these, somewhat improved rates have been realised. Other kinds rule steady in price.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, April 15.—During the past week the arrivals coastwise and by rail have been more plentiful, and the prices of the former week barely maintained. The following are this day's quotations:—Yorkshire Flukes, 130s to 140s; Lincolnshire Regents, 100s to 110s; Dunbar red soil ditto, 140s to 160s; North Berwick, 120s to 130s; Perth, Forfar, and Fife ditto, 100s to 115s; ditto, ditto, ditto Rocks, 85s to 95s; ditto ditto, ditto Reds, 75s to 85s; French Whites, 60s to 90s; Belgian ditto, 75s to 80s; Dutch ditto, 60s to 80s per ton.

BOROUGH AND SPITALFIELDS, April 18.—Somewhat increased supplies of potatoes have been on sale here, and the trade, generally, has ruled inactive at about previous quotations. York Flukes are quoted at 130s to 130s; Scotch Regents, 100s to 130s; and Dunbar Regents, 150s to 170s per ton.

COAL MARKET.

FRIDAY, April 19.—Wall's-end:—Tees 18s 3d—Braddyl's Hetton 17s 3d—South Hartlepool 16s 9d—Eden Main 17s—Gosforth 16s 3d—Riddell's 16s 3d—South Durham 16s 3d—Harton 16s 3d—Framwellgate 16s 3d—Tanfield Moor Butes 13s 3d—Craghead 14s.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 16s to 2*l* 4s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 2s to 5*l* 8s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 18s to 2*l* 4s per load. Trade steady.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 18s; and straw, 1*l* 15s to 2*l* 4s per load. Supply moderate.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 19.—We have a fair business doing this week at current rates. Stocks continue very light, except of East India wools, which as usual are reserved for public sale, the second series of which will take place on the 30th inst., and following days, when about 6,000 B. E. India and some other low wools will be brought forward. The former quantity may be increased by arrivals in the meantime.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 19.—Since Tuesday the trade has been in a rather languid state, and purchases being restricted to retail quantities for present use, there is scarcely any variation to report in prices of Indian corn, wheat, or flour. Oats and oatmeal quiet.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 19.—The market for manufactured iron continues quiet, and prices remain without change. Scotch pig iron is slightly higher, with more business doing. For copper there has been less inquiry during the past week. Tin plates have decidedly improved, and there has been more doing in spelter. Lead is comparatively neglected.

The Gazette.

TUESDAY, April 16.

BANKRUPTS.

W. A. Putnam, New Oxford street, glass dealer.
I. and M. T. Levitt, Minories, chronometer manufacturers.
E. T. N. Jenkins, Victoria park square, Bethnal green, cigar manufacturer.
W. H. Hamburgh, High street, Poplar, upholsterer.
J. Cowderoy, Peckham, innkeeper.
R. K. Boorman, Marden, Kent, cattle dealer.
E. Rae, Eastcheap, commission agent.
E. Breeze, Kingswinford, Staffordshire, grocer.
H. C. Chown, Sheffield, shoe dealer.
J. Duffield and W. R. Dauber, Sheffield, grocers.
S. Greenhalgh, Bury, confectioner.
J. Mills, Royton, near Oldham, Lancashire, cotton manufacturer.

SCOTCH SEQUESTRATIONS.

T. Seaton, Musselburgh, hat manufacturer.
A. Hill, Edinburgh, wood carver.
J. M. Watson, Edinburgh, engineer.
J. Lochead, Ardrishaig, Argyleshire, merchant.
J. Gunion, Glasgow, cheesemonger.
P. and A. Copeland, Newtyle, Forfarshire, general merchants.

GAZETTE OF LAST NIGHT.

BANKRUPTS.

W. Parsons, draper, Brill, Bucks.
H. Freeman, merchant, Leadenhall street.
T. Parkinson, stockbroker, Halifax, Yorkshire.
C. R. Pettit, corn dealer, Marlborough.
A. C. Lewis, tailor, Bath.
W. Brain, grocer, Risca, Monmouthshire.
J. B. Gough, timber merchant, Liverpool road, Islington.
E. R. Gilbert, mantle manufacturer, Cripplegate buildings.
L. Beghin, merchant, St Mary-at-Hill, City.
F. W. Adams, carver and gilder, King street, Covent garden.
J. Tallis, printer and publisher, Strand.
S. Lyon, cabinetmaker, Frederick's place, Hampstead road.
W. T. Hemming, bill broker and scrivener, Old Broad street, City.
T. Digby, tailor, Ottery Saint Mary, Devonshire.
G. G. M'Kay, ships' stores dealer, Liverpool.
E. Copeland, widow, grocer and druggist, Cambridge.
J. Piper, wine merchant, Pimlico.
J. Mills, builder and timber dealer, Stratford-upon-Avon.

COVENT GARDEN.—The performances of the Royal Italian Opera Company at this theatre present no striking feature from previous seasons. The usual good management continues to prevail; and, on several occasions, as, for instance, at the performance of "La Favorita" on Tuesday last, there has been considerable applause.

The 12 leading railway systems all show an advance of traffic during the quarter ending the 31st ult.; but the increase in some cases has been comparatively trifling, and has probably scarcely kept pace with the growth of capital. The London and North-Western advanced from 961,288*l* to 974,452*l*, showing an increase of 13,164*l*, or 1.38 per cent.; the Midland, from 473,794*l* to 490,173*l*, showing an increase of 16,379*l* or 3.45 per cent.; the North-Eastern, from 441,710*l* to 462,037*l*, showing an increase of 20,327*l*, or 4.60 per cent.; the Great Western, from 440,774*l* to 456,599*l*, showing an increase of 15,825*l*, or 3.59 per cent.; the Lancashire and Yorkshire, from 430,135*l* to 448,092*l*, or 4 10 per cent.; the Great Northern, from 315,567*l* to 324,227*l*, showing an increase of 8,660*l*, or 2.74 per cent.; the Eastern Counties, from 299,363*l* to 300,001*l*, showing an increase of 638*l*, or 0.21 per cent.; the London and South-Western, from 183,177*l* to 199,039*l*, showing an increase of 15,862*l*, or 7.92 per cent.; the London, Brighton, and South Coast, from 155,258*l* to 170,459*l*, showing an increase of 15,201*l*, or 9.79 per cent.; the South-Eastern, from 144,567*l* to 154,268*l*, showing an increase of 9,701*l*, or 6.71 per cent.; the Manchester, Sheffield, and Lincolnshire, from 141,048*l* to 143,799*l*, showing an increase of 2,751*l*, or 1.95 per cent.; and the Caledonian, from 117,118*l* to 125,735*l*, showing an increase of 8,617*l*, or 7.36 per cent. These figures sufficiently indicate the movement of traffic, without account being taken of lines, the earnings of which have not reached 100,000*l* in the quarter.

COMMERCIAL TIMES

Weekly Price Current.

☞ the prices in the following list are carefully revised every Friday afternoon, by an eminent house in each department.

LONDON, FRIDAY EVENING.

Add 5 per cent. to duties on pepper, tobacco, wines, and timber, deals, wood, &c., from British Possessions.

EPITOME OF RAILWAY NEWS.

GREAT SOUTHERN OF INDIA.—The directors state in their report that the engineer in chief anticipates that the line between Negapatam and Trivalore, 14½ miles, will be ready for opening in May, and the whole throughout to Trichinopoly in September. Notwithstanding the land was not obtained and the works not actively commenced until August, 1859, the railway will be completed and equipped in the space of two years. Shares to the amount of 155,000*l* have been converted into stock, and immediate steps will he taken to consolidate the remainder. The capital account showed that 416,142*l* had been received, and 381,861*l* expended, leaving a balance of 34,281*l*.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 6th of April amounted to 521,940*l*, and for the corresponding week of last year to 511,960*l*, showing an increase of 9,980*l*. The gross recepts of the eight railways having their termini in the metropolis amounted to 233,937*l*, and for the corresponding week of 1860 to 232,389*l*, showing an increase of 1,548*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, April 15.—The railway market was rather firmer at the opening, but afterwards became less steady. The closing quotations were generally the same as on Saturday. No alteration of importance occurred in colonial descriptions. In the foreign market Northern of France relapsed, while South Austrian and Lombardo-Venetian were firmer. In American railway securities a decline took place in the shares of the Illinois Central and New York and Erie. Mines were inactive, at about previous quotations.

TUESDAY, April 16.—The market opened without change, but subsequently improved, nearly all the leading stocks leaving off ¼ to ½ per cent. higher. There was, however, little business doing, and the daily transactions continued insignificant. No change of importance took place in the colonial market. Indian descriptions remained steady. In foreign railways another slight improvement occurred in South Austrian and Lombardo-Venetian shares. American securities continued firm. Mines were dull, and in several cases showed a reduction. United Mexican, however, were higher.

WEDNESDAY, April 17.—The market opened steadily, and in the afternoon improved with Consols. Compared with yesterday, the final quotations show an average rise of about ½ per cent. In the Colonial market Indian guaranteed descriptions were in better demand. Foreign railways were firm. No change of importance occurred in American railway securities. Mines were again in little demand, and in several cases a reduction took place.

THURSDAY, April 18.—The market advanced at the opening, but afterwards declined with Consols, and only partially recovered before the close. The general transactions were limited. In the Colonial market Grand Trunk of Canada and Atlantic and St. Lawrence advanced, the former leaving off at 20½ to 21. Foreign descriptions closed without alteration. Mines were in better demand, and in one or two cases an advance took place. United Mexican, however, relapsed.

FRIDAY, April 19.—The railway share market this morning was firm. A little dulness, however, was observable towards the close of business, but without leading to any material change in prices. Lombardo-Venetian railway shares were steady, at 1¾ to 1⅞ dis. The late improvement in the two principal Canadian lines was supported. Mining shares ruled steady.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil services examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

KEATING'S COD LIVER OIL. Just Imported. The Pale from Newfoundland, and he Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within he reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure. at 79 St Paul's Churchyard.

Free for four stamps,

ELECTRICITY AND ITS WONDERS in conjunction with the newly-discovered ELECTRO MEDICATED BATH, which can be prepared and applied by "the Invalid," for the safe, speedy, and effectual cure of sexual and generative disorders, spermatorrhœa, and all nervous diseases. Translated from the French by an English Practitioner for the benefit of the British Public. "A new and wonderful discovery, amply proving that many persons, in certain cases, can cure themselves without the aid of the Physician or his usual adjuncts."—MEDICAL REVIEW. Free for four stamps by Dr WATSON, U.S., F.R.A.S., No. 27 Alfred place, Bedford square, London. Daily consultations from 11 till 2 and 6 till 8.

HOLLOWAY'S OINTMENT AND PILLS.—*Disfigurements* removed.—From the quickened action of the heart in spring, conjoined with variable temperatures, many affections of the skin are now prevalent, such as boils, *pimples*, tumours, blotches, &c. In treating such complaints "cosmetics" are worse than useless; the only rational mode of cure consists in subduing the local disease, whilst the impurities producing it are expelled from the blood and glandular system. Holloway's Ointment ensures the former object, whilst his Pills promote most perfect depuration of blood, glands, absorbents, and capillaries. The humours being thus expelled, continuance in the same course benefits digestion, and the complexion assumes a wholesome clearness and transparency, quite irreconcileable with the idea of depraved or suspended action.

CURE OF CHRONIC COUGH, by DR LOCOCK'S PULMONIC WAFERS.—From Mr Smedley, Bookseller, Sleaford. "Gentlemen,—I can speak with confidence, particularly of the Pulmonic Wafers, with which I have not only been relieved, but cured of a Chronic Winter Cough. Hundreds of boxes I have sold, and still the sale is as great as ever. Signed, J. SMEDLEY." Dr Locock's Pulmonic Wafers give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. To Singers and Public Speakers they are invaluable for clearing and strengthening the voice; they have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all medicine vendors.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

CHIMNEY-PIECES, TOMBS, MONUMENTS, FONTS, &c.—EDWARDES BROTHERS and BURKE, 17 Newman street, Oxford street, London, W., beg to inform the nobility and gentry that they manufacture at their own establishments, in Italy and Belgium, as well as at the above address, every description of marble work, at the lowest possible prices. Their galleries contain specimens of all foreign and British marble quarried, in Chimney Pieces, from 25s to 300 guineas each; MONUMENTS AND TABLETS, from £5; Head and Foot Stones, from 30s each.—Sole agents to the Invernettie Granite Company.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the GLENFIELD STARCH, we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

DR DE JONGH'S (Knight of the Order of Leopold of Belgium) LIGHT-BROWN COD LIVER OIL, pronounced by the most eminent Medical Men throughout the world to be incomparably superior to all other kinds.

CONSUMPTION.

The investigations of the most experienced pathologists have conclusively proved that Dr de Jongh's Oil is unequalled as a remedy for Consumption, and that no other Oil can possibly produce the same salutary results. ALLEN G. CHATTAWAY, Esq., the eminent Surgeon to the Leominster Infirmary, writes:—"Having for some years extensively used Dr de Jongh's Light-Brown Cod Liver Oil, both in public and private practice, in the treatment of consumption, I have no hesitation in stating that its effects are very far superior to those of any other Cod Liver Oil."

GENERAL DEBILITY.

In cases of General Debility, the restorative powers of Dr de Jongh's Light-Brown Cod Liver Oil have been remarkably manifested, and it has been resorted to with the most beneficial effects, after the whole range of ordinary tonics had been in vain exhausted. BENJAMIN CLARKE, Esq., M.R.C.S., F.L.S., in testifying to its extraordinary efficacy in his own case, observes:—"Having myself taken both the Pale Oil and Dr de Jongh's Light-Brown Oil for Debility, I am able, from my own experience, to remark upon their effects and comparative usefulness as remedial agents. After the Pale Oil, and all other remedies that I could think of had failed, I tried, merely as a last resort, Dr de Jongh's Light-Brown Oil; I received immediate relief, and its use was the means of my restoration to health."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES, ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

RUPTURES—BY ROYAL LETTERS PATENT

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 2s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

CHUBB'S PATENT SAFES—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

DR CURTIS'S MEDICAL WORK. "MANHOOD."

An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills"—TIMES.

Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.

London: J. Churchill, and to be had of all booksellers.

MEDICAL CONSULTATIONS.—Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,

37 BEDFORD SQUARE, LONDON.

Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.

These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.

Dr L. La'Mert may be consulted in Glasgow until the 31st March, at 56 Rosebank terrace, St George's road.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

FINE TEA CHEAPER.

STRACHAN & CO.'S justly celebrated DRAWING ROOM TEA is now reduced to 4s per lb. Guaranteed the finest and Cheapest Tea in the United Kingdom.

26 Cornhill, London, E.C.

TRADE S/P MARK.

BROWN AND POLSON'S

PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark, and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

---

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

FURNITURE CARRIAGE FREE.—Clergymen about to Furnish are most respectfully informed that RICHARD LOADER and Co. have just published an entirely new and elegant "Illustrated Furnishing Guide," comprising 216 well-executed designs of Cabinet and Upholstery Furniture, Iron Bedsteads, &c., which guide they will be happy to forward on application to intended purchasers, Gratis and Postage Free. This valuable Pamphlet also contains an estimate for completely furnishing a moderate-sized Parsonage House, which, it is hoped, may be found of much service to those desiring such assistance. Every article warranted for twelve months, and exchanged if found defective. All orders are Delivered Carriage Free to any part of the United Kingdom.

RICHARD LOADER and Co, Manufacturing Cabinet-Makers, Carpet Warehousmen, and General House Furnishers, 23 and 24 Pavement, Finsbury, London, E.C.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

VOLUNTEER PIPE.—RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

OVERLAND ROUTE.—COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

THE LANDS IMPROVEMENT COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any publicor general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

COLLARD AND COLLARD'S NEW WEST-END ESTABLISHMENT, 16 GROSVENOR STREET, BOND STREET, where all communications are to be addressed. Pianofortes of all Classes for Sale and Hire.

With power to add to their number.

The attention of the Public is earnestly requested to the following facts:—

"The Committee have the pleasure to announce that they have already remitted £50,000 to India for distribution through the local authorities of the districts most urgently requiring relief. An impression is said to prevail that the distress is only temporary; the Committee, however, feel it their duty to inform the public that no permanent relief can be locally obtained until October or November, by which time it is hoped that the autumnal rains will, to some extent, have mitigated the evil.

"At a meeting of the Committee, held on the 12th inst., Sir John Lawrence, Sir Charles Trevelyan, Lord Harris, and many other important Indian authorities, bore testimony to the fact that the population of the districts afflicted is at least ten millions; whilst two millions are literally starving, and have nothing but the hand or charity between them and death. It was further stated that the Government were fully alive to the exigences of the case, and had given instructions for the employment of all persons able to work, but that thousands were so broken down by starvation that they must be supported by the Central Relief Committees, and that as those bodies were only able to distribute food to applicants, a very large field was open for the flow of private charity.

"By the last mail, intelligence was received that th famine was expected to extend, and as the area wil thereby be considerably enlarged so should the contributions of the benevolent be proportionately increased. Nothing is so likely to break down caste and uproot native prejudices as our affording to the people of India the assistance they now so urgently need, and it is hoped, that under the Divine blessing, a path will be opened up to enable our Missionaries more effectually to preach the Gospel when they can demonstrate that we have carried out the Christian principle of "Doing to others as we would be done by." The Committee, therefore, feel called upon to impress strongly on the public, the absolute necessity of not relaxing for some time to come the efforts which are being made to arrest the fearful scourge now raging in India.

A statement of the facts will be forwarded upon application to the Honorary Secretaries.

Subscriptions may be remitted direct to the Mansion House, or through any banker in the United Kingdom, to the credit of the Indian Famine Relief Fund with the Bank of England.

The Committee gratefully acknowledge the receipt of several church and chapel collections, and trust that all clergymen and nonconformist ministers will aid the movement by preaching sermons in behalf of the fund; and thus demonstrate to our Indian fellow-subjects that difference in creed does not prevent the flow of Christian charity.

The next mail will leave for Calcutta on the 26th inst., when all sums received to that date will be remitted.

The General Committee will meet at the Mansion House on the first Friday in every month.

The Sub-Committee meets every Marseilles mail day (the 3d, 10th, 18th, and 26th of each month), at the Mansion House, at 3 o'clock.

The efforts of the Committee have received the Royal Sanction. The Nobility, Merchants, and Public generally, have responded nobly to the appeal which has been made; but so gigantic is the crisis, that continued and united efforts must be made, or thousands of our fellow-creatures must miserably perish under the most deplorable and heart-rending circumstances.

INDIA OFFICE, 4th April, 1861.

THE SECRETARY OF STATE FOR INDIA in COUNCIL hereby gives Notice that he has received from the Government of Bengal the undermentioned schedules, viz.:—

A. Schedule of all Administrations whereof the final balances have been paid to the parties entitled to receive, specifying the amount of such balances, and the persons to whom paid, during the six months ending on 30th June, 1860.

B. Schedule of all sums of money, bonds, and other securities received by the Administrator-General, on account of current and unadjusted estates, not being Hindoo or Mahomedan, remaining under his charge, together with the payments made thereout and the balances in hand.

C. Schedule of all sums of money, bonds, and other securities received by the Administrator-General, on account of adjusted estates, not being Hindoo or Mahomedan, remaining under his charge, together with the payments made thereout and the balances in hand.

D. Schedule of all sums of money, bonds, and other securities received by the Administrator-General, on account of Hindoo and Mahomedan estates remaining under his charge, together with the payments made thereout and the balances in hand.

E. Schedule of balances in the hands of the Administrator-General, set apart to meet the admitted claims of creditors against the estates therein mentioned.

F. Schedule of unclaimed balances of estates under 500 rupees, deposited with the Sub-Treasurer, Fort William, under the Financial Secretary's Letter of the 8th Oct., 1852, interest being allowed thereon by Government.

And that the said schedules are open to the inspection of the public in the Department of the Official Agent to the Administrators-General at this Office.

ARMY CONTRACTS.—

Tenders will be received at this office, until noon on the 1st day of May, from persons who may be willing to enter into Contracts to supply BREAD and MEAT, in such quantities as may be required for the use of Her Majesty's Land Forces stationed in the following places, from 1st June to 30th November, 1861.

1. Brompton House, Hyde Park, and Kensington.
2. Regent's Park, St. John's Wood, and Portman Street Barracks.
3. Wellington Barracks, Horse Guards, Buckingham Palace, and St. George's Barracks.
4. Tower, Bethnal Green, Finsbury, and Hackney.
5. Hounslow and Kneller Hall.
6. Hampton Court.
7. Windsor.
8. Brighton, with Coast Forts from Newhaven to Shoreham.
9. Croydon.
10. Sandhurst.

Separate tenders for Bread, and for Meat, must be made for each of the above-mentioned stations or barracks as separately grouped and numbered.

Forms of tender, and conditions of contract, may be obtained on application at this office, by letter or in person, between the hours of 10 and 4 o'clock.

Tenders on the printed forms must be properly filled up and signed and delivered at the under-mentioned office, under closed envelope (marked on the outside, "Tender for Commissariat Supplies,") before noon on the 1st May next.

W. T. POWER, Deputy Commissary-General.
Deputy Commissary-General's Office, 6 New street, Spring gardens, London, S.W., 1st April, 1861.

SUBMARINE TELEGRAPH COMPANY.

DEBENTURES.—The Directors give notice that they will receive applications for the remaining portion of the proposed issue of £70,000 Debentures, one-half of the amount having been subscribed by the shareholders. The debentures bear interest at 7 per cent. per annum for five years, but are redeemable at the option of the Company at three years.

The Company now possesses 6 separate Submarine lines connecting "Great Britain and the Continent of Europe, containing 22 wires." The income of the Company averages £40,000 per annum.

These debentures form the first charge on the revenue; they are issued in sums of £50 and upwards. Further information will be afforded by the Secretary, at 58 Threadneedle street, or by Messrs Foster and Braithwaite, 63 Old Broad street.

L. WALTER COURTENAY, Secretary.

MONEY UPON MORTGAGE or OTHERWISE.—£183,000 at a reasonable rate of interest, in different sums, for a term of years to be agreed upon. Also some smaller sums upon approved personal securities; Farming Stock, Post Obit Bonds, Bills of Sale, Deposit of Deeds, Machinery; or money advanced upon the personal security of Noblemen, Clergymen, Gentlemen, Officers in the Army and Navy, or responsible Tradesmen.—Apply to Mr Chambers, Solicitor, Percy Chambers, Percy street, Bedford square London.

N.B. None but principals or their Solicitors treated with.

FIVE PER CENT. PREFERENCE SHARES.—The Directors of the Dublin, Wicklow, and Wexford Railway Company are ready to receive APPLICATIONS for the FIVE PER CENT. PREFERENCE SHARES of the Company now in course of issue under the Gorey and Enniscorthy Extension Acts, redeemable at the option of the holder in 1868, and the interest meanwhile secured on the existing lines and the whole undertaking of the Company.—Application to be made to the Secretary, 48 Westland row, Dublin, where any requsite information and the necessary form can be obtained.

ARTHUR MOORE, Secretary.
48 Westland row, Dublin, March 22, 1861.

SWEDISH PROVINCIAL MORTGAGE LOAN for £450,000 Sterling, negotiated in 1852 by Messrs Palmer, Mackillop, Dent, and Co., and Messrs Charles Tottie and Sons.—Notice is hereby given, that in conformity with the Stipulations of the Contract of the said Loan, providing for the liquidation of the same, there were this day drawn by lot, in the presence of William Tottie, Esq., his Swedish and Norwegian Majesty's Vice-Consul, William Webb Venn, public notary, and two witnesses, the undermentioned Sixteen Bonds of the said Loan, amounting to the sum of £3,000 sterling, to be paid off at par, on the 1st of June next, viz.:—

2 Bonds, A, Nos. 107, 300	of £400 each,	£800	
3 Bonds, B, Nos. 22, 204, 455	£300 —	900	
3 Bonds, C, Nos. 289, 388, 420	£200 —	600	
6 Bonds, D, Nos. 95, 103, 151, 286, 302, 433	£100 —	600	
2 Bonds, E, Nos. 71, 140	£50 —	100	
		£3,000	

And the Gothenburg Mortgage Association do hereby inform the holders of the said bonds, that they will be prepared to pay off the same at par upon the presentation on that day, or any succeeding day (except Saturday), at the counting house of their agents, Messrs Dent, Palmer, and Co., 14 King's Arms yard, Moorgate street, London.—April 17, 1861.

PUBLIC NOTICE.

CONSOLIDATED MUNICIPAL LOAN FUND of UPPER and LOWER CANADA.

Whereas the Revenues of the Consolidated Municipal Loan Funds of Upper and Lower Canada are insufficient to meet the annual interest upon the Debentures issued and expressly secured upon the said Funds; and whereas very large advances have been already made from the general revenue of the province in aid of the said funds; and whereas in view of the inadequacy of the said funds to meet the annual charges upon them; the Government has been authorised to redeem the said Debentures, but no provision has been made for further advances from the general revenue for the interest upon the said Debentures—

Public Notice is hereby given, that from and after the payment of the half-yearly interest due 31st December, 1860, NO FURTHER PAYMENT will be MADE upon the BONDS issued upon the Consolidated Municipal Loan Funds of Upper Canada and of Lower Canada, except from the revenues of the said funds. Holders of the said Bonds are informed that the Government of Canada is prepared to redeem the said debentures in full at par, on presentation thereof to the Receiver-General of Canada, or to the Financial Agents in London, Messrs Baring Brothers and Co., and Messrs Glyn, Mills, and Co., after the 1st January, 1861; and interest will be allowed on the said debentures at the rate of 5 per cent. per annum, until their presentation for redemption; provided such presentation takes place within the year ending 31st December, 1861.

Receiver-General's Office, Quebec, Dec. 31, 1860.

T. D. HARINGTON, D.R.G.

Messrs Baring Brothers and Co., and Glyn, Mills, and Co., financial agents of Canada, are instructed to publish the foregoing Notice, and to state in explanation that they are perpared to pay at par, with interest at the rate of 5 per cent. per annum from 1st January last to date of payment, the Canadian Municipal Loan Fund Sterling Bonds, of which the dividends were made payable at their respective offices by the Government of Canada; and that the other Municipal Loan Fund Bonds, whether in sterling or in Canadian currency, will be paid on presentation at the office of the Receiver-General of Canada in Quebec.

London, April 16, 1861.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

Capital paid up, 500,000l.

73 Cornhill, E.C. HENRY MOULES, Secretary.

SOUTH AUSTRALIAN BANKING COMPANY.

—Incorporated by Royal Charter, 1847.—Letters of Credit and Bills issued upon Adelaide, Port Adelaide, Gawler, and Robe. Approved Drafts negotiated and sent for collection.

Every description of Banking business conducted with Victoria and New South Wales, through the Company's Agents. WILLIAM PURDY, Manager.

54 Old Broad street, E.C.

LONDON CHARTERED BANK OF AUSTRALIA.

Incorporated by Royal Charter.

Paid-up capital, £750,000.

CHAIRMAN—Duncan Dunbar, Esq.

DEPUTY-CHAIRMAN—William Fane De Salis, Esq.

Offices, 17 Cannon street, E.C.

Letters of Credit and Bills of Exchange are granted on the Branches of this Bank at Sydney, Melbourne, Geelong, Ararat, Ballaarat, Dunolly, Maryborough, Back Creek, Lamplough, and Inglewood.

Drafts on the Australian Colonies negotiated and sent for collection.—By order of the Court,

JAMES STRACHAN, Secretary.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.

Paid-up capital, £1,260,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, not falling below 2 per cent. nor rising above 5 per cent. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.

Threadneedle street, London, March 23, 1860.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA.

Incorporated by Royal Charter.

Paid-up capital, £500,000. Reserve fund, £50,000.

COURT OF DIRECTORS, 1860-61.

William Howard, Esq., Chairman.
Donald Larnach, Esq.
William Sollory Grey, Esq.
George Garden Nicol, Esq.
George Palmer Robinson, Esq.
George May, Esq.
Alexander Anderson, Esq., Chief Manager.
David Trail Robertson, Esq., Inspector and General Manager.

The Bank negotiates and collects Bills and grant Drafts payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Penang, Hong Kong, Shanghai, and Mauritius; issues Letters of Credit, and Circular Notes for the use of Travellers by the Overland route, terms for which can be ascertained at the Head-office in London.

The Bank will effect the purchase or sale of Indian Securities; undertake the safe custody of same, and the receipt of Interest, Dividends, Pay, Pensions, and other Moneys, for remittance through the Bank or otherwise.

The Bank receives Money on Deposit, on which Interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head office, 52 Threadneedle street, London.

Office hours, 10 to 3; Saturdays, 10 to 2.

BANK OF NEW SOUTH WALES

They also negotiate approved Drafts on the Australian Colonies, forward Bills for Collection, and transact every description of banking business with Australia, on the most favourable terms, through the above-named establishments of the Bank in New South Wales, and its agents in Victoria, South Australia, and Tasmania.

EDWIN BRETT, Manager.

No. 33 Cornhill, London, E.C.,

VICTORIA, AUSTRALIA.

—The Committee of the Six Associated Australian Banks have received instructions from the Government of Victoria to publish the following Notice:—

GEELONG AND MELBOURNE RAILWAY.

DEBENTURES.

It is hereby Notified, for the information of the Holders of the Bonds issued by the late Geelong and Melbourne Railway Company and the public generally, that in accordance with Act 23 Vic., No. 96, the line of Railway has been transferred to the Victorian Government, and that under the Act alluded to, the liability as to the payment of the principal and interest of the Bonds issued by the late Company has devolved on the Government, who will continue to afford to the holders of these securities the usual facilities for transfer,

GEORGE VERDON, Treasurer.

Treasury, Melbourne, 22nd February, 1861.

The Committee have to announce that in accordance with the above Notice they have made arrangements for the Registration of the outstanding Debentures of the late Geelong and Melbourne Railway Company at the London and Westminster Bank, Lothbury, where transfers of the Debentures will be received and registered on and after this date.

For the Bank of New South Wales, D. Larnach, Chairman of Committee.

For the Bank of Australasia, D. Q. Henriques.

For the Union Bank of Australia, J. J. Cummins.

For the Bank of Victoria, J. Matheson.

For the London and Chartered Bank of Australia, D. Dunbar.

For the Colonial Bank of Australasia by their agents the London Joint Stock Bank, W. J. Lancaster.

London, 20th April, 1861.

Tenders may be delivered in, as above, on or before the 17th May.—By order of the Council,

H. HALL DARE, Secretary.

UNIVERSAL PRIVATE TELEGRAPH COMPANY (Limited).

The Terms for use of the Company's Wires are £4 per mile per annum, including maintenance. Wheatstone's Alphabetical Instruments, requiring no battery, can either be purchased or rented. Private lines erected.

L. C. HERTSLET, Secretary.

3 Hanover square, W.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par, in sums of not less than £50.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years, from the 15th December, 1860, transferable by endorsement without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, April 9, 1861.

EAST INDIAN RAILWAY COMPANY.

Notice is hereby given, that the Fourteenth Annual General Meeting of the East Indian Railway Company will be held at the London Tavern, Bishopsgate street, on Tuesday, the 30th day of April, 1861, at One o'clock precisely, in conformity with the terms of the Company's deed of settlement; and

Notice is hereby further given, that an Extraordinary General Meeting of the Proprietors of the East Indian Railway Company will be held at the London Tavern, Bishopsgate street, in the City of London, on the 30th day of April, so soon as the business of the Ordinary General Meeting shall have been transacted, for the purpose of considering, and, if deemed advisable, of passing resolutions for increasing the capital of the Company, by the creation of new shares to such an amount as shall be then determined. And also for the purpose of determining upon the allotment, issue, sale, and disposition of the shares so to be created.

The Transfer Books of the Company will be closed from the 17th to the 30th day of April, both days inclusive.—By order of the Board;

D. I. NOAD, Secretary.

East Indian Railway House, London, April 9, 1861.

GREAT INDIAN PENINSULA RAILWAY COMPANY.

—Notice is hereby given, that in pursuance of a resolution of the Board of Directors, the Shareholders of this Company, holding shares upon which £8 per share have been already called up, are required to pay a further Call of £2 per share upon each such share (making £10 per share), on or before the 29th day of April inst., at the London and County Bank, South Sea House, Threadneedle street, London; and if such call be not paid on or before the said 29th day of April, the holders of the shares will not be entitled to receive interest upon any portion of their shares so long as such call shall remain unpaid, but will nevertheless be chargeable with interest upon the arrears, at the rate of 5 per cent. per annum, and the shares will become liable to forfeiture under "The Companies Clauses Consolidation Act, 1845."

A letter for the payment of the call will be forwarded to each Shareholder.

N.B. The option of paying in full (the remaining £10 per share) upon any portion of their shares is continued to the Shareholders. A letter authorising the bankers to receive the payment may be obtained on application at this office. THOMAS R. WATT, Secretary.

3 New Broad street, E.C., London, April 2, 1861.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the amount which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, of converting them into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company —By order of the Board,

JAMES WALKER, Managing Director.

WINE TRADE—TO BE DISPOSED of, an Old-established Wine Merchant's Business in a Midland county, embracing connections in ten of the surrounding counties. The business is good and capable of much extension, and, being of undoubted respectability, offers an excellent opening to any person with capital desirous of entering the Wholesale Wine Trade. Every information may be obtained by applying in the first instance, by letter only, to A. W., care of Messrs Nissen and Parker, 43 Mark lane, E.C.

Her Majesty's Royal Forests.—Oak Bark.—For Sale, about 2,277 Tons of Timber and Flittern Bark, situate in Delamere Forest, Cheshire; Hazleborough Wood, and Salcey Forest, Northamptonshire; Dean and High Meadow Forests, Gloucestershire: Alice Holt Forest, Bere, Parkhurst, and the New Forests, in Hampshire; and Windsor Park and Forest, Berkshire.

MESSRS DRIVER HAVE BEEN honoured with instructions from the Hon. J. K. Howard, the Commissioner in charge of Her Majesty's Woods and Royal Forests, to SELL by AUCTION, at the Mart, London, on Friday, the 17th of May, at Twelve for One precisely, the BARK in the above Forests, and which will be sold as standing at the Pole, with the exception of a portion thereof, which is some of the produce of last year, and is stacked. The bark is now being stripped, and will be divided into Lots, and will contain in the whole about 210 tons in Delamere Forest, 40 tons in Hazleborough Forest, 83 tons in Salcey Forest, 718 tons in Dean Forest, 216 tons in High Meadow, 25 tons in Alice Holt Forest, 95 tons in Bere Forest, 30 tons in Parkhurst Forest, 785 tons in the New Forest, and 75 tons in Windsor Park and Forest. Samples will be on view at the offices of the Auctioneers, and at the Auction Mart, London. The bark in Delamere, Salcey, and Hazleborough Forests may be inspected and catalogues obtained on application to Mr Thomas Linnell, deputy surveyor, Eddesbury Lodge, Delamere Forest; that in Dean and High Meadow Forests on application to Sir James Campbell, Whitemead Park, Coleford; that in Alice Holt, Bere, and Parkhurst Forests on application to Mr N Higginbotham, Holt Lodge, Farnham; that in the New Forest on application to Mr L. H. Cumberbatch, Queen's House, Lyndhurst; and that at Windsor on application to Mr Wm. Menzies, Parkside, Englefield Green, Staines.—Catalogues may also be had at the office of Woods and Royal Forests, 2 Whitehall place; at the Auction Mart, London; of Messrs Clutton, 9 Whitehall place; and of Messrs Driver, surveyors, land agents, and auctioneers, 5 Whitehall, S.W.

THE "TIMES," £1 1s per QUARTER free by post, by the Mail of the evening of the day of publication. References as to regularity of supply to Clergymen and Gentlemen in all parts of England. Magazines, Periodicals, and all London Newspapers supplied to order by W. ABBOTT, Newspaper and Advertisement Agent, 7 Little Tower street, London, E.C.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.

HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery

THE CITY TURKISH BATHS,
5 SOUTH STREET, FINSBURY.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

PROSPECTUS.

LIVERPOOL AND NEW ORLEANS STEAM NAVIGATION COMPANY (Limited).

Capital £200,000, in 4,000 Shares of £50 each, with power to increase to £500,000, should it hereafter be deemed desirable.

Deposit £5 per share, to accompany the application, to be returned in full if the Company is not established; a call of £10 per share to be made about three months subsequently. No call to exceed £10, and a period of at least three months to elapse between each call.

About one-third of the capital requisite to start the undertaking is already subscribed; and amongst other firms of the highest respectability, the following gentlemen have agreed to take stock, and assist in the management of the Company:—

Messrs Joshua Scholefield, Sons, and Goodman, Birmingham.

Charles Holland, Esq., Deputy Chairman of St Helens Canal and Railway Company, Director of Demerara Railway Company.

Messrs Hoghton, Rankin, and Co., New Orleans.

Charles Robertson, Esq., Merchant, Liverpool.

Francis Boult, Esq., (Boult, English, and Brandon,) Liverpool.

Other names of high standing will be added shortly.

HONORARY SECRETARY; pro tem.

James Samuelson, Esq., 18 Dale street, Liverpool.

BANKERS.

Liverpool—Union Bank.

London—Messrs Barnett, Hoares, and Co.

SOLICITORS.

Liverpool—Mesars J. and E. Whitley and Thompson.

Application for shares (as per annexed form) to be made to Messrs T. Tinley and Sons, sharebrokers, Liverpool; Messrs Huggins and Rowsell, sharebrokers, 1 Threadneedle street, London; Messrs Shore and Kirk, sharebrokers, Manchester; and Mr John Perry, sharebroker, Waterloo street, Birmingham.

Long before the secession of the Confederate States, it was a matter of surprise to the commercial world that amongst the various lines of Atlantic Steam Communication, there should not have been one established between Liverpool and New Orleans, and that the extensive traffic in the produce of the great Mississippi valley, carried on between the American ports of shipment and their European emporium, should be either still confined to sailing ships, or diverted into costly, circuitous, and inconvenient channels.

It is obvious that this extraordinary omission must have been injurious alike to the commerce of both the aforesaid ports.

Whilst New Orleans is undeniably the point to which shipments of manufactured goods, for the supply of the large and increasing markets in the great cities on the Mississippi and its tributaries, should be directed, it is also becoming the entrepot for Texas, Mexico, and other districts on the Mexican Gulf.

Notwithstanding these facts, however, and although there has long existed in the Southern States a strong desire to establish direct commercial relations with Europe, and thus become independent of the Northern importers and manufacturers, yet a large portion of this valuable traffic has been, through the absence of direct steam conveyance, driven to New York and Boston, at a great loss, both of time and money, to all parties interested.

The foregoing observations apply with even more force to the passenger traffic. Large numbers of passengers are compelled every year to traverse the Atlantic to or from New York, at inclement seasons, and frequently at the cost of much suffering, whereas in passing to or from New Orleans, smooth seas and summer weather may be relied on for at least three-fourths of the voyage.

Superadded to these important considerations, the secession of the Southern States, and their liberal tariff as compared with that of the Northern States, will now render a direct Steam Communication absolutely indispensable, and, from numerous inquiries that have been instituted in New Orleans, it has been satisfactorily ascertained that an efficient line of steamers would there be welcomed, and that it would be generally and liberally supported, not only by the importers and dealers in European goods, but by exporters of American produce and the planters in the interior.

Under these circumstances, therefore, and with a view to provide partial accommodation for this large trade, already in existence, and which, it may with truth be affirmed, is capable of unlimited extension, it is proposed to establish, as soon as suitable vessels can be constructed, a monthly line of first-class steamers between New Orleans and Liverpool, to be hereafter increased in number as circumstances may require.

A careful calculation of the estimated receipts and expenditure of the proposed Company has been made by gentlemen who are in every way conversant with the state of the existing traffic and with the management of steam vessels, and the result, after making a liberal allowance for interest of capital, wear and tear, and all the usual contingencies, shows a dividend of about 12 per cent.; there is therefore no reason to doubt that with due care, punctuality, and fidelity, the undertaking will yield a most satisfactory return to the Shareholders.

N.B.—Coals of excellent quality are always obtainable at New Orleans at a moderate price.

FORM OF APPLICATION FOR SHARES.

No.

To the Directors of the Liverpool and New Orleans Steam Navigation Company (Limited).

GENTLEMEN,—Having paid to your Bankers, to your credit, the sum of £ being £5 per share on shares of the "Liverpool and New Orleans Steam Navigation Company (Limited)," I request you to allot me that number of shares, and I agree to accept the same, or any less number that may be allotted to me, and to pay all further calls when required to do so, in compliance with the Articles of the Company; or in default thereof that the deposit or any other payments made on account of such shares may be forfeited.

Name .....

Address .....

Profession or Business .....

Date .....

The above application may be sent to any of the Sharebrokers named upon the first page; or to

The Political Economist.

THE FINAL RESULT OF THE BUDGET OF 1860.

The debate on Mr Gladstone's Budget for this year offers little matter for remark. We have little to add to the very long article which we placed last week before our readers, and that little is scarcely worth adding. In Parliament the debate has been lame, because the Opposition does not desire to take office, and because the decisive reasons of very many Liberals are political rather than financial. We have on this occasion no intention to recur to a theme now almost exhausted, but we feel that there is another subject upon which our readers may properly and reasonably expect from us something more. That subject is the Budget of *last* year. What does experience teach us about it? We remember the enthusiasm with which that Budget was received in the spring; we remember the melancholy forebodings of the autumn:—what, then, is the last result?

In the public mind the verdict has been given substantially in favour of Mr Gladstone. Persons accurately conversant with financial subjects hold perhaps for the most part a more mixed opinion; but with the general mass of mankind, Mr Gladstone's most virulent enemies have proved, as happens so often, his very best friends. It was so frequently prophesied that his measures of last year would almost wholly destroy our indirect taxation, and inevitably entail hopeless financial confusion, that the peaceful calm of his present exposition seems in itself a perfect victory. Those who only slightly attend to finance—and these are the mass even of Englishmen—fancy that the anticipated 'surplus' of the ensuing year indicates a complete success and a corresponding surplus in the preceding year. It is not heeded that last year there was a deficit of two millions and a half; the unpleasant past is overlooked and forgotten in the expectation of a very pleasant future. How far, then, were the calculations of last year in error, and how far were they correct?

On the whole, we may say boldly that the actual results are substantially in accordance neither with the view of Mr Gladstone's extreme opponents, nor with that of his indiscriminate followers, but with the intermediate position which we assumed in this journal last year. We maintained that his proposals were intrinsically beneficial. We maintained that the provision for the service of the year was inadequate. What has been the result? Of the expenditure of last year, it is not necessary to say much. The original estimate of February, 1860, was necessarily altered, not only in its subordinate details, but in its most important details, by the China war. The actual result has considerably fallen short of the final anticipation, though, as there are corresponding outstanding claims upon us, the fortunate result is one rather of present figures than of permanent realities. Still, no Chancellor of the Exchequer can be expected to calculate a *war* expenditure with any attempt at precision; the multifarious events of a distant war might baffle the most far-sighted mind; and the *last* estimates of Mr Gladstone for the Chinese war are entitled to the warmest commendation for adequacy and completeness.

The true difficulty of Mr Gladstone's case is upon the opposite side of the account—upon the revenue side. Taking the supplementary Budget as well as the original (and being careful only to reckon as due within the *last* financial year, not the whole annual produce of the taxes imposed in the autumn, but only the fraction really expected to come in within the year), Mr Gladstone's calculations stood thus:—

	£	£
Revenue as per original Budget		70,564,000
Portion of paper duty which would have been taken off last year by the original Budget		1,000,000
Spirit duty Excise) as per Supplementary Budget		650,000
Spirit duty (Customs)		400,000
		72,614,000
Less the difference between taxes as first calculated	£896,000	
And do. as last calculated	590,000	306,000
(Many alterations having been made in the progress hrough the House)		
		*72,308,000

If we compare this with the facts, we have—

	£
Estimated revenue, as above	*72,308,000
Actual —	70,283,000
Difference	2,025,000.

and such a deficiency is undoubtedly a very serious matter. It has escaped public attention, at least has escaped popular ordinary attention, because it does not affect the future. A Chancellor of the Exchequer 'passes through the Court' once every year. With every new year he starts afresh. He may, as has now happened, reduce the balances of the Exchequer,—that is, pay 'working expenses' out of 'capital'; he may spend any casual money that comes in, which is another form of the same expedient; and he may augment the National Debt; and yet he may be in the popular judgment blameless. The next year's account may be one of competence and plenty.

But because there is a discrepancy between Mr Gladstone's expectation and the subsequent reality, it does not follow inevitably that he is to blame for it, and we are very far indeed from alleging that he is to blame for the whole of it. The whole actual circumstances must be taken into account. The year with which he had to deal was a very unfavourable one: what were the facts? In which branch of the revenue did the deficiency arise? Only a very trifling portion of it arose in the Customs.

	£
The estimate for the Customs was	23,430,000
The result	23,305,000
	125,000

* Mr Gladstone makes his estimate 72,248,000*l*, but we believe the difference lies in an immaterial discrepancy as to the minor taxes.

notwithstanding the many changes of last year—changes enough to baffle calculation. Mr Gladstone's calculation was substantially right—a striking fact, which, after every allowance, as he may well say, refutes many a hostile criticism and many a melancholy foreboding. Nor does any part of the deficiency arise in the direct taxes, the stamps and other miscellaneous sources of revenue. The true shortcoming is in the Excise, and it is thus divided:—

	£
Hops	300,000
Malt	800,000
Spirits	910,000
	2,010,000

Could this have been foreseen or not? Is it fairly chargeable on Mr Gladstone that he made this overestimate or is it not?

His first remark upon the subject is a very true one. He says that the Customs revenue has this year profited at the expense of the Excise. We have had to import corn (paying 366,000*l* of duty at a merely nominal rate); we have had to import sugar to use instead of malt, and foreign spirits to make up for the deficiency in English spirits, which, from the bad barley harvest, we could not as usual manufacture. But this observation only removes the numerical deficiency from one branch of revenue to another, and does not lessen its true amount.

Mr Gladstone shows, what is a lamentable indication of the times, that the ordinary consumption of tea, sugar, and tobacco does not this year show an habitual increase. The 'elasticity of the revenue' has, on this occasion, taken another and far less effectual form. It has given us an augmented nominal 'corn duty,' not an augmented, productive and substantial tea duty.

Mr Gladstone shows too, what is a great triumph for him even over his more moderate critics, that the wine duty has exceeded his estimate, and that the augmented imports of the country, putting corn out of the question, have been principally in the articles dealt with by last year's tariff,—though the importation of some of these, as cheese and butter, has been largely stimulated by the generally high price of provisions:—and these are grounds of satisfaction—just reasons for relying on Mr Gladstone in future.

The real objection to last year's Budget is, that it could only bear good times. No Budget which relies largely on the elasticity of the revenue, increase of consumption, or any other peculiarity of prosperity, can bear bad times. A revenue, calculated on the sanguine assumption of the continuance of a favourable and happy period, will not be realised in unfavourable, anxious, and disastrous times. Mr Gladstone should not, indeed, have calculated on a bad harvest; there was in February, 1860, no ground for that anticipation; but he should not have speculated on the bounty of the future. He should not have made the goodness of the ensuing harvest essential to the correctness of his estimate.

We entertain a strong opinion that it is not financially prudent to calculate year by year, and as a rule, on the elastic augmentation of our indirect revenue. We should wish to see, as an habitual principle, and except in peculiar cases, this supplementary resource used as an aid and a supplement to, and not as a primary element of, financial calculation. Every anticipation of ways and means is subject to many doubts. One set of calamities may prevent probable receipts. Another set may cause unlooked-for expenditure. We should like to see the ordinary and healthy augmentation of the national revenue kept in store as a reserve fund to meet such not improbable misfortunes; we should wish the contingent bounty of the future to be retained as a set-off against its contingent disasters.

On the whole, therefore, the conclusion as to the Budget of 1860 will remain, after the final result, very much where it was placed by the calmest and most reflective observers some few months since. It is not, as its enemies said, an irreparable calamity—a speedy forerunner of national bankruptcy; it is, as its friends alleged, a Budget of great and splendid benefits to the consumer, with a lasting title to fame as a measure of financial simplification, and as a final triumph of Free Trade. But it was defective in an essential ingredient; it was not a Budget in which the calculated revenue was clearly and indisputably adequate to the anticipated expenditure; it had, with merits which few imitators will have an opportunity of equalling, the very defect into which a mere copyist would be most sure to fall.

CIVIL WAR IN AMERICA AND THE ATTITUDE OF ENGLAND.

The fall of Fort Sumter must soon, we fear, if we may rely at all on the drift of the recent news, issue in civil war. The rumour that the Southern Confederation intends to anticipate an attack by moving upon Washington is scarcely likely to be true, for President Davis is too sagacious a man to take a step which would so enrage the North as to induce it to enter heart and soul into an internecine contest with the South. If he were wise, indeed, he would not have ventured any active collision at all, such as has taken place at Charleston. It would have been better to trust exclusively to blockade for the reduction of the Federal garrisons in the revolted States. The moral shock of any collision is most dangerous, as the accounts of the frantic excitement in Washington on the arrival of the news of the collision at Fort Sumter and the surrender of Major Anderson, sufficiently prove. It is true that American rage even at its highest pitch usually manages to stop short where policy would direct, and that we in England are exceedingly liable to be deceived by its effervescent symptoms. Still there is now the gravest reason to apprehend a serious civil war; indeed all the Free States seem already to have intimated to the President, through the telegraph, their readiness to support a War policy; and, if it is prevented at all, it will only be by the unwillingness of the Northern statesmen to risk the adhesion of the Border States by an actual invasion. But if the Southern States should, as is rumoured, be so foolish as to take the initiative by invading Washington, they would play directly into the hands of the extreme party in the North. All compunction would immediately be at an end, and in all probability the Border States would themselves be induced by such a step to fight with the North. The situation is very similar to the attitude of Austria and Sardinia. The neutrals will inevitably throw their influence into the scale of the party attacked. Mr Lincoln, as far as his own popularity and political position is concerned, can wish for nothing better than to be relieved by his antagonist of the responsibility of a decision. His difficulty has hitherto been, that the great power and wealth of the North has been passive, and reluctant to foment a fratricidal strife. But let once the Slaves States take the guilt upon themselves, as in some degree they have already done, and Mr Lincoln would find his hands strengthened and his cause enthusiastically supported by a power such as does not exist in the Southern States at all. We do not believe, then, in the reported invasion of Washington. A course so blind and insane is utterly inconsistent with the general ability shown by the Southern Government. But we do fear that the strife and defeat at Charleston will render it very difficult for Mr Lincoln, in the attitude in which he now stands, to evade some attempt at reprisal, and that thus a regular war may soon break out.

Under these grave circumstances it is that Mr Gregory proposes to ask the House of Commons on Tuesday next to affirm the expediency of an immediate recognition of the Southern Confederation. We can imagine no course more disgraceful to England, or less likely to command the assent of the popular body appealed to. Not that we desire to see a civil war in America, even though the North should be completely triumphant. We have often said that unless there were a Union party in the Southern States considerable enough to make some head even without external assistance, the defeat of the newly-confederated States by the North could scarcely lead to any good result. It would be mere military conquest; and a power like the American Union cannot hope to hold together its territory by military force. And seeing that there is, unhappily, but little trace of a powerful Unionist minority among the seceded States, we cannot wish to see a fratricidal strife which would multiply indefinitely the mutual hatreds of North and South without solving the ultimate difficulty. But this is not the question for us to consider. It has been England's universal rule to acknowledge a *de facto* revolutionary Government whenever it has established its practical independence by incontrovertible proofs,—then and not sooner. Whatever be the wisdom or folly

of the war which there is but too much reason to believe is now declarnd between the Federal Government at Washington and the revolted States,—it is not yet begun, or is only just beginning. There can be no question whatever of the constitutional right of President Lincoln to treat the hostile Confederation as a treasonable rebellion, which, so far as it trenches on Federal property and laws, he may resist by force. This is his present attitude. He hopes, however little we may hope, to suppress the rebellion. He thinks, however little we may think, that he shall be able to enforce the laws enacted at Washington, and to redeem the United States property from the hands of the seceders. This may be sanguine; nay, it may even be a mere hallucination. With that we have nothing to do. We profess always to abstain from judging the rights of a quarrel between a people and its rulers, and to guide our conduct by the plain results of political fact. We are now on the eve of seeing what these results will be. Either war or compromise seems now inevitable. If it be compromise, we shall know how to act. If it be war, we are bound to await the results of that war. A premature recognition of the Southern Confederation would be a departure from the recognised course of England, and could not but therefore express a political *bias* in favour of the seceders.

Now, is it even *decent* to ask an English House of Commons to express such a bias in favour of such a power as that which has its seat of government at Montgomery—a power which is based on Slavery as the very principle of its individual existence, and which, though it professes for the moment to have abolished the Slave Trade, is worked by men many of whom have openly assailed the laws against that traffic as a gross violation of the rights of the South. The head of the Commission appointed to negotiate with the European Powers for the recognition of the Southern Federation, the Hon. W. L. Yancey, of Alabama, has devoted a great portion of his public life to denouncing the obsolete views of Washington and the other great American statesmen of the last century on this subject. The men and the journalists who chiefly instigated secession were most of them deeply pledged to a repeal of the Slave Trade Laws. It is true that when secession was achieved, they found it necessary as a political measure to put forward more moderate men,—men like Mr Stephen, of Georgia who had done his best to arrest the secession movement—and to acquiesce in their counsels. But it remains certain that such papers as the *Charleston Mercury* and such statesmen as Mr Yancey were the motive power of the secession movement, and will again become the motive power of a Slavery Extension policy (which in its turn will require the Slave Trade as its legitimate result), so soon as the ends of compromise have been answered by securing the recognition of the new Power in Europe, and if it may be so, the adhesion of some of the wavering States. Under these circumstances, we earnestly rejoice to see that Mr W. E. Forster has given notice of an amendment to Mr Gregory's motion to the effect that "the House does not at present desire to express any "opinion in favour of such recognition, and trusts that the "Government will at no time make it without obtaining due "security against the renewal of the African Slave Trade." Such an amendment will come with the greatest weight from the representative of Bradford,—a town which, though identified more with the worsted than the cotton trade, still represents fairly the public spirit of our Northern manufacturing interests. The determination of England not to let interested motives interfere with the high principle which she has always shown on the questions of Slavery and the Slave Trade, could not be expressed more fittingly than by the member for Bradford.

THE DANGER OF PREMATURE MOVEMENTS IN ITALY.

Mazzini, whose fanaticism has often done so much to injure and imperil the country which he loves so well, is again coming out in his old character. Hitherto, since the new prospects dawned upon Italy he has been wisely and patriotically silent; he has magnanimously abstained from marring a movement which he could not aid; and has left others to carry out to a successful issue the grand enterprise in which he had so often failed. But it would seem that his patience is at an end, and he is once more emerging into activity and mischief. A week or two ago the *Popolo d'Italia* contained the following provocative signed "Joseph Mazzini":—

Europe only awaits your manifesto to accept it, and this manifesto must be threefold. You must protest now and unanimously against the occupation of Rome, and demand its termination. You must arm yourselves. You must assault Austria in Venice. You wait for Garibaldi; but did not Garibaldi tell you that he expected from you 500,000 armed men in the spring? Are they ready? Are you exerting yourselves to collect them? Combine and arm, Italians. The Government, unless its object is to betray you secretly, cannot refuse its assent and approbation; and being armed, attack the Austrian in Venice. Can you imagine a war of liberation begun in Venice and commanded by Garibaldi, without the Government and the regular army being compelled to follow the impulse? These are the counsels which the Republicans give to their brothers. Joseph Mazzini.

We are happy to know that Garibaldi, with all his enthusiasm, is too sensible and too unselfish a patriot to share these views. Lamentable as his outbreak at Turin was, he has amply proved by his recent conduct hat he contemplates no immediate warlike enterprise, but is prepared to acquiesce in the will of the King and Parliament, however little he may agree with the decision taken. But is it possible to imagine any folly or vanity more deplorable or perverse than that indicated by Mazzini's address? At the very moment when the Austrians are burning for an excuse for attacking the Italians, Mazzini is doing all he can to furnish it. He is assisting Benedek with all his might. He is endeavouring to force the Government and the regular army into that very step which every one but himself can see would be just the most fatal to Italy that could be taken. It is escapades like this that cause his enemies to represent him as the tool of Austria, and compel his friends to rescue him from this darker charge by pleading that he is not in his right mind—that miserable exile, brooding distrust, and inordinate self-opinion, have upset a naturally fine intellect, and poisoned an originally pure and genial heart. The game for Italy at this moment is beyond question the Fabian one. Every week and month is to her inestimably precious. What she needs is time to consolidate the amalgamation of her heterogeneous provinces, to organise her disjointed and inchoate Kingdom, to establish everywhere an administration at once temperate, stimulating, and firm, to learn and study the wants and peculiarities of each district, to recruit her finances, and to prepare and equip her army. Austria, on the other hand, has everything to dread from delay. Her resources are strained to the utmost to maintain numerous forces which are ruinous to her if she may not use them, and which might be so used at this moment as to restore her prestige and almost to rebuild her Empire. If she were to act at once, we can scarcely doubt that her victory would be splendid and decisive, for her actual military superiority over her adversary is enormous. Naples is in too anarchic, discontented, and chaotic a condition to be anything but a burden and a difficulty to Victor Emanuel. His army is comparatively small, and by no means adequately supplied with the materiel of war; he is struggling manfully but desperately with all the obstacles which surround the construction of a new State; all that he asks is peace and leisure to grapple with the work before him. He is not ready for the deadly conflict, and he wants time to get ready. Austria is ready, and wants nothing but an excuse to precipitate the strife. And this excuse Mazzini is insanely bent on giving her!

In truth, we consider the position of the newly acknowledged Kingdom of Italy to be very critical. Hungary, practically her best and most immediately available ally, is carrying on a steady constitutional conflict with Austria, in which she may or may not ultimately be successful; but if Austria concedes all that she demands, it may be very difficult for her as the first results of that concession, to turn round and withdraw her regiments from Italy, and refuse her reconciled and forgiven Sovereign the means of waging a war for the integrity of his dominions. On the other hand, it is certain that Austria's best card in her contest with Hungary would be a series of rapid and successful victories and reconquests in Italy. If she can prostrate Sardinia, and re-enchain Lombardy and Venice by one brief campaign, she

may be able to deal with her other rebellious subjects as a master. She has every motive, therefore, for not delaying a single day the appeal to the arbitrament of war. Victor Emanuel, in the meantime, has his hands full with internal troubles, and needs no complication from without. The administration of the Neapolitan Provinces has, up to the last change, been one continued course of the most astounding and mischievous errors—errors arising from natural ignorance, no doubt, but not on that account the less fatal or the less deplorable. The Sardinian statesmen, when Naples was annexed, were entirely unacquainted both with men and with parties in the South. They did not know either whom to trust or whom to distrust. They appointed as rulers, in the first instance, men like Farini, who, however capable and honest, were entire strangers to the Neapolitans, and had never been heard of there by ninety-nine out of every hundred of the people. These rulers, from pure ignorance of the local feeling and local worthies, selected in many cases as ministers and agents the obscure, the incapable, and the scandalously bad—traitors, renegades, and exiles. By this course they offended the susceptibilities, both egotistical and respectable, of all the higher classes, and threw even those among them who were originally well disposed back upon Bourbon sympathies and predilections. Instead of soothing, flattering, attaching, and compromising the nobles, they slighted and repelled them, and occasionally outraged all their pride by bringing them into forced association with plebians who had neither distinction of talent nor purity of character to justify their elevation. To such an incredible extent have these blunders been carried that, had the Bourbons been one whit less detested than they are by the middle classes both in town and country, the reactionary feeling would have reached a height that must materially have endangered the fusion, and perhaps caused an overwhelming demand either for autonomy or for restoration. For, we must not be deluded into believing that either the revolution or the vote for annexation was the spontaneous or unanimous expression of the popular will. The revolution was the doing of Garibaldi and his volunteers, and was successful simply because there was no resisting spirit or loyal attachment to the old family. The annexation was the corollary of the revolution, and of the general excitement which it spread. The masses are so ignorant and brutal, and so utterly devoid of any political feelings or opinions, that they can as easily be made to vote one thing as another; the nobles and the priests, where not Bourbonists, are certainly anything but annexationists, and are now anti-Piedmontese almost to frenzy; the middle classes, the tradesmen, the professional men, alone, are really and from conviction attached to the new régime. Not only, therefore, has the work of fusion in the South still to be done, but much work of disunion and disgust has still to be undone. Such is the moment chosen by Mazzini to fling his firebrand into the irritable crowd. Unless England and France speak out at once, speak strongly, and speak in unison, we confess to look for sad troubles yet in Italy.

NOMINAL BANK DIRECTORS.

A RECENT trial in the Court of Session, on a suit brought by a shareholder in the Edinburgh and Glasgow Bank, deserves attention as throwing light on the duties and responsibilities of Bank Directors.

Sir William Johnston, the chairman of the bank, and the principal defender in the suit, was at the time of his appointment Lord Provost of Edinburgh, and a member of nearly every public board in the city, besides having a large private business of his own. To what end was he made Director and Chairman of this concern? Certainly not with any notion that he would have it in his power to devote much of his time and ability to that most absorbing of mercantile engagements, the management of a large bank. The real object of his appointment doubtless was, as a Northern contemporary shrewdly describes it, to make him a puff to bring business to the shop, an *ornament to* the concern, a decoy to draw in and give confidence to the public. Why a high-minded man should allow himself to be thus made use of, it were sheer waste of time to discuss; for, unhappily, we find high-minded men doing it every day, not only in joint stock companies, but also in charitable and religious institutions. The absurdity is that any part of the mercantile public, and most of all that a shareholder in the very bank in question, should profess to be ignorant of these things.

The machinery of a joint stock bank in a large commercial town usually comprises:—

1. A Manager, largely salaried, and supposed to be thoroughly up to the work, his whole time being given to it.

2. Two inside Directors, handsomely paid, to assist and advise the Manager, expected to devote some substantial portion of their time to the bank, to whose inspection all books and accounts are open.

3. Ten or twelve outside Directors, including the Chairman, who have no access to the books and accounts; but are expected to meet periodically to talk about the bank, and pass certain aggregate statements then laid before them. Their emoluments are small, the amount commonly depending on the punctuality with which they may attend these meetings. The fact that individual accounts are kept secret from them is frequently published as an encouragement to customers.

These outside Directors may be subdivided as follows:—

1. Decoys, aptly described by our Glasgow contemporary.

2. Gentlemen supposed to lend their names and presence to the direction for the sake of the nominal remuneration to which their attendance at the periodical meetings entitles them, and sometimes vulgarly termed "Guinea pigs."

3. Another section, much too respectable to be classed with either of the foregoing, and who often join the direction from the highest and most conscientious motives.

These last deserve our sincerest pity. They are generally over-persuaded to join—told they are needed to protect widows and prevent jobbing—and urged to forget their own comfort and interest in zeal for the public good. They consent, more or less reluctantly. Some time is lost before they know where they stand. Then their first disposition is to be active, but they gradually find out that to be active *is to* be troublesome. They suggest alterations, which are overruled; they move amendments, which are outvoted; they attempt remonstrances, which are pooh-poohed. Snubbed by the Manager and sneered at by a majority of their colleagues, what are they to do? Retire? It would be to desert a ship in distress. Remain and acquiesce? It is to expose themselves to actions like the one just tried at Edinburgh, in which angry shareholders, cognisant throughout of the system and of the facts, endeavour to shift off their losses upon Directors who have already done their best for the general preservation, and who are usually the heaviest pecuniary sufferers when the Bank shuts up. That intelligent, right-minded men should so constantly have to risk being mulcted for consequences they have had no real share in producing, and be subjected to accusations of fraudulent conduct to which their whole lives are often an answer, is the soundest argument we can urge for a complete change of system.

An attentive study of the luminous charge delivered by the Lord Justice Clerk to the Edinburgh jury in the case of Dobbie *v.* Johnson will at once disclose the evils of the present system, and suggest the proper remedies for them. At all events, let words stand for their right meanings, and if it be true that *Directors* do not *direct*, let that word be disused and some other substituted, distinctly indicating the men's real functions. Punish the guilty severely; but let these selfish and scandalous suits against men never believed to be guilty cease with the failure of the Edinburgh action. It is desirable that joint stock companies should continue to command the services for counsel and consultation of men of high standing actually engaged in various trades, and it will be an evil day for shareholders when they can no longer secure such men's help under any name or in any capacity whatever.

THE RIVAL CONVICT SYSTEMS.

COLONEL JEBB is very angry with the "Cornhill Magazine" for misrepresenting the English convict system, and wrote last week to the *Times* on the subject. It is clear enough that the writer's mistake, which Colonel Jebb considered both "gross" and "probably wilful," was due to the inaccurate character of the return from which he quoted, and that there

was no wish to misrepresent the English, in order to recommend the Irish, system. But comparative failure is naturally vexatious, and it is obvious that Colonel Jebb is in no frame of mind to appreciate fairly the extraordinary steps in advance which the Irish Directors of Convict Prisons have succeeded in making. Let us compare the fruits of the two systems by the express admissions of Colonel Jebb on the one side and Captain Crofton on the other, and we shall have no difficulty in forming our own impressions as to the relative advantages of the two systems. Colonel Jebb tells us, in his letter to the *Times*, that during seven years and a half there has been the following number of tickets-of-leave issued to convict prisoners, with the results specified :—

Tickets-of-leave issued	9,180
Revoked	834
Reconvicted	1,038

From which we learn that nearly 20 per cent. of the licences issued have been issued to persons proved not to be worthy of them; and, what is yet more important, that in considerably more than one-half of these cases the licence-holding convicts were left so much to their own devices and so little kept under the surveillance of the police, that they were able to commit fresh crimes before their licence had been recalled. In other words, in much more than half the instances the grant of a ticket-of-leave was a mere form, and the conditional discharge proved to be in fact an unconditional discharge.

Now, let us look at the Irish system. The new Irish convict system has been worked only for about six years. During that time,—shorter only by a year and a half than the period specified by Colonel Jebb,—1,462 tickets-of-leave have been issued. But in Ireland, those liberated have been very strictly watched. They are required to report themselves every month at the nearest constabulary station, and immediately on any change of residence. The slightest misbehaviour, either in the way of intoxication or association with bad company, causes an immediate recall of the licence; and Captain Crofton, after considerable experience, states his firm belief that all cases of irregularity in the licence-holders are soon discovered by the police, and punished by the recall of the licence. Under these circumstances, we find that of 1,462, only 89, or 6 per cent., have been revoked. The two systems, therefore, compare as follows :—On the English system, in seven years and a half nine per cent. of the licences issued have been revoked, without representing half that *ought* to have been revoked, as 11 per cent. more of the holders have been reconvicted for fresh offences; while, under the Irish system, during six years only six per cent. of the licences granted have been revoked, which do represent all ascertained cases of abuse of the licence. We find, therefore, that if we allow something for the rather longer period over which the English trial extends, the Irish system has been at least three times as successful as the English,—and still more so when we reflect that its system of registration enables the authorities to arrest the relapsing criminal at a much earlier stage of the relapse than the English, since in much more than half the known English cases the police officers know nothing about the licence-holder till a fresh crime has caused the arrest and reconviction of the prisoner,—while probably many other cases of relapse escape notice altogether.

Colonel Jebb is very much hurt at the imputation of "failure or retrograde movements" in the English system. Yet not more than three years ago Colonel Jebb expressed his deliberate opinion, in an official comment on Captain Crofton's system, that to introduce the plan of intermediate prisons, which has answered so well in Ireland, into England, "would be in all respects a retrograde movement." Whether with the additional light of the last three years' experience he still thinks so, we cannot say. But we can assure him that the intelligent conviction of English observers inclines more and more every day to an extension of the marvellously successful Irish experiment to the English system. There is a prevailing impression afloat that the Irish system is more *lenient* to crime than the English one. Nothing can be more false. The *régime* as to diet and money allowances is decidedly far more severe on the Irish than on the English system. The great difference is that the Irish system relaxes restraint gradually, cautiously, and under strict supervision, while the English convict passes at once from the severest discipline of a convict prison to an almost unrestrained liberty to enter on his criminal courses again.

AUSTRIAN CIVILISATION AND THE HUNGARIAN LAWS OF 1848.

[COMMUNICATED.]

A REMARKABLE feature during the elections of members to the Hungarian Parliament was the almost *unanimous* declaration on the part of the candidates that "*they would take their stand on the basis of the laws of* 1848." To the general reader, this will only suggest the idea of the Hungarian nation being determined to look back upon the last twelve years of Austrian absolutism as upon an unjust, cruel, and inexcusable attempt against their historical rights and national existence; and, by returning simply to the Acts of 1848, to declare void and null whatever has been changed in the political organisation or the judicial administration of the country.

There is a deeper meaning in the above declaration—a meaning well worthy of being noticed by the English public.

The laws of 1848 have a double bearing intimately connected, and yet entirely different. They break down those distinctions of *caste*, by which *one-twentieth* of the population was in possession of *all* political rights, with scarcely any other obligations than to legislate and administer, leaving all the burdens of social life on the shoulders of the remaining *nineteen-twentieths*. The six hundred thousand nobles were free from military service and public taxation; they had the right of sending deputies to the Diet, and of *binding them*, before sending, by instructions to vote only such laws as their constituents might please to approve of; they every three years renewed the county magistrates from their own number, giving them power of life and death over the millions that were living out of the pale of feudal privileges. The great mass of the people, under the name of *peasants*, were obliged to till the soil of the landlord; give him the ninth of his crops; to give tithe to the bishops; to make roads, and pay tolls for them; to pay the so-called war tax (in contradistinction to the *domestic* tax, a trifling tax collected from among the nobles for the wants of the county administration); to serve his years in the Austrian army; to have the foreign soldiers billeted at his house,—being at the same time under the absolute sway of magistrates, who were nobles, elected (as was mentioned) exclusively by nobles, and who had the administration of civil and criminal laws in their hands. The abettors of Austrian rule might here exclaim, that such having been the condition of the millions up to 1848, there is no reason for complaining against the sweeping measures of the Viennese Government during the period from 1849-1860; *as by said measures the anomaly, pointed out above, has been radically cured.* But the fallacy is too palpable to be seriously entertained. The Hungarian laws before 1848 needed to be reformed; but the aristocracy, and especially that most respectable class of *landed* proprietors which had no other title than that of "noble," and which would perhaps in the best way be designated by the expression of "a substantial gentry," *anticipated* the reforms *by special* agreements, rendering the relations between peasant and landlord as equitable as private settlements would permit. Then we must not forget that the administration of the country was *a national one*—a sufficient compensation for a thousand evils in the eyes of every true Hungarian. But, in fact, the anomaly arising from the ancient Hungarian laws was done away with in rather a queer manner by the Austrian benefactor. That great promoter of civilisation, Baron Bach, and his associates, have put a curious construction upon a current phrase among modern politicians: *they established equality before the law*, by supplanting first the laws (that is to say the Acts of Parliament) by ministerial ordinances, and afterwards *put all classes on the same level, not by raising those who were formerly shut out, but by dragging down those who had formerly enjoyed privileges.* The national administration disappeared, foreign laws and foreign judges were introduced, and taxation having become *twenty-fold what it was before*, the only comfort which the peasant could have found in the Austrian changes was in the saying of the poet:—

Solamen miseris socios habuisse malorum.

The count, the baron, the noble was now *a conscript* as were the sons of the peasants; the gendarmes entered the chateaux as unscrupulously as the humblest cabin, dragging forth to remote fortresses the unhappy inhabitants; and the custom house officers —militarily organised—were a common plague to all, the sheep and cattle of an archbishop being liable to confiscation no less than those of the peasant. Agriculture and rural economy were rapidly declining; industry—as carried on by large and powerful establishments—became almost nominal, and commerce was without any prospect of a better future. The complications of the Government abroad rendered it impossible to develop the resources of a naturally rich country, except as far as the means for conveying speedily military stores and bodies were concerned.

No wonder that the people at large were sighing everywhere for the return of former days; no wonder that, from the moment the fetters were taken off by the diploma of October 20 of last year, the people almost without exception rallied *round their former masters—the nobles*, showing their sense and gratitude by returning everywhere members of the nobility as their representatives to the Diet.

The trust thus placed in the Hungarian nobility was grounded on the laws of 1848. "These laws (says Count Dessewffy,

the President of the Hungarian Academy of Sciences, and one of the legislators in 1848), have established the equality before the law, annulled the monopoly of political rights by a single caste, given political rights to the people, and abolished the statute labour. By these laws the common share in public burdens is affirmed, and to the free cities of the realm the due rank at the Diet vindicated, as also a truly municipal autonomy secured;—in these laws it is first distinctly stated, that henceforward the Sovereign is to take advice from the Hungarian councillors upon Hungarian matters, and that these councillors are responsible to the Diet, although the principle, of which that article is but a more distinct utterance, is one of our most ancient cardinal rights."

The laws of 1848 laid the foundations for further *material* prosperity, as well as for the amalgamation of political interests. As from the abolition of Statute labour and the conditions connected with it, a large and independent class of landed proprietors was seen to arise; as through the article upon the Royal Free Cities the industrial and commercial claims have obtained their due weight in the Legislature of the realm; so also the *security of rights* must follow from those reforms which were effected in the civil, criminal, and commercial codes of the country.

It is a well-known fact that Hungary, notwithstanding her inexhaustible resources, had neither commerce nor industry on a large scale; agriculture itself, with very few exceptions, was almost in a primitive state. The scarcity of capital was beyond all conception, the proprietor of thousands of acres of first-rate land being unable to raise money even for the most crying necessities, not to speak of necessary improvements; and whenever a bad harvest fell upon the country, or disease was ravaging the cattle, years were required for bringing up things once more to their former level, low as that level may have been. The landlord was almost exclusively at the mercy of Jews, not only for loans, but also for the sale of his produce,—and the Jews themselves very often were but tools in the hands of foreign speculators, who, living far from the country, tried to draw as much as possible from it, without ever thinking about investing part of their profits in enterprises that promised much trouble and small emoluments. To show what was the condition of the country, it is enough to point out the unique and almost incredible circumstance, that *in the whole kingdom there was not a single banking establishment for agricultural purposes!* And yet, Hungary was held to be an agricultural country *par excellence*.

It would be tedious to the English reader to enter here upon technical details; suffice it to state, that *in Hungary there was no real property till the laws of Entail and Descent were repealed*, and that such repeal is one of the most lasting triumphs of the Hungarian legislation in 1848. Article XV. of that year breaks courageously with the past, establishing a new era in this respect. The *laws of entail and heirloom* are now such, that by them the rights of *bonâ fide* possession are secured; the transfer of landed property by sale rendered easy and sure, and the principles of wills and bequests clearly defined. The rage with which the Austrian Government tried during the last eleven years to eradicate all vestiges of the ancient laws and privileges has led in one direction to a most beneficial result. What the Diet of 1848 was prevented from introducing, has been carried out by the Austrian authorities in the greater part of the country, viz., the registering of landed property; the so-called Doomsday-books afford to-day all the evidence that may be wanted of the transactions which relate to immoveable property. Notwithstanding the general outcry with which the country is ringing from one end to the other against the arbitrary changes effected under the *Schwarzenberg-Bach* system, *these registers have been respected by the several counties*, as also by the Judicial Conference held at Pesth during the the last two months—a sufficient proof of the firmness of resolution with which the nation wishes to maintain and to develop the material interests of the country.

An obstacle no less serious than the above-mentioned in the way of the salutary influx of foreign capital was to be found in the deficiencies of our *criminal and commercial laws*. The ancient *Praxis criminalis* was an agglomerate of incoherent customs and rules, not contained in any written code, varying with the more or less advanced state of public opinion, as also with the more or less enlightened views and principles of the leading men in the counties. As a general rule, we may state that the noble had everywhere too much favour, the peasant too little justice to expect. Outrages committed upon person or property were, in many cases, punished less in conformity with their nature, than according to the influence which the offender or the offended could command; and although the *sedes judiciariæ* of the counties, and still more the Tabula Regia (Court of Appeals), did all they could to check the errors and to remedy the faults of the county judges (Judices nobilium), yet the uncertainty of the result was in most cases too palpable not to leave unpleasant impressions upon the minds of foreigners, who perhaps would have felt inclined to settle in the country, or to invest capital in industrial and commercial enterprise.

The admirable *code*, elaborated by command of the Diet 1843-44, is a rare jewel in the field of modern codification. The best and most distinguished men of Hungary have been for years engaged in preparing it, and if by Royal sanction once raised to the dignity of law, it will not be surpassed by any code the civilised world can boast of. *Mittermayer*, a greater authority than whom we scarcely could cite in criminal legislation,—after having perused a German translation, prepared we believe by the great historian *Szalay*—could not withold his admiration, congratulating the country on the possession of such a treasure.

It is no fault of the nation if, for want of Royal sanction, it has not yet become law, although it has passed long since through both Houses of Parliament. The reason for the delay on the side of Government we find alluded to, by one of its chief contributors, Francis Deák, who, during the discussions of the Judicial Conference, explained the horrible elasticity of those ancient laws, by which high treason and crimes of *Lèse-majesté* were defined. "Henceforward," said the illustrious patriot, "Majesty may feel sure, because it will always be possible to reach by law the real criminal, without the danger of seeing the innocent immolated."

As to the commercial laws, it is necessary only to make the general remark that they are formed after the best models, adapted to the wants of the country, and in harmony with the other branches of legislation. They are worthy of being discussed in a more special way, because the time cannot be far off when the two nations, the dates of whose Magna Charta are separated only by seven years, will be seen in close alliance, as they were once on the fields of Palestine; but this time it will be an alliance to cement political sympathies by the advantages of mutual exchange.

Agriculture.

THE ROT IN SHEEP.

As might have been expected from the long-continued wet weather of the past eighteen months, much disease prevails amongst the flocks in various districts. The rot, or as it is called in the West of England, the "bane," is considered to be a disease of the liver, to which sheep are liable from causes and under circumstances not very well understood. The liver is destroyed by "flukes," which appear to be living creatures, and the animal speedily wastes and dies; the wool, skin, and carcase being quite worthless. In wet seasons the disease is more prevalent, but there are certain pastures which at particular seasons of the year produce this disease though the sheep may remain in them for a day only. Thus irrigated or water-meadows on which ewes and lambs are fed in the spring with impunity, will, it is said, inevitably produce the rot in all sheep put into them in the autumn. The why and the wherefore of this is assuredly unknown to farmers. The subject has now attracted the notice of the Royal Agricultural Society, for at a weekly meeting of the Council, Professor Simonds delivered a lecture on the "Nature and Causes of the Disease known as the Rot in Sheep." He says there are several diseases which "pass under the common term rot," but he would confine it to that in which flukes are found in the biliary ducts and the liver. This disease differs from the dropsical effusions sometimes called "water-rot." The disease is mentioned by our oldest agricultural writers, but none of them have satisfactorily accounted for it. The greatest loss on record in this country from rot occurred in 1830, when it is supposed two millions of sheep were lost in Great Britain. The next year the supply of sheep to Smithfield Market was diminished by 5,000. Since that time the present season is the worst "outbreak" of the disease which has occurred. Mr Simonds said:—"I am acquainted with instances in my own neighbourhood, on the verge of London, where the losses have amounted to 600 to 700 sheep in a flock. I am now speaking more particularly of Welsh sheep, the ewes having been purchased and brought into the district for breeding purposes. Some persons indeed have scarcely a sheep left. One person in particular who buys 800 or 900 of these sheep has, I believe, not more than 40 or 50 now alive. In Sussex and in many parts of Surrey similar losses of sheep of far greater value have taken place. In the neighbourhood of Eastbourne some persons have lost as many as 500 and 600 breeding ewes of considerable value as Southdown sheep." After referring to different theories propounded by various writers to account for the disease, and stating, in some detail, his own investigations into the anatomy and habits of the fluke, he concludes that the last transformation of these insects does not take place in the liver or biliary ducts, but in the stomach of the sheep. This fact has only been recently ascertained, and it explains why certain places cause the rot in sheep there fed. Instances are on record of sheep having strayed on to a dangerous spot, while the drover had gone into a public-house, and in so short a period had become affected with rot. A sheep having received these creatures in a particular stage of development, either in drinking water, or eating grass in damp places, into its stomach, they become developed into flukes, and the rot is the result. Mr Simonds added:—"Now there are certain difficulties which people put before us with regard to this theory. They want to know how it is that we get rot in certain seasons and not in others. Well, we show that whenever there is an excess of moisture—whenever, in fact, we have great rainfalls—certain pastures

and places, which are perfectly free from disease at other times, now become affected. This is easily enough explained. We have seen that the ova of these creatures come out in millions from one affected sheep: what, then, must be the number of them in hundreds of sheep so affected? Now, by direct experiment, I have proved this, that you may take the ova of these flukes and keep them upwards of a year before there is any change taking place in them. We know not, therefore, what is the duration of life of these ova. It is just possible that they may remain, not only one year, but two years, without undergoing any change, until placed under favourable circumstances to undergo that change. If, then, we look at the vast numbers in which these ova exist, and at the power of maintaining their vitality for a great length of time, we get rid of a considerable amount of difficulty. Then we find that when you get an excess of moisture, and with that an elevated temperature, we have the living germs, if I may so call them, that are now separated by the bursting of the operculum of the egg, set at liberty and become parasitic to other creatures, as I previously explained, passing through that series of transformations comparatively quickly, and being very easily received into the system of the sheep. I have referred to an elevated temperature combined with excessive moisture; and what is the practical observation which is made with reference, for instance, to watery meadows? It is notorious that sheep placed upon watery meadows receive the rot; but it is equally notorious that it is only at a certain period of the year that they will do so. You may, as every practical man knows, put sheep upon water-meadows during the winter months, or in the early part of the spring; but if you water your meadows in the month of May, and then get a luxuriant herbage springing up afterwards, and put the sheep on this, you are almost certain to rot them. As you approach midsummer, the danger increases; and as you approach towards winter, it decreases. That single circumstance shows that, when there is moisture and heat combined, the cause is brought into operation."

There has been no cure discovered, and the only practical course of the farmer is to avoid infection. It is found that adult sheep in the earlier stages of the disease fatten more quickly even than healthy sheep, which Mr Simonds attributes to the stimulus given to the liver by the first invasion of the flukes, and before they have become numerous enough to drain off the nutrition of the animal. So well was Bakewell aware of this, that in order to prevent other people obtaining his draft ewes, he always fattened them on a damp meadow which produced the rot *before selling them to the butcher*, so that if an attempt had been made to keep them round for breeding, the progress of the disease would have destroyed them. Bakewell attributed the rot to a flooded pasture. As to the best means of prevention; it is found that sheep do not rot in salt marshes, however wet they they may be. Supplying the sheep with salt, therefore, may prevent injury by acting on the insects when taken into the animal's stomach. The dangerous period is towards midsummer, and then the sheep and lambs should be fed on corn, meal, cake, &c., with salt. This he had found to prevent rot during last summer, though his sheep were often fetlock deep in water. Mr Arkell stated that sulphur and saltpetre had stayed the disease of dropsy or water-rot in his sheep last summer. The symptom of water-rot is that the liver and gall bladder are white and flaccid. Sulphate of iron, a tonic, has been found beneficial in this disease. This lecture is a very timely one, for we are approaching the time of danger, and the use of salt and good feeding form the best means of prevention. On well-drained land, not flooded, there is probably little danger of rot even in the wettest seasons; such at least is the result of our own observation and experience.

Literature.

COMMERCIAL LITERATURE.

REPORT OF THE PROCEEDINGS OF THE MADRAS CHAMBER OF COMMERCE FOR THE YEAR ENDING THE 31ST DEC., 1860. Printed at the Scottish Press, Graves and Co., Madras.

THE feature of the greatest interest to the English public in the above report is the increased attention devoted to the cultivation of cotton. In the previous year some correspondence on the subject had taken place with the Manchester Cotton Supply Association, who forwarded a quantity of American seed for trial in India, and further communications appear in the present pamphlet. The experiment, however, had to be abandoned, nine-tenths of the seed turning out worthless. More success has attended the sowing of some Egyptian seed at Chingleput, which has produced cotton of fair quality. A cleaning machine for freeing the staple from seed and dust, invented by Mr Barter of Tuticorin, has been tried with very satisfactory results. It is worthy of remark, that in the frequent questions arising between the Chamber, as representative of the mercantile community, and the Government, relating to new and obnoxious regulations in the Customs or the like, the Chamber appear to have experienced none of the ill feeling towards independent European settlers usually attributed to the Calcutta authorities. If occasionally thwarted by the less important officers of the Crown, an appeal to the Governor and Council seems to have met with ready redress. A tribute is paid to the talents and energy of Sir Charles Trevelyan, while the death of his successor, Sir H. Ward, is said to have been severely felt. The trade of Madras was much depressed in the earlier part of the year, but latterly an improvement had taken place.

IRON; its History, Properties, and Processes of Manufacture. By WILLIAM FAIRBAIRN, C.E., LL.D., F.R.S., &c., &c. Edinburgh: Adam and Charles Black.

MR FAIRBAIRN having been suddenly called upon to write the essay upon iron in the eighth edition of the "Encyclopædia Britannica," had so little time afforded to him for the work that it was necessarily imperfect. The publishers, however, of the "Encyclopædia" handsomely offered to print the article in a more complete shape, and the present volume, therefore, contains the original essay with considerable additions. The subject is treated in a masterly and comprehensive manner, the author commencing first with the history of the manufacture, and then tracing the process from the reduction of ores to the latest method introduced for working iron and steel. The book is of interest to all classes, and is well worthy of perusal. Mr Fairbairn's postscript upon armour-plated ships is of peculiar value in the present state of affairs. He expresses his unqualified opinion that the use of wooden vessels of war is a thing of the past, and that in future iron should be exclusively employed.

THE ALPHABETICAL GAZETTE: a Permanent Register of Bankrupts, Insolvents, &c. London: W. J. Adams.

THE above is a reprint from the *Gazette* of bankruptcies, insolvencies, dissolutions of partnerships, and the like, arranged for the purposes of speedy reference. It also contains notices of important meetings of creditors, suspensions, &c. This work will prove useful to many parties, but might be improved by forming one comprehensive quarterly table, in lieu of a separate table for each month.

GENERAL LITERATURE.

SILAS MARNER: the Weaver of Raveloe. By GEORGE ELIOT. Blackwood. 1861.

THIS tale is a permanent and no trifling addition to the wealth of English literature. There is no element of power wanting to make it more impressive, and no element of beauty wanting to make it more attractive. The conception is as fine as the execution is marvellous. It does not approach in tragic power some parts of "Adam Bede," because the scope of the narrative will not admit of it,—but it is a more perfect whole; and a more unique and subtle, though not so deep an interest constitutes the plot. No book that we have ever read combines so completely the broadest masculine power with the most delicate feminine insight and finish. Nor is there, as far as we have noticed, a single cynical Thackerayism about the book like those which so often disfigure the introductory discussion-paragraphs to the various chapters in "Adam Bede,"—unless, indeed, we except a single word which we have italicised in the following characteristic sentence:—

> The prevarication and white lies which a mind that keeps itself *ambitiously* pure is as uneasy under as a great artist under the false touches that no eye detects but his own, are worn as lightly as mere trimmings when once the actions have become a lie.

Why should the word "ambitiously" have been inserted there? It is, we believe, the only cynicism in the book.

One of the most striking features in this striking tale is the strong intellectual impress which the author contrives to give to a story of which the main elements are altogether unintellectual, without the smallest injury to the verisimilitude of the tale. There is no character delineated through whose mouth the author could express a subtle thought without impropriety;—and she herself indulges very sparingly in the descriptive comment which formed so large an element in "The Mill on the Floss" and "Adam Bede." Yet not the less is the tale a most intellectual as well as graphic picture of the most unintellectual social life which has been known in England during the last fifty years. This is managed in various ways. From the outset the eye of the reader is fixed on the psychological facts which the story is intended to illustrate, though there is no attempt to analyse or discuss their metaphysical origin. Again, the intellectual effect is throughout produced by the *kind* of humour shown in the selection of the traits of life delineated. The turn given to the conversation of the peasants, though never untrue or unreal in them, has almost always a distinct relation to the intellectual forms of the same questions as discussed in modern times by the educated classes,—and hence there is a subtle undercurrent of humour which betrays the mind of the writer even in her most happy delineations of the rural peasantry whom she portrays. Indeed, where this is not the case,—where the conversation of the villagers is not studied, as it usually is, with explicit relation to the corresponding classes of thoughts that occupy more cultivated minds,—the principle of selection is intellectual contrast, instead of intellectual similarity. Sometimes, as in the beginning of the inimitable dialogue in the Rainbow, the theme taken up has no subtle references at all, but is simply and solely one to excite a butcher's

and farrier's fervour. But the pungency is given by the grotesqueness of the contrast between the professional interests of the lower and middle classes, and by that additional flavour of professionality which every descent in the scale of education certainly ensures.

The conversation, which was at a high pitch of animation when Silas approached the door of the Rainbow, had, as usual, been slow and intermittent when the company first assembled. The pipes began to be puffed in a silence which had an air of severity; the more important customers, who drank spirits and sat nearest the fire, staring at each other as if a bet were depending on the first man who winked; while the beer-drinkers, chiefly men in fustian jackets and smock-frocks, kept their eyelids down and rubbed their hands across their mouths, as if their draughts of beer had been a funereal duty attended with embarrassing sadness. At last, Mr Snell, the landlord, a man of a neutral disposition, accustomed to stand aloof from human differences as those of beings who were all alike in need of liquor, broke silence, by saying in a doubtful tone to his cousin the butcher,—

"Some folks 'ud say that was a fine beast you druv in yesterday, Bob?"

The butcher, a jolly, smiling, red-haired man, was not disposed to answer rashly. He gave a few puffs before he spat and replied, "And they wouldn't be *fur* wrong, John."

After this feeble delusive thaw, the silence set in as severely as before.

"Was it a red Durham?" said the farrier, taking up the thread of discourse after the lapse of a few minutes.

The farrier looked at the landlord, and the landlord looked at the butcher, as the person who must take the responsibility of answering.

"Red it was," said the butcher, in his good-humoured husky treble—"and a Durham it was."

"Then you needn't tell *me* who you bought it of," said the farrier, looking round with some triumph; "I know who it is has got the red Durhams o' this country-side. And she'd a white star on her brow, I'll bet a penny?" The farrier leaned forward with his hands on his knees as he put this question, and his eyes twinkled knowingly.

"Well; yes—she might," said the butcher, slowly, considering that he was giving a decided affirmative. "I don't say contrary."

"I knew that very well," said the farrier, throwing himself backward again and speaking defiantly; "if *I* don't know Mr Lammeter's cows, I should like to know who does—that's all. And as for the cow you've bought, bargain or no bargain, I've been at the *drenching* of her—contradick me who will."

The farrier looked fierce, and the mild butcher's conversational spirit was roused a little.

"I'm not for contradicking no man," he said; "I'm for peace and quietness. Some are for cutting long ribs—I'm for cutting 'em short, myself; but *I* don't quarrel with 'em. All I say is, it's a lovely carkiss—and anybody as was reasonable, it 'ud bring tears into their eyes to look at it."

"Well, it's the cow as I drenched, whatever it is," pursued the farrier, angrily; "and it was Mr Lammeter's cow, else you told a lie when you said it was a red Durham."

"I tell no lies," said the butcher, with the same mild huskiness as before; "and I contradick none—not if a man was to swear himself black: he's no meat o' mine, nor none o' my bargains. All I say is, it's a lovely carkiss. And what I say, I'll stick to; but I'll quarrel wi' no man."

"No," said the farrier, with bitter sarcasm, looking at the company generally; "and p'rhaps you aren't pig-headed; and p'rhaps you didn't say the cow was a red Durham; and p'rhaps you didn't say she'd got a star on her brow—stick to that, now you're at it."

"Come, come," said the landlord; "let the cow alone. The truth lies atween you: you're both right and both wrong, as I allays say. And as for the cow's being Mr Lammeter's, I say nothing to that; but this I say, as the Rainbow's the Rainbow.

Nor does the conversation remain long in this phase. As soon as Mr Macey, the parish clerk and tailor, enters into it, a faint shadow of the intellectual phases of "modern thought,"—just sufficient to remind the reader of the form which they take in the present day, without in any way marring the truth of the picture,—begins to fall on the discussion. Mr Macey has fallen upon some appropriate form of the difficulty of distinguishing between the "subjective" and the "objective." He it is who tells us that "there's allays two 'pinions; there's the 'pinion a man has of himsen, and there's the 'pinion other folks have on him. There'd be two 'pinions about a cracked bell if the bell could hear itself." And further, in discussing the error of a bride and bridegroom who had interchanged their respective responses in the marriage service, he throws up the difficult question as to the relation between "substance" and "form." "'Is it the meanin' or the words as makes folks fast i' wedlock?' For the parson meant right, and the bride and bridegroom meant right. But then, when I come to think on it, meanin' goes but a little way i' most things, for you may mean to stick things together and your glue may be bad, and then where are you? And so I says to mysen, 'It isn't the meanin', it's the glue.' And I was worreted as if I'd got three bells to pull at once.....But where's the use o' talking?—you can't think what goes on in a 'cute man's inside."

Nor is it only from the quaint traces of connection between the cultivated and the uncultivated classes, that this tale derives its intellectual impress. The whole structure of it is cast in an intellectual mould. Its motto is taken from Wordsworth:—

> A child, more than all other gifts
> That earth can offer to declining man,
> Brings hope with it, and forward-looking thoughts.

And the idea of the tale is to contrast the withering effects of a mild, innocent love of gold growing upon a contracted and timid mind that had early received a shock both to its faith and human trust, with the influence of the affection for a little child which replaces the lost gold,—the former constantly narrowing the connection between the miser and the social life around him, the latter constantly widening and deepening it. The art and originality of the story lies in the completely innocent cast given to the miserliness of the old weaver, his almost entire freedom from any touch of moral responsibility for the growth of this passion, and in the complete and unresisted revulsion of feeling caused by the loss of his gold and the substitution of a living interest in its place. Silas Marner's character is no common conception. The absolute sway of blind association, over it would commonly be considered inconsistent with any distinct picture at all. Yet it is a most distinct and marvellous picture throughout. The picture of him during the growth of his first passion for hoarding is no less vivid than subtle:—

His life had reduced itself to the mere functions of weaving and hoarding, without any contemplation of an end towards which the functions tended. The same sort of process has perhaps been undergone by wiser men, when they have been cut off from faith and love—only, instead of a loom and a heap of guineas, they have had some erudite research, some ingenious project, or some well-knit theory. Strangely Marner's face and figure shrank and bent themselves into a constant mechanical relation to the objects of his life, *so that he produced the same sort of impression as a handle or a crooked tube, which has no meaning standing apart.* The prominent eyes that used to look trusting and dreamy, now looked as if they had been made to see only one kind of thing that was very small, like tiny grain, for which they hunted everywhere: and he was so withered and yellow, that, though he was not yet forty, the children always called him "Old Master Marner."

Nor is the transformation produced by the appearance of the child in his cottage less vividly conceived:—

He had no distinct idea about the baptism and the church-going, except that Dolly had said it was for the good of the child; and in this way, as the weeks grew to months, the child created fresh and fresh links between his life and the lives from which he had hitherto shrunk continually into narrower isolation. Unlike the gold which needed nothing, and must be worshipped in close-locked solitude—which was hidden away from the daylight, was deaf to the song of birds, and started to no human tones—Eppie was a creature of endless claims and ever-growing desires, seeking and loving sunshine, and living sounds, and living movements; making trial of everything, with trust in new joy, and stirring the human kindness in all eyes that looked on her. The gold had kept his thoughts in an ever-repeated circle, leading to nothing beyond itself; but Eppie was an object compacted of changes and hopes that forced his thoughts onward, and carried them far away from their old eager pacing towards the same blank limit—carried them away to the new things that would come with the coming years, when Eppie would have learned to understand how her father Silas cared for her; and made him look for images of that time in the ties and charities that bound together the families of his neighbours. The gold had asked that he should sit weaving longer and longer, deafened and blinded more and more to all things except the monotony of his loom and the repetition of his web; but Eppie called him away from his weaving, and made him think all its pauses a holiday, reawakening his senses with her fresh life, even to the old winter-flies that came crawling forth in the early spring sunshine, and warming him into joy because *she* had joy.....

In old days there were angels who came and took men by the hand and led them away from the city of destruction. We see no white-winged angels now. But yet men are led away from threatening destruction: a hand is put into theirs, which leads them forth gently towards a calm and bright land, so that they look no more backward; and the hand may be a little child's.

The subtle intellectual character of the tale is given also in great part by the character of its "poetical justice." Instead of finding the ordinary kind of retribution for the weakness and cowardice of the principal hero of it, Godfrey Cass, the authoress gives that gentleman what he himself considers an unusual run of good fortune, and then shows him regretting this good fortune in later life. The story in this respect is very finely contrived. The mere external good fortune seems to fall where it is little deserved,—but this is only in order to show how inevitably ill-deserved fortune will be embittered by the very elements out of which it is constituted. It is easy to see that the author has studied closely the "poetical justice" of real life. She does not visit any one with the *kind* of condign punishment in which novelists usually delight. The evil character of the piece, betrayed into the theft of the weaver's money, does him the greatest real service instead of injury, by disburdening him of this petrifying treasure. But as he, staggering under his stolen wealth, disappears with it into the night, never again to return to the scene, he steps, as we afterwards learn, into one of the stone-pits near the weaver's cottage, and is drowned by his own booty. The gold remains there for 16 years, and is discovered just in time to serve as the marriage portion of the weaver's adopted child. Thus all the incidents of the tale work together for good to the poor weaver, and restore gradually his broken trust in man and God. There is nothing much more beautiful, humorous, and pathetic in fiction than the conversations in which Dame Winthrop gropes her way towards some solution of poor Silas Marner's early difficulties, and leads him to the conclusion that he is not abandoned by "Them above," but that on the contrary, as the weaver expresses his trust in Providence, "There's dealings with us, there's dealings." There is no more delicate and powerful writing in this delicately-written and powerful book than Dame Winthrop's mode of presenting the infer-

ence, from her own compassion and love for her poor neighbours, to the still greater compassion and love of "Them above." But this we must leave to our readers to read for themselves.

THE LONDON REVIEW. No. XXXI. April, 1861. London: Hamilton, Adams, and Co., Paternoster row. Dublin: John Robertson.

MOST of the articles in this number are upon subjects of considerable interest, and the writers have evidently felt that interest, and have endeavoured to communicate it to the reader. But the narrowness of their theological range exerts a cramping influence over all their views of life and history which they scarcely ever allow us to forget. The first article, on "Cuneiform Evidences," presents a *resumé* of those facts recently gleaned from the Assyrian, Babylonian, and Persian monuments, which agree with the narratives of the Old Testament. These facts are very curious, and extremely interesting to all Biblical students; but the undisguised tone of partisan triumph in which they are here presented is very unworthy of the subject, and tends to degrade it into an angry guerilla war with modern rationalism. The article on the Chinese Insurgents, and the strange compound of doctrine which they profess, contains much that is worthy of attention. According to the reviewer, the quasi-Christianity of the Tae-Pings has already freed them from several barbarous and objectionable habits, and inclines them to a friendly policy with Christian nations, and he argues that such dispositions on their part ought not to be neglected by us. What he advises is neutrality and non-intervention in the political contest between them and the Imperialists, and a large importation of "discreet" missionaries into China, who may ultimately succeed in "teaching them the whole system of Christianity." The theological tone of the article is common-place, but some of the facts narrated are very important,—especially the epitome of a work by "the Shield King," called "Aids to Government," of which a full analysis appeared in the *Overland Register* for August 25, 1860. Besides a poor article on "Hymns," we have one on "Church Music," containing some good practical hints on congregational choirs, but scarcely manifesting sufficient knowledge of real Church music to do justice to the subject as a whole. The article on "Religious Liberty" (virtually based on Mr Mill's book) is of a far higher stamp than any other in the Review. It displays real mental power and width, and only just fails of being a valuable contribution to the literature of a great social problem. Several times does the writer approach some of the knotty points of the subject, where the conscientious *ethical* peculiarities of individuals clash with the general views taken by society,—but he shrinks back from distinctly affirming the natural solutions which present themselves, as not coming within the scope of his subject, viz., "*religious* liberty,"—and slurs over the matter by saying that, in reality, they belong to the province of *civil* liberty. Yet in discussing the relations of religion to society, of the Church to the State, it is suicidal to the inquiry to divide your ground sharply between the sacred and the secular, and, taking your stand on one side, to let the problem escape you by allowing it to leap the boundary-wall. It is only by taking a point of view from which the mutual interdependence of the sacred and the secular is seen with such fulness as the national development has attained, that either of them can be justly dealt with, or even recognised in its true character at all. Besides these articles, there is a paper on "The Women of India and Ceylon," an interesting one on "Ghost-Lore and Table-Rapping," a curious but too rhetorical one on "The Sea," an article on "Tullian Husbandry," and some "Brief Literary Notices," among which is a bitter onslaught on Dr Carlyle's Autobiography.

PROCES DE BANK NOTES HONGROISES. François-Joseph 1er contre Louis Kossuth. Paris: E. Dentu, Libraire-Editeur, Palais Royal, 13 Galerie d'Orléans. 1861.

A FRENCH compilation, by M. E. Horn, containing a translation of M. Toulmin Smith's Letter to Lord John Russell, Kossuth's two affidavits in the Court of Chancery, and other official documents bearing on the subject. The tract is noteworthy, as showing the interest taken by Frenchmen in the Hungarian question.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

The suspension of payment by the important firms of Baltazzi and Co. and Hava and Co., of Marseilles, has, in spite of the assistance rendered them by the Bank of France, become a *fait accompli*. Their precise situation has not yet been ascertained, but it is believed that their joint liabilities are not much, if anything, below 37,500,000f. Their assets, it is true, are large, but unfortunately they are more nominal than real, consisting chiefly of sums due to them by the Turkish Government and by the Sultan personally. The Bank of France is the chief sufferer by their stoppage. According to all accounts it holds more than 25,000,000f of their bills, but the figure seems exaggerated. From the importance of the two firms, and from the grave state of affairs at Constantinople, with which place they were largely connected, fears are entertained that other Greek houses in Turkey, in France, and in England will be placed in an embarrassing situation.

When the Government presented its bill for the abolition of the sliding scale on grain and flour, commercial reformers were so delighted that they did not examine the measure with care; but they have done so since, and they find that two serious objections are to be made to it. The first is, that it imposes higher duties on imports from what the French Customs call "entrepôts," that is non-producing countries, than from producing countries; and people contend that there is no "reasonable reason" for any such enactment, but many why it should not be maintained. Evidently to make corn and flour brought from England pay higher than when it comes direct from Russia and America is absurd. The next objection is, that differential duties are established in favour of imports by French vessels; and it is urged very justly that as imports will only be made on a large scale when corn is scarce in France, the effect of the stipulation will be to enhance its price at the very moment at which the object will be to diminish that price as much as possible: it is moreover affirmed that for this reason the stipulation will be practically inoperative, as the Government in times of scarcity will be obliged to set it aside.

The shareholders of the "Credit Industriel et Commercial" Bank held their annual meeting a few days back. A report on the operations of 1860 was presented in the name of the Directors by the Marquis d'Audiffret, their chairman, and was highly satisfactory. It stated the gross receipts of the year at 2,801,022f 73c, and the expenses at 1,355,179f 99c, leaving a balance of 1,445,842f 74c, which was equal to nearly 14½ (14.46) per cent. on the paid-up capital. This result, considering the short time the bank has been established, is really remarkable. Of the 14½ per cent., 8.80 have been distributed to the shareholders, and the rest has been carried to the reserve fund, or employed in part payment of "the expenses of the first establishment." The report describes this bank as "principally one of deposits, open to funds which remain temporarily without employ in the hands of large and small capitalists," which it takes on interest, and which it employs in discounts, in advances on warrants, on consignments, and on securities easily realised. In the course of last year the discounts amounted to 263,725,048f, and the advances on warrants to 7,263,544f, both of which were considerably greater than those of last year.

The Credit Foncier held its annual meeting yesterday, and the report read—of which I shall give an analysis in my next—set forth the pleasing fact that on the shares of 500f, on which only 250f have been paid up, the dividend for last year will be 30f.

At a meeting of the Southern Railway Company just held, the clear profits of the line for 1860 were stated to be 13,208,233f, which were 2,729,416f more than in 1859, and those of the canal 433,876f—a diminution compared with 1859. The dividend of the year was fixed at 15f per share.

Among the many inexplicable restrictions imposed on commerce in this country, was the prohibition of the greater part of the wine-producing departments to "alcoholise" wines in the locality. After repeated applications, the Government has consented to allow this to be done by the producers, but only for wines destined for export, and only in presence of certain officials.

The Customs department has decided that what in French Customs language is called "copper allied with tin of the first fusion," shall, like pure copper or copper allied with zinc, be admitted free of duty when brought in by French vessels.

The dividend of the Northern Railway for 1860 will, it is expected, be 65f 50c.

Little attention has hitherto been paid in England or America to the fact that gold is to be found in considerable quantities in French Guiana. The French themselves are, however, well aware of it. So far back as May, 1857, a Company obtained from the local Government the exclusive privilege of seeking for gold in the commune of Approuague over an extent of 500,000 acres, and subsequently the duration of this privilege was fixed at five years, commencing on the 1st January, 1858, subject to the condition that at the end of the period a convention should be come to between the Company and the Government. The capital of the Company was nominally fixed at 2,000,000f. in 20,000 shares, but thus far only one-fourth of that sum has been paid up. Although, as always happens with such enterprises, the Company at the beginning had obstacles to contend against, it has since been able to find sufficient gold to cover its expenses, and its prospects, according to a colonial journal, *La Moniteur de la Colonisation*, are favourable. The Company is authorised to introduce 500 labourers into the colony: it has not yet obtained that number, but the average daily earnings of those it employs are stated to be 12f.

On the Bourse there is an improvement compared with last week. It is owing, no doubt, chiefly to the political situation being con-

sidered as less menacing, but the Credit Mobilier, whose annual meeting is about to take place, has been operating for a rise. The following are the quotations: it will be observed that the Bank of France have, notwithstanding the losses the establishment may sustain at Marseilles, recovered from their depression.

The Customs returns for March show that the import duties were 9,296,000f, and that in the same month of last year they were 11,498,000f, and in that of 1859 15,579,000f; also that for the first three months of this year they were 25,931,000f, in the same period of last year 38,346,000f, and in that of 1859 41,991,000f. The decline in the present year, compared with the two preceding ones, is of course owing to the large reductions in the tariffs effected by Imperial decrees and by the English treaty; but these reductions have had the effect of causing a considerable increase in the *quantities* of the principal articles taken out of bond for consumption, as will be seen from the following table:—

	First Three months of 1861.	First Three months of 1860.	First Three months of 1859.

The figures stand thus in the returns.

Annexed is an account of the markets:—

Flour.—At *Paris*, prices have risen; yesterday the quotation was 72f to 74f, and for very superior qualities 75f the sack of 159 kilogs. The four marks were 71f 50c for the present month and May; 72f for May and June; 72f 25c to 72f 50c for June and July.

Wheat, at *Paris*, yesterday, was but little offered, and prices varied from 38f to 40f 50c, and even for very superior quality 41f the sack of 120 kilogs. In the provinces, 80 markets present a rise of from 12c to 2f 10c the hectolitre; 27 a fall of from 12c to 1f 67c; 41 have undergone no change; 16 are reported "firm," and 12 "calm."

Cotton.—At *Havre*, in the week ending Friday, the sales were 6,154 bales, and the arrivals 15,725. The closing prices were 1f lower for the very low qualities of all sorts, but without change in the other qualities of all descriptions: low New Orleans was consequently 99f the 50 kilogs, and very ordinary ditto 104f. On Monday and Tuesday of the present week, 2,800 bales were sold, and prices were well sustained. Yesterday, the sales were 1,900 bales, and prices firm.

Coffee.—At *Havre*, in the week ending Friday, business was not active: 400 sacks Hayti Port-au-Prince, 78f 50c to 79f the 50 kilogs in bond; 1,000 sacks ditto for delivery, 78f 50c; 136 sacks Saint Marc disposable, 84f; 700 sacks Miragoane for delivery, 79f; and a small lot of Gaudeloupe *habitant*, 136f 25c, duty paid. The arrivals were about 21,000 sacks. This week, Porto Cabello has been at 90f, Hayti 79f 50c. Some lots of damaged Hayti and Rio have also been sold. At *Nantes*, last week, the sole transactions were the sale of some damaged Port-au-Prince and Cape. This week, there have been no sales. At *Bordeaux*, last week, 500 sacks Malabar went at 100f duty paid; 560 Guayra, 83f to 91f; 520 sacks Rio, not washed, 70f; some Santiago, 92f 50c; also a lot of French West India. This week, a quantity of Rio, not washed, has been taken at 70f, duty paid. Some lots of Demerara and Guayra have also been sold; prices not given. At *Marseilles*, last week, some small lots of Rio went at 65f to 70f the 50 kilogs in bond, and various lots of damaged were also disposed of. This week, a lot of Rio has been offered by auction, but there were no bidders.

Sugar.—The sales at *Havre*, in the week *ending* Friday, were not important. 370 casks French West India disposable, 49f to 49f 50c the 50 kilogs duty paid; 300 casks Porto Rico for delivery, 48f 50c; 1,945 casks Havana disposable, 36f to 36f 25c in bond; and about 800 casks ditto expected, 36f 50c. The arrivals were about 7,500 sacks and nearly 400 casks. This week, French West India has been at 49f 50c to 49f 75c; Reunion, 53f 50c to 56f 50c; Havana, 36f 25c. At *Nantes*, last week, 1,200 sacks Reunion went at 52f 50c. The arrivals were 22,000 sacks of the same sort. This week, no sales have been made. At *Bordeaux*, last week, 1,400 bales Reunion went at 53f; some French West India at 49f 50c. This week, Porto Rico has been done at 49f. This week, sales have been unimportant. At *Marseilles*, last week, 4,000 sacks Mauritius were sold at prices not stated, and some small lots of French West India were also disposed of, as was likewise a quantity of damaged Pernambuco.

Indigo.—At *Havre*, in the week ending Friday, there were no sales. The arrivals exceeded 1,000 cases. This week, nothing has been done. At *Bordeaux*, last week, 52 cases Bengal, 17 Madras, and 11 Kurpah were disposed of: the Bengal went at 1f 75c to 2f 25c premium;

prices of the other sorts not given. This week some lots of Kurpah and Madras have been sold.

HIDES.—Business at *Havre*, in the week ending Friday, was animated. 2,967 La Plata, dry, 120f to 122f 50c the 50 kilogs; 2,250 ditto, salted, 70f for cow, and 74f to 75f for ox; 1,000 Monte Video, salted, for delivery, 74f; 10,000 Paysandu, for delivery, 74f; 986 Rio Grande, salted, 72f ox, 69f cow; 271 Chili, salted, 72f; 581 Texas, ditto, 49f; 2,144 horse, salted La Plata, 90f the 100 kilogs. The arrivals exceeded 15,000. This week, New York salted has been at 50f 50c to 51f 50c. Yesterday, a sale by auction was commenced. Among other things, Martinique was 54f 55c; New Orleans, 47f 50c; Buenos Ayres, 65f 50c; Valparaiso, salted, 50f 50c to 67f 50c; Lima, 86f; Odessa, 52f 50c.

WOOL.—At *Havre*, in the week ending Friday, business was active. 106 bales La Plata, unwashed, 1f 7½c to 2f 70c the kilog; 8 bales German, 2f 27½c; 28 bales sheepskin Buenos Ayres, unwashed, 1f 65c; and 19 ditto inferior, 1f 5c. The arrivals exceeded 100 bales. A sale by auction of 2,400 bales is announced for the 2nd of May. This week, Buenos Ayres, unwashed, has been at 125f to 295f the 100 kilogs; ditto sheepskins, unwashed, 105f to 250f; ditto washed, 215f to 245f; Monte Video, 245f.

TALLOW.—There were no sales at *Havre*, in the week ending Friday, and the arrivals were only 15,000 casks Rio Grande. This week, no sales have been made. At *Paris*, yesterday, the 100 kilogs were 132f to 132f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was at 106f the hectolitre; Montpelier of 89 deg., 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c; beetroot, first quality, 107f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following schedule has been prepared for the use of clerks in determining the proper deposits on merchandise entered for consumption at New York:—Unbleached cottons, average 45 per cent.; bleached cottons, 45; coloured or printed cottons, 50; cotton quiltings, 30; carpetings, ingrain and Dutch, 30; carpetings, felt, 40; carpetings, other, 35; hearth rugs or door mats (wool), 35; blankets, 40; wool shawls, 40; woollen cloths (fine), 35; woollen coatings, viz., beaver, castor, 40; cloth (wool and cotton), 40; wool, average 16½c to 24c per lb, 15; wool, average 24½c to 1 dol per lb, 30; linens, piece goods, duty to be closed up, 30; silks, 30; silk velvets, 30; wearing apparel (wool), 50; segars from 2 dols to 5 dols per 1000, 80; segars above 5 dols and not above 10 dols per 1000, 60; segars over 10 dols per 1000, 42; brandy, average on 3d proof, 1.16 dol per gallon; gin, average on 2d proof, 43c; kirschenwasser, &c, average on 3d proof, 58c; rum or spirits, average on 3d proof, 46c.

The annexed commercial news is dated Calcutta, March 23:—Produce Market.—The amount of business done in this market is almost wholly limited to orders which were given some time since: no new transactions of any moment are reported. The increasing depression in the home market has not as yet had the effect of inducing holders of produce here to lower their demands, and, pending some considerable reduction, shippers would hardly be disposed to enter the market. Import Market.—A limited business has been doing, mainly attributable to the fact of importers consenting to a decline in rates, but, notwithstanding this temporary reaction, the present condition of our import market is as far as ever from being satisfactory.

Same time 1860		143	31	140

The market was buoyant on Saturday, when the sales were pretty heavy at full prices. The European advices were less favourable than was anticipated, however, and the demand abated, while the market became somewhat depressed, and prices favoured the purchaser to the extent of about ⅛c per lb, to which we adjust our quotations. The sales aggregate 9,500 bales, including 5,500 in transit. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florids.	Mobile.	New Orleans and Texas.

Good middling	13⅜	13⅝	13¾	14⅜
Middling fair	14	14¼	14¼	15

NEW YORK, April 13.—The market is unsettled, lower and dull, and the three day's sales aggregate only 2,500 bales to spinners and exporters, mostly the former, closing heavy at the annexed quotations:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	10¼	10¼	10¼	10¼

There has been a good demand for cotton during the past week. The trade have bought freely, and a considerable business has been done by speculators and for export. Prices have been well maintained, but we make little change in our quotations. Egyptians have been in fair request at steady prices, but the supply is abundant. Brazils are without alteration. East India are firm at last week's prices. The sales to-day are 15,000 bales. The market rather excited. The reported export amounts to 12,050 bales, consisting of 5,440 American, 50 Brazil, and 6,560 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand this week from the manufacturing districts are, on the whole, very favourable. The demand for goods, both for home use and export, has increased, and prices, generally, are well supported. The iron trade has shown more firmness, and the coal trade has shown signs of animation.

MANCHESTER, April 25.—The market has continued to be forced up, but very slowly, by the price and prospects of cotton. The chief transactions were at the end of last week and beginning of this, and consisted more especially of shirtings in 7 lbs to 8¼ lbs, and a few T'cloths and longcloths for India and China. The extremely low prices to which the common sorts of printing cloths have fallen, seem to have tempted buyers to take off some of the cheaper lots for their immediate requirements, but neither in this nor any other branch of the trade does there seem to be any spirit of speculation. Makers of domestics and heavy goods cannot obtain for their cloths more than the merest fraction over what has now for some time been paid for the yarn. Both weaving and export yarns have been in little request, but higher rates are sought.

BRADFORD.—A good deal of wool has changed hands during the past week, but not so much as during the previous fortnight. Skin wools are much sought after, and there has recently been more doing in Coburg wools. Some sorts of fleece wools and matchings are difficult to meet with. Stocks in the hands of staplers are not large. There is rather more doing in yarns by the export houses. In the home trade there is but little increase in the consumption. The fine weather we are now enjoying inspires the home merchants with better hopes for the future, and they have been doing rather more in spring goods. The goods, however, are bought out of stock, and manufacturers do not feel at present benefited.

HUDDERSFIELD.—Business has been brisker than for many weeks back. Many parcels of black doeskins and regular market goods in fancy trouserings have been disposed of. Several buyers from French and German houses have been in attendance, and have purchased, though cautiously, in first-class fancy trouserings, and have also ordered from several makers of these goods lighter makes in autumn and winter styles. The local wool trade continues quiet, manufacturers purchasing small parcels cautiously.

LEEDS.—Stocks of last year's goods still encumber to some extent the shelves of the drapers, and until these are cleared off there is not much prospect of an active trade being done in this year's novelties. Under all these drawbacks, however, purchasers only obtain easier terms in exceptional cases.

LEICESTER.—The hosiery trade remains quiet, and there has not been an average amount of business doing this week. Home orders are by no means prolific, and very little is doing for shipping. At Loughborough and the adjacent country districts trade is dull. Yarns are not altered in value. Wools are firm, and high prices continue to be realised for superior sorts.

NOTTINGHAM.—There is no improvement to notice in the state of the lace trade. Cotton goods are not so much in demand as they were a week ago. Very little is doing in plain nets, and fancies are a very dull sale. There is a fair demand for silk lace articles suitable for trimmings.

BELFAST.—Flax—The markets of the county Armagh district were largely supplied last week, with an active demand at full rates. Yarns—Although a fair amount of business has been doing for home consumption, transactions have not been equal in extent to those of week preceding; foreign orders limited. Stocks show no increase, but rather the reverse. Prices are very firm, and forward orders, in some instances, declined at present rates.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, warm air, 4*l*; Old Windmill End Mine forge pig iron, 3*l* 7*s* 6d to 3*l* 10*s*; best native hydrate pigs, 3 10*s* to 4*l*; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 10*s*; Seend Grey Forge Mine pig iron, 3*l* to 3*l* 2*s* 6d; Seend Mine melting pigs, 3*l* 10*s* to 3*l* 15*s*; good mine pigs, with a modicum of flue cinder, 2*l* 10*s* to 2*l* 15*s*; mine pigs, deteriorated by cinder, 2*l* 7*s* 6d to 2*l* 12*s* 6d; Cleator Moor hæmatites, 3*l* 6*s* 3d to 3*l* 7*s* 6d; Barrow hæmatites, 3*l* 6*s* 3d to 3*l* 7*s* 6d; Workington hæmatites, 3*l* 6*s* 3d to 3*l* 7*s* 6d; grey forge cinder pig iron, 2*l* 5*s* to 2*l* 10*s*; white forge cinder pigs, 2*l* 2*s* to 2*l* 7*s* 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12*s* 6d to 2*l* 17*s* 6d; superior makes of mine melting iron, 3*l* 2*s* 6d to 3*l* 15*s*, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Favourite Shropshire and Forest of Dean brands, hot blast, 3*l* 12*s* 6d to 3*l* 15*s* delivered; Northern hæmatites from 3*l* 2*s* 6d to 3*l* 7*s* 6d, according to brand or quality.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The transactions in English wheat, in most of the leading markets held this week, have been only moderate; nevertheless, prices of all kinds have continued firm. There has been a fair, but by no means active, inquiry for foreign wheat, at previous currencies. The barley trade has shown rather more firmness, and the quotations have been well supported. Malt has moved off slowly. Oats have found buyers somewhat readily, and the value of both beans and peas has had an upward tendency, Flour has remained unaltered in value.

The demand for wheat in the near continental markets has been chiefly restricted to small parcels, at full quotations. Barley, oats, beans, and peas have realised extreme rates, and the shipments to England continue on a liberal scale. Letters from New York state that no change of importance had taken place in the value of either wheat or flour. The quantity of the former on hand in the interior of the country is still represented as very extensive for the time of year.

In Scotland, both wheat and barley have been held at very full prices; but the business doing in them has not increased. Oats of fine quality have produced rather more money.

The Irish markets have been very inactive for wheat, at about previous quotations. Spring corn has sold at full prices, and rather large parcels have found buyers for shipment to England.

To-day's market was again scantily supplied with English wheat; nevertheless, all kinds changed hands slowly, at about Monday's currency. The transactions in foreign wheat were of a limited character, but without leading to any quotable change in prices. Malting barley moved off steadily, at full quotations; otherwise, the demand was in a very sluggish state. Oats, beans, and peas fully maintained previous rates. The flour trade was heavy, and prices were barely supported.

Floating Cargoes.—Since the 17th inst. there have been 31 arrivals off coast for orders, consisting of 11 cargoes of wheat, 11 maize, 5 barley, and 4 miscellaneous, viz.:—Wheat, 3 cargoes from Santander, 1 Odessa, 2 Trieste, 1 Berdianski, 1 Galatz, 3 Alexandria; maize, 1 Alexandria, 3 New York, 2 Vienna, 1 Philadelphia, 1 Venice, 1 New Orleans, 2 Baltimore; flour and maize, 1 Philadelphia; barley, 1 Odessa, 2 Constantinople, 1 Smyrna, 1 Alexandria; beans, 1 Saffi, 2 Alexandria. Several of the above had found buyers before arrival. There has been a very limited business in cargoes afloat since this day week, the following being the only reported sales up to the close of to-day's market:—Wheat, arrived, per 492 lbs, Venetian at 57*s* 6d; New Odessa Ghirka at 52*s* 9d; Kanizza at 56*s* and 53*s*; per imperial quarter, Saide at 39*s* 6d; for shipment per steamer, per 488 lbs, Banat (a small parcel) at equal to 58*s* 6d. Rye, arrived per 480 lbs,, Eupatoria at 32*s* (for London). Maize, arrived per 480 lbs Mazagan (warm throughout and spot damaged) 36*s* tale quale; American yellow, 38*s* 6d; on passage, a cargo of American, the white at equal to 40*s*., the yellow to 38*s* 3d. Barley, arrived, per 400 lbs, Scala Nova, 26*s* 6d.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 24th day of April, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,802,960	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	11,437,102
		Silver Bullion	890,858
	26,802.960		26,802,960

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10 272,938
Rest	3,183,435	Other Securities	17,956,119
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4 757,607	Notes	6,763,975
		Gold and Silver Coin	788,989
Other Deposits	12,604,075		
Seven Day and other Bills	683,904		
	35,782,021		35,782,021

Dated the 25th April, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,722,889	Securities	28,151,057
Public Deposits	4,757,607	Coin and Bullion	13,116,949
Private Deposits	12,604,075		
	38,084,571		41,268,006

The balance of Assets above Liabilities being 3,183,435*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£265,359
An INCREASE of Public Deposits of	561,701
A DECREASE of Other Deposits of	775,861
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	458,650
A DECREASE of Bullion of	15,254
An INCREASE of Rest of	5,615
An INCREASE of Reserve of	240,076

The above return is more favourable than might have been expected. Notwithstanding the large withdrawals of gold for exportation, the bullion shows only a slight decrease, while a considerable augmentation has taken place in the reserve. The other securities exhibit a falling off, attributable to the general contraction of trade.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,950,889	£ 21,277,952	£ 22,705,780	£ 22,336,092	£ 20,722,889
Public deposits	4,308,927	3,850,150	5,249.296	6,251,582	4,757,607
Other deposits	9,812,983	15 657,+48	15,334,625	14,602,278	12,604,075
Government securities	13,929,905	9,885,481	11,871,118	9,728,943	10,272,938
Other securities	11,509 951	15,455,430	17,505,501	22.070,236	17,956,119
Reserve of notes & coin	7,420,942	12,736,145	10,176,717	7,526,875	7,552,964
Coin and bullion	13,289,847	18,674,750	17,640,342	14,687,120	13,116,949
Bank rate of discount	2 p. c.	3 p. c.	3½ p. c.	5 p. c.	5 p. c.
Price of Consols	96⅞	97⅛	89½	95	92
Average price of wheat	39s 3d	44s 9d	41s 4d	49s 6d	56s 9d
Exchange on Paris (shrt)	25 5	25 2¼ 10	25 2¾ 10	25 10 17½	25 12½ 20
— Amsterdam ditto	11 15½ 16	11 15	11 14	11 14½ 15	11 15½ 16½
— Hamburg (3months)	13 7¼ 7½	13 6½	13 4½ 5	13 5¼ 5½	13 6¼ 7¼

In the corresponding week of 1851, attention was almost exclusively directed to the approaching opening of the Great Exhibition. The money market was easy, notwithstanding that for some weeks there had been a diminution in the bullion at the Bank. The principal event abroad was the progress of the insurrectionary movement in Portugal under Marshal Saldanha.

In 1858, the position of Lord Derby's Government was imperilled through the course taken by the Parliamentary debates on the India Bill. The funds, however, were supported by the plethora of money, as well as by the reinvestment by holders of 2,000,000*l* of Exchequer bonds about to be paid off.

In 1859, the expectation of an immediate outbreak of war between France and Austria, combined with the positive statement that France and Russia had concluded an alliance, supposed to be specially directed against England, had caused a panic in the Stock Exchange. Within a single week Consols had receded from 94½ to 88½. The fall amounted to 20 to 22 per cent. in Turkish bonds, 9 to 10 per cent. in Russian and Sardinian, 9 per cent. in East Indian railway stock, 5 to 9 per cent. in British railway stocks, and 3*l* to 4*l* per share in French and Lombardo-Venetian railway shares. The last Indian debenture loan had declined to 5 per cent. discount, and French Three per Cents. from 66½ to 63. The Bank rate of discount had been raised promptly from 2½ to 3½ per cent., preparatory to a further advance.

In 1860, the Reform Bill was being debated at great length in the House of Commons to the exclusion of much other pressing business. The advices from India announced the outbreak of disturbances in the indigo districts. From abroad, the principal news was the retirement and suicide of Baron Bruck, the Austrian Minister of Finance. The Spanish Government had discovered and arrested the Count of Montemolin.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 1,696,968*l*; in 1858, an excess of 202,218*l*; in 1859, a deficiency of 2,170,876*l*; and in 1860, a deficiency of 7,467,958*l*. In 1861, the deficiency is 5,352,044*l*.

DISCOUNT AND MONEY MARKET.—The renewal of shipments of gold to the Continent, which has led to some considerable withdrawals from the Bank, and the augmented drain of silver to the East, have been attended by an increased demand in the money market this week. The general rates, however, still remain below the Bank *minimum*, the best bills being taken at 4½ per cent. Owing to the absence of any revival in trade, the supply of capital continues abundant, and hence the comparatively low value of money, notwithstanding the general desire to discount as cautiously as possible. On the Stock Exchange the large purchase of the London and Westminster Bank of more than half-a-million in the funds caused money up to this morning to be very easy, and loans on Government securities were offered at 2 to 2½ per cent. In the afternoon, however, there was a sudden increase in the demand, and the terms finally charged were 3 to 3½ per cent.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	3½
Frankfort	3	2½
Amsterdam	3	3
Turin	6	5½
Brussels	4	4
Hamburg	...	2½
St Petersburg	6	...

ENGLISH FUNDS.—The funds opened on Saturday at a reaction of an eighth, and remained without fluctuation until Wednesday, when the positive announcement that the French troops will quit Syria at the stipulated period was followed by some animation and a slight temporary rise. This improvement, however, was not maintained, and the news from New York to-day has caused increased depression, although less than might have been expected, from a belief that the statements of the American press are much exaggerated. Consols for the account, which left off last Friday at 92⅛ to ¼, declined in the early part of the week to 92, but were afterwards again buyers at 92⅛. From this point, however, a reduction took place to-day to 91⅞, at which they remained alternately buyers and sellers until the close, when the quotation was 91⅞ exactly. For money the last price is 91¾ to ⅞.

Exchequer bills and India bonds have not maintained their recent rise, and were respectively quoted this evening 3s discount to par, and 16s to 10s discount.

The new Indian loan has been in less demand this week, investments having ceased for the present. The price, however, remains tolerably steady at 101⅝ to ⅞.

FOREIGN STOCKS.—There has again been little business doing in foreign stocks during the week, and the fluctuations have been mainly confined to Turkish Six per Cents. The announcement that at the request of the Turkish Government two English officials have been authorised to proceed to Constantinople to assist in an investigation of the finances of the Empire, with the view to their adjustment on a sounder basis, caused at one time a temporary advance in the 1858 loan, but the price has since relapsed. The stock of 1854 has been comparatively steady. The changes in Mexican are unimportant, but the final price to-day shows less firmness. Spanish descriptions have been rather more

in demand, while Brazilian and Russian continue to present an unfavourable tendency.

The closing price from Paris this evening was 68f 65c, showing a rise of three-eighths per cent. compared with yesterday, and of nearly a half on the week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

	Consols, Money		Consols, Account		Exchequer Bills.

Railways and other Shares.—The railway market continues inactive, and the quotations have generally followed the movements in the funds. The want of business in this department is more marked than for a long time past, neither speculative nor *bonâ fide* transactions taking place to any extent. Up to this morning no material variation had taken place, but the adverse news from America then caused an unfavourable turn. Compared with last week, prices show a general decline. South-Eastern has been additionally heavy from the expected competition of the London, Chatham, and Dover. London and North-Western has also been prejudiced by some sales of money stock.

In the colonial market, Indian guaranteed stocks remain quiet, but firm. Canadian have been rather dull, especially to-day.

Foreign descriptions have been steady. A further recovery being announced in Lombardo-Venetian shares on the Paris Bourse, a corresponding improvement has taken place here, the final price being 1 to ⅞ discount.

American railway securities haye fallen considerably to-day, Illinois Central shares being quoted 30½ to 29½ dis., and New York and Eries, 23½ to 24½.

In the miscellaneous market, Great Ship shares were flat at 4s to 4s 6d.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

	Railways. Closing prices last Friday.	Closing prices to-day.

Foreign Exchanges.—On Tuesday there was a good demand for bills, and the rates generally showed a decline. To-day the tendency was more favourable, and the quotations for Amsterdam, Hamburg, and Paris were higher.

Bullion.—The principal event in the bullion market this week has been the purchase by the Council of India of the whole of the silver bullion in the Bank of England, 848,362*l* by the last return, which will be forwarded to the East on Government account by the succeeding mails. The following is the weekly circular of Messrs Pixley, Abell, and Langley, upon the general movements in the market and the transactions in Indian rupee paper:—

Gold.—The gold ex Kooria Mooria has been delivered, and has all been taken for exportation. The demand for the Continent has revived within the last day or two, and in the absence of supplies, about 120,000*l* has been withdrawn from the Bank. Arrivals of gold from Australia are now hourly looked for, nearly 800,000*l* being now at sea, of which about 390,000*l* may be considered as due. Some amounts of gold have been received from Constantinople, and the Africa has brought 15,000*l* from New York. Some small sums have, however, been sent to America, the Arabia having taken 13,600*l*, and the City of Baltimore 5,000*l*.

Silver.—Since the date of our last circular silver has been in demand, and the price has risen to 61¾d per oz standard; a considerable amount has been purchased at this rate, and the shipments to Bombay by the steamer of the 27th inst. are likely to be large. The next West India steamer is expected on the 29th inst., and is supposed to have a rather large amount of specie on board; this, however, cannot be delivered in time for the next outward mail to Calcutta and China, and some purchases have already been made for the steamer which will leave Southampton on the 4th May. We quote the price as 5s 1¾d per oz standard. The Alhambra has brought 3,150*l* from Lisbon, and the Pera 300*l* from Alexandria.

Mexican dollars have again been in demand during the past week, and as the quantity obtainable has been but small, the price has again advanced; the closing price has been 5s 0⅞d to 5s 1d per oz.

Exchange on India for bank's drafts at 60 days' sight, we quote 1s 11½d to 2s 0¼d for Calcutta, and 1s 11¾d to 2s 0⅛d Bombay. Some transactions have taken place below these quotations, viz., 1s 11½d Calcutta and 1s 11⅝d Bombay, but the transactions were exceptional, and this rate was yielded to effect large sales.

India Government Loan Notes are almost in the same state as at date of our last. 5½ per Cents. may be quoted 100 to 100½; and 5 per Cents., 94.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, refinable, 77s 10½d per oz std. Silver—Bar silver, 5s 1¾d per oz std, last price; bar silver, containing 5 grains of gold, 5s 2d per oz std, last price; fine cake silver, 5s 6⅜d per oz, last price; Mexican dollars, 5s 0⅞d to 5s 1d per oz, last price; Spanish dollars (Carolus), 6s 6d per oz, last price.

The precise amount of specie that will be sent by the Bombay steamer to-morrow is 397,140*l*, of which 66,150*l* in gold and 328,990*l* in silver are for Bombay, and 2,000*l* in gold for Alexandria. Included in the above is a Government remittance of 90,370*l*.

It is reported that further orders for gold have been received from New York by the present mail, and the steamer to-morrow will probably take a small sum.

About 36,000*l* in gold was withdrawn from the Bank yesterday, and about 16,000*l* this afternoon. The latter amount is for Spain.

The silver market to-day has been quiet, but firm.

Public Companies.—The annual meeting of the Oriental Bank was held on Monday, when the report, recommending a dividend and bonus of 7 per cent. for the past half-year, making a total distribution of 16 per cent. for 1860 free of income tax, was unanimously adopted. From various causes, but chiefly the stagnation in trade in several parts of India, the profit has been rather less than in the previous year; but, on the other hand, the public have shown increased confidence in the bank by largely augmenting their deposits. Since the commencement of the bank, between nine and ten years ago, the capital has been raised from 600,000*l* to 1,260,000*l*, and the dividends paid have been 1,329,000*l*. Each of the original shares of 25*l* has received 31*l* 5s, and now stands in the market at a price double the nominal amount. In answer to questions, it was stated that the Oriental has incurred no loss whatever by the failure of the London and Eastern Bank. The Directors have hitherto found the practice of allowing interest on deposits in Australia advantageous; but with reference to their future action it has not been determined whether to continue it or not. It is not intended to make any further

addition to the reserve for the present, the amount at which it now stands, viz., 252,000*l*, or 20 per cent. of the paid-up capital, being considered sufficient.

A requisition having been presented to the Directors of the Bank of Turkey, for the winding up of that concern and return of the deposits, the following reply has been issued ;—

57 Coleman street, London, April 18, 1861.

Gentlemen,—We have submitted to the Directors of the Bank of Turkey the requisitions from certain shareholders, which were enclosed in your letter of the 13th inst., and we are desired by them to state that the subject to which you drew their attention has been long under their consideration. They feel that, notwithstanding the value they attach to the concession from the Turkish Government, the time must soon arrive when a final decision must be come to as to the possibility of carrying out the objects of the undertaking; and with this view they have sent Mr Elkin, an officer of the bank, to Constantinople to ascertain what are the intentions of the Government of Turkey, and to protect the interest of the shareholders of the bank. The Directors regret this unavoidable delay; but as soon as they hear from Mr Elkin they will communicate to the shareholders the result of his mission.—We are, Gentlemen, yours,

(Signed) Crowder, Maynard, and Co.

The annual meeting of the Royal Mail Steam Company (West India) took place on Wednesday, when the report was adopted, and the usual dividend declared of 2*l* per share free of income tax. It was stated that the receipts during the past half-year show an increase, notwithstanding the competition to which the Company is subjected on the Brazil line. A considerable part of the augmentation under the head of freight, arises from the development of the through traffic arrangements with the Pacific Steam and Panama Railway Companies. The expenditure for repairs and machinery has been less than the percentage appropriated for this purpose by 9,271*l*, and the balance against the repair and renewal account has consequently been reduced by that amount. Through various accidents to the Company's ships towards the close of last year, the regularity of the service was to some extent disturbed, but the resources of the Company enabled them in a very brief period to restore it to perfect order, and the working has since continued satisfactory. A list of the Company's fleet shows an aggregate of 24 steamers of 44,345 tons register and 11,730 horse-power. Of these, 17 are of 1,700 tons and upwards.

The Directors of the Great Ship Company have issued a circular to their principal shareholders, proposing to raise 35,000*l* in debentures, of which about 19,000*l* will be required to meet Mr John Scott Russell's claim. The Directors and others have already subscribed for about 17,000*l* of the total required.

A Mutual Annuity Endowment and Tontine Association has been formed, under the supervision of Directors of the Mutual Assurance Society. The object is to enable persons to make provision for the probability of protracted longevity, tontine assurance being the very converse of life assurance in its ordinary acceptation. The latter is a provision against the contingency of early death, while the benefits of a tontine accrue to those who live the longest. Both equally are the result of prudential motives and a desire for maintaining independence. Many persons are able, from official position or otherwise, to calculate upon a permanent income, but not upon the means of leaving an income to their children. These constitute the class to whom life assurance is essential. Others find themselves in the enjoyment of a prosperous business, which enables them to place their children out in the world, but which, being liable to all the casualties of fashion or changing trade, may prove merely temporary, so that in old age they may become dependent on others. These are the persons who would look to the advantages of a tontine assurance. The interest payable under such an assurance increases year by year, in proportion as any of the subscribers die off, and after a certain period the entire principal is divided among the survivors. Those who have faith in their own longevity thus find comfort in the knowledge that, instead of becoming a burden upon relatives from the incapacities of age, every additional year of prolonged life will bring with it increasing means. On the Continent this system has been more popular and successful than that of life assurance; but in this country its introduction on safe principles seems to have been almost entirely neglected. Nothing, however, admits of more easy management. The plan is to classify subscribers according to their respective ages; to invest the sums paid in in funded or mortgage securities, giving periodical accounts of the nature of these investments; to divide the interest from such investments each half-year among the subscribers; and finally, when only a certain proportion of the subscribers remain, to hand over to them the entire principal. Of course various modifications of the system can be offered to meet the wants of particular classes, and examples to that effect are given in a series of tables. Some persons would prefer to take no interest, but to leave the subscribed amounts to accumulate at compound interest for a fixed period, such as 5, 10, or 20 years, and then to be distributed among the survivors. As a provision for children, in the event of their attaining an age when a sum would be required to start them in a business or profession, this would be the form selected; and there is, in fact, no contingency connected with the provision for the receipt of pecuniary benefits at a future date to which the system cannot be adapted.

A new Company has been started, with every element of success, under the head of the Natal Land and Colonisation Company. When we consider how well the land on the eastern part of Cape Colony appears adapted for the cultivation of cotton, sugar, and other articles at present only grown in limited quantities, and also that the shipments of wool to England, from Algoa Bay and Port Natal, last year, amounted to nearly 46,000 bales, we can scarcely hesitate to say that the undertaking is one of the utmost importance, and one which equally concerns Great Britain as Natal itself. A considerable number of the shares have already been taken up, and the present quotation for them is $\frac{7}{8}$ to 1 premium.

Another important Company, with the object of transmiting passengers and goods between Liverpool and New Orleans direct and *vice versâ*, has been announced, with a capital of 200,000*l* in 4,000 shares of 50*l* each. This also must meet with the approbation of all persons connected with the trade of the Southern States of America and the Port of Liverpool.

Failures and Mercantile Embarrassments.—Advices from Marseilles announce the suspension of Messrs Gabriel Hava and Co., and Demetrius Balthazzi and Co., Levant merchants and bankers, at that port. In the former case the liabilities are large, nearly 700,000*l*, of which about 80,000*l* will fall upon England. Those of Messrs Balthazzi are less, being about 200,000*l* in France and 20,000*l* in England. Last September the engagements of the two firms were four times the present amount, but with the assistance of the Bank of France the two houses have been gradually realising their resources, a proceeding which has involved great sacrifices. This assistance has been suddenly stopped, and in some well-informed quarters it is said that political motives are the cause. The two houses are large creditors of Turkey, and it is reported that the refusal to continue further advances has been made by order of the French Government, who desire, as liquidators of the estates, to have a further hold upon Turkey. The Bank of France have installed two clerks in each of the establishments at Marseilles, with a view to have the whole ramification of the business with the Turkish Government clearly before them. Mr Hava, of London, is not in partnership with his brother at Marseilles.

In consequence of the above suspensions, and the serious effect they may possibly produce, the representatives of the Greek firms in London held a meeting on Wednesday, and agreed to send two persons to confer with the Bank of France. It is hoped that if the advices from Constantinople prove favourable, no further disaster of any magnitude will take place.

An adjourned meeting of creditors of Messrs Leone Rodocanachi and Co., Greek merchants, who suspended last January, was held on Tuesday, when an amended balance sheet was presented, showing liabilities 101,937*l*, and assets 134,993*l*. This result agrees very nearly with the estimate formed at the previous meeting. Mr Coleman, the accountant in the case, explained that the suspension was a most judicious step, and had saved a great sacrifice of property, thus ensuring to the creditors ultimately 20s in the pound. Up to Saturday last the firm were in a position to name a defi-

nite period for meeting all their engagements, but the failures at Marseilles on that day, which may delay the realisation of property at Constantinople, have caused a modification of the time necessary for that purpose. Nevertheless, Messrs Rodocanachi were prepared to meet all their liabilities in the following manner, viz., 8s in cash, and three instalments of 4s each at six, twelve, and eighteen months, with 5 per cent. interest. Some discussion took place whether the estate should be liquidated in this mode, or the assets divided as fast as sufficient for a 2s payment should come in, but eventually the following resolution was passed:—

Messrs L. Rodocanachi and Co. having submitted a statement of the actual amount of liabilities of their firms in England, France, and Turkey, and given particulars as to the realisation of their several estates to this time, by which it appeared there were sufficient proceeds to admit of a division equal to 40 per cent., say 8s in the pound, to be paid at once:

Messrs L. Rodocanachi and Co. having also stated that they expected to be enabled to pay the remainder of their liabilities by further instalments of 4s in the pound in the month of November next, 4s in the pound in the month of May, 1862, and the remaining 4s in the pound in the month of November, 1862, and interest at the rate of 5 per cent. on the full amount of their liabilities, together with notarial charges on the bills, Messrs L. Rodocanachi and Co. reserving to themselves the right of anticipating such aforesaid payments should they be able to do so:

It was resolved,—That such instalment of 8s in the pound shall be made payable on the 1st day of May next, and that the further liquidation of the estate be left with Messrs L. Rodocanachi and Co.

At an adjourned meeting of creditors of Mr D. Navone, Greek merchant, who suspended in January last, it was stated that the liabilities coming on the estate were 31,400*l*, and the estimated assets 5,900*l*. From the nature of the latter, however, any substantial return to the creditors will be remote. A year and a half ago, Mr Navone had a capital of 7,000*l* to 8,000*l* which is now lost. It was resolved to liquidate under a deed of inspectorship.

The following circular has been issued with regard to the affairs of Mr E. Vitalis in the Levant trade, who failed early in February:—

7 Gresham street, April 25, 1861.

I beg to inform you that, with the concurrence of the inspectors to his estate, Mr E. Vitalis has since the date of my last communication proceeded to Constantinople, with the view of effecting arrangements with his principal debtors there, upon the liquidation of whose estate the result of his own will mainly depend. In pursuance, however, of the resolution passed at the general meeting of creditors, held on 27th February, a *pro forma* meeting took place here to-day, and was again adjourned until the 27th May, on the understanding that I am to summon one prior to that date if any intelligence of sufficient importance is received from Constantinople, Mr Vitalis having been there too short a time to enable him up to the present time to send home any reliable report as to the probable settlement of his affairs.

I may in addition state that I am advised, through independent channels, that the settlement of his debtors' affairs, as well as of his own firm, is likely to prove satisfactory.—I am, &c.,

CHARLES F. KEMP.

The creditors of Messrs Cook and Greenwood, wine and spirit merchants, have held a meeting, but nothing definite was decided, although some of the parties interested were willing to accept a composition. The estate will probably go into bankruptcy. The liabilities were announced to be 14,850*l*, with net assets valued at about 6,800*l*.

The adjourned meeting of creditors of Messrs Behrends and Co., East India merchants, called for Tuesday, has been postponed to the 2nd of May.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is nearly 4-10ths per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 425 per mark, and the short exchange on London is 13.5 per 1*l* sterling. Standard gold at the English Mint price is, therefore, at about the same price in London and Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 107 to 107¾ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England. But, after making allowance for loss of interest and charges of transport, the present rate leaves no profit on the transmission of gold to the United States.

Imports of the week ..... 151,042 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark lane, to-day, both English and foreign wheat changed hands slowly, at about Monday's currency. Fine barley was firm in price, and the best oats were held for rather more money. Other kinds of produce, including flour, were steady. The imports from abroad are 44,450 quarters of wheat, 3,600 barley, 16,910 oats, and 2,170 sacks of flour.

The Liverpool market, held this morning, was steady for wheat, at full prices; but all other articles were a dull inquiry.

There has been a large demand maintained throughout the present week in the Liverpool cotton market, resulting in total sales of 80,000 bales, including 55,000 bales to spinners, 13,000 bales on speculation, and 12,000 bales for export, and these transactions have taken place in the face of very heavy arrivals during the week. Prices up to yesterday were about ⅛d per lb dearer than last Friday. This morning, news from America having arrived reporting the commencement of hostilities in the States, the market became very excited, and the sales have amounted to 20,000 bales, which might probably have been doubled, if holders had not mostly withdrawn all their cotton from the market, or demanded an immediate advance of ⅛d and ¼d per lb. If such accounts are received again on Monday from America, a very excited market may be expected next week in Liverpool, with high prices.

"Our market for cotton has been animated," write Messrs Briggs and Co., of Alexandria, whose communication is dated the 11th inst., "and prices have somewhat advanced. Qualities continue to deteriorate, and even the arrival of Princes' growth are very inferior. The following have been the transactions since the 4th:—5,749 bales ordinary to middling, 6.68d to 7⅛d; 2,529 bales good middling to fair, 7.55d to 7.80d; 653 bales good fair, 7.90d to 8.30d per lb f.o.b.—total, 8,931 bales. Freights—By steamer, 7-16ths per lb in full; by sailing ships, ⅜ths to ⅝ths and 5 per cent. per lb. Exchange—On London, dull at 96 piastres per £ sterling.

"The crop question is attracting less attention," observe Messrs Neill Brothers, of New York, "and there remains little of fresh interest to be said respecting it. It has become a settled conviction with all parties that the bulk of the crop has already been sent to market, and there is now little cotton to come forward. The receipts at the ports by mail dates amount to 3,250,000 bales; and estimating the future deliveries at 250 to 300,000 bales, and the overland cotton from Memphis, with annual corrections, at 200,000, would make a total of 37 to 3,750,000. The smaller of these figures has the most supporters at the present time, and at the South it is considered an outside estimate. The stock of cotton in all the interior markets on the 1st instant only amounted to 45,000 bales against 118,000 last year. The high scale of prices which has lately been attained in our markets will draw the full balance of the crop to market, and the country will be thoroughly cleared of old cotton before we get any of the next crop."

The public sales of tea have gone off steadily, and prices have been well supported. Privately, the demand is steady.

The following intelligence, dated Hong Kong, March 16, refers to the state of the tea and silk trades:—

Canton Silk—Nothing done, and quotations nominal. Tea—Settlements have been small, and no reduction can be quoted for black teas, though for the lowest grades rather easier prices would probably be taken. In greens hysons show a decline, other descriptions, being held for previous extreme rates. Scented kinds are neglected. Sales, stocks, and prices are as follows:—Congou—Sales, 6 chops; Ohnams, 20 to 24 taels; Oopacks, 27 to 31½ taels; Ningchow, 22 to 25½ taels. Stock, 55 chops. Souchong—No sales. Stock, 3 chops. Canton-packed congou, 500 half-chests, at 18½ to 19½ taels; scented orange pekoe, 1,000 boxes, at 26 to 27½ taels; scented caper, no sales; Canton gunpowder, 600 boxes, at 23 to 24 taels. Country Green Teas—Sales, 800 packages; stock, 400 packages. Prices:—Hyson skin, 20 to 22 taels. Young hyson, cargo kind, 25 to 30 taels; ditto, medium to finest, 36 to 46 taels. Hyson, cargo, 32 to 34 taels; ditto, good to superfine, 38 to 55 taels. Gunpowder and imperial, 35 to 52 taels. Freights to London, 2*l* 10s. Amoy advices are to the 11th inst. In imports transactions have been very trifling. Foo-chow advices are to the 8th inst. Tea—Transactions have been on a limited scale, being checked by the small quantity of available teas in the market, and extreme rates asked by holders. Further purchases have been made for the colonies. Supplies from the country are small, and chiefly of low and inferior quality. In Oolongs a few hundred packages have been settled for England. A small sale of Pekoes is reported at full rates. Green Teas—One chop (230 half-chests) have been sold at 25-5 taels short; muster packages, of about 1,300 half-chests, are to hand. On comparing prices with those current on the 23d of February, there is an advance of 5 mace to 1 tael on common, and fully 1 tael on medium kinds and Ningchows. Settlements are as follows:—Congou, 10,850 chests, at 10 to 21-5 taels; Oolong, 1,070 half-chests, at 19 taels; Pekoe, 250 chests, at 21-5 to 30 taels. Shanghai advices are to the 8th inst. Silk—Settlements for the fortnight amount to 2,500 bales, making a total for the season of 74,000 bales. Previous to the receipt of the London advices of the 10th January a further advance of 10 taels per lb took place for No. 3 Tsatlee. No sales have been made since the arrival of the mail, but the lower qualities might be purchased at a reduction of 5 taels to 10 taels. Quotations are:—Tsatlee, No. ½, none; ditto, No. 3, 430 taels; ditto No. 4, 410 taels; ditto, inferior, 370 taels to 390 taels; Tayeaam, No. 1, none; ditto, No. 2, 340 taels; ditto No. 3, 300 to 310 taels; ditto, No. 4, 280 taels; ditto, inferior, 240 taels to 270 taels. Total export of silk from China to Europe is 72,523 bales, against 53,821 bales last year, or an increase for this season of 18,702 bales. Tea—Scarcely any supply of black tea brought to market during the fortnight. The only settlement reported is 300 chests congou, common Hohm, at 20 taels D.P. Quotations are unaltered. No direct supplies of green have yet arrived from the country. Freights to London, 2*l* 10s to 3*l* for tea, and 4*l* to 4*l* 10s for silk; to New York, 10 dols to 12 dols for tea. The total export of tea from China to Great Britain is 72,723,100 lbs, against last year 69,085,200 lbs, or an increase for this season of 3,637,900 lbs. To the United States the export is 22,055,700 lbs, against 28,105,400 lbs last year, showing a decrease for this season of 6,050,700 lbs.

On the whole, a full average business has been passing in raw sugar, at quite last week's currency. Refined goods have continued steady in price.

We have no change to notice in the value of coffee, but the demand has continued somewhat active.

Rice has moved off slowly, and the market, generally, is heavy.

In English wool, there has been less doing; nevertheless, prices have ruled firm. Colonial and foreign parcels have ruled about stationary in value. The next series of public sales will commence on the 9th proximo, when the following quantities will be offered:—Sydney, 12,631 bales; Port Philip, 14,008; Tasmania, 4,388; Adelaide, 11,735; Cape, 6,538; Swan River, 1,000; and New Zealand, 1,052—total 51,352 bales.

Hemp, flax, and saltpetre have commanded very little attention. Scotch pig iron has sold at 48s 9d. Tin has advanced 4*l* per ton.

There has been a great revival in the Scotch pig iron trade since

an amelioration was first observable in the commercial prospects of the country. Thus the shipments have expanded as follows:—

	1861. Tons.	1860. Tons.
Week ending March 9	7,117	11,114
— — 16	7,982	9,656
— — 23	8,206	10,037
— — 30	10,169	8,345
— April 6	14,992	12,275
— — 13	14,419	11,673

The oil market has been devoid of animation. Prices, however, have continued steady. Spirits of turpentine have realised 31s to 32s per cwt.

The tallow market is firm as to price. To-day, P. Y. C., on the spot, has sold at 59s; April to June, 59s; October to December, 55s 9d per cwt.

"For money, the demand is very limited," observes the New York *Shipping List* of the 10th inst., "and borrowers with good security have but little difficulty in making almost their own terms. Rates, if anything, are lower; prime paper continues very scarce; short dated passes freely at 5 per cent. and long at 5½ to 6½. On call, the supply as usual of late is much in excess of the necessities of the general public, and we not unfrequently hear of the brokers' refusing balances at 4 per cent. We repeat the quotations in our last:—

	Per cent. per annum.
Loans on call, stock securities	4½ to 5½
Do. other good securities	6 6½
Prime endorsed bills, 60 to 90 days	5½ 6
Do. 4 to 6 months	6½ 7
First-class single signatures	6½ 7
Other good bills	8 9
Names less known	12 24

The weekly statement of the city banks, as was expected, exhibits a further argumentation of the specie reserves, and a moderate extension of the loans and discounts, resulting from the readiness of the banks to lend money on the Government loan, rather than from any increased demand for accommodation on the part of the business community. The negotiation of the 5,000,000 dols Treasury notes, in the course of a few days, will relieve the plethora a little. We annex the usual summary compared with the exhibit for the previous week:—

	March 30. dols		April 6. dols		dols
Loans	120,953,065	...	122,113,496	... Inc.	1,160,431
Specie	41,408,308	...	41,705,558	... Inc.	297,250
Circulation	8,434,344	...	8,830,141	... Inc.	395,797
Deposits	93,611.898	...	94,859,810	... Inc.	1,247,912

We subjoin the usual Custom House returns, showing the foreign trade of the port during the past week, and from 1st of January, compared with the previous season:—

IMPORTS.

	1860. dols		1861. dols
For the week—			
Dry goods	1,497,470	.....	1,566,723
General merchandise	2,733,944	.....	3,785,434
Total for the week	4,231,414	.....	5,292,157

Exports	11,831,394	.....	10,510,417"

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, April 10.—Owing to the somewhat unfavourable tenor of the European intelligence, the market for State and Western flour has been less buoyant, and holders have been compelled to grant a slight concession daily. The demand has been fair, however, and the aggregate business for the three days is tolerably heavy. The market has been somewhat irregular, but closed quiet yesterday, at a decline of about 5c to 10c per barrel. The sales since Friday foot up to 46,000 barrels. Canada flour is a shade lower, with sales to a fair extent, comprising 2,700 barrels, including 900 yesterday. The demand for Southern flour has been moderate during the three days, and prices are substantially the same. The sales foot up 6,000 barrels, of which 1,700 found purchasers yesterday. Rye flour continues in limited request, and prices are unchanged. Corn meal is quiet, and prices are nominally unchanged—we note sales since Friday of 600 barrels; puncheons are quiet, and we are without sales to note.

EXPORT from 1st to 9th April.

	1861. barrels		1860. barrels
Wheat Flour	39,220	.....	15,696

Under a tolerably active demand the market for wheat was buoyant on Saturday last, when the transactions were pretty heavy, at a slight appreciation in values. The sales for the three days aggregate 210,000 bushels, of which about 73,000 were placed yesterday, including 26,500 Milwaukee Club, in store and delivered, at 1.25 dol to 1.30 dol; 5,500 good and common Chicago spring, 1.23 dol, delivered; 6,000 Racine spring, 1.27 dol, delivered; 4,200 red State, 1.32 dol, delivered; 11,000 winter red Western, 1.35 dol to 1.37½ dol, delivered; 12,500 amber Iowa, 1.32 dol, delivered; 4,500 fair white Canada, 1.44 dol; 3,500 white Western, 1.42 dol to 1.60 dol; 700 white Kentucky, 1.65 dol; and 2,500 damaged white Western, 1.15 dol. Corn is in moderate request, at a reduction of 1c to 2c per bushel on Western; the sales comprise 205,000 bushels, including 70,000 yesterday at 61c to 68c for Western mixed, and 58c to 60c for unsound; other kinds are unchanged.

EXPORT from 1st to 9th April.

	1861 bushels		1860 bushels
Wheat	203 094	.....	8,261
Corn	158 929	.....	29,590

NEW YORK, April 13.—Since our last report, the demand for State and Western flour has been good, and prices have improved 5c to 10c per bbl, the market closing less active but quite steady. Canadian flour has been fair and active at very full and steady prices. In Southern flour, also, there has been a good business done in part for export, without change in prices.

In wheat the transactions have been moderately large, both for export and milling, particularly, however, the former, and sellers have obtained 2c to 3c advance on the prices current at the date of our last. For corn there has been an active demand, principally for export, and prices are 1c to 2c per bushel dearer.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND, since September 1, 1860.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The liberal supplies of Mauritius brought forward have principally sold, but the general demand is by no means so animated as noticed last week, large arrivals being overdue. Several parcels of foreign at the public sales were bought in, and the market is rather quiet. Up to yesterday (Thursday) afternoon, 560 casks West India only sold; this small business, however, being partly attributable to the reduced quantity on show. The week's delivery of sugar was 4,170 tons, or nearly 1,000 tons more than in 1860, and the increase is 2,500 tons for home use, and 2,200 tons for export, since the beginning of the present year. The stock at this port reaches 48,700 tons, against 54,725 tons at the same period last year.

Mauritius.—The sales on Tuesday and Wednesday comprised 26,750 bags, of which the greater part sold at last week's rates. Low to fine yellow, 38s to 40s 6d; brown, 31s to 36s; crystallised, 40s to 44s 6d; (16s duty), 47s to 47s 6d; grainy, 38s to 44s. A few parcels have changed hands on the spot, and a floating cargo sold at 27s per cwt, No. 11, for the United Kingdom.

Bengal.—925 bags chiefly sold: fine dry bright yellow, 46s to 46s 6d; low middling to middling white Benares, 44s to 45s 6d; soft Dumma sorts, 34s to 36s; good pale Gurpatta date was taken in at 42s 6d per cwt.

Penang.—5,854 bags found buyers: brown, 36s to 37s; low soft greyish to fine yellow, 38s 6d to 44s 6d per cwt.

Foreign.—1,252 boxes clayed Cuba in public sale were sold upon moderate terms: middling greyish to fine, 40s to 43s 6d. 190 casks 84 barrels Porto Rico partly sold at 37s to 39s 6d for brown and low heavy grey, and 49s to 44s 6d for low middling to good yellow. 2,488 boxes Havana were nearly all bought in: brown to good yellow, 36s to 43s 6d. 127 casks Martinique were partially disposed of at 36s to 39s 6d for brown to good yellow. 8,340 bags clayed Manilla were bought in above the value, viz., 36s to 38s for low to very good quality. 200 bags soft greyish China were taken in at 38s to 38s 6d. 1858 bags fine yellow to white Siam went at 42s 6d to 45s 6d. 709 baskets Java partly sold at 39s to 41s for low to middling, and at 38s for brown. 1,000 bags dark brown Siam are reported at 31s 3d to 32s 6d, 1,500 bags Pernambuco at 33s, 150 casks Surinam at 37s. Three floating cargoes of Havana, Nos. 11 to 12½, are reported at 27s 3d to 28s. Two of Cuba muscovado at 24s 6d and 25s 6d for the United Kingdom. A

floating cargo of brown Pernambuco has also sold at 22s 9d per cwt for Gottenburg.

Refined.—The temporary scarcity of dry goods has enabled the refiners to obtain extreme rates, but the market is now less active, owing to the extended production and the probability of a better supply shortly.

MOLASSES.—A parcel of Antigua has been sold at 19s, and some Dominica at 17s 6d to 18s per cwt, being dearer.

RUM.—The market remains steady, but the inquiry is no way active at previous quotations. A parcel of 240 puns Berbice has sold at 1s 10d to 1s 11d, and some of Penang at 1s 9d per proof gallon.

COCOA is quiet. 294 bags ordinary Trinidad offered by auction were bought in at 64s. 510 bags St Lucia sold at 56s. 91 bags Guayaquil were taken in at 63s 6d per cwt.

COFFEE.—Several parcels of plantation Ceylon brought forward have realised full prices, and the market presents a very firm appearance. 613 casks 198 barrels 459 bags plantation Ceylon chiefly sold at 68s to 76s for fine ordinary and small berry to good middling. 1,926 bags good ordinary to superior native, 61s 6d to 65s. 59 half-bales greenish small berry Mochs, 95s. 14 cases Neilgherry, 67s to 68s 6d. 3,291 bags Rio partly sold: low to good, 53s to 60s 6d; a few lots washed, 63s to 63s 6d per cwt.

TEA.—A moderate amount of business has been done by private contract in congou from the recent arrivals; otherwise, the general demand shows little improvement. Yesterday, there were public sales of 17,877 packages, when 4,163 packages sold. Low sorts of congou went cheaper. Green teas realised full prices.

RICE.—All kinds sold rather slowly, and prices have still a downward tendency. A large cargo of Necrancie Arracan afloat sold last week at 10s 3d. Since then, transactions have been on a very limited scale, including low middling white Bengal at 10s 6d. Of 7,073 bags by auction, 6,000 bags Ballam sold at 9s 6d to 9s 9d per cwt.

IMPORTS and DELIVERIES of RICE to April 20, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	17500	8390	6765	37325

Stock	30700	53530	78040	84900

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SAGO.—606 cases were chiefly bought in or withdrawn, a few lots finding purchasers: good medium, 17s; good small grain, 17s 6d to 18s per cwt,

SPICES.—Scarcely any change in prices is apparent this week. 30 cases brown nutmegs found buyers at 10d to 1s 6d for low to fair, and two or three lots 3s 4d to 3s 6d for superior bold: 5 cases middling mace, 11d to 1s. White and black pepper are steady, but not much inquired after. 500 bags good greyish brown, rather dusty, sold at 3½d, one lot 3⅝d. 26 packages Amboyna cloves were partially disposed of at 4¼d to 4⅜d per lb. Small parcels of pimento have changed hands privately at former rates.

SALTPETRE.—This article has been less in demand, and is rather cheaper. 1,821 bags Bengal, by auction, principally sold at and after the sales: refraction 5 to 2¼, 37s 3d to 38s; 8½ to 7½, 35s 6d to 36s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to April 20, with STOCKS on hand.

Deliveries last week 170 tons.

COCHINEAL.—507 bags offered in the public sales were partly sold at easier rates: Honduras silvers, 2s 6d to 2s 11d; blacks, 2s 7d to 3s 4d for low pasty and small; Teneriffe silver, 2s 7d to 2s 9d; blacks, 2s 10d to 3s; Mexican silver bought in at 2s 7d to 2s 8d; black partly realised 2s 8d to 2s 11d per lb.

IMPORTS and DELIVERIES of COCHINEAL to April 20, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imports	6650	6500	7250	2720
Deliveries	5120	4950	6200	3790
Stock	8660	7610	6800	6975

There were 754 serons delivered last week, this large quantity being partly for Russia

OTHER DYESTUFFS.—Turmeric continues in demand, 15s to 15s 6d, being paid for good Bengal. Safflower is firmer with few sellers, unless at an advance. Cutch and Gambier inactive.

LAC DYE.—600 chests were only partly sold: DT, 1s 11d; PNC, 1s 5d; low native, 2d to 3½d per lb.

CAMPHOR.—Business has been done at 11*l* per cwt.

METALS.—In several instances the inquiry has revived, and business to a moderate extent has transpired. The most prominent feature to notice consists of the great rise in tin, English and foreign. The former has been advanced 5s; the latter sold at 125s for good Straits. Tin plates are in active demand for export. Spelter has sold at 18*l* 7s 6d on the spot, and 18*l* 10s to arrive. Copper firm. All kinds of iron are steady at the quotations. Scotch pig has been sold at 48s 6d to 49s per ton for mixed numbers.

JUTE.—The increased supplies brought forward on Wednesday, rather checked the upward tendency of the market, but quotations remain steady. 8,000 bales about one-third part sold: low to middling, 12*l* to 16*l* 10s; good to fine, 17*l* to 21*l* per ton.

MANILLA HEMP is in good demand at 21*l* to 22*l* 10s per ton for ordinary to fair roping sorts, and there now appears few sellers at these prices.

HIDES.—150,000 East India brought forward yesterday, partly sold at ¼d per lb under previous rates, but the demand was inactive.

LINSEED.—Large supplies come forward from the East Indies. Calcutta and Bombay, however, find ready buyers at full prices.

OILS.—Olive remains dull on the spot. A floating cargo of olive has sold at 57*l* 10s per tun for this port. Fish oils are inactive. There has been a better demand for cocoa-nut: Cochin, 47s 6d to 48s; Ceylon, 46s to 46s 6d. Palm scarce: fine, 45s 6d to 46s per cwt. The market for linseed is active, and 28s 6d now demanded. The market for rape continues firm, with rather an upward tendency: foreign refined, 42s; brown, 39s per cwt.

TURPENTINE.—1,100 barrels low quality now in warehouse have sold at 9s. An active demand has existed for American spirits at 31s 6d, and holders now require 32s per cwt.

TALLOW.—The advance established upon foreign last week has since been maintained, but the consumers still restrict their operations in Russian. To-day, the market is rather quiet. 1st sort Petersburg Y.C., 59s, and for delivery in the last three months of the year, 55s 9d per cwt.

PARTICULARS OF TALLOW.—Monday, April 22.

Ditto Town	58s 0d	57s 3d	56s 6d	56s 6d

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was dull to-day, and prices occasionally were in favour of the buyers. By auction, 11,380 bags Mauritius and 1,269 bags native Madras only partly sold. The transactions in West India for the week reach only 663 casks.

COCOA.—556 bags Grenada partly sold at 57s to 58s per cwt.

COFFEE.—50 casks 113 barrels and bags plantation Ceylon realised former rates.

TEA.—The sales, to-day, contained 8,857 packages, and 1,078 packages sold without further alteration in prices.

RICE.—8,263 bags white Bengal were partly sold at 9s 6d to 10s for low middling broken white. 2,000 pockets Ballam sold after the sale at 9s 3d per cwt.

SPICES.—A few lots of mace, nutmegs, and white pepper sold on former terms.

SALTPETRE.—1,500 bags, refraction 15 to 6¼ per cent., sold at 34s to 37s 6d. 1,210 bags Bombay, refraction 52 to 38, sold at 31s per cwt.

COCHINEAL.—326 bags only partly sold at rather lower rates for Honduras silvers.

CUTCH.—2,300 bags good Pegue were bought in at 24s per cwt.

OILS.—713 casks cocoa-nut sold: Cochin, 47s 6d to 48s; Ceylon, 46s to 46s 3d. 206 casks palm, 40s to 45s 9d per cwt. 1,830 tubs Japan were bought in at 29s to 31s. 200 casks East India rape sold at 38s 6d to 38s 9d per cwt. Sperm oil part sold at 104*l* for American; and some winter bagged at 105*l* 10s per tun.

TALLOW.—Town advanced to 57s 3d. By auction, 236 casks Odessa sold at 52s to 55s 3d. 186 casks 180 boxes South American part sold at 53s to 53s 3d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been rather languid this week; no material alteration to note with respect to prices. Treacle continues scarce, and rather higher prices have been obtained for home consumption. Dutch crushed continues very firm in Holland.

GREEN FRUIT.—A steady demand for all kinds, but no improvement in prices. Some parcels St Michael, Terceira, and Valencia oranges, sold by Keeling and Hunt at public sale, went at similar prices obtained last week. Lemons without alteration. Nuts in moderate request.

DRY FRUIT.—The fruit trade is very dull, but holders are firm, and no sales are reported at any lower rates. A sale of selected Valencias is said to have been made at 42s.

SEEDS.—The trade in seeds has been languid lately, with very little change in quotations.

ENGLISH WOOL.—English wools are rather less in demand this week than for some weeks past; prices remain the same.

COLONIAL WOOL.—The public sales are fixed to commence on the 9th of May. 51,000 bales have arrived, and will probably be increased by the time the sales commence to 70,000 to 77,000 bales. The market remains quiet, with rather a firmer tone.

COTTON.—Sales of cotton from Friday, 19th April, to Thursday, 25th, inclusive:—1,600 bales Surat at 5⅜d to 6d for middling to good sawginned, 4⅞d to 5¼d for very middling to middling fair Oomrawatty, 5d to 5¼d for fair Mangarole; 900 bales Tinnevelly at 5¼d to 6d for good fair to good; 250 bales Western Madras at 5d to 5¼d for good fair to good. The transactions were limited, and the market dull up to yesterday, when an active demand was experienced, and the sales amounted to about 2,000 bales at very full, and in some cases rather higher, prices. Compared with last week, the quotations for the better qualities of sawginned may be advanced ¼d per lb, and for other descriptions extreme prices have been obtained. P.S.—Market firm; sales to-day, 350 bales Tinnevelly, at 4 15-16d to 6d for ordinary to good; 700 bales Surat, at 5d to 5⅜d for middling to fair Oomrawatty.

SILK.—This market has been less active during the last week Prices without alteration.

LEATHER AND HIDES.—During the past week more business has been done in leather. The demand has been of a general character, including most descriptions of goods, but at Leadenhall, on Tuesday, the attendance of buyers was small, and the transactions limited. Former prices have been barely sustained.

METALS.—The foreshadowing of an improved market, which we noticed in our last, has been verified to a fair extent by an increase of business during the last fortnight in the principal branches of the metal trade. Copper has received increased attention, and an improved demand has sprung up for all descriptions. This improvement does not amount to activity, but has pretty generally stayed the underselling in English, and enabled some of the holders of foreign to realise at improved rates. Iron is little changed, the depression in the Staffordshire districts being unabated; but the late slightly improved demand for Welsh is maintained, and Scotch pig has improved about 1s per ton. Tin has become suddenly

buoyant, and higher in prices. English advanced 5*l* per ton on the 23rd instant, whilst foreign is from 9*l* to 10*l* higher than it was a few weeks ago. This change has been mostly caused by speculative operations. Spelter keeps steady at improved prices. Lead is somewhat neglected at the moment. Tin plates are still in better demand, and prices have advanced with the price of tin.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	57	3
Fat by ditto	2	11½
Yellow Russian	60	6
Melted stuff	37	6
Rough ditto	22	6
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

MONDAY, April 22.—The total imports of foreign stock into London, last week, amounted to 3,211 head. In the corresponding period in 1860, we received 1,939; in 1859, 994; in 1858, 2,318; in 1857, 1,494; in 1856, 431; and in 1855, 1,243 head.

There was only a moderate supply of foreign stock in our market to-day. On the whole, the demand ruled steady, at about previous quotations. From our own grazing districts, as well as from Scotland, the arrivals of beasts fresh up this morning were seasonably good, and in full average condition. The attendance of buyers was rather numerous, and nearly all breeds of beasts commanded a steady inquiry, at last Monday's currency. The extreme value of the best Scots was 5s per 8 lbs. The receipts from Norfolk, Suffolk, Essex, and Cambridgeshire amounted to 2,000 Scots, &c.; from other parts of England, 500 various breeds; and from Scotland, 400 Scots and crosses. We were again fairly supplied with sheep, the quality of which exhibited some improvement. The mutton trade ruled firm at full quotations. The best old Downs in the wool realised 5s 10d, out of the wool 5s to 5s 2d per 8 lbs. Prime lambs commanded a steady sale, at full prices; otherwise, the lamb trade was in a sluggish state. The quotations ranged from 6s to 7s 4d per 8 lbs. From the Isle of Wight 320 lambs reached us in poor condition. We have to report a dull sale for calves, at a decline in the currencies of 2d per 8 lbs. The top price for veal was 5s 6d per 8 lbs.

SUPPLIES.

	April 23, 1860.	April 22, 1861.
Beasts	4050	3610
Sheep and lambs	25820	17620
Calves	160	65
Pigs	350	530

THURSDAY, April 25.—To-day's market was but moderately supplied with beasts; nevertheless all kinds moved off slowly, and prices were barely supported. Prime sheep were scarce, and in good request, at full currencies; otherwise the mutton trade was very inactive, at late rates. Good and prime lambs sold briskly, at an improvement in value of 4d per 8 lbs. Inferior lambs were a slow inquiry. Calves, the supply of which was limited, were in good request, at an improvement in value of 2d per 8 lbs. Pigs and milch cows were tolerably firm in price.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	8	Prime Southdown sheep	5	8	5	10
Second quality ditto	3	10	4	2	Large coarse calves	4	8	5	2

Prime Scots, &c.	4	8	4	10	Large hogs	4	0	4	6
Coarse and inferior sheep	3	6	3	10	Small porkers	4	8	5	0
Second quality ditto	4	0	4	4	Suckling calves.....each	18	0	22	0
Prime coarse-woolled do.	4	8	5	6	Quarter old store pigs	22	0	30	0

Lambs, 6*s* 0*d* to 7*s* 8*d*.

Total supply—Beasts, 950; sheep and lambs, 7,620; calves, 76; pigs, 290.
Foreign supply—Beasts, 180; sheep, 1,000; calves, 40.

NEWGATE AND LEADENHALL.

MONDAY, April 22.—The supplies of meat on sale here continue large. Prime beef, mutton, lamb, veal, and pork are in steady request, at full prices; but other kinds are a dull inquiry.

FRIDAY, April 26.—The supply of both town and country-killed meat has been much less extensive, and the trade rules somewhat on higher terms.

Per 8lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	10	3	2	Middling mutton	4	2	4	8

Large Pork	4	0	4	8	Lamb	6	0	7	0
Inferior mutton	3	8	4	0					

HOP MARKET.

BOROUGH, Monday, April 22.—Our market continues to be firmly supported, with a steady demand for the best qualities of every date. Yearlings and the finest samples of the last growth are becoming scarce, and command rather more money. Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 168s; Sussex, 60s, 80s, 126s; Yearlings, 110s, 140s, 180s.

FRIDAY, April 26.—All good and fine hops move off freely, and prices are on the advance. Inferior samples are held at quite as much money.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, April 22.—During the past week the arrivals have been very large, both by rail and coastwise, and trade exceedingly heavy at reduced prices. Second-rate or inferior samples are unsaleable. The following are this day's quotations:—Yorkshire Flukes, 120s to 150s; Lincolnshire Regents, 95s to 105s; Dunbar red soil ditto, 120s to 160s; North Berwick, 115s to 130s; Perth, Forfar, and Fife ditto, 90s to 105s; ditto, ditto, ditto Rocks, 80s to 85s; ditto ditto, ditto Reds, 70s to 80s; French Whites, 60s to 80s; Belgian ditto, 60s to 80s; Dutch ditto, 60s to 80s per ton.

BOROUGH AND SPITALFIELDS, April 26.—Increased supplies of home-grown potatoes have been on sale here, and the demand for all qualities has ruled very inactive. Prices, although in some instances rather drooping, have not materially altered from our previous report.

HAY MARKETS.—THURSDAY,

SMITHFIELD.—Meadow hay, 2*l* 0*s* to 5*l* 5*s*; clover, 3*l* 10*s* to 6*l* 0*s*; and straw, 1*l* 14*s* to 2*l* 0*s* per load. Trade steady.

CUMBERLAND.—Meadow hay, 2*l* 0*s* to 5*l* 8*s*; clover, 3*l* 10*s* to 5*l* 18*s*; and straw, 1*l* 16*s* to 2*l* 0*s* per load. A fair demand.

WHITECHAPEL.—Meadow hay, 2*l* 5*s* to 5*l* 5*s*; clover, 3*l* 10*s* to 6*l* 0*s*; and straw, 1*l* 14*s* to 2*l* 0*s* per load. Trade dull.

COAL MARKET.

FRIDAY, April 26.—Best Wallsend are quoted at 18*s* 6*d* to 19*s*, and other sorts at 14*s* to 18*s* per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 26.—The public sales of East India and other low wools will commence on the 2nd and continue until the 10th proximo. The quantity of the former will be about 10,000 bales and that of the sundries 6,000 bales and ballots. There is a moderate amount of business doing by private contract, and prices continue to be well supported.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 26.—Moderate attendance at corn market. Fair sale for wheat at Tuesday's prices. Flour slow, without change. Indian corn, mixed, 35s 3d to 35s 6d. Limited demand. Beans steady. Oats and oatmeal dull.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 26.—Manufactured iron still continues in comparatively limited demand, with little or no change to notice in prices. In Scotch pig iron there has been more animation during the week, and the market is slightly firmer. Few transactions in copper or lead. In tin an advance of 5*l* per ton has been declared, and tin plates are in improved demand, as also spelter.

The Gazette.

TUESDAY, April 23.

BANKRUPTS.

G. Trickett, Great Winchester street, metal merchant.
J. Neech, Aylsham, Norfolk, miller.
D. H. Doust, Pomeroy place, Pomeroy street, New cross, omnibus proprietor.
J. B. Gough, Theberton street, Liverpool road, timber merchant.

J. Allen, smallware manufacturer, Radcliffe Bridge, Lancashire.

SCOTCH BANKRUPTS.

C. M'Lean, china merchant, Elgin.
G. Hamilton and Sons, smiths, Glasgow.
W. Grant, farmer, Cairnhill, Ayrshire.

CRYSTAL PALACE.—The new season commences on the 1st proximo, on which day Haydn's "Creation" will be performed on the same grand scale as the Handel "Festival," and assisted by the great singers of the metropolis. There is no fresh feature observable in the new programme; indeed, ticket-holders cannot justly be dissatisfied with their purchase, if the directors only vary the amusements to the same extent as last season.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 13th of April amounted to 521,633*l*, and for the corresponding week of last year to 502,342*l*, showing an increase of 19,291*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 232,118*l*, and for the corresponding week of 1860 to 225,766*l*, showing an increase of 6,352*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, April 22.—The railway market was rather firm in the earlier part of the day, but receded towards the close. In several stocks a fractional decline occurred, especially Midland, York and North Midland, North British, and Eastern Counties. Indian descriptions were in better demand. In foreign railways a recovery occurred in South Austrian and Lombardo-Venetian to 1⅜ to ¼ dis. American securities were heavy, and another reduction of 1¼ dol was shown in Illinois Central shares and New York and Erie. Mines were inactive, and in several instances exhibited a decline. In joint stock banks, City shares and Oriental were inquired for. No material change took place in miscellaneous descriptions.

TUESDAY, April 23.—The railway market continued without business, and prices were almost entirely influenced by the changes in Consols. After some trifling changes the quotations at the close generally showed a fractional advance, South-Eastern, however, being flat. London and North-Western, Lancashire and Yorkshire, and Great Western improved. In the colonial market, Indian guaranteed stocks continued firm. Grand Trunk of Canada, on the other hand, relapsed to 20¼ to 21; and Great Western shares were dull at 11¼ to ⅜. Foreign descriptions were steady. Dutch-Rhenish improved, and South Austrian and Lombardo-Venetian maintained their late rise, at 1⅜ to ¼ dis. In American railway securities, New York and Erie shares were again lower. Mines were little dealt in, but in one or two cases an advance took place. Agra Bank shares were quoted higher. In miscellaneous descriptions there was a rise in Electric Telegraph stock.

WEDNESDAY, April 24.—The railway market opened firmly with Consols and subsequently improved, but on a few sales, especially of London and North-Western for immediate delivery, a partial reaction took place. Later in the afternoon the tendency was again favourable. Compared with yesterday, most of the leading stocks advanced ⅛ to ¼ per cent., Midland, Lancashire and Yorkshire, Great Western, North-Eastern stocks, and Caledonian showing the principal rise. In the colonial market, Indian guaranteed stocks continued in demand at a gradual advance. Canadian remained about the same as before, Grand Trunk being last quoted 20¼ to 21, and Great Western 11¼ to ⅜. In foreign descriptions there was a rise in Dutch-Rhenish and Western of France. South Austrian and Lombardo-Venetian were also slightly firmer. American railway securities were again heavy. There were scarcely any transactions in mines, and no material change occurred. Union Bank of London shares were quoted higher. In miscellaneous descriptions there was an improvement in Peninsular and Oriental Steam.

THURSDAY, April 25.—The railway market continued without the slighest animation, and in several stocks a fractional decline took place. South-Eastern was especially heavy; Midland, Great Western, and Caledonian were also flat. North British was exceptionally firm. In the colonial market, Indian guaranteed descriptions were steady. Great Western of Canada shares were lower, at 11⅜ to ½, while Grand Trunk stock remained at 20¼ to 21. Foreign railways were generally without change. Mines were inactive, and occasionally flat.

FRIDAY, April 26.—The railway share market was heavy, owing chiefly to the news from America. A reduction of ¼ to ½ per cent. took place in most of the principal stocks. London and North-Western stock was quoted 95¾ to 96¼; Great Western, 71 to ½; Midland, 124 to ½; Lancashire and Yorkshire, 110¾ to 111; South-Eastern, 82 to ¼; Caledonian, 97 to ½; Eastern Counties, 49¼ to ¾; and Great Northern, 111 to 112. Lombardo-Venetian railway shares advanced. Great Western of Canada were flat. Indian railway stocks ruled steady. The mining share market was in a very inactive state.

The Economist's Railway and Mining Share List.

THE HIGHEST PRICES OF THE DAY ARE GIVEN.

PRACTICAL OBSERVATIONS

on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.

London: John Churchill; and may be had of al booksellers

DR KAHN ON MARRIAGE.—

A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane: or from the author's address, 17 Harley street, Cavendish square, London.

DR CURTIS'S MEDICAL WORK. "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND

CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES,

Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills."—TIMES.

Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.

London: J. Churchill. and to be had of all booksellers.

CURE OF A 39 YEARS' ASTHMA

by Dr LOCOCK'S PULMONIC WAFERS.—"17 Church lane, Hull. Sir,—I have suffered more than I can describe from the effects of an asthma, which has for years rendered my days irksome and my nights sleepless. I have had the ablest advice, but nothing has given me one-tenth part of the benefit which Dr Locock's Wafers have. W. ERRINGTON, late Grenadier Guards. (Witness) Mr J. C. Reinhardt, Chemist, Market place, Hull." Dr Locock's Pulmonic Wafers give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. To Singers and Public Speakers they are invaluable for clearing and strengthening the voice: they have a most pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all chemists.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

VALUABLE INFORMATION.—

GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

MEDICAL CONSULTATIONS.—

Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,

37 BEDFORD SQUARE, LONDON.

Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.

These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.

Dr L. La'Mert may be consulted in Glasgow until the 31st March, at 56 Rosebank terrace, St George's road.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

CHIMNEY-PIECES, TOMBS,

MONUMENTS, FONTS, &c.—EDWARDES BROTHERS and BURKE, 17 Newman street, Oxford street, London, W., beg to inform the nobility and gentry that they manufacture at their own establishments, in Italy and Belgium, as well as at the above address, every description of marble work, at the lowest possible prices. Their galleries contain specimens of all foreign and British marble quarried, in Chimney Pieces, from 25s to 300 guineas each; MONUMENTS AND TABLETS, from £5; Head and Foot Stones, from 30s each.—Sole agents to the Invernettie Granite Company.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine article, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

KEATING'S PALE

NEWFOUNDLAND COD LIVER OIL, perfectly pure, nearly tasteless, and free from adulteration of any kind, having been analysed, reported on, and recommended by Professors Taylor and Thomson, of Guy's and St Thomas's Hospitals, who, in the words of the late Dr Pereira, say, that "The finest oil is that most devoid of colour, odour, and flavour," characters this will be found to possess in a high degree. Half-pints 1s 6d, Pints 2s 6d, Quarts 4s 6d, and Five-pint Bottles 10s 6d, Imperial Measure.

79 St Paul's Churchyard, London.

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

MEDICAL ADVICE.

DR WATSON, U.S., F.R.A.S., &c.

(specialist), may be consulted daily from 11 till 2 and 6 till 8, or by letter, on all those secret ailments and infirmities peculiar to youth, manhood, and old age, and which tend to embitter and shorten life. All desiring invaluable information on these subjects, or having doubts as to their state of health, should consult the Doctor's new Essay "SELF-TREATMENT SIMPLIFIED," which enables Invalids (in the majority of cases) to Cure themselves easily, privately, and at a small cost. Post paid to any address on receipt of six stamps by the Author, Dr Watson, 27 Alfred place, Bedford square, London.

A BOON TO NERVOUS

SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

OVERLAND ROUTE.—

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

THE FRENCH AND GERMAN

PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

KEATING'S COUGH LOZENGES.—

Judged by the Immense Demand, this Universal Remedy now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 79 St Paul's churchyard, London. Retail by all Druggists and Patent Medicine Vendors in the world.

HOLLOWAY'S OINTMENT AND

PILLS.—Influenza, Bronchitis.—At the beginning of Spring chest complaints are continually produced by the east wind and variable temperature. In all such cases early attention and effective treatment are demanded to prevent them degenerating into more serious and often fatal maladies. The invalid may rest assured that Holloway's Pills, without worrying the weakest constitution, will remove all formidable symptoms. The Ointment should be rubbed on the chest, back, and sides, every night and morning for at least ten minutes, and the parts then encased in flannel. This course of treatment will lessen fever, rectify incipient congestion, relieve the oppressed lungs, and remove restlessness, hoarseness, and cough; thorough restoration will reward diligence and attention in following this advice.

With power to add to their number.

The attention of the Public is earnestly requested to the following facts:—

"The Committee have the pleasure to announce that they have already remitted £50,000 to India for distribution through the local authorities of the districts most urgently requiring relief. An impression is said to prevail that the distress is only temporary; the Committee, however, feel it their duty to inform the public that no permanent relief can be locally obtained until October or November, by which time it is hoped that the autumnal rains will, to some extent, have mitigated the evil.

At a meeting of the Committee, held on the 12th inst., Sir John Lawrence, Sir Charles Trevelyan, Lord Harris, and many other important Indian authorities, bore testimony to the fact that the population of the districts afflicted is at least ten millions, whilst two millions are literally starving, and have nothing but the hand of charity between them and death. It was further stated that the Government were fully alive to the exigences of the case, and had given instructions for the employment of all persons able to work, but that thousands were so broken down by starvation that they must be supported by the Central Relief Committees, and that as these bodies were only able to distribute food to applicants, a very large field was open for the flow of private charity.

We have thus before us the unquestionable fact that, for six months from this date, several millions of our fellow-subjects in India, deprived of their ordinary resources, are mainly dependent upon charity for their necessary sustenance. How loud the call upon the benevolence of a Christian people! How inviting the opportunity to show to these poor distressed heathens, painfully sinking day by day to their graves, that the Englishman is something more than a conqueror—that, in the hour of direst need, he is a deliverer from death, and a friendly succourer in those intense privations and sufferings from which death is welcomed as a relief and escape!

A statement of the facts will be forwarded upon application to the Honorary Secretaries.

Subscriptions may be remitted direct to the Mansion House, or through any banker in the United Kingdom, to the credit of the Indian Famine Relief Fund with the Bank of England.

The Committee gratefully acknowledge the receipt of several church and chapel collections, and trust that all clergymen and nonconformist ministers will aid the movement by preaching sermons in behalf of the fund; and thus demonstrate to our Indian fellow-subjects that difference in creed does not prevent the flow of Christian charity.

The next mail will leave for Calcutta on the 26th inst., when all sums received to that date will be remitted.

The General Committee will meet at the Mansion House on the first Friday in every month.

The Sub-Committee meets every Marseilles mail day (the 3d, 10th, 18th, and 26th of each month), at the Mansion House, at 3 o'clock.

The efforts of the Committee have received the Royal Sanction. The Nobility, Merchants, and Public generally, have responded nobly to the appeal which has been made; but so gigantic is the crisis, that continued and united efforts must be made, or thousands of our fellow-creatures must miserably perish under the most deplorable and heart-rending circumstances.

TRADE 6/P MARK.

BROWN AND POLSON'S
PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, pronounced by the most eminent Medical Men throughout the world to be incomparably superior to all other kinds.

CONSUMPTION.

The investigations of the most experienced pathologists have conclusively proved that Dr de Jongh's Oil is unequalled as a remedy for Consumption, and that no other Oil can possibly produce the same salutary results. ALLEN G. CHATTAWAY, Esq., the eminent Surgeon to the Leominster Infirmary, writes:—"Having for some years extensively used Dr de Jongh's Light-Brown Cod Liver Oil, both in public and private practice, in the treatment of consumption, I have no hesitation in stating that its effects are very far superior to those of any other Cod Liver Oil."

GENERAL DEBILITY.

In cases of General Debility, the restorative powers of Dr de Jongh's Light-Brown Cod Liver Oil have been remarkably manifested, and it has been resorted to with the most beneficial effects, after the whole range of ordinary tonics had been in vain exhausted. BENJAMIN CLARKE, Esq., M.R.C.S., F.L.S., in testifying to its extraordinary efficacy in his own case, observes:—"Having myself taken both the Pale Oil and Dr de Jongh's Light-Brown Oil for Debility, I am able, from my own experience, to remark upon their effects and comparative usefulness as remedial agents. After the Pale Oil, and all other remedies that I could think of had failed, I tried, merely as a last resort, Dr de Jongh's Light-Brown Oil; I received immediate relief, and its use was the means of my restoration to health."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

NATAL LAND AND COLONISATION COMPANY (Limited).

Incorporated, with Limited Liability, under the Joint Stock Companies' Acts, 1856-57.

Capital £225,000, in 22,500 shares of £10 each.

14,000 of these shares have been appropriated to pay for 250,000 acres of land in the colony, purchased on behalf of the Company, to commence its operations, leaving 8,500 shares for allotment.

All applications for shares to be made in the annexed form, either to the Secretary or to the Brokers of the Company. A deposit of £1 per share must be paid upon allotment. The capital will be gradually called up in calls not exceeding £1 per share.

OFFICES—41 Threadneedle street.

Objects of the Company.—This Company is formed for the purchase and re-sale of land in the prosperous colony of Natal. 250,000 acres, held under grants from the Crown, have been secured as a commencement, at the average price of 11s 6d per acre. The estates thus bought belonged to many of the principal settlers in the colony, who have accepted the entire purchase money (£140,000) in the paid-up shares of the Company, under the conviction that its operations will be highly remunerative, and that its shares will form an excellent investment, augmenting in value with the prosperity of the colony.

The Company will offer inducements to a valuable class of emigrants, with adequate means and experience, to settle on their property, and it will enable European capitalists to participate in the profits arising from the rapid increase in the value of land, and make safe and highly profitable investments.

The Company will make advances on the mortgage of landed estates and other approved securities. The capital thus advanced will be reproduced by the issue of debentures for convenient sums and for stated periods, bearing a fixed rate of interest, with coupons attached, payable half-yearly at the Company's bankers in London. Thus the capital will be frequently turned over, and will afford, upon each re-investment, a distinct and repeated profit, arising out of the difference between the rates at which the Company will borrow in the English market and the high colonial interest on its mortgage loans. This branch of the Company's business will obtain a large and early remuneration for the shareholders, and will rapidly augment the value of their estates by advancing the prosperity of the colony.

The Company will act as agents for the purchase of estates, or for making other investments in the colony, and will transact any financial business at home that may be entrusted to it by the local Government, by public bodies, or other constituents.

Position and Advantages of Natal.—Natal lies on the South-East coast of Africa, between 29° and 31° South latitude. It contains an area of about 20,000 square miles, with 140 miles of coast, and is well watered by 23 rivers flowing into the Indian Ocean. The climate is the most salubrious of our colonial possessions, and admirably adapted to European constitutions. The Natal territory forms three terraces of different elevations. The coast land yields the most luxuriant crops of sugar, coffee, and arrowroot, and is well suited for the growth of cotton, indigo, ground nut, and other tropical productions. The midland and upper districts produce wheat, barley, oats, Indian corn, beans, flax, and every kind of European fruit and vegetables, and are well suited for sheep farms, and the breeding of horses and cattle. The export of wool is steadily and rapidly increasing, and coal is found in two distinct localities, and is used by the colonists.

The European population numbers 15,000; the natives enter freely into the service of the settlers, and the recent introduction of Coolies from India meets the increasing demand for labour.

Her Majesty's Government have manifested their conviction of the important position this colony is destined to occupy by authorising the local Government to raise £165,000, at which sum contracts have been concluded for the construction of harbour works at Port Natal, according to a plan approved by the Admiralty, and to be executed under the direction of James Abernethy, Esq., C.E.

The proposed new line of steamers between the Mauritius and the Cape, via Natal, will shorten the distance from England to Natal from 42 to 34 days.

Production of Cotton.—Great attention is now directed to the facilities which Natal offers for the growth of large quantities of cotton, of a quality which experience has proved to be fully equal to that of America—the supplies from whence are now imperilled by political conflicts. In the appendix will be found important extracts relating to this subject, from the despatches of the Lieutenant-Governor and other authorities.

Many of the Company's estates are admirably adapted to the growth of this important staple, and the Directors are prepared to deal liberally with public bodies or private individuals desiring to undertake its cultivation; and should they determine to carry out the long-cherished plan of promoting the removal of free blacks from North America to a climate well suited to their constitution, the Company will enter heartily into their views.

Sugar.—Much of the land in Natal, including many of the Company's estates, is fully equal in productiveness to the sugar lands of the Mauritius, which command very high prices. The Natal sugar crop for the current year is estimated at 3,000 to 4,000 tons, or nearly double the exports of Mauritius in 1812, since which date the sugar exports from the latter have risen to 110,000 tons; and there is every reason to anticipate an equal rate of increase in the Natal exports of this important staple.

General Remarks.—By actively assisting emigration, and promoting the influx of capital into the colony, the Company will accelerate the already rapid rise in the value of land—the principal source of the anticipated large profits to the shareholders. Every plot of land sold and brought into cultivation augments the value of adjoining sections; and advantage will be taken of this fact, in the allotment of estates, to reserve for the Company their fair share of the benefits arising from the growth and prosperity of the colony.

The Company offers great facilities to farmers and others desiring to settle in Natal, as it possesses estates fitted for every variety of culture, full particulars of which can be obtained on application at the Company's offices; and provisional agreements for purchases can be effected, subjected to confirmation, after inspection by the colonist.

Lands will be sold at prices dependent upon their quality and locality, and the capital of settlers will be left available for purposes of cultivation, by allowing portions of the purchase-money to remain on mortgage, or by other means adapted to meet the wants of emigrants and at the same time afford ample security to the Company. To give further aid to the industrious settler upon their estates, the Company will be prepared to make prudent advances upon his improvements, and will adopt every legitimate means of promoting the growth of sugar, coffee, and other expensive but highly remunerative crops.

Very favourable terms will be granted to associated bodies of immigrants, who may wish to purchase large blocks of land to found a town or village: and, in such cases, free grants of land will be made for the erection of schools and places of religious worship.

Profits.—The profits of the Company will arise from the sale of estates at enhanced prices, from the rents of its lands, from the investment of its capital at high rates of colonial interest, and the difference between the rates of interest at which the Company will borrow in this market and lend in the colony, and the commission upon its agencies.

The Company will be managed on principles analogous to those of the Canada and other successful land companies. The shares of the Canada Company have risen from £32 10s to £109.

The Directors have much pleasure in stating that they have secured the services of Carl Behrens, Esq., late Manager of the Natal Bank, to act as this Company's manager in Natal; and as evidence of the security with which prudent advances may be effected in that colony, it may be observed that during six years of Mr Behren's management of the Natal Bank, that establishment did not make a single bad debt, and paid annual dividends of from 15 to 18 per cent.

In an appendix to this prospectus will be found letters illustrating the increasing value of land in Natal, from Adolph Coqui, Esq., Member of the Legislative Council in Natal, and from Henry Milner, Esq., one of the earliest sugar planters in the colony, and formerly Member of its Legislative Council.

A pamphlet, giving full particulars on all matters relating to the colony, and which is especially adapted as a guide to intending emigrants, can be had at the Company's offices, and of Messrs Jones and Causton, 47 Eastcheap.

FORM OF APPLICATION FOR SHARES.

No.——

To the Directors of the Natal Land and Colonisation Company (Limited).

Shares, £10 each.

Gentlemen,—I request that you will allot me shares of £10 each in the capital of the Natal Land and Colonisation Company (Limited); and I hereby agree to accept the said shares, or any smaller number that may be allotted to me, and to pay the deposit of £1 on each share so allotted, and the calls when made, and to sign the articles of association when required to do so, and in default thereof I agree to forfeit the said deposit, and authorise you to cancel the allotment.

7 PER CENT. DEBENTURES.—SUBMARINE TELEGRAPH COMPANY.

DEBENTURES.—The Directors give notice that they will receive applications for the remaining portion of the proposed issue of £70,000 Debentures, one-half of the amount having been subscribed by the shareholders. The debentures bear interest at 7 per cent. per annum for five years, but are redeemable at the option of the Company at three years.

The Company now possesses 6 separate Submarine lines connecting "Great Britain and the Continent of Europe, containing 22 wires." The income of the Company averages £40,000 per annum.

These debentures form the first charge on the revenue; they are issued in sums of £50 and upwards. Further information will be afforded by the Secretary, at 58 Threadneedle street, or by Messrs Foster and Braithwaite, 68 Old Broad street.

L. WALTER COURTENAY, Secretary.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par, in sums of not less than £50.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years from the 15th December, 1860, transferable by endorsement without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, April 9, 1861.

MADRAS RAILWAY COMPANY.

—Notice is hereby given, that the Ninth Annual General Meeting of the Madras Railway Company will be held at the London Tavern, Bishopsgate street, London, on Friday, the 10th day of May next, at One o'clock precisely, in conformity with the terms of the Company's deed of settlement.

And Notice is hereby further given, that at such meeting a resolution will be proposed for the conversion into Stock of all the shares in the Fourth Extension Capital in respect whereof the whole money subscribed shall have been paid up. The transfer books of the Company will be closed from the 3rd to the 10th proximo, both days inclusive. Deeds of transfer are not received at the offices of the Company while the books are closed.—By order of the Board,

JAMES WALKER, Managing Director.

33 New Broad street, London, E.C., April 22, 1861.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the amount which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, of converting them into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London, 1st January, 1861.

GREAT INDIAN PENINSULA RAILWAY COMPANY.

At the Twenty-Third Half-yearly General Meeting of Shareholders, held at the London Tavern, Bishopsgate street, London, on Friday, the 26th day of April, 1861, W. J. Hamilton, Esq., Chairman of the Company, in the chair, the advertisement convening the meeting was read. The Company's seal was affixed to the Register of Shareholders. The Directors' Report having been taken as read,

It was moved by the Chairman, seconded by J. G. Frith, Esq., the Deputy-Chairman, and resolved,—

That the Report of the Directors, together with the accounts now submitted, be received and adopted.

It was moved by James Rolls, Esq., seconded by Wm. Sangster, Esq., and resolved,—

That Mr T. S. Cowie and Mr L. R. Reid, of London, and Mr M. Scott and Sir Jamsetjee Jejeebhoy, Bart., of Bombay, be and are hereby re-elected Directors of this Company.

It was moved by Mr Alderman Dakin, seconded by Thomas Huggins, Esq., and resolved,—

That Mr I. Anderton be and is hereby re-elected an Auditor of this Company.

It was moved by Wm. Hartridge, Esq., seconded by David Faloke, Esq.,—

That three Shareholders be chosen to determine the differences between the two Auditors as to their duties and functions, and to report their opinion to the Directors as early as possible.

Whereupon it was moved by Henry Haymen, Esq., seconded by James Rolls, Esq., as an amendment,—

That as Mr Franklin will not confine himself to the performance of the duties of Auditor prescribed by the Act of Parliament regulating the Company, but continues to raise abstract questions upon principles of audit, thereby prejudicially affecting the interests of the Shareholders, he be requested, and is hereby asked to resign his office of Auditor.

The amendment on being put to the meeting was carried.

W. J. HAMILTON, Chairman.

It was moved by Charles Packer, Esq., seconded by Col. French, and resolved,—

That the best thanks of the meeting are due, and are hereby tendered to the Chairman and Directors, for their attention to the interests of the Company.

THOS. R. WATT, Secretary.

FINE TEA CHEAPER.

STRACHAN & CO.'S

justly celebrated DRAWING ROOM TEA is now reduced to 4s per lb. Guaranteed the finest and Cheapest Tea in the United Kingdom.

The Bank negotiates and collects Bills and grant Drafts payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Penang, Hong Kong, Shanghai, and Mauritius; issues Letters of Credit, and Circular Notes for the use of Travellers by the Overland route, terms for which can be ascertained at the Head office in London.

The Bank will effect the purchase or sale of Indian Securities; undertake the safe custody of same, and the receipt of Interest, Dividends, Pay, Pensions, and other Moneys, for remittance through the Bank or otherwise.

The Bank receives Money on Deposit, on which Interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head office, 52 Threadneedle street, London.

Office hours, 10 to 3; Saturdays, 10 to 2.

FURNITURE CARRIAGE FREE.—

Clergymen about to Furnish are most respectfully informed that RICHARD LOADER and Co. have just published an entirely new and elegant "Illustrated Furnishing Guide," comprising 216 well-executed designs of Cabinet and Upholstery Furniture, Iron Bedsteads, &c., which guide they will be happy to forward on application to intended purchasers, Gratis and Postage Free. This valuable Pamphlet also contains an estimate for completely furnishing a moderate-sized Parsonage House, which, it is hoped, may be found of much service to those desiring such assistance. Every article warranted for twelve months, and exchanged if found defective. All orders are Delivered Carriage Free to any part of the United Kingdom.

RICHARD LOADER and Co., Manufacturing Cabinet-Makers, Carpet Warehousmen, and General House Furnishers, 23 and 24 Pavement, Finsbury, London, E.C.

VICTORIA, AUSTRALIA.

—The Committee of the Six Associated Australian Banks have received instructions from the Government of Victoria to publish the following Notice:—

GEELONG AND MELBOURNE RAILWAY DEBENTURES.

It is hereby Notified, for the information of the Holders of the Bonds issued by the late Geelong and Melbourne Railway Company and the public generally, that in accordance with Act 23 Vic., No. 96, the line of Railway has been transferred to the Victorian Government, and that under the Act alluded to, the liability as to the payment of the principal and interest of the Bonds issued by the late Company has devolved on the Government, who will continue to afford to the holders of these securities the usual facilities for transfer,

GEORGE VERDON, Treasurer.

Treasury, Melbourne, 22nd February, 1861.

The Committee have to announce that in accordance with the above Notice they have made arrangements for the Registration of the outstanding Debentures of the late Geelong and Melbourne Railway Company at the London and Westminster Bank, Lothbury, where transfers of the Debentures will be received and registered on and after this date.

For the Bank of New South Wales, D. Larnach, Chairman of Committee.
For the Bank of Australasia, D. Q. Henriques.
For the Union Bank of Australia, J. J. Cummins.
For the Bank of Victoria, J. Matheson.
For the London and Chartered Bank of Australia, D. Dunbar.
For the Colonial Bank of Australasia by their agents the London Joint Stock Bank, W. J. Lancaster.

London, 20th April, 1861.

MURRAY'S HANDBOOK ADVERTISER.

[Published Annually in May.]
Printed for the convenience of those who are desirous of communicating information to Travellers, and inserted in every copy of Murray's Continental Handbooks issued during the season.
The great advantage of this medium of Advertising over all others can scarcely be questioned, as it enables Steamboat, Railway, and other Public Companies, Landlords of Inns, Teachers, Tradesmen, and others, to bring under the immediate notice of the great mass of English and American Travellers, the various merits of their Railways, Steamers, Hotels, Taverns, Professions, Articles of Merchandise, Works of Art, and such other information as they may desire to make known; while, instead of being limited to the casual publicity of a Daily, Weekly, or Monthly Periodical, it has the additional merit of being displayed for the entire year in a permanent work of interest and perpetual reference to the very class of persons for whom it is specially intended.
As only a limited space is allowed, preference is given to those Advertisements which are more immediately addressed to Tourists.

THE HANDBOOK ADVERTISER
is inserted in the following—
Handbook—North and South Germany.
Handbook—Switzerland.
Handbook—France.
Handbook—Spain and Portugal.
Handbook—Egypt.
Handbook—Madras and Bombay.
Handbook—North and South Italy.
Handbook—Central Italy and Rome.
Handbook—Russia and Sweden.
Handbook—Greece.
Handbook—Syria and Palestine.

TOWER.—SALE OF STORES.—
By order of the Secretary of State for War.—To be Sold by Public Auction, in the Tower, on Thursday, the 9th of May, 1861, at 11 o'clock in the forenoon precisely, the following STORES:—Great Coats and Cloaks; Clothing, various; Rags, Blanket, White and Grey; Accoutrements; Surgical Instruments, &c.; Tools, various; Steel, Old Files; Leather articles, various; Brushes; Old Iron, Steel, and Miscellaneous Articles.
May be viewed at the Tower from 10 to 4 o'clock, the three days previous to the day of sale, and catalogues may be had at the War Office, Pall Mall; the Tower; and Royal Arsenal, Woolwich.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

Her Majesty's Royal Forests.—Oak Bark.—For Sale, about 2,300 Tons of Timber and Flittern Bark, situate in Delamere Forest, Cheshire; Hazleborough Wood, and Salcey Forest, Northamptonshire; Dean and High Meadow Forests, Gloucestershire; Alice Holt Forest, Bere, Parkhurst, and the New Forests, in Hampshire; Windsor Park and Forest, Berkshire; and at Andover, Hants.

MESSRS DRIVER HAVE BEEN honoured with instructions from the Hon. J. K. Howard, the Commissioner in charge of Her Majesty's Woods and Royal Forests, to SELL by AUCTION, at the Mart, London, on Friday, the 17th of May, at Twelve for One precisely, the BARK in the above Forests, and which will be sold as standing at the Pole, with the exception of a portion thereof, which is some of the produce of last year, and is stacked. The bark is now being stripped, and will be divided into Lots, and will contain in the whole about 210 tons in Delamere Forest, 40 tons in Hazleborough Forest, 83 tons in Salcey Forest, 718 tons in Dean Forest, 216 tons in High Meadow, 25 tons in Alice Holt Forest, 95 tons in Bere Forest, 30 tons in Parkhurst Forest, 785 tons in the New Forest, 75 tons in Windsor Park and Forest, and 23 tons 7 cwts at Andover, Hants. Samples will be on view at the offices of the Auctioneers, and at the Auction Mart, London. The bark in Delamere, Salcey, and Hazleborough Forests may be inspected and catalogues obtained on application to Mr Thomas Linnell, deputy surveyor, Eddesbury Lodge, Delamere Forest; that in Dean and High Meadow Forests on application to Sir James Campbell, Whitemead Park, Coleford; that in Alice Holt, Bere, and Parkhurst Forests on application to Mr N. Higinbotham, Holt Lodge, Farnham; that in the New Forest on application to Mr L. H. Cumberbatch, Queen's House, Lyndhurst; that at Windsor on application to Mr Wm. Menzies, Parkside, Englefield green, Staines; and that at Andover on application to Messrs Mortimore, who have charge of the same.—Catalogues may also be had at the office of Woods and Royal Forests, 2 Whitehall place; at the Auction Mart, London; of Messrs Clutton, 9 Whitehall place; and of Messrs Driver, surveyors, land agents, and auctioneers, 5 Whitehall, S.W.

MERCANTILE SHIPPING AGENCY. Established upwards of 80 years.
The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.
W. J. HALL and CO., Sworn Brokers,
(Successors of Holmes, Hall, and Sons,)
Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, E.C., London.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery

THE CITY TURKISH BATHS,
5 SOUTH STREET, FINSBURY.
Open daily, Sundays excepted.
The bath, in addition to being a great curative agent is the greatest physical luxury in the world.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.
FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.		Amount payable up to Dec., 1854.	
£	£	s	£	s
5,000	1,987	10	6,987	10
1,000	397	10	1,397	10
100	39	15	139	15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1859, amounted to £690,140 19s, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

Government Officials.—Reduction in Scale of Premiums

THE EUROPEAN ASSURANCE

SOCIETY ISSUES POLICIES of GUARANTEE, at reduced rates, for Officials in or under the Treasury, Customs, Inland Revenue, Board of Trade, Poor Law Board, Admiralty, and other public departments, and for Bank and Railway Clerks, and persons in commercial employments.

Further reductions on the combination of Life Assurance with guarantee. Annuities granted on favourable terms.

Forms and every information may be obtained at the Chief Office, No. 2 Waterloo place, Pall Mall, London.

LIFE ASSURANCE.—

Special Notice.—The next investigation into the profits of the Life Department of the SCOTTISH UNION INSURANCE COMPANY will be made as at 1st August, 1861, and parties taking out policies before that date will participate in the division.

625 new policies, for £304,705, yielding £9,828 6s 2d of new premiums, were issued during the year ending 1st August, 1860.

Thirty days' grace allowed to renew life insurances and 15 days to renew fire insurances, during which time, on payment of the premium, the Company hold themselves liable.

No extra premium charged for members of volunteer or rifle corps within the United Kingdom.

THE STANDARD LIFE ASSURANCE COMPANY.

Established 1825.

LONDON—32 King William street.
EDINBURGH—3 George street (Head office).
DUBLIN—66 Upper Sackville street.

ANNUAL REPORT, 1861.

The Thirty-fifth Annual General Meeting of the STANDARD LIFE ASSURANCE COMPANY was held at Edinburgh, on Monday, the 25th of February. The following results were communicated in the Report by the Directors, showing the operations of the Company during the year 1860:—

	£	s	d
Amount proposed for assurance during the year, contained in 1,384 proposals	807,747	0	0
Amount of assurances accepted, and for which policies were issued, contained in 1,207 policies	705,897	0	0
Annual premiums on new policies	22,565	4	6
Claims by death during the year, exclusive of bonus additions.....	164,326	14	8
Annual revenue at 15th November, 1860	304,161	13	7
Arising from premiums.. £227,598 4 1			
From interest on the invested funds 76,563 9 6			
	304,161	13	7
Accumulated fund, invested in Government securities, in land, mortgages, &c.	1,805,982	13	6

Average amount of new assurances annually for the last 14 years, Half a Million sterling, being the largest amount of business transacted in that period by any Insurance Company.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

NOTE.—An Adjourned Meeting will be held early in May, to receive the Report on the Division of Profits for the past Quinquennial period.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

EARLY PARTICIPATION IN PROFITS.

CLERICAL, MEDICAL, AND GENERAL LIFE ASSURANCE SOCIETY,

13 St James's square, London.

Policies in existence on June 30th, 1861, will participate in the Seventh Bonus to be declared in January, 1862; so that persons who complete Assurances before June 30th, 1861, will share in that Division, although one Premium only will have been paid.

Tables of Rates and Forms of Proposal can be obtained of any of the Society's Agents, or of

GEORGE CUTCLIFFE, Actuary and Secretary.

IMPERIAL LIFE INSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman.

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £18 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

THE LANDS IMPROVEMENT

COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any publicor general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

THE COLLEEN BAWN

JAMES FAHEY, Sec.

FRENCH, ITALIAN, AND SPANISH

CORRESPONDENCE.—A Manchester Shipping House is in want of a first-class Correspondent in French and Italian, or French and Spanish. A German preferred. Good style of composition and clear legible writing indispensable.—Address Box S. 36, Post Office, Manchester.

PARTNERSHIP.—A GENTLEMAN,

who is seceding from a highly respectable firm in the City, requires a Partner, who can command from £4,000 to £5,000. A half-share in the profits, which are about £2,000, offered to a suitable party. References of the highest order given.—Apply for particulars to Mr James Livett, 156 Cheapside, E.C.

WANTED, BY A YOUNG WOMAN

of serious habits, a situation as Companion or Attendant upon an elderly or invalid Lady. Either of them would find her services valuable, as she has been well brought up. Age 27.—Direct P.Q., Post office, Lea Bridge, Lewisham, Kent.

WANTED, BY A FOREIGN

Export House of Textile Fabrics, an experienced Correspondent, perfectly master of the French and German languages, and conversant with the general routine of the counting house. To a competent person, well recommended, a good salary and a permanent position would be offered.—Applications, with testimonials, to be made to Mr Edward Margetson, 4 Gresham street, E. C.

WANTED, A CORRESPONDING

Clerk, who has a thorough practical knowledge of accounts, and is well acquainted with the duties and routine of office work; he must be able to conduct correspondence in a very superior manner, and write a clear and fluent hand. Age not to exceed 28 or 30. A liberal salary will be given.—Apply by letter only, to Messrs Todd, Heatly, and Co., 11 John street, Adelphi. A knowledge of foreign languages is not required. All applications will be treated as confidential, but none will be attended to where age is not stated, and last and present employer.

TO CAPITALISTS.—

An opportunity now presents itself for any person having the immediate command of £10,000 to make six times that amount in a short time, without trouble or relinquishing for a moment the control of their capital. Apply, with real name and address, to A. B., 35 New road, Sloane street, S.W.

TO ACCOUNTANTS AND BANK MANAGERS.—

An Accountant, whose connection is of the highest class, is willing to admit a Partner of experience and ability to a share producing at present from £500 to £800 a year, and capable of considerable augmentation.—Address "Alpha," care of Messrs Hopwood and Sons, Solicitors, Chancery lane, London.

TO CAPITALISTS.—

£5,000 is required in connection with the manufacture and sale of an article of general demand, which has already acquired great notoriety and favour with the public. Half the interest is offered to the capitalist, the Patentee having now an opportunity of securing a great success to his patented improvement.—Address to R. S. P., care of Messrs Hammond and Nephew, 27 Lombard street, London, E.C.

MERCHANTS, WAREHOUSEMEN,

and OTHERS, are respectfully informed that they can at all times, and without delay or inconvenience, engage most efficient and respectable Managers, Bookkeepers, Clerks, Travellers, and other class of assistants, from Smith, Barry, and Co.'s, 106 Fenchurch street, publishers of the "Employer's Assistant," which is delivered gratis to employers.

150th SALE.

CUSTOM HOUSE,

London, May, 1861.—For SALE, by order of the Honourable the Commissioners of Her Majesty's Customs, at the Commercial Sale Rooms, Mincing lane, on Tuesday, 7th, Wednesday, 8th, Thursday, 9th, and Friday, 10th May, 1861, at TWELVE o'clock at noon precisely, the following GOODS for exportation or home consumption:—Anchors—Chains, &c.—Arnott Stoves (Iron)—Articles of Carved Wood—Boats—Books—Beer—Barytes (Sulphate of)—Braid, Trimmings, &c.—Brandy—Candles (Stearine)—Copper—Cutlery—Capsules—Coffee—Cordials—Chocolate—Dyewood (Fustic)—Dice—Earthenware—Empty Casks—Embroidery or Needlework—Geneva—Glass—Goose Quills—Goats' Wool—Hides (dressed)—Jewellery (Imitation)—Jute—Muskets—Molasses—Painters' Colours—Pepper—Perfumed Spirits—Rum—Rice—Raisins—Segars—Succades—Spirits, plain and mixed—Straw for Plaiting—Sugar—Seeds, &c.—Ships' Gear—Snuff—Tobacco—Tea—Timber—Vegetable Ivory—Wine—Watches—Water (Mineral)—and various other Goods.

The above goods may be viewed at the Queen's Warehouse, Custom House, Thames street, at the St Katherine, London, West India, East India, and Victoria Docks, and Tobacco Ground, Rotherhithe, on Monday, the 6th May, 1861, from Ten o'clock in the morning until Three o'clock in the afternoon, and on the days of sale, from Ten o'clock in the morning until Twelve o'clock at noon; the tasting of spirits and wine being restricted to the day of sale as regards the Queen's Warehouse.

Take Notice, that goods sold at this sale will not be delivered until after two clear days of the day on which they are sold, and that no lots can be paid for at the office of the Receiver-General after Two o'clock in the afternoon, and that on the days of sale money will not be received by the Receiver-General after Eleven o'clock in the forenoon.

Catalogues may be had at the Queen's Warehouse, Custom House, Thames street, One Shilling each.

The Political Economist.

THE ETHICS OF FINANCIAL OPPOSITION.

It may be questioned whether Mr Disraeli chose a sound Conservative policy, or a true political policy of any sort or kind, in his unsuccessful proposal to substitute a repeal of a portion of the tea duty for the entire abolition of the paper duty. It is an old and just maxim of constitutional morals, that the finance of the country should only in the rarest cases, and on occasions of critical necessity, be made the subject of party strife. The business-like habits and nature of Englishmen do not like to see *money* so played with. A due care for the national Exchequer—such at least was the doctrine of past times—is too evidently important, too pressingly necessary, to be postponed to the claims of party conflict or the aims of personal ambition. And the Conservatives who assume to 'stand upon the old 'ways,' to maintain the tried maxims of the constitution, are especially required to adhere to this sound and excellent principle. But has Mr Disraeli actually done so?

It is unquestionable that upon one view of the present Budget he would have been quite justified in opposing it by every means in his power—in using the whole resources of party organisation to resist it—in summoning his followers from the extremities of Ireland or from the ends of the earth. This view is the view of Mr Horsman. That comfortable and comforting politician tells us that there is no "balance" out of which taxation can this year be remitted, and that this present Budget will disclose to us, even as soon as "July," "the unfathomable abyss of an interminable deficit." Now, if this be so, it was not only the constitutional right, but a duty incumbent on the Conservative Opposition, to resist it. If they are leagued in the House of Commons for any good purpose, it is to prevent the present Government from doing harm, and one of the worst kinds of harm is financial disorganisation.

We could not absolve the Opposition from this, their constitutional duty, upon the simple and plain ground stated with his usual emphasis and vigour by Mr Bright. He said, "he would always believe any Chancellor of the Exchequer "who said he had a surplus." And he meant that, in his opinion, that functionary will always be so anxious to obtain money, that his assertion that it is not required is unquestionable and conclusive evidence that it cannot be required. But this is a very superficial view of the temptations of a financial minister in the present age. A Chancellor of the Exchequer may desire *popularity*. We do not think or hint or for one moment imply that such is the case now; it would be an insult to Mr Gladstone to praise his *bona fides*,—for only the wildest and basest of his opponents have ever dreamed of questioning it; and, moreover, his financial replies have this week taught many that his figures are not so questionable or his balance so unsubstantial as they thought;—but it is a future possibility that some Chancellor of the Exchequer may look to his immediate personal or party interests more than to his permanent reputation or the interests of the revenue; he may, in a word, wish to make 'political capital' at the expense of the national capital; and, in that case, the opposition would unquestionably be bound by constitutional duty to resist him.

But Mr Disraeli did not take this line of argument. He threw away the eager though disinterested support of Mr Horsman. He acquiesced in the 'reality of a 'surplus,' and only confined himself to criticising the mode in which Mr Gladstone proposes to dispose of it. He could not, therefore, say that he interfered to preserve the national finances from an anxious desire to protect the nation from a growing and 'irretrievable deficit.' He interfered with a financial alternative; and the simple question which he raised was, the balance of the advantages which he offered over those which he rejected.

And, in this respect, it is very questionable whether the proposition was a wise measure of constitutional opposition. It was violating the sound rule of exempting the financial arrangements of the State from party clamour and party violence without any strong or sufficient reason. Even if it were plausibly argued that there were some small preponderance of advantage in the remission proposed by the Opposition over the remission proposed by the Government, it would still be a matter of grave doubt whether it were wise to take the national finances out of the hands of the responsible Administration. On questions of money a Government has great advantages. It has access to information of which the public knows but little; it is aided by skilled public servants in the revenue departments, whose names are but little known to the general public, but who, nevertheless, spend their whole lives in their respective posts of finance, and often apply very great abilities to them; it is obliged to consider, with this information and with this counsel, the financial prospects of the year as a matter of anxious business and under the pressure of actual responsibility. According to every probability, therefore, it is more likely to be right than the chance opinion of a composite Opposition, based on no peculiar knowledge, aided by no peculiar skill or science, formed without the steadying, regulating, and chastening influences of official duty. Every sound thinker would be inclined to sacrifice what seem to him plausible opinions and probable conjectures, rather than interfere on complex questions of financial expediency with those who have the best means of knowing and the strongest motive to be right.

In the present case, we avowed some time since a perhaps over-cautious and over-anxious judgment. We still, however, retain an impression that it would have been better this year only to have abandoned the tenth penny of the income tax, and to have retained all our present sources of indirect revenue. Our surplus is formed by anticipations of an augmented revenue, which are certainly not unfair, which may very possibly in the event be considerably exceeded,

but which, on the other hand, would be wholly deranged by a second bad harvest, or any other equivalent calamity; and by the anticipation of a casual receipt from the other side of the world which may after all not come in. Having regard to the compound doubtfulness of two dubious items, we should prefer to deal timidly and gently with the estimated surplus, and to take off only the tenth penny of the income tax which we imposed last year.

But if any other impost is likewise to be removed, we have seen no argument to impair our former opinion that the paper duty has a preferable claim to the tea duty under the existing circumstances of the country, and after the decisive events of last year.

There are with respect to the paper duty only two lines of policy which are in any degree rational or wise. We should either get rid of the paper duty at the earliest possible period, or we should decide upon maintaining it as a permanent part of the revenue of the country. For what is our position? The House of Commons last year condemned the paper duty in the most conclusive mode in which a duty can be condemned. It sent up a Bill to the House of Lords to abolish it. The House of Lords—avowedly as an extreme and exceptional step—expressly on reasons of high financial necessity, whether true or false—simply and solely because they believed that the money which it was proposed to relinquish was in reality very urgently wanted—refused to pass the Bill. But now that it is admitted that the money is not urgently wanted, what is the House of Commons to do? Consistently with its constitutional dignity it can only do one of two things. It can say, 'We adhere to our opinion 'that this duty is a noxious, vexatious, retarding influence. 'We reiterate the expression of our opinion that it ought to 'be repealed. We require of the House of Lords, now that 'the momentary reasons alleged last year have passed away, 'to pass the Bill they then refused—to abolish the tax they 'then maintained.'

After a change of Ministry, and perhaps a dissolution, the House of Commons could consistently say, 'We bow to 'the decision of the House of Lords. We admit that the 'duty which in 1860 we proposed to repeal, is, notwithstanding its occasional defects, upon the whole, a satisfactory 'duty. We are much obliged to you for rejecting our former 'Bill. We will, as far as we can, hereby declare and agree 'that the Excise duty on paper is and shall be a permanent 'part of the revenue of the country.'

No one who practically knows the essential temperament of the House of Commons would ever question what in this alternative would be their conclusion. They never would acquiesce in the decision of the House of Lords. No party in the State would ever think of making such a proposal to an assembly which, however miscellaneous its composition, is yet the proudest and the most self-centred of any in the civilised world.

But the course which Mr Disraeli proposed was even less dignified. It was a retractation, not upon great and clear reasons, but for little and complex reasons. It amounted to saying, 'We 'will pass by all question of the paper duty at the present 'time. Perhaps you were right in rejecting it; perhaps 'not. But there is this other tax, which after all is better 'worth repealing, though we forgot it last year; which has 'greater inconveniences, though we then overlooked and did 'not appreciate them; which we will thank you to repeal, 'as by not doing what we then wished you have given us 'now an opportunity of repealing it.' It would be very difficult, at any rate, to induce a House of Commons to say this. It would not be very easy to induce it, as a condescension to the House of Lords, to retract, even for indisputable and permanent reasons, a financial error of permanent importance. Constitutional dignity is both for evil and for good a very powerful political force; and it would be impossible to induce the House of Commons to make a similar condescension for slight and insignificant reasons. The retractation which might have been just conceded to evident arguments of unanswerable force, could never have been granted to a fine-drawn web of nicely-balanced comparisons. The House of Commons has declined to take this course, and has been right in doing so. The constitutional dignity of the House of Commons may not be worth everything, but it was worth at least the difference whether the tea duty or the paper duty should be first repealed.

THE EVIL AND THE GOOD IN THE AMERICAN CIVIL WAR.

The war which has at length broken out in America, in spite of the truly legal caution and forbearance of the President, through the presumptuous aggression of the seceders, will no doubt be fierce and bloody. No one can think of it without dismay; no one can even venture to predict what may be its results and where it will end. The Southern leaders have unquestionably the whole responsibility of this fatal step. The blood which has at length begun to flow must be upon them and on their children. They originated the quarrel by their passionate desire to extend the shameful institution of which they are so proud. At every fresh turn of the dispute they have been the aggressors. They not only declined to submit to a constitutional defeat, but their statesmen had prepared by years of secret treason for the rebellion of last November. When they had consummated their purpose, and found the Northern States still long-suffering, still reluctant to precipitate the unhallowed strife, and yet intent on holding their ground in the Federal property still remaining to them, —they profited by the delay which the intercession of the Border States secured, only to mature their aggressive measures, and then did not hesitate to break the truce and plunge the country into civil war. Their plans are well conceived and ably executed. They are directed by a man of prompter mind and more vigorous decision than President Lincoln, and for a time they will probably be successful. The Border States, after causing a delay long enough to serve the purposes of Mr Jefferson Davis, are now going off with rapid explosions to the enemy. Virginia has seceded, and on the attempt of her troops to seize the Federal arsenal at Harper's Ferry, it was blown up and abandoned by the officer in command. North Carolina has again seized the Federal forts. Even Maryland is fiercely divided. The war feeling is strong in Tennessee. Kentucky, alone, appears still to incline to the Northern side. A march on Washington was apprehended; and the Northern States, at length aroused to the true character of the position, were slowly sending in their succours to the President, while the Southern army was said to be completely organised. Blood had been already shed by the Secessionists both at Baltimore and Harper's Ferry, and every hope of compromise was at an end.

Such news seems pure evil. And that it is the herald of frightful calamities, no thoughtful man can deny. Still it is not in our estimation evil quite unmixed and unfathomable. Black as the storm is, we believe there is promise of light through it. Let us take the worst feature first;—and the worst feature about the war undoubtedly is that the eventual victory of the North can scarcely carry with it eventual success. We speak of the Northern victory as ultimately certain, because a wealthy and free population of twenty millions cannot but conquer in the long run in a contest with a poor free population of the same race, numbering at most seven millions even if we give the South the whole of the Border States. That the North may be beaten at first, we regard as exceedingly probable. But that a defeat will only animate the Northern States to greater and greater exertion, we consider absolutely certain. And in the long run no doubt wealth and numbers must decide this fatal strife. But suppose the war ended, and ended by the defeat of the Southern Confederation, will victory mean success? We think not. It may bring back one or two doubtful districts or even doubtful States within the Union. It may restore Western Virginia, Missouri, and Kentucky, —possibly even North Carolina to the United States; but in the Gulf States at least victory would be conquest, and conquest only. No one doubts that in these States the Secessionist party has always had an enormous majority, which is likely to be increased by civil war into a feeling of ferocious unanimity. Those States may be conquered, may be held in military possession, but they can scarcely again be expected to take a voluntary part in the political institutions of the United States. Unless the issue of civil war were a Slave insurrection which should put an end to

the institution of Slavery altogether as the result of a train of events which it is utterly impossible to measure or foreshadow,—the Gulf States can never again be reasonably expected to act in political concert with the North. Whatever result, therefore, a Northern victory might have,—it could not be a political recovery of the Gulf States. It seems as certain as any human event can be, that by them at least the step taken can never be retraced. It follows, therefore, that the war, bloody and perhaps long as it may be, will be in this respect a fruitless war. The blood of Americans will be poured out by Americans, without any hope of achieving the end which is apparently the only legitimate end of such a war. After the conflict is over, the rival parties will be politically just where they were when it began,—except that mutual animosities will be deeper, both parties will be poorer, and both parties more vindictive than at the outset. The North will beat the South in the end, but when it has done so, we do not see what the Government can do, except leave the South to follow its own devices at the last as it might do at this moment. Surely nothing can well be blacker than a prospect of a war at once vindictive, bloody, and fruitless.

This is the dark side of the prospect, and a very dark side indeed it seems. There is, however, not a little to be said on the other side. And the main consideration appears to us to be that the war will draw together the Northern States as they have never been drawn together yet,—will teach them the all-important character of the Slavery issue,—will sweep the political horizon of those petty political controversies which have long frittered away the attention of Statesmen and diverted them from the really great issues which were slowly maturing beneath the surface of society,—and finally will impress them with the absolute necessity of a closer union, a stronger central power, a suppression of those repulsive forces which keep State and State jealous and apart,—in one word, with the duty of turning the Federal Government into a really supreme power. Such, we think, may, and most probably will be, one result of the disastrous conflict in which the United States are now engaged.

As a secondary and casual advantage, the struggle will liberate from the authority of the Border States all those sections which are already prepared and anxious to extinguish slavery. This would be difficult to effect without war. While the State organisation is still perfect, the stronger party will carry the State. For example, in Virginia the State has declared for the South, but Western Virginia is almost entirely in sympathy with the North. Again, in Kentucky there seems to be a very large Northern party and the same is true of Tennessee. Nothing but war probably could dissolve those State-chains which bind the reluctant freeman to the corrupt and corrupting domestic institution in such cases as these. But war will enable these fragmentary States, chafing under their hateful connection with districts of quite different political tendencies, to achieve their liberty and seek the protection of the Union. This would be in itself no small gain. But the one gain which alone can compensate the North for the horrors of civil war is the growth of genuine Republican conviction to which it will probably give rise;—the learning of the great lesson that there can be no hearty political alliance between freedom and slavery, and no genuine freedom without a strong central government and the surrender of those atomic political privileges which minister to local jealousies and general anarchy.

For the South we see no possibility of a good issue for the war which its statesmen have provoked and commenced. The greater their temporary success, the greater must be their ultimate humiliation. Their policy seems to us able and masterly, but utterly short-sighted. To rouse by gratuitous insult the mettle of a nation three times as numerous and far more than three times as powerful, to force them by aggressive steps into a struggle in which the sympathy of every free and civilised nation will be with the North, seems like the madness of men whose eyes are blinded and hearts hardened by the evil cause they defend. Had they been wise, they would have trusted all to delay and their own obstinate purpose. As it is, they rush on a war which, whether it end in their mere exhaustion or in the horrors of a servile insurrection, cannot but end in humiliating disasters, which will excite no pity, because they have been positively courted by the Southern leaders.

MR JEFFERSON DAVIS'S LETTERS OF MARQUE.

The recent events in America have given rise to a very curious event. We have very often called the attention of our readers to the laws of maritime warfare. We have pointed out how favourable they were to nations which were generally neutral in times of war: we have shown how much, as America was always presumably neutral, they operated in her favour. And such were the fair probabilities, the plain conclusions of very simple reasoning. But what has been the result? In fact, the Northern States of America, the shipping States, are at this moment suffering very materially from the usages of warfare; those who were expected to benefit have been the first to suffer.

The position of the Southern States was, in many respects, a peculiar one; but in no respect was it more peculiar than in this,—though possessed of a very long line of sea coast, they have not the vestige of a navy; not a single armed vessel of war belonged to any of them. They were wholly unable, therefore, to provide for the now imminent contingency of a maritime war with the North in what we hold nowadays in Europe to be the regular and legitimate way, and are driven to what we deem an exceptional and unjustifiable course. As they had no navy, they issued "letters of "marque," which will empower any individual to fit out a privateer with which he can annoy the mercantile navy, and in some small measure carry on a maritime warfare with the North.

The effect has been immediate, and would have been foreseen, if only the unprecedented events which have caused it could have been anticipated. United States ships are at a great disadvantage. They can be attacked in all quarters, and especially near home, by such privateers as any individual associates of Mr Jefferson Davis may think it expedient to fit out and maintain. These may not perhaps for the moment be very many, but still there is a risk for the present, be it what it may, to which American ships are exposed. A year ago, we should hardly have fancied such an event to be within the range of possibility,—certainly we should have laughed at any one who ventured to predict that it was impending.

MODERN CONSERVATISM AND LIBERALISM.

LORD DERBY AT THE MANSION HOUSE.

That there has been during the last year a very striking accession to the forces of the Conservative party, both in Parliament and in the country, it would be idle to deny. But how far this undeniable fact is a fit subject for exultation, even in the breast of the great leader of the Conservative party himself, is a question which may depend in some degree on the causes and nature of this new Conservative movement,—whether it be of a kind to strengthen "the "Church, the Peerage, and the Monarchy" in the hearts of the people of England, as Lord Derby thinks, or only of that provisional and suspensive kind which is prepared to preserve the *status quo*, in lieu of any hearty belief either in Church and Peerage, or in anything else which professes to be hostile to them. We should think better of the new Conservatism than we do, and better also of the party-Liberalism which is opposed to it, if there were any signs of hearty attachment to great principles on either side. But the truth seems to be that Conservatism is gaining ground in Home Affairs, not as representing any new growth of loyalty, but as a principle of inaction—as a principle of disbelief in the wisdom or utility of reforms; while Liberalism is losing ground because the Liberals also have ceased to believe cordially in the efficiency of the changes they recommend, and continue to repeat the watchwords which they have inherited, but which no longer represent their convictions, with a secret hope that the inertia of the nation will be too strong for their languid efforts to overcome it.

We cannot think that there is cause for any triumph on either side in such a condition of things. That "great Con-"servative party," which Lord Derby so proudly boasts of leading, was never held together by principles so purely negative as at the present moment. The traditional attachment to "the Church, the Peerage, and the Monarchy," of which Lord Derby speaks, was, a generation ago, genuine faith and zeal as compared with the cautious and sceptical dread of change which now replaces it. The recent Wednesday vic-

tories of which the Tories boast, have been, with few exceptions, victories won, not by a common faith in the sacredness of existing institutions, but by a common and vague dread of the disasters which any alteration, however infinitesimal, might bring with it. The Conservative speeches and articles show that on every subject, except the Ballot, which has been brought before them on these Wednesday afternoons,—on Church rates, on Church burials and Church district preaching, on Mr Dilwyn's Charitable Endowments Bill, on the question of marriages within the prohibited degrees of affinity, and even on Reform itself, the Conservatives have little belief in the satisfactoriness and justice of the present state of the law. Their argument is always the same: 'Things are certainly not as 'they should be, but once begin altering, and where are you 'to stop? We do not believe in *your* principles for improving 'things, and we have none of our own, and can lay down no 'distinct limits to change. Therefore we oppose all change.' This is not the spirit of a great party. This is not what could give courage to them if they were to succeed in grasping the helm. They can unite only to defeat any fresh proposals of their opponents. Ask them to guide the State, and they will divide in a moment. Many of their leaders are too sagacious, and many of them are too sincere, to avoid seeing that a 'let 'alone' policy is only another word for deliberately consigning some of the most valuable of our institutions to rust and destruction,—and that true Conservatism, wishing to save the essence rather than the form of English constitutional traditions, should be prepared to announce principles strong enough to cope on equal terms with democracy in politics, and with the bodies external to the Church in religion. But though some of the leaders see this, and condemn the childish cry of "No "surrender" where a wrong is admitted, their followers cannot agree either with their leaders or with each other,—or can only agree to preserve the *appearance* of believing in the perfection of institutions, the faults of which are secretly haunting them and inspiring them with vague dread. So far from the Wednesday victories being matter for much triumph, we believe that they have generally shown Conservatism in its poorest aspect, admitting evils which it is too pusillanimous to attempt to remedy, and delighting to overcome the little faith of the Liberals in their proposed remedies, by their own utter want of faith in even the possibility of a remedy.

Again, in Foreign Affairs, as Lord Derby tacitly admits, the Conservative party has not even the advantage of representing the national unbelief. There we find at least the remnant of a national faith. The English nation does strongly hold to the greatness and justice of the cause of constitutional liberty on the Continent, and especially in Italy. It does believe in the value of an orderly and free national life. It does look to the triumph of the Italian cause as the greatest hope of modern Europe. It does, in spite of the leading statesmen on both sides of the House, profoundly distrust the Austrian power, and sympathise with the struggles of Hungary for her ancient independence. And in all these things the Conservatives do not even profess to represent the nation. They believe only in the *status quo*. They wish only to prevent any change, either for the better or the worse, and to keep aloof from any change which may prove inevitable. They have ceased to advocate openly the cause of foreign dynasties and despotisms. They have not yet begun to believe in foreign *nations*. And so they linger on in virtual alliance with the *laissez faire* radicals,—giving their sympathy to the powers that be, heaping discouragement on all inchoate attempts to subvert those powers, and advocating a policy of unlimited reserve. This is Lord Derby's foreign policy, and in this, as his cautious hints indicate, he does not represent the English nation. For the people of England, though they have no defined convictions on British affairs, still retain an enthusiasm for the constitutional cause abroad,—and would probably like best at the present moment to be ruled by a Conservative Administration at the Home Office, and a Liberal Administration in the department for Foreign Affairs.

But if this passive and negative Conservatism but little justified Lord Derby's boasts, the fault in great measure lies, as we have already indicated, with his Liberal opponents. Conservatives are strong when they rest upon a sleepy feeling of loyalty and attachment to things as they are; but Liberals are bound to base themselves on a creed as well as a sentiment,—for, as they propose changes, they ought to be able to defend them by exposition and argument. If the modern Conservatism shows very little sign of unity of sentiment,—the modern Liberalism shows still less of unity of conviction or zeal. The Liberals ask, indeed, for changes, and put forth mechanically the old arguments without the old conviction. Except in foreign politics,—and even there they hesitate to support by anything more than barren sympathy the cause they esteem most profoundly,—they see no changes for which they are heartily eager, although they are, as it were, constitutionally conscious of some abstract necessity for change. They try to believe in public in formulas which they abandon without excuse in private. They wish to see political power given to the working classes, and fetters taken off the action of the Church; but they are quite aware that the old recipes for securing these results are really incompatible with much that is most valuable in the present condition of things, and yet they have no courage to say so, and propose new ones. The Liberals have lost heart because they have no genuine faith in their old prescriptions, though they still cling to their old aims; and if it be ground enough for triumph to see them scared, spiritless, and helpless, Lord Derby may be justified in his exultation. But if he looks a little further, and wishes to see some positive bond of unity in his own party, deeper than a common distaste to all proposed reforms,—he would have plenty of ground for melancholy rather than exultation. They are a hollow square with nothing at the centre; when you have cracked the shell of Conservatism the kernel turns out to be the apologetic Conservatism of Mr Disraeli, which manufactures ready-made principles so soon as they are wanted for arguments, and abandons them so soon as they become inconvenient. The nation has little reason just now to be proud of either of its great parties,—either of the Conservatism which is strong only in cowardice, or the Liberalism which is bold without belief.

THE BOARD OF TRADE RETURNS.

THE TRADE WITH THE UNITED STATES.

The Board of Trade Returns for the first quarter of 1861, which will be found in our usual monthly Supplement, show a very considerable decline in the value of our exports, though the returns for March are much less depressed than those for the two previous months. The declared value of the British and Irish exports is as follows:—

	1859.	1860.	1861.
	£	£	£
Month of March	11,313,228	10,393,470	10,950,830
Three months ending 31st March	30,520,794	30,481,907	27,669,249

In case the trade of the first quarter of the year should turn out to bear its ordinary proportion to that of the entire year, we shall probably find the value of the export trade up to the mark of the depressed year 1858, but considerably inferior to that of 1859 and 1860. Of course the most serious falling off is in the trade with the United States, and, under present circumstances, both political and economical, we can scarcely expect that in this there will be any improvement, but rather that there will be an increased decline during the remainder of the year. Yet it is well worthy of note, that the Morrill tariff has produced no sensible effect on the exports even of March. It became law on the 2nd of March, and the assent of the President to it was known in this country about the 12th: indeed few had anticipated a veto during the earlier part of the month; and as it was to take effect in America from the 1st of April, it may be supposed to have told on our export trade in March with a great part of its force. That it was considered easy to evade it (we believe in some cases by shipping goods to Southern ports and paying the Southern duties, and then sending them to the North as American goods), seems probable from the following figures. The Morrill tariff would appear to have had no effect in diminishing our trade with the United States, except in the case of the metals.

The following gives the comparison both for March and for the three months ending 31st March:—

DECLARED VALUE of EXPORTS to UNITED STATES.

	March.		Three months ending 31st March.	
	1860.	1861.	1860.	1861.
	£	£	£	£
Beer and ale	10,000	5,000	27,000	8,000
Coals and culm	12,000	23,000	30,000	50,000
Cotton manufactures	245,000	252,000	1,210,000	923,000
Earthenware & porcelain	60,000	40,000	184,000	98,000
Haberdashery and millinery	170,000	160,000	524,000	421,000
Hardware and cutlery	70,000	59,000	245,000	183,000
Linens	120,000	173,000	527,000	355,000
Iron (pig)	15,000	15,000	36,000	37,000

Tin (plates)	106,000	36,000	266,000	65,000
Oil (seed)	10,000	700	29,000	1,000
Salt	6,000	9,000	36,000	30,000
Silk stuffs	13,000	26,000	56,000	60,000
Other silks	7,000	3,000	37,000	15,000
Soda	44,000	21,000	140,000	62,000
Spirits (British)	400	6,000	6,000	8,000
Woollen (cloths)	84,000	74,000	250,000	199,000
— (mixed stuffs, flannels, &c).	148,000	184,000	483,000	424,000
— (worsteds)	103,000	84,000	342,000	244,000
	1,488,000	1,298,000	5,084,000	3,573,000

Now from this it is clear that the decline in the value of our exports in the month of March is much less in proportion, than for the quarter in general, though the Morrill tariff has affected March, and March only, of the three months. While the decline on the quarter is about 30 per cent., that on the month's exports to the United States is about 13 per cent.,—so that the depressing causes have evidently operated with *less* severity on the month on which the new tariff has partially operated to diminish exports than on any previous month.

The trade with the British possessions in India is still of course exceedingly depressed, as compared with recent years, though here again it seems true that in March there is a tendency to less depression than in the preceding months. It is remarkable that, in the face of these unfavourable circumstances, our cotton manufacturers have exported goods to a larger value in March than even in the same month of 1859, the declared values being:—

March.		
1859.	1860.	1861.
£	£	£
3,074,456	2,825,136	3,323,878

The increase is accounted for by the *enormous* increase of our cotton exports to China,—our only customer for these goods who appears to be largely increasing her consumption, and even here we should fear that the increase is somewhat of a speculative character. The figures are these:—

COTTON EXPORTS to CHINA and HONG KONG.

March.			Three Months ending March 31.		
1859.	1860.	1861.	1859.	1860.	1861.
£	£	£	£	£	£
286,879	296,646	579,699	555,039	838,758	1,333,490

from which it appears that we are exporting to China and Hong Kong more than double the value of the goods of this description which we exported in 1859. No doubt the market, if once fairly opened to us there, may be almost insatiable, but at present we fear the exportation is in some measure speculative.

With respect to the imports, we may observe that the provisions so largely demanded in consequence of last year's deficient harvest are still rapidly pouring in. There is some falling off, on the other hand, in the imports of cotton and wool in the month, and still more in the three months.

The following are the quantities of raw materials received in the month:—

	March.		
	1859.	1860.	1861.
Cotton.....cwts	833,316	1,780,027	1,603,787

THE CAUSE OF THE INEQUALITIES IN THE PRESSURE OF THE INCOME TAX.

TO THE EDITOR OF THE ECONOMIST.

Trinity College, Dublin, 23rd April, 1861.

SIR,—In your article of April 20th upon the Budget there occurs the following passage:—"There will scarcely be a question that the reduction of the income tax has a prior claim to every other remission whatever. It presses more hardly, not of course on the richest persons who pay it, but on that subordinate, numerous, and straitened class of persons whom we call the lower middle class. Clerks with 200*l* a year would feel relieved by the diminution of the income tax more than by anything else; and if a fair person will compute the comparative pressure on different classes, they are probably the most burdened class of all."

The fact is, I believe, very generally recognised, yet I am not aware that any explanation has been given of it, much less that any remedy for the grievance it involves has been seriously proposed.

And yet the admission that a large section of the community is taxed out of proportion to its means, is surely a grave one, and imports a state of things which should not easily be acquiesced in,—a state of things, which, should it be allowed to continue, cannot but reflect discredit either on our financial skill or on our notions of equity.

I have said that I am not aware that any explanation has been given of this undue pressure of taxation on a particular class, although, if this has not been done, it is certainly not owing to anything recondite either in the nature or action of the causes which have produced it. I will, therefore, ask your permission to point out what appear to me to be these causes; and, if in doing so I am led to dwell on certain elementary principles of finance, it will I trust be a sufficient excuse for thus occupying your pages, that those principles, elementary as they are, are yet constantly denied by writers who pretend to economic knowledge, and that to their operation is directly to be traced the evils which we are considering.

Our fiscal system is worked by two great financial engines, direct and indirect taxation,—taxation applied to persons and taxation applied to things. By means of either of these methods, were it only carried out without exception, perfect equality of taxation might be attained. If, for example, an *ad valorem* tax were imposed on all commodities whatever, each person in the nation would then contribute to the revenue an amount exactly proportioned to his expenditure, each would submit to an equal sacrifice, and absolute equality of taxation would be the result. Such a scheme, however, could only be carried into operation by sacrificing to the single consideration of equality all the other ends of a good system. The expenses of collection would in many articles exceed the proceeds of the tax when collected. Exceptions would therefore have to be made, and exceptions once made must quickly be multiplied. Without entering here into the numerous reasons for limiting the field of indirect taxation, it is sufficient to say, that, by repeated experiments, the principle has now been established, that indirect taxation, to be productive, must be restricted to a few commodities of large general consumption,—commodities, which, without being necessaries (against the taxing of which a special objection lies), yet approach so nearly to this category, that there is no danger of their consumption being seriously diminished by moderate taxation. By acting upon this principle indirect taxation has been rendered an efficient engine of finance. Unfortunately

we have gained in point of efficiency, we have on the other hand, through the same cause, been losers in point of equality. We are enabled to raise a large revenue at no great expense by means of indirect taxation, but this taxation being applied to but a few commodities, those who pay it are taxed, not in proportion to their means, but solely in proportion to the quantity of the taxed commodities which each happens to consume. I say that the community, so far forth as they contribute to the revenue through indirect taxation, are not taxed in proportion to their means, because the quantity of tax-paying commodities which each person consumes bears no constant proportion to the amount of his income. This is a necessary consequence of the nature of the commodities which are selected for taxation. They are, as I have said, commodities which, without being necessaries, nearly approach to that character. Particular exceptions might, I know, be taken to this statement, but they would not affect its general truth. Accordingly, this being the nature of the commodities selected for taxation, *they* are the *first* objects towards which expenditure is directed, as soon as the desire for necessaries has been satisfied. The labourer and artisan spend almost the whole of their surplus income—of that portion of their *income* which is beyond what is necessary for sustaining their physical energies—upon commodities which are the subject of taxation. The same is true of persons with incomes ranging from 100*l* to 200*l*, and perhaps we might say to 300*l* a year. Even in the case of incomes reaching to 400*l* a year, the portion that is not spent either upon necessaries or upon tax-paying articles is probably not large. As we ascend, however, in the scale of fortunes, we reach a point at which this element of expenditure—the portion which escapes taxation—becomes considerable; and just in proportion as this element is large, the owner of such income fails to pay his fair share to the revenue as compared with those below him in the pecuniary scale. The result is that while for incomes comprehended between the limits, say of 50*l* and 300*l*, indirect taxation affords not only an efficient but a tolerably equitable engine of finance, when applied to the whole range of incomes in a country, it entirely fails in the latter attribute. The consumption of tax-paying commodities by a man of 300*l* a year is probably (other things being equal) nearly six times as great as that of a man of 50*l* a year; but the consumption of such commodities by a man of 3,000*l* a year is certainly not ten times, and is probably not twice, as great as that by a man of 300*l* a year. It follows that, as a means of raising the general revenue, indirect taxation, if employed exclusively, must either be inefficient and expensive, or grossly unequal, and unequal in a most disastrous way, falling with its whole force on the poorer and middle classes, and allowing the wealthier to pass comparatively untaxed.

I know it has been urged, in depreciation of this view of the case, that the larger establishments of domestic servants maintained by persons of large fortunes go far to rectify the inequality complained of, the consumption of tax-paying articles by the rich through their domestic staff being, it is alleged, very great. But, in the first place, even if this consideration be allowed for, it would go but a short way in making out the conclusion which is aimed at; and, in the next, I venture entirely to deny the assumption on which it rests, that it is the employer of servants and not the servant himself who pays the tax. If indeed the taxation in question were directed *specially* against domestic servants, no doubt the persons requiring their services would be those on whom the tax would ultimately fall. Paterfamilias would find it necessary to raise the scale of his domestic salaries in proportion to the special inconveniences to which this field of industry was liable, and servants would be placed in as good a position relatively to other members of the industrial body as if no taxation existed. But, where the tax is general, and falls upon the whole class from which domestic servants are taken, no such consequence as this can arise. The wages of domestic servants will in the long run bear that proportion to wages in other departments of industry which the relative desirableness of the different occupations prescribes; and the wages of industry generally are determined by causes quite independent of taxation. It is, therefore, as impossible for the servant as it is for the artisan or labourer to escape from the common burden; whence it follows that the proprietor of the largest establishment in the kingdom does not pay in indirect taxation more than that included in the consumption of his own immediate family; all beyond this falls not upon the proprietor, but upon the persons whom he employs.

Indirect taxation, therefore, if employed exclusively and under the only conditions under which it can be employed with effect, necessarily throws an undue proportion of the whole fiscal burden upon the lower and middle classes of society; whence arises the necessity of resorting to some other financial expedient in order to redress the balance, and restore the equilibrium which has been disturbed. Such an expedient is furnished by direct, or personal, taxation, with regard to which the same observation may be made which has been made with reference to indirect taxes, that, if it were only applied universally, perfect equality might be attained. An income tax, for example, discriminating incomes according to their sources, and extending from the millionaire down to the working man, would fulfil the conditions of a perfectly equal tax. But such a tax would be as impracticable as an indirect tax applied to all commodities. The collection of the tax from the smaller kinds of industrial incomes would probably be found impossible; and, even if this could be accomplished, the expenses of collection would probably exceed the yield of the tax. Direct taxation, therefore, like indirect, admits in practice of but partial application, and, consequently, if exclusively employed, could only result in the same injustice as the other. Fortunately it happens that the pressures proceeding respectively from each of those forms of taxation act in opposite directions, and, consequently, that one may be employed to neutralise the other. The commodities which favour most the application of indirect taxation are those which form the staple of the consumption of the lower and middle classes. On the other hand, the incomes to which the income tax can be most effectively applied are the incomes of the rich. There is only need of a judicious combination of the two forces to secure in moderate measure the most important condition of a good fiscal system—convenience, efficiency, and equality.

These considerations, Sir, at once afford an explanation of that excessive weight of taxation falling on the "lower middle class," to which you have called attention in the passage with which I have opened this letter. The clerk with 200*l* a year is taxed, through the income tax, in the same proportion to his means as the fundholder with 10,000*l* a year; while he contributes through indirect taxation in a far larger proportion: he is, therefore, including all taxes, more heavily taxed. On the other hand, he is more heavily taxed than the artisan with 50*l* a year, because, while he pays through indirect taxation in about the same proportion, his payments through the income tax are so much in clear addition. "The lower middle class" encounters both the financial forces at the point of maximum intensity; it is caught between the upper and nether millstone of direct and indirect taxation, and of all classes must be the most severely crushed in the fiscal mill.

If this be the correct explanation of the unequal pressure of taxation upon this section of the community, there can be no difficulty in suggesting the proper remedy. Why should not the income tax be graduated, so as to increase in rateable amount as it reaches the higher class of incomes? The principle is already acknowledged in the distinction between incomes above and below 150*l*. But, if there be anything in the principle, it will scarcely be pretended that such an application of it is sufficient. It would, however, be entirely beyond my present purpose to enter into the full discussion of this question. All I desire is, now that a committee has been appointed to inquire into the working of the income tax, to call public attention to this aspect of the case. Theory and observation concur in the conclusion, that persons with incomes ranging between 100*l* and 500*l* or 600*l* a year, are far more heavily taxed than either those above or below them. The mode of giving them relief is obvious, and would be attended in practice with none of the difficulties which attach to other proposed modifications of the income tax. It is to be hoped, therefore, that this view of the case may receive the attention of the committee.

I cannot conclude this letter without referring to a passage in Mr Gladstone's Budget speech, bearing upon the question I have been discussing. Mr Gladstone there tells us that "there is no reason why we should not be governed without

an income tax"; yet, only a year since, the same statesman, also in his Budget speech, assigned a very sufficient reason why this should not be, and by doing so drew down upon himself no small amount of vituperation from certain weekly censors, who set up for being high economic authorities apparently upon slender grounds. The reason which Mr Gladstone then assigned was the fact to which I have just adverted, the necessity in an equitable system of a counterpoise to the undue pressure of indirect taxation upon the lower and middle classes. When Mr Gladstone next declares his willingness to dispense with an income tax, it is to be hoped he will explain by what means he proposes to obtain this counterpoise, and to redress that inequality to which he himself, only a year since, so pointedly drew attention.—I remain, Sir, your obedient servant,

JOHN E. CAIRNES.

THE SLIDING SCALE BEFORE THE LEGISLATIVE CORPS.

[CONDENSED FROM THE "REVUE DES DEUX MONDES" FOR APRIL 1861.]

THERE are various opinions amongst the economists upon the modifications during the year in our Customs tariffs, and although approving the principle, the change appears to some premature, radical, and arbitrary. We still adhere to our published opinions, but differ in respect to the proposal for the abolition of the sliding scale upon the cereals just presented to the Legislative Corps, and with the exception of minor details, of which we shall speak hereafter, this measure appears worthy of our approbation. That it will be a law having the assent of the representatives of the country, and not a decree, is its great merit; since, for the past ten years, there has been no positive certainty respecting the cereals, as the Government has, according to its will, established or suspended the sliding scale. The Government desiring to emerge from an uncertain and capricious system, appears to us to have chosen the only course for settling this great question. The sliding scale has been everywhere condemned by experience, and we do not attempt to analyse the intricacies of past legislation, which, under reasonable appearances, conceals a series of mystifications.

The inquiry before the Council of State in 1859 shows the true effects of the sliding scale—to weaken rather than sustain the ordinary prices of corn, by putting obstacles in the way of continuous commerce—to aggravate a tendency to extremes, since importation or exportation was prevented except when prices were at the highest or lowest point. The Central Society and the agriculturists generally have condemned this illusory operation. The Council of State and the Government, after much hesitation, coincide in this opinion, and the adhesion of the Legislative Corps alone is wanting to cause the sliding scale disappear from our code, as it has done already from those of neighbouring countries.

We must do justice to former Governments by saying that they have not consented to the sliding scale without protest. The law of 1819 initiated the system, and the Duc de Richelieu proposed an amelioration in 1821, but a Commission of the Chamber thought a flow of grain to the interior would follow, and placed prohibitions on foreign produce, in spite of the views of the minister, and in opposition to the Government. As if Providence had designed to teach our legislators a lesson, the price fell to 15f in 1822, and 15f and 17f in 1823, 1824, 1825, and 1826, in spite of all protective duties and prohibitions.

Affairs remained thus until the revolution of 1830. In the month of October, 1831, M. d'Argout, Minister of Agriculture and Commerce in the Cabinet of M. Casimir Périer, proposed a radical modification to the Chamber. After warm discussions and much opposition his changes were allowed to pass into operation for one year, but the death of M. Casimir Périer occasioning a new ministry, the Act became permanent; and thus the sliding scale was introduced into our laws.

Let us inquire into the operation of this system. From 1832 to 1846 average harvests having produced medium prices, the sliding scale worked without detriment or utility. In 1846 there was a scarcity, and the Government perceived the necessity for suspending the Act, but feared the responsibility of such an unusual measure. During the deliberations the advance assumed disastrous proportions, and when the Chamber, pressed by evidence, decided in the month of January, 1847, to pronounce the suspension, the remedy was too late. In 1853, again the same occurrence, and enlightened by the experiences of 1847 the sliding scale was suspended at the commencement of the crisis, and, thanks to this precaution and the Marseilles Railroad, the scarcity was confined within narrower limits than in 1847. Encouraged by this success, the Government maintained this position until 1859, when a demonstration on the part of the Senate compelled a return to the former law; but in August, 1860, a recurring scarcity caused a new suspension, which remains to this time.

Thus for fourteen years since 1846, the sliding scale has been in operation six years, and suspended eight years, and each Government has endeavoured to dispense with it altogether. Is there not in this a strong presumption against it?

The same coalition of interests still exists within the Chambers, and powerful as is the Imperial Government, we should doubt success in the enterprise, were the agriculturists as obstinate and violent in their opinions as formerly. New circumstances have modified the most prejudiced minds, such as the permanent prices of grain in the East of Europe, and more especially the unexpected development in the export of corn to England.

In all that has been spoken and written upon the subject of the cereals, importation is the only side of the question that has been noticed, and producers have thought only of providing against foreign, and particularly Odessa corn. The price of grain at the market of Odessa being 8f and 10f the hectolitre, such fears seemed justifiable, and, in event of the ports remaining open, it was imagined the home markets would be inundated, and reduced to the same level. That the Russian supplies would be limited on these terms, did not enter into the computation; that increased demand would cause an infallible rise in prices at the places of production; that the expenses of transport would advance with the quantities; that in barbarous countries the extension of cultivation would be slow from the difficulties of obtaining labour and the expenses of capital. Imagination effaced distances, obstacles of culture, of transport, and conceived no barrier sufficient to serve as a rampart against an invasion imminent and formidable.

Since 1840, these fears have been gradually dissipated, for the reform of the Corn Laws in England having opened an immense outlet, the prices have equalled our own, rising from 10f to 20f, and even higher. See, for example:—

	France.		Odessa.		Difference.	
	f	c	f	c	f	c
1856	30	75	22	58	8	17
1857	24	37	19	53	4	84
1858	16	75	14	78	1	97
1859	16	74	14	50	2	24
1860	20	41	17	25	3	16

We ought to add to the price of Odessa 3f for carriage, and 2f for difference in quality; and then we shall find that in the years of dearness, 1856 and 1857, the Odessa corn delivered at Marseilles nearly reached the French in price; and that in the years of moderate prices, as 1858 and 1859, the Odessa corn rose higher; consequently French prices ought to exceed 25f in order that there should be sufficient profit to bring an abundance from Odessa; and in such case the supply is requisite for our deficient production.

Experience has brought to light a not less important fact, that even when corn exceeds 30f the hectolitre in France, as in 1856, only limited quantities arrive from Odessa. In 1856 commerce was secured against a sudden return to former imposts, the sliding scale being suppressed for three years; and in spite of our efforts to gather corn from all sides, but nine million of hectolitres of all grain entered, and when in 1858 and 1859 the prices fell, but two millions; a provision just sufficient for the city of Marseilles, where prices regularly exceeded those of the interior.

Thus a minimum of two million hectolitres in the time of low rates, and a maximum of nine millions in the time of extreme dearness; such are the limits of importation which the results of six years' unrestricted trade have shown.

At the same time that the imaginary phantom of importation is dissipated, a very effective exportation is demonstrated.

We cannot estimate at less than 300 million francs value the excess of exports over imports during the last three years, being an addition of 100 millions yearly to the resources of our producers. This new phase of the question arising during the discussion has caused the most decided partisans of restriction to reflect seriously.

The agriculture of France can be divided into two parts, the North producing more, and the South less, than its consumption. The transport from North to South entails expenses advantageous to neither parties; but the surplus of the former finds an outlet in 8 to 10 million quintals from the ocean ports, and the deficiency of the latter is supplied by 2 million quintals from the Mediterranean, and this is the natural movement of a free commerce. To put the question thus—Is not this its solution?

All things announce that the new measure will not encounter, even independently of political pressure, the opposition which would formerly have awaited it in the Chambers. There are times when questions arrive at maturity under all forms of government, and Sir Robert Peel could pass the abolition of the Corn Laws, although that question presented the reverse aspect, as the English had an insufficient agricultural production, owing to their numerous industrial population.

We have but one objection to offer, and that is, since the Government comprehends the question so well, it should resign for ever all rights of prohibition, or at least define the circumstances of urgency upon which those rights can be enforced. No worse condition exists for commerce than uncertainty, of which greater proofs were never manifested than during the present year.....

More than one hundred years have elapsed since the first French economists desired this liberty. The spirits of Quesnay and Turgot must be stirred even in their tombs. What obstacles has not this grand enterprise encountered since the famous

guerre des farines of 1775. Then came the absurd laws of the revolution and the Empire, followed by the boasted, but now shivered mechanism of the sliding scale, and we, in our day, are about to behold the triumph of truth.

Agriculture.

AGRICULTURAL PROSPECTS.

The beginning of May is a period when the farmer may fairly look around him, take stock of his actual belongings, and make something like a reasonable estimate of his probable fortunes for the current year. Adopting that course, let us see what is the present position and what are the prospects of the farmer? The season is a very backward one, but the fine dry weather of April has permitted the sowing of barley and oats in very good order, and the result is that both those crops have sprung up rapidly and are growing with remarkable vigour. Beans and peas also have planted well, and though a good deal of the land will require much cleaning, there is, at least, a fair expectation of good pulse crops. A continuance of dry weather will enable the farmers to attack the weeds, which last year were of necessity left almost untouched. So far all looks hopeful. Next comes the preparation for and the sowing of root crops, and this work is not so forward as could be wished. After the wet autumn and severe winter, the strong lands were found to have become so solid that, even where they had been well ploughed in the autumn, it was necessary to cross plough them this spring. The scarifier made comparatively little impression. This treatment rendered the fallows hard and steely, so that much rolling and harrowing have been required to produce the tilth necessary for roots. Mangold, however, has been generally sown, or will be completed in the course of the current week, and for the most part it has been well done. With some moderate showers in May we may hope for a good crop of this important root in the present year. The live stock has sadly missed it this spring. For swede and other turnips the land will generally be well prepared, the recent dry weather having ensured that result. By the latter end of May or the beginning of June, turnips will be easily sown in good season. Perhaps the worst crop is the wheat. The breadth of autumn-sown wheat is decidedly deficient, and in very numerous instances there has been a great loss of plant. On some good lands we have noticed that fully one-half of the plant has failed, and in the other cases there are numerous defects in the drills which no branching out of the existing plants can fill up. At the same time the plant, though backward, is vigorous, and where the land is in reasonably good condition seems inclined to tiller a good deal. Spring-sown wheat is doing moderately well, but English farmers, rightly as we think, place very little dependence on spring wheat. In reference to this crop, the *Mark Lane Express* in its review of the corn trade says:—"But no weather can replace the loss of wheat plants, or make those that are very weak productive; and the fact remains that less than an average breadth is sown of the most important grain." And in the general agricultural report for April of the same journal, it is asked, "What better or more paying crop than wheat can now be grown in this country, notwithstanding that there is every prospect of immense importations from the Continent or elsewhere?" Now no doubt the answer must be that there is every prospect that the farmer who obtains a good wheat crop this year will find it a very profitable one, but at the present moment he can do but little towards the production of so desirable a result. Hoeing, and top-dressing where needed, will be all the farmer can do for his wheat crops. What a comment, however, does that passage from the report furnish on the absurd predictions once made as to the injurious effect of free trade in corn on English agriculture! Confessedly the English farmer can hold his own against all competitors, wherever his landlord does not interfere to prevent him, as is too commonly the case.

Grass land is backward, but in spite of cold and frosty nights the grass is growing, and with genial weather would soon show a good promise. Cattle have thriven during the winter, in spite of the inferiority of the hay and straw and the shortness of roots; while the fat cattle brought to market have been in very good condition. Sheep, also, have come to hand in fair condition, though many of them are affected with rot. This disease, however, will be more felt in the breeding flocks. All accounts report a good lambing season, the lambs being both numerous and healthy. On the whole, there is a fair prospect of the farmer recovering during the present year some of the ground he lost during the wretched season of 1860.

GOOD FARMING.

THE HELPS AND HINDRANCES.

The combination of circumstances, the efforts and enterprise which go to make up that complex thing called "good farming," are far greater than persons not practically acquainted with husbandry can believe. There must be a farm in such a condition, as regards drainage, buildings, fences, roads, and freedom from obstructions, as will render fertility possible. There must be a fair bargain between landlord and tenant as regards rent, duration of possession, freedom from vexatious or useless restrictions, and so forth. The tenant must have the command of a sufficient amount of capital to enable him to cultivate the farm to advantage, and he must have such an amount of skill and enterprise, energy and caution, as will enable him to direct the cultivation and to control and regulate the labour of his farm promptly and economically. It is not enough to grow good crops; they must be grown on such terms as to leave a reasonable margin of profit.

At the Hexham (Northumberland) Farmers' Club, Mr William Trotter read a paper on "The Advantages of Good Farming," which we find reported in that useful periodical, the "Farmer's Magazine." He there states with some force many of the points to which we have referred as essential to good farming. He said it had been asserted that good farming consisted of the observance of two rules, *i. e.*, "to make the land rich and keep the weeds down." Now, though those are very good rules for practice when all preliminary conditions have been obtained; but, as regards the position of farms and farmers in this country, "farmers have much more to do in addition to making the land rich and clean, to enable them to farm advantageously."

Good farming must be beneficial to both landlord and tenant, and to that end "the productiveness of the soil must be kept up and partake of that continually progressive improvement of which the soil is capable." This, too, is the state of things most beneficial to the community, both as supplying food and furnishing employment at fair wages for the working class. But labour forms so serious an item in farming, that every invention calculated to save manual labour and facilitate cultivation is welcome to the farmer. Hence the present demand for agricultural machinery. Nor does the use of such machinery depress or injure the labourers in husbandry. On the contrary, it relieves them from much drudgery, and makes them "directors of the machine that does the work," and not themselves the mere machines. This elevates and expands their minds, for wherever machinery is much used on a farm the labourers are found to be more reflective and intelligent than where improved machines are not in use. "The benefit, then, which results from the introduction of machinery, so far as regards pounds, shillings, and pence, does not arise from a reduction of wages, but because machines enable us to get the work done better and cheaper than by hand." But the difficult part of the subject is the question of profit. Good farming to be advantageous must be profitable. "But with increasing rents, increasing wages, increasing taxes, and other increasing demands, whilst the average prices of grain remain nearly stationary, how the tenant is to obtain this profit is easier asked than answered. However, it must be admitted that some few farmers do make money. That they do so in a much slower way, and not to that extent that men do who are engaged in manufacturing and commercial pursuits, or in the professions, is true. But there are as few wrecks amongst farmers as amongst any other class." Here we find inherent difficulties enough in the way of farming profitably. The causes which prevent or promote a farmer's success are said by the lecturer to be numerous. Taking some of his illustrations of the causes which prevent success, it is said, "A soil full to the surface with water cannot be farmed profitably, neither can land adjoining badly-managed woods or plantations. They are nurseries of everything that is obnoxious to good farming. I have seen young plantations in which the thistle reigned triumphant. I have seen its seed drifting over the adjacent fields. The result was seen in after crops.....Again, no farmer can farm profitably in the neighbourhood of game preserves..... A man farming under any of these disadvantages suffers more than mere loss in his crops. However well he may plough, however profusely he may manure, his crops will dwindle away before his eyes. This mortifies him to the very core. He hopes against hope, labours indefatigably, but cannot get ends to meet. Energy, so essential to success, gradually loses her sway, and there he stands in the world—not so much a free man as a serf." Climate, the geological structure of his land, and other natural circumstances of the farm, have commonly great influence on the farmer's prosperity or ill-success; but "the greatest cause is within himself. He must have his wits about him. He must calculate rightly, and avail himself of all the helps which present themselves. Thus certain expenses must be set down as a constant quantity against the farm. Rent and taxes are of this nature. Then the expenses of ploughing, of harrowing, and of sowing are the same, whether we get good or bad crops, whether the farm is in good or bad condition." Indeed, this rather understates the case, for all the operations of culture are more expensive when the crops are bad than when they are good, because bad crops permit the growth of weeds to an extent vastly greater than can occur when the crops are good, and an abundance of weeds adds enormously to the cost of cultivation. The obvious conclusion is, that when the farmer has incurred the cost of rent, rates, taxes, and cultivation, he will be acting most unwisely if he neglects manuring. "It is," says Mr Trotter, "self-evident that if we can, by a judicious application of purchased manures, augment our crops, that we shall be gainers in proportion as the *value of the extra part of the crop exceeds the value of the manure*." Nor is that all. Regard must be had to the character of the soil on which the farmer works. Thus, "to go upon a tenacious, retentive soil, when in a 'pasty'

state, whether to cart off turnips, to plough or harrow, is under many circumstances tantamount to destroying the crops, however liberally the land may have been manured." So true is it that "farmers' incomes and outlays are so nicely balanced, that no waste can be admitted whether of produce or labour." We may add that no opportunity of increasing produce must be omitted. There are other topics well dealt with in this lecture. Thus it is said the use of improved machinery, such as reaping and mowing machines and the like, is retarded because many farmers imagine that more skill is required to manage them than is actually to be found on farms. But this is a mistake, for the best farm labourers soon understand and appreciate the use of machinery.

One point dwelt on is not creditable to the management of the landowners. Farmers hesitate to make yearly what would be a profitable outlay in artificial manures, because "just in proportion as the farm has improved up will go the rent." And there is no doubt that such would be the case if the farmers were to be so rash as to make great improvements where unprotected by leases. To this Mr Trotter says, "I grant this, but we must bear in mind that if we do not succeed with good and energetic management, we cannot hope to do so by an opposite course. We seem to have no control over rents, and to stand still because the landlords get the lion's share of our improvements is not good logic." This is not an answer to the objection, nor can there be any effective answer where the farmer holds his farm as a yearly tenant.

With respect to the size of farms, it is said, "I have not been able to discover that large farms have much advantage over small ones. I admit the tendency is to the increasing of size. I see some evil in this, but it partakes of the general tendency of the age, which is that of collecting wealth into heaps, and of population into dense masses." This is, no doubt, the natural tendency of increasing wealth and prosperity. Large farms are incidents to the general progress, and the advantages enjoyed by the occupier of a large farm—assuming him to have a competent capital for its management—over the occupier of a small one are numerous. He can use more and better machinery, he can combine a greater force of horse and manual labour upon any operation, or he can carry on different operations simultaneously, so as often to succeed in precarious seasons, where the small farmer will fail. Of course more skill is required and more hazard incurred on a large than on a small farm.

Literature.

COMMERCIAL LITERATURE.

THE NORTH ATLANTIC TELEGRAPH, VIA THE FAROE ISLES, ICELAND, AND GREENLAND. London: Edward Stanford.

THIS publication contains the proceedings of the Royal Geographical Society on the subject of the North Atlantic Telegraph, with the reports of the surveying expeditions which have been sent out to examine into the practicability of the project. It appears that this idea first originated with Colonel Shaffner of the United States, who, as early as 1854, actually took steps to realise his views; but the Russian war prevented anything being done at that time. Subsequently public attention was entirely directed to the attempt to establish telegraphic communication by the Atlantic Telegraph Company between Ireland and Newfoundland, to the exclusion of all other efforts. It is thus only within the last year that the Northern route, claimed to be by far the best if not the only one practicable, has been prominently brought forward. Among the distinguished individuals who have reported upon the merits of the scheme and its mode of operation are Colonel Shaffner himself, Sir Leopold McClintock, Dr Rae, Captain Young, and others, who all concur in its feasibility, and in regarding it as a high probability that the line will be kept in good working order and uninjured by ice.

HANDBOOK OF THE CIVIL SERVICE. London: Cassell, Petter, and Galpin.

THIS is a useful guide to persons intending to enter the Civil Service, especially now that the new system of more or less of competitive examination is inaugurated. Candidates will find in these pages not merely the dry names of the subjects in which they are required to pass, but examples of the various examination papers, by which a fair idea can be formed of their general tenour. The present guide contrasts oddly enough with those used not many years back; the latter, while sufficiently comprehensive, affording little more information than the salaries given and the limitations as to age and the like.

PROFIT AND DISCOUNT TABLES. By CHARLES ODY ROOKS. London: William Tegg.

THESE tables resemble the many similar publications of the same description, but in one respect they are especially useful, from the quickness and ease with which any given calculation can be referred to. The work is also in a small and portable shape, and is more particularly adapted for the small trader. Besides profit and discount tables, comparative statements are appended of foreign money, weights and measures, stamp duties, &c.

GENERAL LITERATURE.

EGYPT, THE SOUDAN, AND CENTRAL AFRICA; with Explorations from Khartoum on the White Nile to the Regions of the Equator; being Sketches from Sixteen Years' Travel. By JOHN PETHERICK, F.R.G.S., Her Britannic Majesty's Consul for the Soudan. William Blackwood and Sons, Edinburgh and London. 1861.

THE writer of these travels left England in 1845, to take service under Mehemet Ali as a mining engineer, and two-thirds of the volume are devoted to narrating the incidents of exploring expeditions undertaken by command of the Pacha in search of coal and iron. The early part of the book is heavy and monotonous, and the interest cannot be said to begin till the author reaches Khartoum, and strikes out to the West among the tribes of Kordofan, on his last exploration (for iron), the only one here recorded in which he was successful. Kordofan is the Southernmost province of the Mussulman dominion, and is skirted on the West and South by the purely negro territories; its characteristics are therefore of a mixed order, partaking of the peculiarities of both races. Mr Petherick communicates much curious information about the Kordofanese, who received him with uniform hospitality and good-will. The most valuable part of this section of the book is the historical sketch of the province, which he gleaned from some of the most intelligent inhabitants of Bara, then the residence of the local governor. Of this history there is unfortunately no printed or written record, and its traditions only extend over a limited period. From these it appears that the inhabitants have long been, as now, a mixture of Arabs and negroes, who about the year 1770 were subjugated by Adlân, the King of Sennaar, under whose administration the country prospered. "Agriculture and commerce received encouragement; and the vanquished tribes felt happy in the enjoyment of the protection of a ruler to whom they might fly for security from each other's aggressions." But Ibir Fadl, the Sultan of Darfour, alarmed at the growing power of Sennaar, invaded Kordofan and wrested it from its King. He used his victory, however, with moderation, and although the Kordofanese had fought gallantly for their former Sovereign, they had no cause to regret the change of rulers. The country "now entered upon perhaps the happiest era of its existence." "Commerce, only for a short time suspended with Sennaar, received a fresh impetus in connection with Darfour, which, now in the possession of Kordofan, found a new outlet for its rough produce through the Soudan to Arabia; whilst caravans brought Syrian silks and cotton stuffs from Egypt, and the produce of Arabia, India, and Abyssinia, to the markets of Bara and Il Obeid."

Kordofan remained subservient to Darfour till its invasion and conquest by Mehemet Ali in 1821, a change "which is still a source of deep regret to all those who remember the gentle rule of Darfour." The history of this invasion, and of the atrocities committed, both then and subsequently, by the Defterdar, Mehemet Ali's son-in-law, is a melancholy one. Many of the Kordofanese fled to distant provinces, or to the negro tribes of the South, to escape the intolerable oppression of the Turks. Mr Petherick says, that in justice to Mehemet Ali, "it must be said that he was ignorant of the extent of the sufferings of his distant subjects; and when he became apprised of these, he endeavoured to ameliorate them by the removal of the tyrant Defterdar; but although succeeding governors were less cruel, the people gained but little." At length, "commerce came to their aid by the discovery of a mine of wealth" in the shape of the gum of their plentiful mimosa,—the "gum-arabic" of trade. This enabled them to pay their tax to the Government with ease. At first the Pacha monopolised the sale, but afterwards the trade was thrown open, to the increased benefit of the Kordofanese, of whose present condition Mr Petherick gives, on the whole, a favourable account. One interesting trait we must quote of the present Pacha, of whom several praiseworthy anecdotes are here narrated:—

His Highness Said Pacha, the Egyptian Viceroy, during his visit to the Soudan in 1857, having ordered the abolishment of slavery, and liberated vast numbers from bondage, his army is no longer recruited by slaves, neither are they received by the Government in liquidation of the imposts of his subjects.

At the death of Mehemet Ali, Mr Petherick quitted the service of the Egyptian Government, and established himself in the gum-arabic trade at Il Obeid, the chief town of Kordofan, where he resided for five years. In the year 1853,—when that trade had become no longer remunerative, in consequence of native competition and a greatly increased export from the West coast to the English markets,—our author turned his attention to the far interior, the high-road to which was the White Nile. The last seven chapters of his book are devoted to narrating the salient points of his annual expeditions for elephants' tusks among the wild negro tribes to the South of Khartoum, in the years 1853-58,—and this is by far the most interesting part of the work, being full of hazardous adventures, and abounding in curious information concerning regions hitherto unknown. Taking with him some tons of glass beads, cowry-shells, and other trifles with which

to trade with the negroes,—a picked band of Arabs, carefully instructed in the use of fire-arms, and two Dinka negroes as interpreters,—Mr Petherick sailed up the White Nile as far as the Bahr-il-Gazal, a lake spreading from E. to S.W., overgrown with reeds and interspersed with islets, and fed by many rivers from the North and West. Mr Petherick roughly estimates its dimensions at 180 miles in length, and 60 in width at its widest part. At its junction with this lake, the White Nile makes a great bend to the S.E. Leaving the river, Mr Petherick sailed, with considerable difficulty, through the lake, and disembarked at its S.W. extremity; thence marching due South, he encountered successively the tribes of the Wadj Koing, the Girwi, the Djour, the Dôr, the Ombelambe, the Baer, and the Neam Nam. The varying characters and habits of these different tribes are each described in turn, with a careful hand; and though of course there is much in their manners and dispositions that is barbarous and repulsive, yet, on the whole, these pictures are by no means disheartening. The pertinacious and unprovoked hostility of the Wadj Koing, indeed, was a formidable obstacle at the outset, which was only held in check by Mr Petherick's incomparable courage and diplomatic resource. On the other hand, the generous conduct of the friendly Maween, the chief of the Girwi, would do honour to any Christian ruler; and the quasi-civilisation of the Djour and the Dôr tribes, though harsh and crude in many respects, displays features of manly intelligence, which are especially noteworthy in purely negro communities.

The Djour are strictly agricultural; "they cultivate more ground than is absolutely required for the sustenance of their own families, for the double object of storing grain in anticipation of bad crops, and the exchange of it with their neighbours, the Dinkas, for cattle for food." They are also excellent smiths, their territory containing rich ores of oxide of iron. "After securing their crops, the Djour, in large numbers, proceed in search of iron ore; and by means of small cupolas and charcoal fuel this is reduced on the spot to metal of the finest description." Mr Petherick gives a minute account of the process used, and adds that the proficiency attained by these negro smiths is astonishing, "many lances of their manufacture, which I now possess, having been pronounced good specimens of workmanship for an ordinary English smith." "Almost every Djour is employed in this manufacture."

The Dôr territory, immediately to the South of the Djour, extends from North to South about 350 miles, but the tribe is divided into separate communities, acknowledging no one superior chief, and communicating but little with each other, except in their frequent quarrels about hunting grounds. "The Dôr surpass the Djour in industry—a proof of which existed in their extensive fields and granaries." Their corn stacks (of dourra) are formed with much taste, and raised high above the ground to preserve the grain from vermin and white ants. "Their huts were constructed of a beautiful basket-work of cane. The perpendicular walls were six feet high, and were surmounted with a pretty cupola-shaped reed roof, topped with wood carvings of birds. A wooden bedstead occupied its centre, and an oval-shaped hole, two and a half feet high, barely sufficient to admit a man in a stooping posture, formed the doorway. At night this was barricaded with logs of wood laid horizontally upon each other, between perpendicular posts." "The Dôr perhaps excel the Djour in smithery," as well as in agriculture, and, on the whole, they seem to be the most civilised race with whom Mr Petherick made acquaintance. Both the Dôr and the Djour were uniformly hospitable to the travellers.

Mr Petherick calculates that in his Southernmost expedition he probably reached as far as the Equator. This territory was inhabited by the Neam Nams, a formidable tribe of cannibals, who are regarded by their neighbours with so much fear that Mr Petherick could not prevail on any of the latter to accompany him within reach of them. On arriving within sight of the first Neam Nam village, the porters threw down their loads and decamped, leaving only the interpreter in the grip of two of Mr Petherick's own men. Nothing daunted, however, he went on with his faithful Khartoumers, and in the course of a few hours made good his position (without bloodshed), and when, after a residence of several weeks, he returned Northwards, the chief not only made him promise to come again next ivory season, but, "stating that he should be proud to receive me into his family, offered me his daughter as a bride, whom he would keep for me until my return."

Mr Petherick returned to England, after 16 years' absence, in July, 1859, and thus concludes the record of his travels:—

> After a long sojourn at home, I am again on the point of starting for my African home, where I trust, in conformity with the views of the Royal Geographical Society, and with the kind permission of the Foreign Office, to be enabled to meet Captains Speke and Grant in the regions of the Equator, on their homeward journey from Zanzibar, and by supplying them with boats at Gondocoro, to assist them down the Nile to Khartoum.

From an advertisement prefixed to this volume, we learn that the Geographical Society are endeavouring to raise a public subscription of 2,000*l* to enable this attempt to be carried out. They represent that the Zanzibar expedition, "exhausted of means of barter and wholly ignorant of the negro languages of Northern Africa, will be sure to tempt hostility, and to incur serious danger of want of supplies," by the time they reach the equatorial regions, where Mr Petherick's experience and resources would be especially valuable. Should the necessary funds be obtained in time, he will undertake to reach Gondocoro by next November, so as to secure the ensuing months for exploration before the rainy season (which sets in about March) prevents further movements. No one who reads these travels can doubt Mr Petherick's remarkable qualifications for such an undertaking. The tone of his narrative is uniformly brave, prudent, and humane, and the straightforward simplicity with which he tells his own story is very pleasing. We are disposed to object to the frequent diplomatic ruses and nominal threats with which he encountered the hostility of many of his assailants; but he never used these to injure others, and his conduct throughout seems to have been worthy of an Englishman. One instance of his good faith is particularly noble. When surrounded by the inimical tribe of the Wadj Koing, he waited for his second reconnoitring party at great inconvenience to his trade, and no little risk to his life, when the return of the first party, with offers of help from an adjoining tribe, had made escape easy. We do not wonder that his Khartoumers were faithful to such an employer.

Mr Petherick gives copious and lively descriptions of the native animals and plants which he encountered, several specimens of which he preserved to bring to England. He also gives frequent notices of the geological formation of the regions through which he passed. A few dozen words from three of the negro vocabularies, entirely differing from each other, are given at the end of the volume. A sketch map accompanies the travels, and contains almost all the places named in the text, but the spelling in the map is very often different from that in the letter-press.

FRIENDLY SKETCHES IN AMERICA. By WILLIAM TALLACK. A. W. Bennett, Bishopgate street, without.

THE title of this book might lead us to expect from it a view of American society more than usually rose-coloured; while the medium, on the contrary, through which its writer looks at the world of America is purely and simply drab. "Friendly Sketches" must be transposed into "Sketches of Friends" before we shall understand their real nature.

Mr Tallack's object, we take it, is a genuinely friendly one,—to promote a more intimate knowledge and a more cordial union between the Society of Friends in England and in America. The customary topics of interest to the English traveller in the United States are barely alluded to in his volume, which, on the other hand, contains a full and even minute account of the condition and modern history of American Quakerism. Within its own circles it will, we have no doubt, be appreciated, and read with interest. For external popularity it can scarcely look, yet it deserves a passing notice even from those least interested in sectarian statistics, for the proof it affords of the extent to which liberal opinions have penetrated even into so conservative a body as that of the English Society of Friends,—moderating their exclusive tendencies, and freeing them gradually from the shackles of a decaying and corrupting formalism.

When our author first set foot among American Quakers, he was pleasingly surprised at their adherence to their ancient testimonies. He gladly accepted the width of their hat-brims as a proof of the wideness of their Friendly sympathies,—the spotlessness of their drab coats as an outward and visible sign of their Quaker doctrine. "When I entered the United States," he says, "I was myself partial to the 'peculiar dress' of Friends, and still wore it from feelings of many pleasant old associations, and from a belief also that it possessed some real advantages; and so, when I came to the Western settlements of Friends, and found among them a far more general maintenance of these external peculiarities than is now the case in Great Britain, I was much gratified." This gratification was not, however, of long duration: formalism and spiritual pride had, he found, fortified themselves behind the "consistent" collar and spotless coat; uncharitableness looked out from beneath the broad brim; and our author, from a slightly conservative, became a decidedly progressive Friend,—a republican country curiously enough showing him the disadvantages of a stationary policy.

On the whole, American Friends are not a friendly body; they do not dwell together in unity. At the beginning of this century, a vast split divided them into pretty equal parties. This was upon doctrinal points. Of the 160,000, at which number Mr Tallack estimates the Society at the present day, 80,000 are Unitarian in their views. They are known under the name of Hicksites, and great was the scandal among the Orthodox brethren when our author proposed to visit these seceders, and learn more of their standing ground and their progress. Among the Orthodox themselves a fresh split has arisen on matters of discipline. The larger portion, cleaving to the old ways, and resenting the laxity in dress and manners, and the greater strictness of creed that (chiefly by the influence of Joseph John Gurney) began to get footing among them, entrenched themselves in a more rigorous formality, and breaking communion with their other brethren, are known by the name of Wilburites. The three divisions, "Hicksites," "Wilburites," and "Orthodox," are mutually hostile, although they all agree in the distinctive peculiarities of Quakerism; and have each, according to our author, their own peculiar merits. Charity would, it seems, distinguish he first, consistency the second, and evangelical purity of doctrine

the third. It is with this latter body that his sympathies go most freely, yet he sincerely deplores the existing divisions, and reasons most sensibly and earnestly with his American brethren on the folly and sin of the narrow and uncharitable exclusiveness so prevalent among them. The whole tone of his book is in marked contrast to such a spirit. Its liberality and genial kindness make it pleasant to read. It is evidently the work of an intelligent, well-educated, and sensible man, who has at heart the welfare of the community to which he belongs.

We do not remember to have ever met with the following anecdote of Macaulay. Mr Tallack vouches for its "unquestionable authenticity," since he had it from the lips of "a highly respectable citizen of Philadelphia, Thomas Kimber, Jun., who is a member of the Philadelphia Board of Trade, and managing director of one of the chief railways in Pennslyvania." This gentleman told him that "during a visit he made to England a few years ago, he breakfasted one day with Macaulay, and in the course of conversation remarked, 'We Pennsylvanians do not consider that you have done justice in your history to the Founder of our State.' Although a sincerely attached member of the Society of Friends, Thomas Kimber does not adopt their 'peculiarities of dress and speech,' and therefore Macaulay did not suspect him to be one; and, to show the authority for his allusions, took down from a shelf a volume, with a contemporary attack on Penn, which was quoted from a writer named in it. Thomas Kimber examined the book, and presently found, in another part of it, a statement that the very writer just quoted was not always to be relied on for accuracy. Macaulay was nonplussed on this very unexpected check, and quickly changed the conversation, remarking, 'Well, you know, if Penn hadn't been a Quaker, I shouldn't have said anything about these matters; but he was a Quaker, and I hate the Quakers.'"

Old Bones; or, Notes for Young Naturalists. By the Rev. W. S. Symonds, F.G.S., Rector of Pendock. London: R. Hardwicke, 192 Piccadilly. 1861.

The most fascinating books on Natural History are not always the most systematic, but the beautiful little volume before us is entitled to take rank in both classes. We gather from the Introduction that the author, many years ago, "commenced the study of fossil shells and plants, without the slightest knowledge of the history of the animals that inhabit recent shells, or of the physiology of living plants," and naturally became confused with terms and definitions of which he knew nothing. Desiring to save others from the same perplexity, he here endeavours to explain how they may pursue the study of Natural History with system and method. The work consists of a brief sketch of the Vertebrata, divided into the four classes of mammals, birds, reptiles, and fish, and subdivided into orders, with special notices of the fossil species in each order. The book abounds with interesting details, and is written with an enthusiasm that clothes the "old bones" with fresh life. A geological plate of the several fossil-containing strata, besides numerous excellent illustrations of the principal fossils described in the text, contribute much to the reader's understanding of the subject, and an index for reference is appended at the end of the volume.

It is but fair to add that this book may give some offence to readers who hold by the literal sense of the Mosaic chronology, which the Rector of Pendock distinctly treats as a less authentic testimony to the facts of the pre-historic world than the great Bible in stone which he so much delights to expound. He is a warm admirer of Mr Darwin, to whose books he frequently refers. He holds, however, "that there is an impassable hiatus between the intellectual capacities of the lowest race of men and those of the highest race of apes;" and the tone of his work, though fearless and free, is evidently the reflex of a religious, as well as of a reflective and energetic mind.

History of England for Schools and Families. By A. F. Foster, late Assistant-Commissioner on Education; Author of a "History of Spanish Literature;" a "Latin-English Dictionary;" "Treatise on Geography," &c. With numerous Illustrations. London: Chapman and Hall, 193 Piccadilly. 1861.

The Illustrated History of England. By Thomas and Francis Bullock, Joint Authors of "Popular Education." Manchester: John Heywood, 143 Deansgate. London. Simpkin, Marshall, and Co.; and Houlston and Wright. 1861.

The former of these is an extremely good school history, written in a clear and readable style. It is chiefly founded (as the author states in his preface) on the "Comprehensive History of England," published by Blackie and Son, and devotes considerable space to details concerning the industrial condition, manners, dress, &c., of the English people at different periods. A good map of Saxon England is prefixed to the book, and many woodcuts, illustrative of dress and manners, are interspersed throughout the volume. Genealogical tables of the successive reigning houses are given at the end of the history, and a very full index closes this useful work.

The other History of England on our list is a very inferior production. The facts are told meagerly, the printing is very bad, and the woodcuts are miserable.

The New Reformation and its Principles. Tract No. 1. London: Printed for the New Reformation Society, by George H. Nichols, Earl's court, Leicester square. 1861.

This tract is hopelessly absurd and amusingly naïve. The authors would appear to regard themselves as the only moving force in society, if we judge from the simplicity with which they look forward to seeing all parties fall in with the propositions here set forth. The chief of these is the passing of a "Church Reform Bill," to substitute thirty-nine new Articles for those now existing. These new articles are a strange heterogeneous mass of crudities and truisms, utterly incompetent to influence any living mind, much less to form the nucleus of any great public movement. We regret that a programme of reform which contains so much good feeling should be so completely destitute of common sense.

Garibaldi and Other Poems. By M. E. Braddon. Bosworth and Harrison, 215 Regent street.

We should not think much of Mr Braddon's powers in the poetic line if we were to judge them solely by his most ambitious attempt. "Garibaldi" is not a poem. It is a tolerably flowing and animated metrical version of the newspaper reports, showing some facility at verse-making, and a good deal of creditable enthusiasm, and this is all. In the "other poems," where the writer follows his natural bent towards tales of passion and images of sensuous beauty rather than the rougher themes of battles and revolutions, he succeeds better. An easy and musical flow of language, a certain gracefulness of metaphor, and a warmth of youthful imagination are their chief merits. The writer has considerable command over the external form of poetry, but we can discern in him little trace of its finer and more hidden essence.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

Paris, Thursday.

The *Moniteur* of to-day announces that yesterday the treaty of commerce between France and Belgium, which has been several months under negotiation, was signed at the Ministry of Foreign Affairs in this city. It says, also, that a convention of navigation, a convention for guaranteeing literary, artistic and industrial property, and an additional act to the partial convention of 1857, were likewise signed between the two countries. Of these conventions no details are given; but the treaty of commerce is, no doubt, substantially like that with England, and even if it should contain greater concessions the English will profit by it, as article 19 of their treaty says:—"Each of the two contracting Powers undertakes to allow the other to profit by every favour, privilege, or reduction of import duties which may be accorded to a third Power."

As usual at this season of the year, many of the great companies have held their annual meetings, and I notice the more important of them.

The Credit Foncier, which, by the nature of its operations (the principal of which are to make advances on security of real property, to be reimbursed in annual instalments), is one of the most useful and most solid of the financial institutions of France, enjoys, according to the report presented in the recent meeting of the shareholders, a very high degree of prosperity. Its loans of all kinds made last year were 69,489,445f, which were more than double those of 1859; they were,—48,054,300f in mortgages for long periods, 1,870,000f in ditto for short periods, 387,000f for draining, 19,178,145f to municipalities of towns. The total of advances made in mortgages for long periods from the commencement of the Company up to end of last year was 187,977,930f, of which 16,600,000f have been paid back. The number of real property bonds issued by the Company in the course of last year was 122,420, and the amount of them was 46,718,800f. These, added to those previously issued, made the total at the end of the year 558,376, and the amount 176,384,200f. The advances made by the Company on the deposit of its own bonds was in 1860 11,111,655f, and on other securities 62,656,778f—two items greatly superior to those of the preceding year. The gross profits of 1860 were 12,637,615f 71c, the expenses 8,525,607f 47c, leaving net, 4,112,008f 24c. Of this sum, 749,843f 75c has already been distributed to the shareholders as interest at 5 per cent.; and of the remainder, 672,433f have been set apart to the reserve fund, being the maximum allowed by the statutes; 1,639,721f 49c, to the paying of what is due for the houses occupied by the Company; and the balance, 1,050,000f, to the payment of a dividend of 17f 50c per share. This dividend, added to the

aforesaid interest, makes the total revenue 12 per cent. on the 250f per share, which is all that thus far has been paid up.

The shareholders of the Credit Mobilier Company held their meeting on Tuesday last, and the report on the operations of 1860 was presented by M. Isaac Pereire, the chairman. As usual, this document has excited great interest, not only among the shareholders, but among the public. It begins thus:—"During the last year the general state of affairs has undergone no modification. It has rather been rendered more complicated by grave political events, and prudence requiring us to regulate our operations according to circumstances, we have been obliged to maintain the reserve which was imposed on us as regards the creation of new enterprises. Notwithstanding this reserve, which has been our law for some years past, we are happy to be able to state that a notable amelioration in the situation of our Company has taken place. This amelioration has been obtained by the persevering attention we have paid to the enterprises in the foundation of which we have co-operated or in which our interests are engaged." The report then proceeds to give details respecting the affairs in which the Credit Mobilier is more or less concerned, and which are these:—The Parisian Gas Company; the Real Property Company (*Compagnie Immobilière*) of Paris; the Compagnie Générale Maritime; the Confiance and Paternelle Assurance Companies the Salt Works Company of the South of France; the Southern Railway; the Compagnie des Entrepots et Magasins Généraux de Paris; the Spanish Credit Mobilier; the North of Spain Railways; the Cordova to Seville Railway; the Canalisation of the Ebro Company; the Russian Railways; the Austrian State Railways; certain Swiss Railways. All these affairs are represented to have been more or less prosperous, and all are regarded as very promising. The report proceeds to say:—"We have now to give you an account of the different financial operations during the past year. These operations were confined to the financial movement of the companies for which we act, and to the placing out of a certain number of bonds in France and abroad for railway companies, and more particularly for the Credit Foncier de France, which has issued 75,000 communal bonds, the subscription of which is guaranteed. And now we state what was our financial situation on the 31st December last. The analysis which we give to you presents all the elements of complete security. The capital of which we disposed at the end of 1860, which constituted the liabilities, was as follows:—Capital, 60,000,000f; accounts current, &c., 105,132,573f 28c; reserve, 2,000,000f; and balance of account of profit and loss, 6,342,435f 50c—total, 173,474,948f 78c. This capital was represented in assets as follows:—French *rentes*, 25,399,250f; shares and bonds, 97,905,691f 60c; bills, &c., to be received, 16,342,868f 17c; *reports* (continuation at the Bourse), 7,697,730f 95c; advances to companies, 12,727,921f 2c; the house of the Company and furniture, 1,449,880f 89c; cash in hand or at the bank and dividends to receive, 1,195,160f 15c—total, 173,474,948f 78c. After noticing that the amount of accounts current is much larger than that of the preceding year, the report says:—

"You will have remarked that the investments in *rente* exceeded 25,000,000f. As to the other securities, a certain number were only held by us temporarily, but since the beginning of the year have been realised with advantage.

"But what must interest you most of all is the basis of our estimates—the certainty that our assets represent really the sum for which they are set down in our accounts. Now, in this respect we can tell you that we have not confined ourselves in these estimates to the last quotations of the Bourse on the 31st December last, but that in a spirit of prudence of which you will approve, we have effected very large reductions in different chapters of our inventry, so as to place us out of the reach of all miscalculation.

"In consequence of the reductions effected in our estimates of the 31st December, the account of profit and loss only presents for 1860 a profit of 6,342,435f 50c, thus made up:—

	f.	c.
Interest and profits on investments, after deducting the interest allowed on accounts-current	3,312,245.	62
Increase in the value of our securities since the last inventory	1,911,161	60
Profits on investments of bonds and commission	1,544,220	69
Receipts for the deposit of securities, &c.	77,583	33
Balance for 1859	33,565	54
Total	6,878,776	78
From which must be deducted for general expenses, expenses of management, repairs, taxes, assurances, &c.	536,341	28
Leaving a profit of	6,342,435	50
Out of which there has been distributed a first dividend of 5 per cent. as interest on the capital, making at 25f per share	3,000,000	0
Leaving	3,342,435	50
And from that must be taken 10 per cent. for the directors, according to article 57 of the statutes	334,243	55
There consequently remains disposable a sum of	30,008,191	95
Out of which we propose to you to distribute a new dividend of 25f per share, making	3,000,000	0
And to carry to the year 1861 the balance of	8,191	95"

The report concludes by stating that in future the Directors propose to realise one of the principal measures for which the Company was created, and which they thus describe:—"The consolidation of moveable securities, to be represented by securities bearing fixed interest, and by bonds having for special pledge those same securities, independently of the guarantee offered by the Company." In plain English, "floating securities," as they are called, are to be bought up by means of an issue of Credit Mobilier bonds. This operation, it is said, will not only be beneficial to the Company, but will serve the Government by causing a rise in *rente*.

As usual, the report is very sharply criticised. The estimates of the value of the *rente*, shares, and bonds held by the Company, and of the increase in the value of securities since the investment, are, in particular, considered open to objection. But, nevertheless, the report has been well received on the Bourse, where an advance in Credit Mobilier shares has taken place.

As to other companies, the Northern Railway Company distributes for 1860, 65f 50c on old shares (16f as interest and 49f 50c as dividend), and 40f 25c on the new shares (15f 50c as interest and 24f 75f as dividend). The Eastern Railway Company's report shows that the receipts for the old lines were 45,132,757f 27c; the expenses, 23,607,679f 70c; leaving a balance of 21,525,077f 57c. Of this sum, 610,000f have been set aside for repairs of the lines in the present year, 600,000f for new rolling stock, and 356,172f 39c for completing the reserve fund of 5,000,000f. There remains consequently 19,958,905f 18c, and of this sum 9,956,340f were distributed in November at the rate of 20f per share, and it is intended to make a new distribution of 20f to each of the 500,000 shares, the balance to be carried over to next year. As to the new lines which the Company has undertaken, the expenses of them exceeded by 11,420,191f the receipts. With regard to the Lyons and Mediterranean Company, its receipts were for the old lines 99,272,704f 4c, and including the balance standing over from preceding years 99,337,693f 3c: the expenses were 38,857,642f 25c, leaving a balance of 60,480,050f 78c. But the balance was after payment of interest on bonds and other outgoings reduced to 44,178,679f 4c. This sum is sufficient to make the total revenue per share 63f 50c, and to leave a balance of 173,179f for next year. As to the new lines of this Company, the receipts exceeded the expenses by 8,674,942f.

The Credit Immobilière Company states its profits for 1860 at 1,914,718f, a sum which, after deductions for the reserve, allows 10f per share to be awarded. The shareholders of the Ports of Marseilles and the Journaux-Réunis, two of M. Mires' enterprises, have also held meetings, and both were very stormy. In the meeting of the former it was announced that a profit of about 1,600,000f, arising from a sale, had been made, but that it had not been received, and that no dividend could be given.

The following are the quotations of the Bourse:—

Subjoined is an account of the markets:—

FLOUR.—At *Paris*, yesterday, quotations were firm at 72f to 74f and 75f the sack of 159 kilogrammes. Four marks were 71f and 71f 25c for the current month, 71f 50c for May and June, and 72f for June alone.

WHEAT.—Business at *Paris*, yesterday, was not active. The prices demanded were 38f to 40f 50c, and 41f the sack of 120 kilogrammes. In the provinces, 64 markets present a rise of from 10c to 1f the hectolitre, 36f a fall of from 9c to 1f 15c; 22 are reported firm, 24 without variation, 16 calm. The accounts from most of the agricultural districts say that the crops need rain.

COTTON.—The sales at *Havre*, in the week ending Friday, were 11,285 bales, and the importations 36,390. The closing quotations were 1f higher for very low qualities of all sorts and for low Georgia, all other qualities being unchanged. Low New Orleans was consequently 99f the 50 kilogrammes, and very ordinary ditto, 104f. This week, on account of the news from America, sales have been exceedingly active, and prices have risen; low New Orleans being 101f to 101f 50c.

SUGAR.—At *Havre*, in the week ending Friday, business was active: 1,200 casks French West India disposable, or in the port, went at 49f 50c to 50f duty paid; 778 bales Reunion, 52f 50c; 2,734 bales ditto, 55f 50c to 56f 50c; a lot of Porto Rico for delivery, 48f 50c; 850 casks Havana, 36f 25c in bond; and 3,000 casks French West India to be delivered at Paris, 52f 50c, making 49f 50c to 49f 75c at Havre. The arrivals were not considerable. This week, Reunion, of which the sales have been large, has been at 52f to 52f 62½c; French West India, 49f and

49f 25c. At *Bordeaux*, last week, 182 casks Martinique went at 49f 50c, 70 Guadeloupe, 52f 50c; 653 bales Reunion, 53f 75c; a lot of Porto Rico expected 49f. This week, some French West India has been sold at 49f 50c. At *Nantes*, last week, there were no sales. The arrivals were 28,000 sacks Reunion, 6,642 Mauritius. This week, a small lot of Java has been taken at 60f 25c. At *Marseilles*, last week, numerous sales of French West India were made, but little was done in Havana. This week, however, a quantity of the latter has been sold.

COFFEE.—Business at *Havre*, in the week ending Friday, was not active: 1,120 sacks Hayti Port-au-Prince or Jacmel disposable or in the port, 79f to 79f 50c the 50 kilogs in bond; 200 sacks Miragoane, 79f; 620 Porto Cabello *non-grage*, 86f to 92f; 550 Rio, 72f to 72f 75c; and a lot of Guadeloupe in bond, 135f to 137f 50c duty paid. Some lots of damaged Hayti and Gonaives were also sold by auction. The arrivals were upwards of 6,500 sacks, also a great number of casks. This week Hayti, Jacmel has been at 79f 50c, Guadeloupe *habitant* 136f 25c. At *Nantes*, last week, no sales are recorded, and the arrivals were about 2,000 sacks Singapore and Reunion. This week no sales have been made. At *Bordeaux*, last week, 414 sacks Demerara went at 120f; 672 sacks Java, at 114f to 116f; some lots of Guayra at 85f, and some at 92f; 200 sacks Mysore, 110f; 570 sacks Rio, not washed, 70f. This week, a large lot of Java has been disposed of; prices not mentioned. At *Marseilles*, last week, nothing worth mentioning was done. No sales this week.

INDIGO.—Owing to the arrival of a cargo of Bengal at *Havre* last week, a certain degree of animation was imparted to the market, 57 cases having been sold at 45c to 50c above the new estimates, which have been established on the same basis as those of last year. This week, business has been active: a large lot of Bengal having been taken at 50c to 80c above the estimates, and a smaller lot at prices kept secret. At *Bordeax*, last week, business was rather active: 132 casks Bengal having gone at 1f 90c to 2f 25c premium on the estimates; 12 cases Kurpah and 15 Madras were also sold, prices not stated. This week, some small sales of Bengal and Madras have been made.

HIDES.—At *Havre*, in the week ending Friday, 10,600 Monte Video salted ox, expected, went at 74f to 75f the 50 kilogs; 690 New Orleans, 50f 50c to 51f 50c; 500 Irish cow, 43f; 400 horse, salted La Plata, 90f. A great public auction which occupied two days was very dull, only 6,884 hides, out of 37,818 offered, having been disposed of: Pernambuco (sound) went at 82f to 91f; Martinique salted (sound), 54f to 55f; New Orleans salted (sound), 45f to 47f 50c; Buenos Ayres, 49f 50c to 65f 50c; Valparaiso salted, 50f 50c to 67f 50c; Lima dry, 86f; Odessa salted, 45f to 46f 50c. Various lots of different sorts of damaged were also sold. The arrivals of the week were about 11,000. This week, a quantity of horse, Buenos Ayres salted, has been taken at 90f the 100 kilogs; in other sorts, Rio Grande ox salted has been at 72f, ditto cow, 69f.

WOOL.—At *Havre*, in the week ending Friday, the demand was regular. 91 bales Buenos Ayres and Monte Video, unwashed, 1f 25c to 2f 95c the kilog; 5 bales Mexico, unwashed, 1f 30c; 5 bales Buenos Ayres, unwashed, 1f 5c to 2f 50c; and 2 ditto washed, 2f 15c to 2f 65c. The arrivals exceeded 500 bales. This week, 15 bales German, unwashed, have been taken at 280f the 100 kilogs.

TALLOW.—No sales were made at *Havre* in the week ending Friday; the arrivals were 264 casks. This week, 50 casks New York have been sold at 66f to 68f the 50 kilogs. At Paris, yesterday, the 100 kilogs were 133f 25c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was 103f to 104f the hectolitre; Montpellier of 89 deg., 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c; beetroot, first quality, 104f.

MADRID, April 28.

Negotiations for a treaty of commerce between this country and Russia are now in progress.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, April 16.—The flour market was somewhat more active, but closed at a decline of 5c to 10c per barrel. The sales embraced about 15,000 barrels, within the following range of prices:—Superfine State, 5.10 dols to 5.25 dols; extra State, good to choice, 5.25 dols to 5.40 dols; superfine Western, 5.10 dols to 5.25 dols; common to choice Western extra, 5.30 dols to 7.25 dols; mixed to straight Southern 5.25 dols to 5.65 dols; straight to good extra ditto, 5.70 dols to 7.25 dols; choice extra family and bakers' brands, 7.25 dols to 8 dols; rye flour, 3.30 dols to 4.5 dols; corn meal, Jersey and Brandywine, 2.85 dols to 3.15 dols. Wheat was in less demand, with sales of about 43,000 bushels, at 1.45 dol to 1.60 dol for white, and 1.36 dol to 1.38 dol for red Western, 1.29 dol to 1.32 dol for Milwaukee Club, and 1.26 dol to 1.28 dol for Chicago spring. Corn steady, with sales of 45,000 bushels at 62c for new, and 66c to 68c for old Western mixed, 67c to 68c for Southern yellow, and 72c for white ditto. Rye, barley, and oats are unchanged.

NEW YORK, April 20.—The flour trade is dull, and prices have fallen 5 to 10c per brl. Wheat has moved off heavily, at a decline of 1c per bushel. Corn, however, ruled firm, at full prices. Mixed Western realised 68 to 69c; choice new ditto, 62 to 65c per bushel.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.
